Thirteenth Year, No. 1.

BUILDING AND INDUSTRIAL NEWS

A Weekly Publication Devoted to the Architectural, Building and
Industrial Activities of the Pacific Coast

Successor to:

California Architect.

Industrial News of Alameda Co.

Builder and Contractor.

Western Builder.

THIS WEEK'S ILLUSTRATIONS:

A Modern City Residence For R. H. Keaton
To Be Erected On Carmel Street Near Cole.
Designed By Architect William H. Newman,
San Francisco.

Six Apartment Flats To Be Erected On Filbert
Street Near Laguna Street For The Market
Street Jewelers. Designed By Architect
William H. Newman, San Francisco.

TUESDAY, JANUARY 7, 1913.

SAN FRANCISCO AND OAKLAND,

CALIFORNIA

Contractors Equipment

THAT BRINGS RESULTS

Insley's
Gravity
Distributing
Equipment
Spreader
Carts
and
Harness

Erie Tandem Asphalt Rollers. 3, 5 and 10 ton sizes.

Belt Hoists
—
Electric Hoists
—
Concrete Elevators
—
Wheelbarrows
—
Carts

RUSSELL
Road and Elevating Graders

MUNDY'S Hoisting Engines

All of the above equipment carried in stock in San Francisco by

LANGFORD, BACON & MYERS

INCORPORATED

Salesrooms 215-217-219 Rialto Building

SAN FRANCISCO, CAL.
Telephone Douglas 1380

Building and Industrial News

Devoted to the Architectural, Building, Engineering and Industrial Activities
of the Pacific Coast.

75028

Issued Weekly, \$3.00 per year

San Francisco, JANUARY 7, 1913

Thirtieth Year No. 1

BUILDING & INDUSTRIAL NEWS

Devoted to the Architectural, Engineering, Building and Industrial Activities of the Pacific Coast.

Entered as second-class matter at San Francisco Post Office under act of Congress of March 3, 1879.

ISSUED EVERY TUESDAY

L. A. LARSEN,
Publisher and Proprietor,
SAN FRANCISCO OFFICE
500 Mission Street,
Telephone—Douglas 2372.

STAFF.

CHALMER MUNDAY, Editorial Com-
ment.
W. D. MANVILLE, Architectural News
Department.

Stores and Offices	9
Tapping the Colorado	3-4

Editorial Comment.

December 1912 was a fairly prosperous month for San Francisco. Permits and recorded contracts tabulated from the files of the Daily Pacific Builder show a total of 2,106,233 for the year being an increase of about 900,000 over the same month last year. This total is divided as follows: Brick and concrete \$1,237,671; frame \$555,598; alterations \$312,966. This total does not include city work nor does it include government buildings erected within the city limits. Government work in the Presidio and in the military reservations in and around San Francisco has amounted to more than 6 millions during the past year.

The December total brings the figures for the year up to the sum of more than 26 millions which was divided between the months as follows:

	1912
January	\$1,692,810
February	1,696,232
March	2,146,011
April	3,435,334
May	3,153,910
June	2,058,334
July	2,127,215
August	1,797,408
September	1,886,743
October	1,918,839
November	2,160,045
December	2,106,233
Total for year.....	\$26,179,116

The year's total makes the average for each month to be \$2,181,593. December therefore was about an average month falling under that figure by a very small margin. Compared with other years the month shows more than an average. For the past ten years the month has shown the following figures.

December, 1903	\$ 851,860
December, 1904	1,282,419
December, 1905	911,231
December, 1906	4,140,984
December, 1907	2,116,190
December, 1908	3,223,201
December, 1909	2,357,575
December, 1910	1,169,131
December, 1911	2,128,022
December, 1912	2,106,235

So also the year's work shows a steady growth in the city's development. Totals for twelve months during the same years are as follows:

1903	\$14,984,514
1904	16,916,118
1905	20,111,861
1906	39,254,167
1907	50,496,199
1908	35,128,651
1909	30,411,196
1910	22,873,912
1911	21,431,268
1912	26,179,116
Total for 10 years.....	\$280,787,632

These figures do not include city

work or government buildings, but only private construction. At that it shows that the building business in San Francisco is an important industry. Nearly two hundred and eighty-one millions of dollars have been spent during the last ten years in erecting buildings. And this represents real money expended and is no mere bookkeeping entry. The New Year bids fair to be a prosperous one. It is to be hoped that the figures computed on January 1914 will read a substantial increase over the previous year.

The Smithsonian Institution of Washington is erecting on Mount Wilson in Southern California a tower telescope 60 feet high. The object of this tower is to study the effect of solar radiation. This is the practical side of astronomy. As it is there is little of practical value in the study of astronomy today. The old science begun by the ancient Chaldeans has added little to the practical advance of modern times. Since the theory of the universe advanced by the old philosophers has been changed by Copernicus and Newton demonstrated his theory of the law of gravitation the science of the stars has been little applied to practical affairs.

But solar radiation, the heat of the sun, is the source of all life and energy on the earth. Heat and electricity are now harnessed and made to do the work of man. They together with all organic life depend upon the radiation of the sun. So one day some genius will discover a way of transforming this radiant energy into power for the use of man and then the cloudless deserts will be capitalized into sunshine areas and the barren wastes will be transformed into productive gardens.

The practical use of aeroplanes in warfare is being demonstrated in the Balkan war. Many flights have been made and it will be sometime before the net result of the feats will be obtained.

The first Bulgarian aviator to lose his life in this war was Lieut. Tarractchieff, who was sent out by Gen. Yankoff early in the war to reconnoiter Adrianople. His monoplane went wrong and he crashed to the ground and was killed as the result of his injuries. The Russian aviator, Poppoff, was also killed as a result of his machine catching fire in the air and falling to the ground, and on December 6th Dr. Constantin, the one time assistant of Dr. Doyne, a well known French surgeon, was sent while making a flight. He managed to descend, and the machine alighted safely at the Bulgarian camp with the dead aviator, who has been shot in the breast, still clutching his control wheel. The photograph showed that he had been up to a height of 1000 feet. He had flown over a Turkish fort.

and taken photographs and had evidently been shot in the act. His biplane was riddled with bullets, but this did not seem to affect its flying qualities. Thus once again was demonstrated the necessity of protecting the aviator with armorplate if he is going to engage in active warfare. The only aviator employed by the Turks appears to have been the Frenchman Letort. He made several reconnaissances of two to three hours' duration, and brought valuable information to the Turkish commander. A breakdown to his engine caused him to alight behind the Greek lines and he was captured. The latest cable news is to the effect that on the 19th inst. a Greek aviator, Montoussis, and his passenger dropped many bombs upon the fortified town of Janina, seriously damaging the principal buildings and terrorizing the inhabitants.

The Machinery Hall is the most important building of any exposition. Provisions for its location and construction are the first consideration of the board of management of the fair. The Panama-Pacific Directors have done well to commence its erection early. For this is a mechanical age. The Canal itself owes its construction primarily to mechanical appliances. Machinery has excavated its channel. Machinery has built its locks, its dams, and spillways and machinery will operate it when it is completed. The great ships that plow the seas are the creatures of the machines that propel them and have made their construction possible. Machinery has harnessed the forces of nature and made them do the work of man. Machinery is the means of transportation on land, on sea and in the air. It prints the newspapers. It prepares our food. It ministers our every want. It has been the means of harnessing not only the molecular forces of nature but the still more subtle energy of electricity and light.

Philosophy, and painting and sculpture and the arts were developed to a high degree in previous ages. But the perfection of modern machinery has advanced the world by leaps and bounds. The world has grown to be a small space compared even with the little section of southern Europe known to the ancients. And today the happenings in the remotest corner of the globe are known the world around before the close of day.

The inventor has been at work. The wheel and axle and inclined plane has transformed the world. Buildings are erected as if by magic. Steel and concrete have assumed gigantic proportions in construction. And if the architect of the temple of Diana, which was one of the wonders of the ancient world was to see modern construction his chief wonder would be at the perfection of modern machinery.

Old Archimedes said he would move the world if they would give him a place to put his lever. The modern inventor has used his lever to pry up and advance every branch of industry. The Canal itself, the ships that come through it, the trains that carry the millions of visitors, the automobiles, the aeroplanes, the newspapers, the telegraph, the telephone, in fact, everything that will make up the exposition will depend primarily upon machinery. The Machinery Hall will house the examples of the latest development in all

machines. It will represent the accumulated inventions of the ages. And on these inventions depend primarily the modern advancement of the race.

NATION AND STATE JOIN FORCES.

Co-operation between United States Geological Survey and State of California in Topographical Mapping and Investigation of Water Resources.

One of the strongest evidences of the practical value of the work of the United States Geological Survey is furnished by the fact that many of the States have appropriated money with which to assist in its investigations, under co-operative agreement. The people of the States are desirous of securing the results of the Geological Survey's work at a faster rate than they can be furnished with the appropriations provided thereby by Congress. Instead of using the funds to carry on independent investigations of the same kind, the States apparently realize that it will be better for them to make use of the equipment and qualified corps that the Geological Survey has accumulated and established for such work. In every State in which co-operation has been maintained the saving in expenditure and the results accomplished have been so great that the desirability and practicability of the arrangement have been proved beyond question.

Among the States which have in largest degree availed themselves of these co-operative opportunities in California. Under a general act the State has made a continuing appropriation, which provides \$15,000 annually for topographic mapping and \$9,000 annually for the investigation of stream flow and underground water resources. This work is carried on in connection with the regular Geological Survey work under co-operative agreement between the Survey and the State engineer.

Additional Contributions by California

The California Conservation Commission, authorized by an act of the legislature to make an investigation of the natural resources of the State, found that it required information concerning the water resources at the earliest possible date and therefore entered into an agreement with the Geological Survey, by which the Survey undertook special investigations of stream flow and water power under an allotment of \$12,500.

The State Board of Control (Water Powers), authorized by an act of the legislature to make a special study of the available water powers of the State and to recommend legislation for their control, likewise entered into a co-operative agreement with the Geological Survey to compile a complete digest of all available data concerning the flow of streams in the State of California and made an allotment for that investigation of \$4,000.

Inventory of Water Resources.

The results of the work thus undertaken are being published by the Geological Survey in six volumes designated Water-Supply Papers 295 to 300, inclusive. Nos. 295, 296, and 297 are hydrographic gazetteers containing information concerning all streams,

lakes, ponds, and other bodies of water within the State. Nos. 298, 299, and 300 contain the results of all stream-flow measurements that have been made within the State.

The State Board of Control (Water Powers), finding itself in need of accurate information concerning the fall of the principal rivers of the State, made a further allotment to the Geological Survey for special profile surveys of the Pit, Middle Fork of Feather three forks of the American, the Tuolumne, and the San Joaquin rivers, allotting therefor the sum of \$10,600.

The California State Water Commission, which succeeded the Board of Control (Water Powers), has recently entered into an agreement for the further pursuit of stream flow investigations under an allotment of \$2,500.

Involves Values of Millions of Dollars.

All this work above described, together with that which has been carried on in previous years under co-operative agreement between the Survey and the State engineer, will make available to the people of California practically complete information concerning the water resources of the State, the actual value of which has already been demonstrated to be many millions of dollars and the future value of which will overrun all estimates that may at the present time be considered reasonable.

The California legislature meets for organization today. There has been a movement on foot for a non-partisan caucus of the members of each house in regard to its organization. And there is a great deal of sense in the suggestion. The only real dividing line between the members of the incoming Legislature is that which separates the servants of the People from the servants of the Privilege. And no mere party considerations should prevent the progressives from getting together and enacting measures for the benefit of all the people.

The people of the state generally care little whether a legislator calls himself a Progressive, a Republican, or a Democrat. What they are concerned with is what he does. So that if beneficent measures are enacted and provisions made so that the average man gets a better chance the legislator who works for such measures will have served his district and his state well.

Party government is necessary in a big country like ours. But party prejudice and party fealty has ever been the means by which the buccannery of business and of politics have despoiled the people. People follow and vote the ticket that bears the name of their ancestors political faith long after it has lost every vestige of principle that gave it birth. And the fight for the leaders who have forced themselves into the leadership of the party councils when the very leaders are the ones who are deluding and dragging the principles of the party in the dust.

The last legislature of California accomplished much, more than any other in the history of the country.

The task of the present legislature is to perfect and amend that work. In many respects it has a harder task. But we still have the same Governor and we have every reason to believe that the present body will continue the good work so auspiciously begun.

TAPPING THE COLORADO.

Remarkable Work of Reclamation in the Yuma Valley Rendered Possible by Concrete.

By Charlton Lawrence Edholm.

One of the oldest stories told about Arizona—to the effect that an enthusiastic resident was explaining to a skeptical tenderfoot: "All this country needs is water and good society," to which the Eastern man scornfully replied: "That's all that is lacking in hell!"—has been recorded in all the "funny columns" of the rural press. The fact is there are several bucketfuls of water in Arizona, and then some; but the trouble heretofore has been that it was not properly applied. And regarding the good society, that is outside the scope of this article; but I may say in passing that while there are not enough people in the Territory to make a full grown city, yet among them are some of the best people on earth.

However, it is not a society column but a little account of an irrigation project that I am writing, a brief description of several remarkable feats performed by the United States Reclamation Service, which has run a dam about a mile in length across the Colorado River, with nothing but the unplumbed bed of silt for a foundation, and a granite wall at each end to anchor it, diverting sufficient water to irrigate 130,000 acres of desert and bottom land, and—perhaps the most spectacular performance of all—causing what amounts to a fair-sized river to flow one hundred feet below the bed of the Colorado from California, in order that the desert land about Yuma may be rendered fruitful.

The Laguna Dam is fourteen miles above Yuma, and extends across the broad, muddy Colorado, which here reminds one very strongly of the Mississippi near St. Louis. It is the only dam of its kind in the United States, although this style of dam is not an experiment, having been successfully tried out in India and Egypt. Three such dams are in use on the Nile. The type is known as the "Indian weir." A rather broad, flat, and not at all imposing structure, but one which does the work.

To quote the technical description given out by Mr. Francis L. Sewell, Project Engineer, the Laguna Dam is:

"Composed of loose rock filled between parallel walls of concrete which well down into the river. These concrete walls extend the entire length of the structure from the granite abutments in California to those in Arizona; and the upper wall is founded on sheet piling. The down-stream face of the weir, which has a slope of one foot in twelve feet, is paved with concrete 18 inches thick; below the down-stream wall is a substantial apron of derrick stone so placed as to protect the structure from flood erosion. The dam is over 4,700 feet in length, and about 240 feet in width, and of sufficient height to raise the water level of the river above about ten feet.

"One of the most difficult problems connected with irrigation from the Col-

orado is the removal of the silt before it can enter the canals, thereby clogging them and causing very considerable expense for canal cleaning. Failure to provide proper structures for removing the bulk of the silt before allowing the water to enter the canals, has caused the failure of many privately owned canal companies. This very important function will be performed by the head-works at Laguna Dam, in a most admirable manner.

"The dam will, by backing up the river flow for about ten miles, create a lake through which the passage of the water will be slow as compared with the normal current of the stream above. Thus considerable silt deposition can occur before the head-works are reached.

"The main irrigation canals which will leave from either end of the dam will not take their supply immediately from the river, but from sluiceways which will leave the main stream several hundred feet above the weir, bringing water to the canal head at a velocity of about one foot per second, which will result in still further silt deposits before the canals are reached. Observation has shown that in a flowing stream of water the greater volume of sediment is near the bottom; so it is desirable to take a canal supply from as near the surface as possible. At Laguna Dam, while there may be a depth of twelve to fifteen feet of water in the sluiceways, the regulators controlling the canal supply is so arranged that the irrigating water shall all come from the top fifteen inches of the sluiceway prisms. The down-stream ends of the sluiceways are closed by immense sluice gates, which will be opened periodically and the sluiceway deposits washed back into the river below the dam.

It will be seen from the above that the supply for the Yuma canal is clarified first by its slow progress through the lake above the dam; it is further clarified by its still slower progress through the sluiceways; and then the top only of this sluiceway supply is allowed to enter the canals. This long process of sedimentation, while it removes a large amount of earthy matter from the water, does not affect its action as a fertilizing agent, which is one of the most valuable functions of the Colorado water.

"The main cause of the project will have its head in the westerly abutment of the dam, and for the first 7,000 feet where it passes through the sand hills toward the south, will have a bottom the width of about 45 feet. Below the limits of the sand hills, the bottom width is increased to about 75 feet which dimension continues through the Indian Reservation until the Colorado River is reached. The stream will be crossed by an inverted siphon of concrete steel 14 feet in internal diameter, placed well below the river bottom. Below the siphon, the Yuma val-

ley will be served by two main canals—one near the river on the west, and the other following the foot of the mesa land on the east. The easterly canal will carry the water for the mesa, which will be pumped to the higher lands at the most favorable point. Power for a portion of this pumping can be developed along the line of the main canal in the Reservation; and the first installation will create about 1,000 net horse-power, which will provide for 30 per cent of the mesa land. Radiating from these main canals, the systems of laterals and sub-laterals will cover the entire irrigable area in a most comprehensive manner."

Not the least interesting feature of the Laguna Dam is the huge system of steel gates operating between massive concrete supports 40 feet high. These gates of the Storey type, which are built of steel plates, are riveted in a form which somewhat resembles a box divided into twelve compartments. They are each 33 feet long by 18 feet high, and are operated by a system of counterweights so delicately balanced that they can be controlled by hand until the power house is finished and the gas engine and generator are installed for their permanent operation.

A unique idea which originated with the Reclamation Service is the use of a fourth, or auxiliary, gate, which is hung behind the others and suspended on a heavy truck so that it can be shifted to position behind any one of them. This auxiliary is assigned for use while any of the regular gates are out of commission for repairs.

Returning to Yuma from the Laguna Dam, the railroad runs along the levee built by the Reclamation Service on the California side to protect the bottom lands; and here one can see the work of clearing the land in actual progress. Part of it is overgrown with cottonwoods, willows and mesquite; while some tracts are merely covered with brush, which can be cleared by the use of heavy railroad iron dragged broadside across the ground by a team at each end. The neat and trim cabins of the new settlers can be side by side with the primitive shelters of the Indians composed of bought and brush eked out with bits of boards from cracker boxes or packing cases.

On the river side of the levee, much of the brush has been utilized for building abatis work as a protection against the Colorado in times of flood.

At the bridge above the Colorado, we were obliged to leave the special, as it is not allowed to use the main line of the Southern Pacific Railroad; and here, within a few hundred feet of the tracks, is one shaft of the large siphon designed to carry the water diverted from the Laguna Dam underneath the river to Arizona. The concrete shaft, or caisson, stood like a tower, its top 20 feet or so above the ground, and its cutting edge far below the surface. Its depth was more than

90 feet at the time of the writer's visit, in May, and, when completed, it will have a depth of 150 feet. The inside diameter of this caisson is 11 feet; and it corresponds in dimensions with the caisson on the Arizona side, except that the latter will be two feet lower at the top. The two shafts will be connected by a tunnel about 1,000 feet in length and 14 feet in diameter, running 100 feet below the lowest sounding of the Colorado at that point. The tunnel will be lined with concrete; and the water rushing down the shaft on the California side, through the tunnel under the river, and up the shaft on the Arizona side, will have a velocity of eight feet per second, a mighty torrent which will irrigate more than 55,000 acres.

The work of sinking the caisson is an interesting problem which is being solved with gratifying success. As the caisson on the California side was approached, a number of Yuma Indians could be seen working in the shade of an awning that was stretched above it. They were operating the air-pump which supplied the diver, then working in ninety-three feet of water. As I ascended to the top of the big concrete structure, and sat on the edge looking down into the yellow water, suddenly a big round head bobbed up, and the clumsy body attached to it was hauled to a temporary platform by the diver's assistants. As he rested his elbows on the platform the helpers unscrewed the big helmet and laid it aside, giving the diver a chance to rest from its weight. He had just finished drilling a hole beneath the steel cutting edge of the caisson, and had come to the surface for the charge of dynamite, which was handed to him, a long, yellow roll attached to the firing wire. Then he was once more encased in his helmet, and, at a signal, lowered rapidly out of sight, to reappear after another interval.

As I waited there, the firing wire was connected, an electrician was given the signal to throw on the switch, and instantly the huge mass of concrete, weighing 1,600 tons seemed to rise under me with a jolt. In reality it had dropped a trifle; and with every shot and every bucketful of crushed rock removed, the caisson is driven inch by inch into the ground, forced downward by its own weight.

On the Arizona side of the river, I was able to watch the steady clock-like sinking of the big shell, by means of an apparatus for registering its descent. A measuring rod is placed on top of the siphon, with feet and inches marked on it. The lower end of the rod rests on the concrete, and it slides in a groove. As the rock and gravel is dredged from the bottom by the clamshell bucket, one can see the rock settling very slowly and steadily as the huge mass of concrete forces its way downward. The cutting edge is beveled so that the rock is forced in; a core is crushed out by using a pile driver, equipped with teeth, and, as the core is scumpled, the beveled cutting edge embraces the gravel to the center. Where the formation is too hard for this method, a diver is sent down to drill a hole and charge it with dynamite. When the siphon sinks about 3½ feet, the steel ring, or form, is

filled to the top with concrete, which is allowed to harden. Then the form is unclamped, loosening the concrete from the steel and allowing it to settle as before.

As in many other Western engineering projects, the work at Yuma has brought out some new ideas, for, when one is far from all supplies, a remarkable resourcefulness is developed and a man often makes his tools to work with. An example of this is the improvement on the clamshell bucket, invented by Project Engineer Sellow. When it was found too expensive to keep the water pumped from the bottom of the shaft so that pick and shovel work could be done, it was decided to allow the water to remain and excavate with clamshell buckets. But, as much time would be required to secure new ones from the East, a couple of abandoned "clamshells" were rescued from the scrap pile at Laguna Dam and repaired to fit them for service. It was found, however, that the ordinary bucket of that type made little impression on the particular rock formation encountered, until, at Mr. Sellow's direction, they were furnished with three pairs of long steel teeth, which bit into the rock and did the work.

Another idea developed on this project is that of equipping a pile-driver weight with steel spikes. This is allowed to fall from a great height, and does good work in breaking and crushing the rock at the bottom of the shaft.

Irrigation has already commenced on the Yuma project, the Indian Reservation in California now being served by gravity canals, while a pump and a scoop wheel serve to irrigate 10,000 acres of the Yuman Valley. When completed the work at Yuma will serve to irrigate the following areas:

	Acres
Yuma Indian Reservation, Cal.	16,150
Lower Yuma valley, Ariz.	55,242
Gila valley near Laguna Dam.	8,000
Mesa land	10,000
Total	119,392

When the 11,000 acres in the lower Gila valley are added, a grand total of about 130,000 acres will be reached.

There is no doubt as to the wonderful fertility of the land to be reclaimed. Alfalfa is one of the standard crops, a yield of 500 pounds per acre being well within the average. Barley and wheat are harvested in March or April; and during the same season, corn pumpkins, or melons may be grown in the same field. In fact any garden vegetable can be raised with remarkable success in this desert soil when it is supplied with water. Olives, oranges, lemons, grape fruit, the pomegranate, the date and the fig are all products of this American Egypt, and the culture of cotton promises to be one of the great industries of the valley. Experiments with long-fibred Egyptian cotton are successful; and, as its market price is about twice that of the short-fibred cotton, it is claimed on good authority that \$100 per acre can be counted on as the gross returns of the cotton culture.

These are just a few items called at random which give an idea of the reason why the United States Govern-

ment is expending so much money and labor on the reclamation of the Yuma valley. With great pride the people of that district quote Theodore Roosevelt's message to Congress in which he speaks of the lands of the lower Colorado in these words:

"A most conservative estimate, after full development, must place the gross products from this land at not less than \$700 per acre per year, every ten acres of which will support a family when under intense cultivation. Much of the land will be worth from \$500 to \$1,500 per acre to individual owners."

This is the land which has been termed "The Country God forgot." In reading over a statement compiled by the Reclamation Service, I found among the dry facts and figures the "pat" answer to this proverbial phrase: "Not the country God forgot; merely the country which man overlooked."

FOREIGN TRADE OF THE UNITED STATES IN 1912.

The foreign trade of the United States in 1912 will show a higher record in both imports and exports than in any previous year. Eleven months' figures just compiled by the Statistical Division of the Bureau of Foreign and Domestic Commerce indicate that the imports of the year will approximate 1,800 million dollars, against 1,563 million in the former high record year for imports, 1910, and that the exports will approximate 2,400 million dollars against 2,093 million in the former high record year for exports, 1911. The calendar year will break all records in the value of both imports and exports. In one feature, however, that of excess of exports over imports, the record of the year will fall below that of certain earlier years. The excess of exports in 1912 will apparently be about 600 million dollars, while 1908 showed an excess of exports of 636 million and 1900 an excess of exports of 619 million dollars.

The exact figures of the 11 months for which the record has been established are, for imports, \$1,664,300,000, against \$1,426,200,000 in 1910 and \$1,392,600,000 in 1911. The value of the merchandise which entered free of duty in the 11 months of 1912 was \$902,000,000, against \$694,332,000 in 1910 and \$714,490,000 in the corresponding period of 1911. The amount which paid duty in the 11 months of 1912 was \$761,900,000, against \$731,862,000 in the corresponding months of 1910 and \$677,194,000 in the same months of 1911. For the single month of November, 1912, the total imports were \$153,000,000, of which \$89,600,000 entered free of duty and \$63,400,000 paid duties, the share of the imports which entered free of duty being, in November, 58.6 per cent, and in the 11 months, 51.2 per cent. On the export side of the 11 months' figures of 1912 are \$2,118,000,000, and for the single month of November, \$277,900,000, suggesting that if December trade equals that of November, the total imports of the year will be about \$1,800,000,000, against \$1,562,000,000 in 1910 and \$1,523,000,000 in 1911; and the exports about \$2,400,000,000 in 1912, against \$1,866,000,000 in 1910 and \$2,092,000,000 in 1911, the first year in which the

exports had crossed the two billion dollar line.

The increase in imports occurred especially in manufacturers' raw materials which, for the 10 months for which detailed figures are now available, amounted to \$523,873,088, against \$421,502,273 in the same months of last year, an increase of over \$100,000,000, or about 25 per cent in this class alone. Articles partly manufactured for further use in manufacturing show a gain of imports of about \$21,500,000 in the 10 months for which figures are available; manufactures ready for consumption a gain of about \$40,000,000, and foodstuffs, a gain of \$80,000,000. The increase of \$100,000,000 in manufacturers' raw materials occurred especially in hides and skins, which show a gain of \$33,000,000; rubber, about \$20,000,000; wool, over \$15,000,000, and fibers, \$10,000,000. In foodstuffs imports of coffee in the 10 months showed an increase of \$31,000,000, and sugar, \$23,000,000.

On the export side the increases occurred chiefly in cotton, wheat and manufactures, while foodstuffs other than wheat show a further decline. Cotton exports made their highest record in November, amounting to over \$109,000,000 for the single month and bringing the total for 11 months up to \$531,000,000 and indicating for the full year a total considerably above \$600,000,000, against \$440,000,000 in the same months of 1911 and \$428,000,000 in the corresponding months of 1910, the former high record year in the value of cotton exported. The quantity of cotton exported makes a new high record in 1912, the total for the 11 months being 4,849 million, against 4,460 million in the full 12 months of the former high record year, 1911. Wheat exports for the year will probably amount to about 100,000,000 bushels, including stated in terms of wheat, exceeding by about 20,000,000 bushels the record of last year, but being less than half that of 1901. In meats and food animals exported the record of the year will be low. The number of cattle exported in the 11 months ended in with November was but 44,997, against 152,288 in the same months of last year; and of fresh beef the quantity exported in the 11 months was eight and one-third million pounds against 27 million pounds in the corresponding months of last year. Manufactures ready for consumption show an increase of 76 million dollars and those for further use in manufacturing an increase of 53 million in the 10 months ended with October, suggesting that the total increase of the full year in all classes of manufactures will amount to about 150 million dollars and bring the total of manufactures exported considerably above the billion dollar line.

The increase in both imports and exports was apparent in the trade with all parts of the world. Exports to Europe show in the 10 months for which detailed statistics are available a gain from 1,015 million dollars in 1911 to 1,103 million in 1912; those to North America, from 299 million to 473 million; to South America, from 98 million to 114 million; to Asia, from 76½ million to 96 million; to Oceania, from 57 million to 61 million; and to Africa, from 20 million to 22 million dollars.

Pictures describing news on special classes of buildings such as Banks, Churches, Schools, Hotels, etc., will find such items all classified and grouped under proper headings, commencing on this page. These same items are again repeated under "LOCALITIES" in the last part of our news department.

APARTMENT HOUSES.

SAN FRANCISCO—Apartment houses, 2, 2 story and base, frame, \$10,000 each. Architect, none. Owner, John Dempulak, 1684 Washington St., S. F. Each of the buildings will have a street frontage of 23 feet and a depth of 33 feet. Interiors will be arranged for four-room suites with private baths and wall beds, central heating system will be installed. Interior finish will be of pine throughout. Some hardwood floors will be used. Bath rooms will have cement floors and tile wainscot. The exteriors will be covered with rustic and cement plaster on metal lath. Plans are complete and in the hands of the owner who will do the work by Day Labor.

SAN FRANCISCO—Apartment house, 3 story and base, frame, \$45,000. Architects, Falch & Knoll, Hearst Bldg., S. F. Owner's name withheld. This building will be erected on Russian Hill, a section of the city but recently attracting this type of building. Preliminary plans show a structure arranged for 32 suites of the two and three room type. There will be connecting baths, wall beds, elevator service and a central heating system. Interiors will be handsomely finished throughout with pine, redwood, some hardwoods and ornamental plaster. The exterior of the building will be covered with cement plaster on metal lath. Working drawings will not be completed for about thirty days.

SAN FRANCISCO—Apartment house, 3 story and base, frame. Cost not stated. Architects, Welsh & Carey, Western Metropolis Bank Bldg., S. F. Owner, A. Rosa. The building will be erected at the corner of 28th and Church streets, and is to contain stores on the first floor and 12 two and three room suites on the upper floors. Interiors will be finished in pine, redwood and elm with some oak floors. A central heating system will be installed. All apartments will have connecting baths and wall beds. The exterior of the building will be covered with cement plaster on metal lath. Plans are being prepared and will shortly be out for figures.

SAN FRANCISCO—Apartment house, 1 story and base, brick and steel, \$45,000. Architect, C. S. McNally, Mechanics' Institute Bldg., S. F. Owner's name withheld. The building will be erected on Sutter street and will have a street frontage of 40½ feet and a depth of 90 feet. There will be a total of 19 suites besides the entrance, lobby and reception rooms. Apartments will consist of two and three rooms each with bath and wall beds. There will be steam heat, hot and cold water, a vacuum cleaning system and elevator service. Interior will be finished in pine and elm. Baths will have cement floors and tile wainscot. Ornamental plaster and imported tapestries will be used in the reception room and lobby. Considerable marble and tile are specified. The exterior of the building will be faced with pressed

brick and cement plaster. Plans are complete and figures are being taken.

RICHMOND, CONTRA COSTA CO., CAL. Apartment house, 2 story and base, frame, \$10,000. Architect, none. Owner, G. L. Messerle, Richmond. The building will contain four apartments of three rooms and bath. Interior finish will be of pine and redwood throughout. There will be open fire places or gas grates. Mantels will be of tile. Bath rooms will be finished in tile and cement. The exterior of the building will be covered with rustic. Plans are complete and in the hands of the owner who is now taking figures on the various parts of the work.

LOS ANGELES, CAL.—Apartment house, 1 story and base, brick and steel. Cost not stated. Architect, F. M. Tyler, Hibernian Bldg., L. A. Owners, Mrs. Frances Zahn and A. W. Ross. The house has been designed to contain 102 rooms, which will be arranged in suites of two and three rooms each. There will be private baths, wall beds, a vacuum cleaning system, two elevators and steam heat. Interior finish will be of pine, mahogany and oak. Entrance will be finished in tile and marble. Bath rooms will have cement floors and tile wainscot. Some metal window sash will be used. The exterior of the building will be faced with glazed white brick and terra cotta. Plans are complete and figures are being taken.

SAN FRANCISCO—Apartment house, 3 story and base, frame, \$20,000. Architect, H. C. Smith, Humboldt Bank Bldg., S. F. Owner, Mrs. A. L. Brownlee. The building will be erected on Jones street near Washington, and has been arranged for 24 apartments of two and three rooms each, with bath and wall beds. Interior finish will be of pine, redwood and elm. There will be a central heating system and a vacuum cleaning plant. Baths will have cement floors. The exterior of the building will be covered with cement plaster on metal lath. Plans are complete and figures will be taken at once.

OAKLAND, CAL.—Apartment house, 3 story and base, frame, \$10,000. Architect, Al. J. Mazurette, 1522 Broadway, Oakland. Owner, Roger Coit. The building has been designed to contain 13 modern apartments of three and four rooms each. All suits will have private baths, wall beds and separate entrances. Interior finish will be of pine, redwood and hardwood. There will be steam heat. Bath rooms will be finished in tile. A vacuum cleaning system will be installed. The exterior of the building will be covered with cement plaster and veneer stone. Plans are complete and the work will be done by Day Labor.

PORTLAND, ORE.—Apartment house, 3 story and base, reinforced concrete, \$30,000. Architect, none. Owners, Butterworth-Stephenson Co., Portland. The building will cover an area of 7474 feet, and will be designed to contain 16 apartments of three rooms and bath each. The first floor will contain the entrance, lobby, office and three large store rooms. There will be steam

heat and elevator service. Interior finish will be of pine with some hardwood veneer. The bath rooms will have cement floors and tile wainscot. The exterior of the building will be faced with cement plaster. Wall beds will be used throughout. Plans are being prepared.

PORTLAND, ORE.—Apartment house and stores, 2 story and base, reinforced concrete. Cost not stated. Architect, Fred S. Allerton, Portland. Owner's name withheld. The building will be 50x100 feet with stores on the first floor. Upper floor will contain five three-room apartments with baths and wall beds. There will be steam heat. The interior of the building will be finished in pine throughout. Exterior will be faced with cement plaster. Plans are being prepared.

LOS ANGELES, CAL.—Apartment house, 3 story and base, brick. Cost not stated. Architect, L. L. Jones, I. W. Hellman Bldg., L. A. Owner, John M. Thomas. The building has been designed to contain 66 rooms which will be arranged in suites of two and three rooms. All apartments will have wall beds and private baths. There will be steam heat and a vacuum cleaning system. Interior will be finished in pine, redwood and elm. Bath rooms will have composition floors. The exterior of the building will be faced with pressed brick. Plans are complete and the work will be done by Day Labor.

Contracts Awarded.

LOS ANGELES, CAL.—Apartment house, 3 story and base, brick, \$37,000. Architect, none. Owners, J. B. and E. C. Hunter. Contractors, C. F. Borton Co., Hibernian Bldg., L. A. Contract price, \$37,000.

BANKS

LODI, SAN JOAQUIN CO., CAL.—Bank, 1 story and base, reinforced concrete, \$25,000. Architect, Walter King, Elks' Bldg., Stockton. Owners, Bank of Lodi. This work has been mentioned here before when the plans were first started. Bids for the work are now being taken and a contract will be awarded shortly. The structure will contain the general offices, banking rooms and private offices. Interior will be finished in hardwoods, tile, marble, ornamental plaster and bronze. There will be a central heating system. The exterior of the structure will be faced with pressed brick and terra cotta. Bids are now being taken.

BRIDGES, DAMS AND HARBOR WORK.

SAN FRANCISCO.—Sea wall construction, \$195,000. Engineer, Assistant State Engineer, Ferry Bldg., S. F. Owners, State of California. Five bids were received by the State Board of Harbor Commissioners on Monday last for the construction of section 9A of the sea wall and seven bids for section 9B. The Daniel Contracting Company presented the lowest figures in each case and will probably be awarded the contract. Their bid for section 9A was \$275,700, aid for section 9B \$220,000. Sections 9A and 9B of the seawall will extend from the foot of Harrison street to the foot of King street. Governor Johnson and Mayor Tolph met with the Harbor Commissioners. The next work to be undertaken by the State Board of Harbor Commissioners will probably be the construction of pier 37, which will be erected at the foot of Mason street. This contract will be followed by the construction of pier 39, which will adjoin pier 37. Directly following the letting of these contracts bids will be asked for on the construction of the Ferry Annex, working drawings for which are now being completed by Architect L. B. Dutton, Chronicle Bldg. For a complete list of all figures presented for the seawall work see under San Francisco in this issue.

FACTORIES & WAREHOUSES.

SAN FRANCISCO.—Warehouse and shop, 1 story steel and corrugated iron, \$5,000. Architect, Charles E. J. Rogers, 24 California St., S. F. Owner, Earl K. Cooley. The building will be erected on Harrison street near 8th, and will cover an area of 40x80 feet. There will be a light steel frame with exterior walls covered with corrugated iron. Floor will be of cement. The front portion of the building is to be occupied by the office and the balance of the space given over to factory and storage space. Plans are complete and the architect is now taking figures on the work.

Contracts Awarded.

SAN FRANCISCO.—Warehouse, 3 story and base, reinforced concrete, \$90,000. Architect's name not given. Owners, American Can Co., Mills Bldg., S. F. Contractors, Clinton Fireproofing Co., Mutual Bank Bldg., S. F. general construction. Contract price, \$80,000. Raymond Concrete Pile Co., foundation work, \$15,000. Note: Mr. Bush, of the American Can Co., is handling the work for the owners.

FLATS.

SAN FRANCISCO.—Flats, 2 story and base, frame, \$5,500. Architect, none. Owners, Hansen and Jacobsen, 1886 McAllister St., S. F. The building will have a street frontage of 25 feet and a depth of 55 feet. There will be two modern flats of five and six rooms each with bath. Interior finish will be of pine and redwood with some elm panels. Oak floors will be used in the living rooms. Bath and kitchen will be finished in tile. Open fire places and tile or brick mantels are specified. The exterior of the building will be covered with cement plaster on metal lath.

Plans are in the hands of the owners and the work will be done by Day Labor.

SAN FRANCISCO.—Flats, 2 story and base, frame. Cost not stated. Architects, Walsh & Carey, Western Metropolis Bldg., S. F. Owner, X. W. Fay. The building has been designed to contain two modern flats of five and six rooms each. Interior finish will be of pine and redwood with some oak floors. There will be open fire places and tile or brick mantels. Tile will be used in the bath rooms and kitchens. The exterior of the building will be covered with cement plaster. Plans are now being prepared.

GARAGES.

PORTLAND, ORE.—Garage, 2 story and base, reinforced concrete. Cost not stated. Architects, Whidden & Lewis, Portland. Owner, J. Woods Smith. The architects have just been selected to prepare plans for this building. The building will occupy a corner site 100 feet square. The first floor and basement will be used for a commercial garage and the second floor for hall purposes. None of the particulars of construction can be given at this time.

GOVERNMENT WORK AND SUPPLIES.**Honolulu Channel Iron Work.**

Bids were opened by the lighthouse inspector, 19th district, Honolulu, H. T., as follows for furnishing certain iron work in connection with the Honolulu channel light No. 6:

Honolulu Iron Works Co., \$580; accepted.

Cotton, Neill & Co., Ltd., \$600.

von Hamm-Young Co., \$671.70.

Judson Mfg. Co., \$700.

Moore & Scott Iron Works, \$850.

Bureau of Yards and Docks.

The annual report of the chief of the bureau of yards and docks contains the following information:

At the beginning of the fiscal year the bureau had under construction 3 new dry docks of the largest size—at New York, Puget Sound, and Pearl Harbor—and the lengthening of the principal dry dock at Norfolk was nearing completion. Early in the year the Norfolk dry dock was completed, and the New York dry dock has since been officially accepted, both docks now being in regular service. The Puget Sound dry dock is approaching completion, lacking only removal of contractor's cofferdam and dredging at entrance, with some installation of machinery in the pump well. The contract for the dry dock at Pearl Harbor is being modified to provide for a usable length of 1,000 feet, so that it may take any ship which can pass through the Panama Canal. Great difficulties were encountered both at New York and Pearl Harbor. The former was met by an original design and method of construction and the latter by careful study, experiments, and tests. Large expenditures have been made in the repair and preservation of the floating dry dock Dewey at Manila, and this dock continues to provide needed docking facilities in Philippine waters.

Work has been carried on during the year on the three large hospitals of

practically identical construction at Portsmouth, Chelsea, Mass., and Newport. Work under the contract for the three buildings is practically complete. There remains to be constructed power houses, quarters for officers and attendants, and other detached buildings. Plans for a general hospital at Pearl Harbor have been developed, and the work is nearly ready for advertisement. Miscellaneous small improvements have been carried out at various other stations.

Plans are in preparation for a marine barracks, Philadelphia, and marine officers' quarters have been constructed at Philadelphia and Norfolk on plans prepared at the bureau. Minor improvements have been carried out at various other stations. Marine barracks and quarters for Pearl Harbor are under contract.

Construction work is either under way or has been completed at nine separate stations aggregating over \$260,000. In addition plans have been prepared or construction has been started for additional work aggregating over \$390,000.

The act of March 4, 1911, authorized two floating cranes of 150 tons capacity for Boston and Pearl Harbor, the limit of the cost of the two being \$660,000. The pontoons have been completed, and the erection of the superstructure and machinery is proceeding satisfactorily.

The station at Arlington, Va., including one 660-foot tower and 450-foot towers and several buildings, has been completed. Proposals will shortly be opened for a wireless station at Guantanamo, Cuba.

Fuel-oil stations have been completed at Melville, R. I.; Norfolk, Charleston, and Key West. The oil station at Guantanamo is in process of erection. Extensions have been authorized at these places, and active construction work is under way. A gasoline tank is also being erected at Boston. A 25,000-ton plant has been designed for Pearl Harbor, and the tanks and other material for 5,000 tons of fuel oil and 250 tons of gasoline are under contract.

The coal-storage plant at Tiburon, Cal., has been completed. The bureau has made designs for coaling plants of 200,000-ton capacity at Boston, Norfolk and Pearl Harbor. Funds have been allotted to commence the construction of the plant at Pearl Harbor, and work is being actively prosecuted.

Pearl Harbor, H. T., Magazine Buildings.

The followings bids were received by the chief of the bureau of yards and docks, Navy Department, Washington, D. C., for the construction of 5 magazine buildings at the U. S. Naval magazine, Pearl Harbor, H. T.:

Item 1. Net price for 5 buildings, complete, in accordance with plans and specification.

Item 2. Net price for 5 buildings, complete, in accordance with plans and specification, using alternate wall construction.

Item No. 3. For primer house.

Item No. 4. Do, using alternate wall construction.

Item No. 5. Price for magazine building.

Item No. 6. Do, using alternate wall construction.

Item No. 7. Price for loaded-shell house.

Item No. 8. Net price for loaded-shell house, using alternate wall construction.

Item No. 9. Price for fixed-ammunition house.

Item No. 10. Price for fixed-ammunition house, complete, using alternate wall construction.

Item No. 11. Price for high-explosive house.

Item No. 12. Price for high-explosive house, using alternate wall construction.

Item No. 13. Price to be added to or deducted from prices bid under items Nos. 1, 5, 7, and 9 for each 20-foot bay added to or deducted from the lengths shown on the drawings, using tile wall construction.

Item No. 14. Price to be added to or deducted from prices named under items Nos. 2, 6, 8, and 10 for each 20-foot bay added to or deducted from the lengths shown on the drawings, using alternate wall construction.

Item No. 15. Price to be added to or deducted from prices named under items Nos. 1, 3, and 11 for each 18-foot bay added to or deducted from the lengths shown on the drawings, using tile wall construction.

Item No. 16. Prices to be added to or deducted from prices named under items Nos. 2, 4, and 12 for each 18-foot bay added to or deducted from the lengths shown on the drawings, using alternate wall construction.

Spalding Construction Co., 1020 Chamber of Commerce Building, Portland, Ore., item 1, \$89,110; 2, \$93,570; 3, \$7,370; 4, \$7,804; 5, \$23,340; 6, \$24,230; 7, \$32,723; 8, \$34,173; 9, \$27,450; 10, \$28,590; 11, \$7,370; 12, \$1,804; 13, \$2,400; 14, \$2,500; 15, \$1,800; 16, \$1,900; alternate, \$84,140.

Penn Bridge Co., 313 Bond Bldg., Washington, D. C., item 1, \$88,740; 2, \$85,793.

W. N. Concanon Co., Menadnock Bldg., San Francisco, Cal., item 1, \$88,980; 2, \$85,980; 3, \$6,400; 4, \$6,200; 5, \$19,600; 6, \$19,000; 7, \$31,000; 8, \$30,100; 9, \$26,500; 10, \$25,800; 11, \$25,800; 12, \$6,400; 13, \$1,350; 14, \$1,200; 15, \$2,000; 16, \$1,960.

Lord-Young Engineering Co. (Ltd.), 12 Merchant street, Honolulu, Hawaii, item 1, \$79,600; 2, \$77,200; 3, \$6,200; 4, \$6,100; 5, \$20,000; 6, \$19,600; 7, \$29,500; 8, \$28,500; 9, \$25,000; 10, \$21,000; 11, \$6,200; 12, \$6,100; 13, \$1,900; 14, \$1,800; 15, \$1,100; 16, \$1,375.

—HALLS & SOCIETY BLDGS.—

McMINNVILLE, ORE.—Lodge hall, 3 story and base, brick and steel, \$30,000. Architect, C. C. Robbins, Portland. Owners, McMinville Masonic Hall Association. The building will be a three story and basement structure, covering a site 80x100 feet. The first floor will contain several large stores. There will be offices on a part of the second floor while the owners have reserved the entire third floor and a part of the second for their hall. There will be steam heat. Interior will be finished in pine and hardwoods. The exterior of the building will be faced with pressed brick. Plans are being prepared.

HOTELS.

SAN FRANCISCO—Hotel, 6 story and base, steel and concrete, \$30,000.

Architect, William Mosser, Nevada Bank Bldg., S. F. Owner, Henry Wolff. This building will be erected in the rear of a present structure on O'Farrell street near Jones. There will be in the neighborhood of 65 rooms and a number of baths. The building will have elevator service and steam heat. Hot and cold running water has been provided for all rooms. Interior finish will be of pine and redwood. The exterior will be faced with cement plaster. Plans are complete and a contract will be awarded at once.

SAN FRANCISCO—Hotel, 7 story and base, brick and steel, \$75,000. Architect, Albert Farr, Foxcroft Bldg., S. F. Owner, A. W. Maltby. This work has been mentioned in these columns before when working drawings were being prepared. The building will have a street frontage of 52 feet and a depth of 100 feet. Plans provide for two stores on the first floor and a total of 50 guest rooms on the upper floors. There will be steam heat, elevator service and a vacuum cleaning system. Interior finish will be of pine, redwood and some hardwoods. Bath rooms will be finished in tile. The exterior of the building will be faced with cement plaster. Plans are complete and figures will be called for at once.

SAN FRANCISCO—Hotel, 7 story and base, Class C construction, \$65,000. Architect, N. W. Sexton, Chronicle Bldg., S. F. Owner, W. B. Grosh. The building will be erected on Sutter street west of Powell, and is to contain stores on the first floor besides a large and attractive lobby. The upper floors will be arranged for a total of eighty rooms and baths. Interior finish will be of pine and some hardwood. Bath rooms will be finished in tile. There will be steam heat and elevator service. The exterior will be faced with pressed brick. Plans are being prepared.

LOS ANGELES, CAL.—Hotel, 2 story and base, brick. Cost not stated. Architect, A. E. Fetherstonhaugh, Ferguson Bldg., L. A. Owner, J. H. Call. The building will contain a total of ninety rooms and a number of baths besides the office and general lobby which will occupy the entire first floor. There will be steam heat and elevator service. Interior finish will be of pine and redwood. Running hot and cold water has been provided for all rooms. The exterior of the building will be faced with pressed brick. Plans are being prepared.

LOS ANGELES, CAL.—Hotel and stores, 4 story and base, brick. Cost not stated. Architect, Edward C. Thorne, Realty Board Bldg., L. A. Owner, L. L. Deball. The building is to cover an area of 60x101 feet. Plans provide for seven stores on the ground floor and a total of 125 rooms on the upper floors. Interior finish will be of pine throughout. Bath rooms will have cement floors. There will be steam heat and elevator service. Running hot and cold water will be supplied to all rooms. The exterior of the building will be faced with pressed brick. Patent store fronts will be used. Plans are being prepared and work will be started within a short time.

HILLSBORO, ORE.—Hotel, 2 story and base, brick, \$20,000. Architect, Newton C. Gaunt, Portland. Owners, J. W. Bailey, et al. The ground floor will contain one store, main office and

lobby, sunple rooms, dining room and kitchen. Upper floors are to be arranged for 10 guest rooms and 12 private baths. There will be steam heat. Interior finish will be of pine. The exterior of the building will be faced with pressed brick. Plans are now being prepared.

IMPERIAL, IMPERIAL CO., CAL.—Hotel, 2 story and base, brick. Cost not stated. Architects, Western Architectural and Building Co., Counter Bldg., L. A. Owner, Mrs. Laura Waters. The building will cover an area of 112x128 feet. The first floor will contain a number of stores while provision has been made on the upper floor for 5 rooms and a number of baths. There will be hot and cold running water in all rooms. Interior finish will be of pine throughout. The exterior of the building will be faced with pressed brick. Plans are being prepared.

TOURANCE, LOS ANGELES CO., CAL.—Hotels, 4, 2 story and base, brick. Cost not stated. Architect, Irving J. Gill, 625 So. Hill St., L. A. Owners, Dominguez Land Co. Each of these buildings has been arranged for stores on the first floor and rooms above. All interior trim will be of pine. Hot and cold running water is to be supplied to all rooms. The exteriors will be faced with pressed brick. Plans are complete and figures are being taken by the owners.

Contracts Awarded.

PORTLAND, ORE.—Hotel addition, 4 story, brick, \$40,000. Architects, Emil Schacht & Son, Portland. Owners, Golden West Hotel. Contractors, Brayton Eng. Co., Portland. Contract price, \$10,000.

RESIDENCES.

SAN FRANCISCO—Residence, 2 story and base, frame, \$6,000. Architect, D. C. Coleman, Western Metropolis Bank Bldg., S. F. Owner, M. Fisher. The dwelling has been designed for an eight-room house with bath rooms and laundry. Interior finish will be of pine, redwood and white cedar. There will be furnace heat and open fire places. Hardwood floors will be used in the principal rooms. Bath room will be finished in tile. An automatic water heater will be installed. The exterior of the dwelling will be covered with cement plaster on metal lath. Plans are complete and the work will be done by Day Labor.

SAN FRANCISCO—Residence, 2 story and base, frame, \$2,500. Architect, none. Owner, Frank Lapham, 575 3rd Ave., S. F. The house will contain six rooms and bath. Interior finish will be of pine and redwood throughout. There will be an open fire place with tile mantle. Some oak floors will be used. The exterior of the house will be covered with rustic and shingles. Plans are complete and the work will be done by Day Labor.

ATHERTON, SAN MATEO CO., CAL.—Bungalow, 1½ story and base, frame, \$6,800. Architects, Falch & Knoll, Hearst Bldg., S. F. Owner, Mr. Bruden. The bungalow has been designed to contain about eight rooms, sleeping porch and bath. Interior finish will be of pine, redwood and hardwood. Hardwood floors will be used throughout. There will be furnace heat and open fire places. Mantels will be of brick. Tile will be used in the bath

rooms and kitchen. An automatic water heater will be installed. The exterior of the house will be covered with cement plaster on metal lath. Plans are complete and figures have been taken. A contract will be awarded within a few days.

SAN CARLOS, SAN MATEO CO., CAL.—Residence, 2 story and base, frame, \$12,000. Architects, Falch & Knoll, Hearst Bldg., S. F. Owner's name withheld. This house has been designed to contain in the neighborhood of ten rooms, baths, sleeping porch and a laundry. Interior finish will be of pine, redwood and hardwoods. Hardwood doors will be used throughout the principal rooms. A central heating system will be installed. There will be open fire places and brick and tile mantels. An automatic water heater will be used. Tile will be used in the bath rooms and kitchen. The exterior of the dwelling will be covered with cement plaster on metal lath and the roof will be of red clay tile. Plans will be out for figures in the course of a week or ten days.

SAN FRANCISCO—Bungalow, 1½ story and base, frame, \$2,000. Architect, none. Owner, F. Monson, 865 Church street, S. F. The bungalow will contain six rooms and bath. All interior finish will be of pine or redwood. Oak floors will be used in the living and dining rooms. There will be a large open fire place in the living room with a tile or brick mantle. Tile will be used in the bath room and kitchen. The exterior of the house will be covered with shingles. Plans are complete and the work will be done by Day Labor.

SAN FRANCISCO—Residences, 2, 2 story and base, frame, \$6,000 each. Architect, none. Owner, W. J. Rednal, 2500 Filbert St., S. F. These houses will each contain eight rooms and bath. Interior finish will be of pine, redwood and some hardwood. Oak floors will be used in the principal rooms. There will be furnace heat and open fire places. Mantels will be of brick and tile. Bath rooms will be finished in tile with composition floors. Automatic water heaters will be installed. The exteriors will be covered with red stock brick veneer and white cement plaster on metal lath. Plans are complete and the work will be done by Day Labor.

OAKLAND, CAL.—Residences, 8, 1 and 2 story and base, frame, \$2,500 to \$4,000. Architect, Al. J. Mazurette, 1522 Broadway, Oakland. Owner, Roger Coit. These houses will all be erected in the neighborhood of Broadway and Kales street. Mr. Coit is a well known Oakland builder and he will erect the buildings for sale. The one story houses will contain from five to seven rooms and the two story houses from six to eight rooms. Interior finish will be of pine, redwood and hardwoods. Oak floors will be used extensively. The better type of houses will have furnace heat and all will have open fire places with brick or tile mantels. Plans are being prepared and as rapidly as completed the work will be started under the Day Labor system.

OAKLAND, CAL.—Residence, 2 story and base, frame, \$3,800. Architect, George Anderson, 5456 College Ave., Oakland. Owner, J. Anderson. The house will contain seven rooms and

bath. Interior finish will be of pine and redwood with some oak floors. There will be furnace heat and open fire places. Mantels will be of tile or brick. The exterior of the dwelling will be covered with cement plaster on metal lath. Plans are complete and the work will be done by Day Labor.

SCHOOLS.

OAKLAND, CAL.—School, 1 story and base, reinforced concrete, \$70,000. Architect, J. J. Donovan, Security Bldg., Oakland. Owners, City of Oakland. This building will be known as the 15th Avenue School and will be similar in design to a number of others recently erected in Oakland. There will be six class rooms and an assembly hall. A central heating system will be installed. The exterior will be faced with cement plaster and the roof will be of red clay tile. Plans are complete and have received the approval of the Board of Education. Bids are being taken and will be opened by the board on January 20th. Plans and complete information may be secured from the Supervising Architect J. J. Donovan.

POMONA, LOS ANGELES CO., CAL.—School, 1 story and base, reinforced concrete, \$25,000. Architect, Paul F. Higgins, Pomona. Owners, Pomona School District. Working drawings have been completed for the San Antonio Avenue Grammar School and will be approved by the Board of Education at their next meeting. The building will contain six class rooms, assembly hall and teachers' rooms. A central heating system will be installed. Interior finish will be of pine throughout with some maple floors. The exterior of the building will be faced with cement plaster. Bids will be called about January 15th.

SEWERS, STREET WORK AND WATER SYSTEMS.

SAN FRANCISCO—Sewers, storm water and sanitary. Cost not stated. Engineer, Engineering Department, P. 1 & C, Exposition Bldg., S. F. Owners, Panama-Pacific Exposition Co. Plans for the sanitary and storm water sewer for the Exposition site are complete and out for figures. Bids will be opened on January 9th. One of the next contracts to be awarded by the Exposition Co. will be for a service water supply system, plans for which are complete and specifications are being written.

REDLANDS, SAN BERNARDINO CO., CAL.—Water system. Cost not stated. Engineer, F. E. Trask, Union Oil Bldg., L. A. Owners, City of Redlands. Plans for the municipal water system have been approved and are now out for bids. Bids will be opened by City Clerk R. Warner Thomas on January 15th. The material will consist of 300 tons cast iron pipe as follows: 1,730 lineal feet 12-inch; 9,050 lineal feet 8-inch; 600 lineal feet 6-inch; 15 tons cast iron specials; 13,410 lineal feet 4-inch standard screw pipe; 1,650 lineal feet 6-inch standard screw pipe; standard pipe specials; 7,800 lineal feet 12-inch riveted steel pipe; 23,000 lineal feet 16-inch riveted steel pipe; 5,100 lineal feet 20-inch riveted steel pipe; 100 lineal feet 24-inch riveted steel pipe; specials for above; 80 fire hydrants; valves as follows: Two 20-inch, seven 16-inch, two 12-inch, two 10-inch, eighty 6-inch, 100 4-inch; two air valves of 200-lbs. pressure; 20 dozen lanterns; 10 dozen each picks and shovels; four wells of 18-inch, 20-inch and 22-inch casing, four pumps and heads; one one-ton auto truck. Bids will be received on the work as a whole or on each unit separately.

REDLANDS, SAN BERNARDINO CO., CAL.—Electric power plant. Cost not stated. Engineer, F. E. Trask, Union Oil Bldg., L. A. Owners, City of Redlands. Plans for the electric power plant for the municipal water system have been completed and are now out for figures. Bids will be opened by the Board of Trustees on February 5th. A maximum of 600 horse power is required and bids will be taken for steam, gasoline, and crude oil engines. Full particulars can be secured from either the engineer or from City Clerk R. Warner Thomas, Redlands.

Contracts Awarded.

PORTLAND, ORE.—Trunk sewer system No. 2. Cost not stated. Engineer, City Engineer Portland. Owners, City of Portland. Contractors, Giebisch & Joplin, Portland. Contract price, \$156,107.40.

STORES & OFFICE BUILDINGS.

SAN FRANCISCO.—Stores and offices, 10 story and base, Class A construction, \$100,000. Architects, Havens & Toppel, 46 Kearny St., S. E. Owners, A. Meyers and J. Liebes. The present buildings at the corner of Market and Sutter streets are to be demolished and a new and thoroughly modern office building will be erected on the lot. Preliminary plans have been prepared by the architects, but no details of the construction are available at this time. Mr. Liebes states that the new building will have a complete steel frame and the construction will be fireproof throughout. Exterior walls will probably be faced with pressed brick and terra cotta. Further mention will be made as plans progress.

OCEAN PARK, LOS ANGELES CO., CAL.—Stores and lodge hall, 2 story and base, brick. Cost not stated. Architect, J. William Roberts, 2375 West 25th St., L. A. Owner, J. William Roberts. The building will contain four stores on the first floor and ten offices besides a large lodge room on the upper floor. Interior finish will be of pine throughout. The exterior will be faced with pressed brick. Plans are complete and the work will be done by Day Labor.

Contracts Awarded.

PORTLAND, ORE.—Stores and offices, 12 story and base, Class A construction, \$750,000. Architects, Doyle, Patterson & Beach. Owners, Marqua Llock Co. Contractors, Dinwiddle Construction Co., Portland. Contract price, \$750,000.

S. engineer offices in the following cities: Seattle, Wash., Los Angeles, Cal. F. C. BOGGS, major, corps of engineers, U. S. A., general purchasing officer.

PROPOSALS FOR SCHOOL BUILDINGS.

THE BOARD OF EDUCATION of the City of Oakland, State of California, requests and will receive Proposals or bids for the furnishing of all the materials, labor and workmanship required in connection with the construction and completion of a one (1) story and basement reinforced concrete and wood frame School Building containing Seven Class Rooms, Kindergarten, Manual Training, Principal's Rooms, Teachers' Rooms, Club Rooms, Assembly Room, etc., to be known as the Thirteenth Avenue School Building, to be erected on the block of land situated on the east side of 13th avenue, between East 37th street and East 38th street, in the City of Oakland, California.

All said materials, labor and workmanship is to consist of that required by, and be in accordance with the plans, drawings, and specifications prepared therefor and on file in the office of John J. Donovan, the Supervising Architect of the City of Oakland, to which said plans and specifications reference is hereby made.

All proposals shall be made upon and conform to the requirements of the forms of proposals, prepared and furnished by the city through the Supervising Architect, and shall be enclosed in sealed envelopes, endorsed "Bid for Thirteenth Avenue School Building," addressed to the Board of Education, and deposited by the bidder, or his agent, with the Board, while in session, between **1:30 o'clock and 5:30 o'clock, Pacific Time, on the 20th day of January, 1913**, in the rooms of the Board in the City Hall Annex, No. 1728 Broadway, Oakland, California, and at the expiration of the time named the bids will be opened, examined and publicly declared in open session of the Board.

The contract for the furnishing of all the labor and material entering into the construction and completion of the work, including plumbing, heating, ventilating, electric work and all equipment indicated on the drawings or called for in the specifications is to be let or awarded as a whole or General Contract, but each bidder shall at the time of submitting his proposal

to the Board, deliver and deposit in the care of said Board, in a separate sealed cover addressed to the Supervising Architect, a sub-division of his proposal on a form which will be furnished the bidder, and which shall show a true estimate for all the work included in each of the following groups or branches into which the specifications are sub-divided, together with a list of the subcontractors in each of the various groups of the work to whom the bidder proposes to sublet such portions, viz.:

- 1, Preparation of Site; 2, Structural Iron and Steel; 3, Concrete, Plain and Reinforced; 4, Brick and Terra Cotta; 5, Paving; 6, Composition Roofing; 7, Rough Carpentry and Mill Work; 8, Sheet Metal; 9, Architectural Metal; 10, Lath and Plaster; 11, Glass and Glazing; 12, Painting; 13, Finish Hardware; 14, Plumbing and Gas Fitting; 15, Blackboards; 16, Heating and Ventilation; 17, Electric Wiring.

No proposal or bid will be received or considered which is not accompanied by a check, certified by a responsible bank, payable to the order of Frank R. Thompson, City Clerk, in an amount not less than ten per centum (10%) of the aggregate amount of the proposal. Said check shall be forfeited to and be retained by the city if the successful bidder fails or refuses to execute the contract in the required form and furnish bonds of the forms to be provided by the city and as required by the Charter of the City of Oakland, within twenty (20) days after receiving notice of award.

All information relative to the requirements for bidding, and all directions necessary to explain and make definite any of the provisions of the specifications or drawings will be given by the Supervising Architect upon application at his office.

The right is reserved to the Board in accordance with the provisions of the Charter of the City of Oakland, to reject any or all bids submitted.

By order of the Board of Education of the City of Oakland, California.

Dated December 26, 1912.

R. B. S. YORK,

Secretary of the Board of Education of the City of Oakland.

NOTICE TO BIDDERS.

NOTICE is hereby given by the High School Board of Galt Joint Union High School District of Galt, California, that sealed bids will be received by the Clerk of said Board in the temporary school building in the City of Galt up to the hour of 10 a. m. on the 14th day of January, 1913, at which time and place the said bids will be opened for the furnishing of labor and materials to complete a certain building for the Galt Joint Union High School District.

Bids shall be for the erection and construction and the furnishing of all and every kind and sort of labor and material according to the plans and specifications, which may be seen at the office of C. H. Russell, Architect, at his office in the Humboldt Bank Building, San Francisco, California, during business hours, and which will comprise everything necessary to complete the building described and designated in said plans and specifications, exclusive of the heating and ventilating systems.

Bids will be received in accordance

with the plans and specifications referred to, for a heating and ventilating system complete, including all oil burners, for said building.

Bids will be received in accordance with the plans and specifications referred to, for a program clock system complete, for said building.

Each bidder must accompany his bid by a certified check payable to Wallace B. Sawyer, Clerk of the Board, or certificate of deposit for not less than 10% of the amount of his highest bid, conditioned that the successful bidder shall enter into a contract in accordance with such bid, and file with said High School Board, the bond to be approved by them, within ten days after the acceptance of his bid, which bond shall be conditioned for the faithful fulfillment of the contract entered into and to be for at 50% of the amount of the contract price for the work to be done thereunder.

All work to be done and material furnished shall be in accordance with the plans and specifications herein specified, and all bids hereunder will be opened at the hour of 10 o'clock a. m. on the 14th day of January, 1913, by said High School Board in their office in the temporary high school building of Joint High School District.

All bids must be submitted on forms obtained from the Architect, C. H. Russell; a deposit of \$20.00 will be required for each set of plans and specifications taken from the office of the Architect; this deposit to be refunded to the bidder upon return of the plans and specifications.

The High School Board reserves the right to reject any and all bids.

Dated December 19, 1912.

By order of the Joint Union High School Board of Galt Joint Union High School District.

By WALLACE B. SAWYER, Clerk.

NOTICE TO CONTRACTORS.

PANAMA-PACIFIC INTERNATIONAL EXPOSITION.

SEALED PROPOSALS will be received by the Buildings and Grounds Committee of the Panama-Pacific International Exposition Company at the office of the Director of Works, in the Exposition Building, Pine and Battery Streets, San Francisco, California, at 11 o'clock A. M. Saturday, January 18, 1913, for the following work:

Contract No. 20.

For the erection and construction of a Light Ship and Approach thereto in accordance with the specifications on file in the office of the Director of Works.

Each proposal must be accompanied by a certified check payable to the order of the Panama-Pacific International Exposition Company or cash in the sum of ten (10) per cent of the amount bid, or the same will not be considered. When the award of contract is made all checks will be returned to the respective bidders, except that filed with the accepted proposal or bid, which check will be returned upon the successful bidder signing the contract and filing the required bond. A bond in the sum of fifty (50) per cent of the contract price will be required for the faithful performance of the contract; the sureties thereon must be satisfactory to the Buildings and Grounds Committee of the Panama-Pacific International Exposition Company.

Progressive payments will be made. The right is reserved to reject any and all bids and to waive technical defects if in the interest of the Exposition Company.

Plans and specifications for the work may be obtained from the Director of Works, at Room 617 Exposition Bldg., by depositing \$25.00 in cash, which will

be refunded upon the return of the plans and specifications in good condition.

By order of the Buildings and Grounds Committee.

SAN FRANCISCO.

APARTMENT HOUSES—2, 3 story and base, frame, \$10,000 each. San Francisco. Architect, none. Owner, John Dempiak, 1684 Washington St., S. F. Each of these buildings will have a street frontage of 23 feet and a depth of 83 feet. Interiors will be arranged for four room suites with private baths and wall beds. A central heating system will be installed. Interior finish will be of pine throughout. Some hardwood floors will be used. Bath rooms will have cement floors and tile wainscot. The exteriors will be covered with rustic and cement plaster on metal lath. Plans are complete and in the hands of the owner who will do the work by Day Labor.

APARTMENT HOUSE—3 story and base, frame, \$45,000. San Francisco. Architects, Falch & Knoll, Hearst Bldg., S. F. Owner's name withheld. This building will be erected on Russian Hill, a section of the city but recently attracting this type of building. Preliminary plans show a structure arranged for 32 suites of two and three rooms each. There will be connecting baths, wall beds, elevator service and a central heating system. Interior will be handsomely finished throughout with pine, redwood, some hardwoods and ornamental plaster. The exterior of the building will be covered with cement plaster on metal lath. Working drawings will not be completed for about thirty days.

APARTMENT HOUSE—3 story and base, frame. Cost not stated. San Francisco. Architects, Welsh & Carey,

Edward R. Bacon is positively not connected with any other firm.

Firms desiring news from certain localities like San Francisco, Los Angeles, Portland, Seattle, etc., will find all such items, commencing on this page, all carefully classified as to location. These same items are repeated in the fore part of the news department, under distinct headings such as Banks, Churches, Hotels, etc.

Western Metropolis Bank Bldg., S. F. Owner, A. Rosa. The building will be erected at the corner of 28th and Church streets, and is to contain stores on the first floor and twelve two and three room suites on the upper two floors. Interiors will be finished in pine, redwood and elm with some oak floors. A central heating system will be installed. All apartments will have connecting baths and wall beds. The exterior of the building will be covered with cement plaster on metal lath. Plans are being prepared and will shortly be out for figures.

APARTMENT HOUSE—4 story and base, brick and steel, \$45,000. San Francisco. Architect, C. S. McNally, Mechanics' Institute Bldg., S. F. Owner's name withheld. The building will be erected on Sutter street and will have a street frontage of 40½ feet and a depth of 90 feet. There will be a total of nineteen suites besides the entrance, lobby and reception rooms. Apartments will consist of two and three rooms each with bath and wall beds. There will be steam heat, hot and cold water, a vacuum cleaning system and elevator service. Interior will be finished in pine and elm. Laths will have cement floors and tile wainscot. Ornamental plaster and imported tapestries will be used in the reception room and lobby. Considerable marble and tile are specified. The exterior of the building will be faced

with pressed brick and cement plaster. Plans are complete and figures are being taken.

RESIDENCE—2 story and base, frame, \$6,000. San Francisco. Architect, D. C. Coleman, Western Metropolis Bank Bldg., S. F. Owner, Mr. Fisher. The dwelling has been designed for an eight-room house with bath rooms and laundry. Interior finish will be of pine, redwood and white cedar. There will be furnace heat and open fire places. Hardwood floors will be used in the principal rooms. Bath room will be finished in tile. An automatic water heater will be installed. The exterior of the dwelling will be covered with cement plaster on metal lath. Plans are complete and the work will be done by Day Labor.

RESIDENCE—2 story and base, frame, \$2,500. San Francisco. Architect, none. Owner, Frank Lapham, 753 3rd Ave., S. F. The house will contain six rooms and bath. Interior finish will be of pine and redwood throughout. There will be an open fire place with tile mantel. Some oak floors will be used. The exterior of the house will be covered with rustic and singles. Plans are complete and the work will be done by Day Labor.

APARTMENT HOUSE—3 story and base, frame, \$30,000. San Francisco. Architect, H. C. Smith, Humboldt Bank Bldg., S. F. Owner, Mrs. A. L. Brownlee. The building will be erected on

Jones street near Washington, and has been arranged for 24 apartments of two and three rooms each with bath and wall beds. Interior finish will be of pine, redwood and elm. There will be a central heating system and a vacuum cleaning plant. Baths will have cement floors. The exterior of the building will be covered with cement plaster on metal lath. Plans are complete and figures will be taken at once.

SEA WALL CONSTRUCTION—\$195,000. San Francisco. Engineer, Asst. State Engineer, Ferry Bldg., S. F. Owners, State of California. Five bids were received by the State Harbor Commissioners on Monday last for the construction of section 9A of the sea wall and seven bids for section 9B. The Daniel Contracting Co. presented the lowest figures in each case and will probably be awarded the contract. Their bid for section 9A was \$275,700, and for section 9B \$220,000. Sections 9A and 9B of the sea wall will extend from the foot of Harrison street to the foot of King street. Governor Johnson and Mayor Rolph met with the Harbor Commissioners. The next work to be undertaken by the State Board of Harbor Commissioners will probably be the construction of pier 37, which will be erected at the foot of Mason street. This contract will be followed by the construction of pier 39 which will adjoin pier 37. Directly following the letting of these contracts bids will be asked for on the construction of the Ferry Annex, working drawings for which are now being completed by Architect L. B. Dutton, Chronicle Bldg. For a complete list of all figures presented for the sea wall see under San Francisco in this issue.

WAREHOUSE AND SHOP—1 story, steel and corrugated iron, \$5,000. San Francisco. Architect, Charles E. J. Rogers, 24 California St., S. F. Owner, Earl K. Cooley. The building will be erected on Harrison street near 8th, and will cover an area of 40x80 feet. There will be a light steel frame with exterior walls covered with corrugated iron. Floor will be of cement. The front portion of the building is to be occupied by the office and the balance of the space given over to factory and storage space. Plans are complete and the architect is now taking figures on the work.

FLATS—2 story and base, frame, \$5,000. San Francisco. Architect, none. Owners, Hansen and Jacobsen, 1886 McAllister St., S. F. The building will have a street frontage of 25 feet and a depth of 55 feet. There will be two modern flats of five and six rooms each with bath. Interior finish will be of pine and redwood with some elm panels. Oak floors will be used in the living rooms. Bath and kitchen will be finished in tile. Open fire places and tile or brick mantels are specified. The exterior of the building will be covered with cement plaster on metal lath. Plans are in the hands of the owners and the work will be done by Day Labor.

FLATS—2 story and base, frame, Cost not stated. San Francisco. Architects, Welsh & Carey, Western Metropolitan Bank Bldg., S. F. Owner, N. W. Fay. The building has been designed to contain two modern flats of five and six rooms each. Interior finish will be of pine and redwood with some oak floors. There will be open fire places and tile or brick mantels. The

will be used in the bath rooms and kitchens. The exterior of the building will be covered with cement plaster. Plans are now being prepared.

HOTEL—6 story and base, steel and concrete, \$30,000. San Francisco. Architect, William Mooser, Nevada Bank Bldg., S. F. Owner, Henry Wolff. This building will be erected in the rear of a present structure on O'Farrell street near Jones. There will be in the neighborhood of 65 rooms and a number of baths. The building will have elevator service and steam heat. Hot and cold running water has been provided for all rooms. Interior finish will be of pine and redwood. The exterior will be faced with cement plaster. Plans are complete and a contract will be awarded at once.

HOTEL—7 story and base, brick and steel, \$75,000. San Francisco. Architect, Albert Farr, Foxcroft Bldg., S. F. Owner, A. W. Matby. This work has been mentioned in these columns before when working drawings were being prepared. The building will have a street frontage of 52 feet and a depth of 100 feet. Plans provide for two stories on the first floor and a total of 90 guest rooms on the upper floors. There will be steam heat, elevator service and a vacuum cleaning system. Interior finish will be of pine, redwood and some hardwoods. Bath rooms will be finished in tile. The exterior of the building will be faced with cement plaster. Plans are complete and figures will be called for at once.

HOTEL—7 story and base. Class C construction, \$65,000. San Francisco. Architect, N. W. Sexton, Chronicle Bldg., S. F. Owner, W. B. Grosh. The building will be erected on Sutter street west of Powell, and is to contain stores on the first floor besides a large and attractive lobby. The upper floors will be arranged for a total of 80 rooms and baths. Interior finish will be of pine and some hardwood. Bath rooms will be finished in tile. There will be steam heat and elevator service. The exterior will be faced with pressed brick. Plans are being prepared.

BUNGALOW—1½ story and base, frame, \$2,000. San Francisco. Architect, none. Owner, F. Monson, 565 Church St., S. F. The bungalow will contain six rooms and bath. All interior finish will be of pine or redwood. Oak floors will be used in the living and dining rooms. There will be a large open fire place in the living room with a tile or brick mantel. Tile will be used in the bath room and kitchen. The exterior of the house will be covered with shingles. Plans are complete and the work will be done by Day Labor.

RESIDENCES—2, 2 story and base, frame, \$6,000 each. San Francisco. Architect, none. Owner, W. W. Rednal, 2500 Filbert St., S. F. These houses will each contain 8 rooms and bath. Interior finish will be of pine, redwood and some hardwoods. Oak floors will be used in the principal rooms. There will be furnace heat and open fire places. Mantels will be of brick and tile. Bath rooms will be finished in tile with composition floors. Automatic water heaters will be installed. The exteriors will be covered with red stock brick veneer and white cement plaster on metal lath. Plans are complete and the work will be done by

Day Labor.

SEWERS—Storm water and sanitary. Cost not stated. San Francisco. Engineer, Engineering Department P. P. I. E., Exposition Bldg., S. F. Owners, Panama-Pacific Exposition Co. Plans for the sanitary and storm water sewer for the Exposition site are complete and out for figures. Bids will be opened on January 9th. One of the next contracts to be awarded by the Exposition Co. will for a service water supply system, plans for which are complete and specifications are being written.

STORES AND OFFICES—10 story and base. Class A construction, \$100,000. San Francisco. Architects, Havens & Toepke, 46 Kearny St., S. F. Owners, A. Meyers and I. Liebes. The present buildings at the corner of Market and Sutter streets are to be demolished and a new and thoroughly modern office building will be erected on the lot. Preliminary plans have been prepared by the architects, but no details of the construction are available at this time. Mr. Liebes states that the new building will have a complete steel frame, and the construction will be fireproof throughout. Exterior walls will probably be faced with pressed brick and terra cotta. Further mention will be made as the plans progress.

Contracts Awarded.

WAREHOUSE—3 story and base, reinforced concrete, \$90,000. San Francisco. Architect's name not given. Owners, American C. Co., Mills Bldg., S. F. Contractors, Clinton Fireproofing Co., Mutual Bank Bldg., S. F. general construction. Contract price, \$80,000. Raymond Concrete Pile Co., foundation work, \$15,000. Note: Mr. Bush, of the American Can Co., is handling the work for the owners.

ASSIGNMENT OF LIEN.

Jan. 3, 1913—S PINE 137-6 E Jones E 94-6XS 137-6 (assigned Oct. 4, 1911 to J. Morey; released Nov. 29, 1912) The Hinchman-Clement Co., Inc to Wm H Chapman.....

J. H. Wiese, Omaha, Neb...	411,320

Sea Wall Contracts Go To One Firm.

Bids Opened For Sea Wall Work Are Let to Daniel Contracting Company at Low Figures.

Five bids were received by the State Board of Harbor Commissioners on Monday last for the construction of Section 9A of the sea wall and seven bids for Section 9B. The Daniel Contracting Company presented the lowest figures in each case and will probably be awarded the contract. Their bid for Section 9A was \$275,700 and for Section 9B \$220,000.

Sections 9A and 9B of the sea wall will extend from the foot of Harrison street to the foot of King street. Governor Johnson and Mayor Rolph met with the Harbor Commissioners. The following is a complete list of all figures received:

Constructing Section 9A.

F. Rolandi	\$485,000
Pacific Construction Co.	420,582
Healy-Tibbitts Constr. Co.	297,673
San Francisco Bridge Co.	328,000
Daniel Contracting Co.	275,700

Constructing Section 9B.

Pacific Construction Co.	\$321,100
F. Rolandi	402,000
Healy-Tibbitts Constr. Co.	280,000
Mercer-Fraser Co.	305,600
San Francisco Bridge Co.	277,522
Thompson Bridge Co.	308,000
Daniel Contracting Co.	220,000

The next work to be undertaken by the State Board of Harbor Commissioners will probably be the construction of pier 37, which will be erected at the foot of Mason street. This contract will be followed by the construction of the Ferry Annex, working drawings for which are now being completed by Architect L. B. Dutton, Chronicle Bldg.

Celebrate New Year At The Exchange.

Big Surprise Sprung at the Builders' Exchange When Confetti and Horns Replace Business.

The coming of the New Year was celebrated in the most fitting manner at the Tuesday session of the Builders' Exchange, when all business was abandoned for the time being, and the day given over to festivities. The celebration was a decided innovation but will probably be made one of the features of a San Francisco New Year in the future.

B. R. Walcott is an unusually efficient gatekeeper, but a bunch of Ted Power's Joys slipped through the doors of the Exchange and within a few minutes business had been declared off. Andrew J. Maloney, E. J. Bradon, J. W. Bender, D. O. Church, W. S. Scott, A. W. Lawson, J. E. Steere and Thomas Butcher were the originators of the festivities and secured the consent of President James A. Wilson. A collection was taken up to secure confetti, serpentine and horns. When the party returned from their shopping excursion

a big surprise broke on the late comers.

In far less time than it takes in telling it, everybody had an ear full of noise and a neck full of confetti. Serpentine draped tables, chairs and the light fixtures, and most everybody's neck. The floor of the big room was covered a foot deep with confetti. The best part of the affair, however, was the spirit in which the members entered into the fun. There is no doubt but what more elaborate plans will be laid to welcome the next New Year.

Among those entering into the spirit of the day were the following: Robert Dewar, J. W. Miller, H. E. Drake, Richard Herring, Herbert T. Lynch, L. R. Boynton, R. H. J. Forbes, P. J. Lynch, Charles Hadley, Harry Mondrell, Adam Beck, W. C. Murray, James S. Fennell, George Farrell, Roy Mauvis, Emil Hogberg, Jerry O'Connor, Cruischank, W. S. Scott, Nels Anderson, O. E. Brady, Al Deubrey, M. W. Mowbray, T. F. O'Rourke, E. S. Rainey, Joseph J. Phillips, Harry Larkin, O. L. Meisel, B. R. Walcott, S. A. D. Schenk, Andrew J. Maloney, J. W. Bender, E. J. Bradon, D. O. Church, A. W. Lawson, Capt. Fulford, J. E. Steere and Thos. W. Butcher.

TO BUILDERS AND CONTRACTORS.

Recognized A One Construction Superintendent, General or Carpenter Foreman, Architectural Draftsman and Estimator, with planing mill expw who has been through the mill and can run a general contractor's business with results will be open for position about January, 1913, with progressive firm of contractors who require the services of an all-round man with technical training, who, placed in possession of plans and specifications for any class of construction will suffice to interpret and direct to completion without further comments. Expert in reinforced concrete construction, including cost data, design floor loads, etc. Address Supt., 568 Golden Gate Ave., Apartment 21, S. F. Phone Franklin 7619.

OAKLAND AND ALAMEDA COUNTY.

APARTMENT HOUSE—3 story and
base, frame, \$10,000, Oakland, Cal.
Architect Al J. Mazurette, 1522 Broad-
way, Oakland. Owner, Roger Coit. The
building has been designed to contain
12 modern apartments of three and
four rooms each. All suites will have
private baths, wall beds and separate
entrances. Interior finish will be of
pine, redwood and hardwood. There
will be steam heat. Bath rooms will
be finished in tile. A vacuum cleaning
system will be installed. The exterior
of the building will be covered with
cement plaster and veneer stone. Plans
are complete and the work will be
done by Day Labor.

RESIDENCE—2 story and base,
frame, \$3,800, Oakland, Cal. Archi-
tect, George Anderson, 5456 College
Ave., Oakland. Owner, J. Anderson.
The house will contain seven rooms
and bath. Interior finish will be of
pine and redwood with some oak floors.
There will be furnace heat and open
fire places. Mantels will be of tile or
brick. The exterior of the dwelling
will be covered with cement plaster
on metal lath. Plans are complete and
the work will be done by Day Labor.

SCHOOL—1 story and base, rein-
forced concrete, \$70,000, Oakland, Cal.
Architect, J. J. Donovan, Security
Bldg., Oakland. Owners, City of Oak-
land. This building will be known as
the 13th Avenue School and will be
similar in design to a number of
others recently erected in Oakland.
There will be six class rooms and an
assembly hall. A central heating sys-
tem will be installed. The exterior will
be faced with cement plaster and the
roof will be of red clay tile. Plans are
complete and have received the ap-
proval of the Board of Education. Bids
are being taken and will be opened by
the Board on January 20th. Plans and
complete information may be secured
from the Supervising Architect, J. J.
Donovan.

RESIDENCES—S, 1 and 2 story and
base, frame, \$2,500 to \$4,000, Oakland,
Cal. Architect, Al J. Mazurette, 1522
Broadway, Oakland. Owner, Roger
Coit. These houses will be erected in
the neighborhood of Broadway and
Kales street. Mr. Coit is a well known
Oakland builder, and he will erect the
dwellings for sale. The one-story
houses will contain from five to seven
rooms and the two-story structures
from six to eight rooms. Interior fin-
ish will be of pine, redwood and hard-
woods. Oak floors will be used exten-
sively. The better type houses will
have furnace heat and all will have
open fire places with brick or tile
mantels. Plans are being prepared
and as rapidly as completed the work
will be started under the Day Labor
system.

SCHOOL TEACHERS LUNCH WITH THE LEAGUE.

The School Teachers officially representing the California Teachers' Association will lunch with the Home Industry League of California at the Palace Hotel, Thursday, January 2, at 12:15 P. M. sharp.

The Bay Section of the Teachers' Association will be in session in this city, 1500 strong. This splendid body of educators have under their immediate charge 100,000 boys and girls as pupils. They stand as sponsors for the future of this great army of young people who will soon enter the industrial and commercial life of California.

The Advisory Board, the Executive Committee and the Officers of the Association have been invited to meet the League and to there hear the facts concerning the home industries of California. The members have generally accepted this invitation and will be present.

It is the duty of all members to be present on this occasion.

An interesting program has been arranged as follows:

Opening remarks by the President of the League.

Five-minute advisory talks by Dr. C. V. Cross and Norman W. Hall.

Fifteen minutes' exhibition of lantern slides illustrating California factories.

Five-minute speeches by the following teachers:

F. K. Barthel, President; A. J. Cloud, Secretary; Directors—R. D. Faulkner, W. H. Hanlon, George W. Frick, Alex. Sheriffs, C. B. Biedenbach, M. E. Dailey, P. S. Rosseter.

Come and bring your friends and welcome our guests in strong numbers.

THESE USE THE FORSTER.

The Sharon Estate Building, New Montgomery and Jessie streets; The new two million dollar Oakland Hotel; the U. S. Custom House; the new Barrack buildings at the Presidio; the new City and County Hospital of San Francisco are all equipped with Forster's Water Closet Waste Connection. The above buildings required the best—that's why Forster's was used. Made in California.

CIRCULATE PETITION FOR BOND ISSUE.

SACRAMENTO, Dec. 31.—Two hundred and fifty copies of the Greater Capitol petition, which has been framed by Attorney W. H. Devlin, declaring the necessity for a bond issue to pro-

vide \$700,000 for the purchase by the city of the two blocks bounded by L and N, Ninth and Tenth streets, on which it is proposed to erect two new buildings—One a State Library and Courts Building and the other a building to house the various State officials, who are now illegally residing and maintaining offices in San Francisco, were distributed recently, and the canvassers started immediately getting the signatures of the voters. If 15 per cent of the voters' signatures is obtained the first election, with its expense and delay, will be eliminated and the Commissioners will immediately be asked to call the bond election.

The plan is for the city to purchase the two blocks and donate them to the State, the State in turn to erect the new buildings, the cost of which would be in the neighborhood of \$2,000,000.

TO BOND FOR HIGHWAYS.

SUISUN (Solano Co.), December 31. A large bond issue for the construction of a complete system of good roads will probably be a proposition for the voters of Solano County to vote on in the near future. The Supervisors are seriously considering the matter. The amount necessary will be more than \$1,000,000. The plans cannot be definitely determined until the route for the State highway is settled upon, as the county's roads will be feeders to it.

WATER FILTER INSTALLED.

The Pacific Water Purifying Company, 104 Front street, has recently installed a Filter in the Young Men's Christian Association of Berkeley.

The Filter was installed on the circulating system for the swimming tank water in order to keep the water in the tank clear and sanitary at all times.

The complications that arises from installing filters in buildings already finished has been met in such a way that it is forthly of the attention of owners of buildings who are considering installing filters.

The Young Men's Christian Association report that the swimming tank is more than satisfactory and it has been a large asset in the renewals of fall membership and the general interest shown by the members with the crystal clear bathing water.

The Pacific Water Purifying Company has had a great deal of experience in filtering and purifying swimming tank waters and Architects should know that such a firm is manufacturing filters right here in San Francisco.

LUMBER RATES SUSPENDED.

WASHINGTON, Dec. 30. The interstate commerce commission today suspended proposed transcontinental freight tariffs advancing rates on lumber from British Columbia and Alberta, Canada, and Oregon, Washington and other northwestern states shipping through Colorado gateways to eastern destinations. The effect of the proposed tariffs would be to advance the rate from Portland, Ore., to Chicago from 65 cents a hundred pounds to 89 cents; and from Portland to New York from 85 cents to \$1.08½. Rates between other points show a similar advance.

NEVADA CITY CONSIDERS BONDS.

NEVADA CITY (Nevada Co.), December 31.—A meeting of the City Trustees was held last night to consider a proposition of submitting a bond issue of \$20,000 to The People, the money to be used in the construction of a new City Hall and improvements for the city sewer system.

The proposition found favor with the meeting and at a meeting of members of the Nevada City Chamber of Commerce held Monday night.

FOREIGN TRADE OPPORTUNITIES.

[Inquiries in which addresses are omitted are on file at Bureau of Foreign and Domestic Commerce. In applying for addresses refer to file number.]

Consuls are requested to contribute to this department, and in doing so should in each instance state in what language correspondence should be conducted.

No. 10120. Chemicals, dyes, and appliances for cotton and dyeing works.

A report from an American consular officer in a European country states that a firm well known in all the cotton printing and dyeing works in his district wishes to act as agent for the sale of any American chemicals, dyes, and appliances in this line.

No. 10121. Automatic bolt-heading and nut-threading machines.

A business firm in Russia informs an American consular officer that it desires to get in touch with American manufacturers of automatic bolt-heading and nut-threading machines. Correspondence may be in English, German, or Russian.

No. 10123. Cotton growing and ginning machinery and furniture.

An American consular officer reports that a resident of East Africa desires to receive catalogues of machinery used in the production and ginning of cotton, etc. He is especially interested in the Montgomery and in the Marvin Smith machines. He would also like to receive catalogues of furniture and other articles suitable for colonial use. These latter articles must be able to withstand the hardest kind of usage and be suitable for use in a tropical climate. Correspondence should be in the Portuguese language.

No. 10124. Electric meters.—A report from an American consul in a Latin-American country states that an electric light company in his district will during 1913 supply its customers with

electric meters. This company is in immediate need of 300 meters, of 2 to 15 amperes, single phase, 125 volts, 60 cycles. Correspondence, in English or Spanish, should be addressed to the manager of the Company.

No. 10125. Electric elevators.—An American consul reports that on account of the steadily growing population of his district building operations have been greatly stimulated. With a tendency to higher buildings for residences, offices, and business purposes, there is a growing demand for the installation of electric elevators both for passenger and freight and conditions are favorable for American manufacturers to compete for some of the new business offered. British firms, through long-established connections, practically control the business at present, but there seems to be a fair opportunity for an active agent to secure contracts for the American type of lifts. An effort should be made to introduce elevators with automatic gates, if the addition of the safety gates would not greatly increase the cost of installation. The names of two firms that have specialized in elevator work for the past 10 years, as well as a list of engineering firms, accompanied the report.

LUMBER OUTPUT FOR LAST FOUR YEARS.

WASHINGTON, Dec. 31.—A preliminary statement of the output of lumber, lath and shingles in the United States during the calendar years 1911, 1910, 1909 and 1908 was issued by Census Director E. Dana Durand. It was prepared under the direction of William M. Stewart, chief statistician for manufactures, by Jasper E. Wheelhel. The data were collected in co-operation with the forest service of the department of agriculture and form one of a series of annual reports regarding the lumber and timber industries.

The reported production of lumber in the United States during the calendar year 1911 by 28,107 mills was 37,003,297 M feet board measure, as against 40,018,252 M feet board measure reported by 31,934 mills in 1910; 44,509,761 M feet reported by 45,112 mills in 1909 and 33,224,369 M feet reported by 31,231 mills in 1908. The figures for the four years covered by the showing are substantially comparable, with the exception of those for the year 1909.

The information covering this year was collected by special agents of the census office in connection with the regular quinquennial census of manufactures, and hence covered, theoretically, every lumber producing establishment which was in operation during the whole or any part of that year. The data for 1911, 1910 and 1908 were gathered by correspondence, and while including the cut of practically all of the larger or commercial plants for these three years do not cover the operations of many of the neighborhood or custom mills. It should be pointed out, furthermore, that the totals for 1911 and 1910 do not include the output of any mill which reported a product of less than 50 M feet during these years. Returns for about 4,500 mills of this character were secured in both 1911 and 1910, but omitted from the tabulations. The decreases in 1911 as compared with 1910 of about 4,000 mills and 3,000,000,000 feet board measure of

lumber were doubtless due in part to a delay of about two months in mailing the schedule cards to the manufacturers in 1912.

While the industry of lumber manufacture is widely distributed throughout the United States, a production during the calendar year 1911 having been reported from every state but one, namely, North Dakota, it is interesting to note that nearly 36 per cent of the total cut was reported from the five states of Washington, Louisiana, Mississippi, Oregon and North Carolina, ranking in the order named. Furthermore, it will be observed that two of these five states are located on the Pacific coast and three in the south, which regions have in recent years become the principal centers of lumber production in the United States, their combined output in 1911 forming 68 per cent of the total cut for that year.

The reported cut of softwood lumber in 1911 was 28,902,388 M feet board measure, or 78.1 per cent of the production from all woods, while that of hardwood lumber amounted to 8,100,819 M feet board measure, or 21.9 per cent. The slightly larger proportion of the total production supplied by softwoods during 1911 as compared with the figures for the preceding year is a logical result of the drift in the lumber industry to regions which are chiefly coniferous or softwood.

The five leading species cut in 1911 were yellow pine, Douglas fir, white pine, oak and hemlock, ranking in the order named, the aggregate output from these woods being 26,835,285 M feet, or 72.5 per cent of the total production from all species. Yellow pine alone supplied 12,896,706 M feet board measure, or 34.9 per cent of the total, while oak, the leading hardwood, contributed 3,098,444 M feet, or 8.4 per cent.

The comparative summary for states gives these figures for coast states:

Washington—1908, 2,915,828; 1909, 3,862,916; 1910, 4,097,492; 1911, 4,064,754.
Oregon—1908, 1,468,158; 1909, 1,898,995; 1910, 2,084,633; 1911, 1,083,698.
California—1908, 996,115; 1909, 1,143,507; 1910, 1,254,826; 1911, 1,207,561.

REDDING LAND OFFICE MOVED.

REDDING (Shasta Co.), January 2.—The Redding Land Office closed its doors forever at 4:30 Tuesday afternoon. What little furniture could not be used in the office at Sacramento was sold at public auction.

All the records were packed up and shipped to Sacramento by registered mail. There were two big truckloads of them.

LINCOLN VOTES SCHOOL BONDS.

LINCOLN (Placer Co.), January 2.—By an overwhelming majority of 88 to 12 the bond issue for \$4500 carried here Tuesday. The passage of the above authorizes the Trustees of Lincoln School District to purchase a block of land diagonally across from the school building for \$3200 and place it in shape for playground purposes.

The block in question consists of sixteen city lots, 50x135 each, and when leveled will be a great addition to the school.

The question of the new playground was brought more forcibly to the people and Trustees this year on account of the increased attendance,

which jumped from 180 last year to 215 at the beginning of this term. This necessitated employing an additional teacher in the primary department.

The Board of Trustees composed of Mrs. Carrie A. Gladding, R. J. Toft and J. J. Banquier, will have the new block placed in order as soon as the County Board of Supervisors acts officially upon the bonds.

BANKRUPTCY PETITIONS.

The following petitions in bankruptcy have been filed in the United States district court: Albert A. Lynch, a hotel man at Stockton, liabilities \$21,532, assets \$11,324, of which amount \$465 is secured; Theo W. Hatch, painter living at Tracy, liabilities \$857, assets \$798; Ralph E. Parr, bookkeeper of Alameda, liabilities \$1115, no assets; Jordan & Lack and the Knickerbocker Ladies' Tailors of Oakland, liabilities \$2258, no assets.

CLEARING HOUSE GAINS.

San Francisco's clearing house gains for the year ending Tuesday night over 1911 was \$250,456,408.81, according to a compilation made by Manager Charles Sleeper. The 1912 total was \$2,677,561,952.27, the 1911 total \$2,427,075,543.46. The December gain for the last year was \$14,222,921.25, December, 1912, having a record of \$230,631,977.11, while the corresponding month a year ago \$216,109,055.86 was recorded. Tuesday the clearings were \$323,635.59.

IMMENSE SUM IN AUTOMOBILES.

SACRAMENTO, Jan. 2.—Californians spent \$43,740,000 during the year 1912 for automobiles, according to an estimate prepared by Joseph Mansfield, head of the automobile department of Secretary of State Jordan's office. Mansfield issued 29,160 permits during the year, an increase of approximately 10,000 over the number issued for the year 1911. The total registration since automobiles came into use are 92,199.

Estimating the average value of machines purchased at \$1,500, Mansfield finds \$43,470,000 was spent during the year for new machines.

California's total of permits now exceeds that of any other state, with 5000 more here than in the state of New York, which is next.

FIRST PERMIT ISSUED.

First Permit of the New Year Goes to Contractor J. D. Hannah for Pierce-Arrow Job.

The first building permit of the New Year was issued yesterday to Contractor J. D. Hannah for the construction of the four-story and basement reinforced concrete garage building which is to be erected for the Pierce-Arrow Company at the corner of Polk and Geary streets. The building will cost in the neighborhood of \$100,000 and was designed by Architect John Galen Howard. When completed the structure will be one of the handsomest and most costly automobile buildings in this city.

PANAMA CANAL EXCAVATION.

In spite of a rainfall for the month of October of 14.91 inches, the total amount of excavation at the Panama Canal reached 2,584,823 cubic yards, which works out at a daily average of 95,734 cubic yards for 27 working days.

There was placed in the dam 332,531 cubic yards of fill, and 66,754 cubic yards of concrete was laid.

WINE AND LUMBER PRODUCTS OF CALIFORNIA.

Wine and lumber constituted an important phase of California's prosperity during the year just closed, their activities meaning an interesting financial story of over \$40,000,000.

Southern Pacific and Santa Fe freight traffic officials approve as correct figures just prepared by L. E. Stanton, general agent of the Chicago, Milwaukee and St. Paul road on this coast, relative to the lumber and wine production of California in 1912.

Of lumber, 1,000,100,000 feet, excluding poles and ties, but including shingles, was produced. The output was valued at \$18,500,000. This is the first time in the history of the State that the lumber production has run over the billion mark.

Wine to the amount of 44,000,000 gallons was last year's record. Its value is placed at \$22,000,000.

Much of the lumber goes into box shooks and, as a covering for oranges, dried and canned fruits, vegetables, deciduous fruits and wine, reaches the eastern market. In fact, with 55,000 cars of oranges, 21,500 cars of dried and canned fruits, 14,500 cars of deciduous fruits, 2,000 cars of vegetables, 2,300 cars of cateloupes and 5,000 cars of wine, the quantity of lumber necessary to construct boxes and crates amounts to much more than if shipped as straight lumber.

The box lumber, however, is usually of the poorer grades and is unsuitable for any other purpose while fully answering the call for crates and boxes.

Of the better grades about 225,000,000 feet went East by rail to 2,000 destinations in forty States. An average carload is 20,000 feet and it takes over 16,000 cars to carry these shipments annually to points outside of California.

The largest consumption is west of the Missouri river, but shipments go as far as Maine on the North and Virginia on the South.

An equal quantity moves by sea to Australia, Honolulu, Central America, South America and England from the Bay of San Francisco.

The remainder, or about 500,000,000 feet, is used at home, in addition to shipments from Oregon and elsewhere.

About 30,000,000 gallons of California wine are consumed annually in the United States. Five quart-size bottles are used to each gallon of wine, making 220,000,000 bottles. Of this number 150,000,000 are used yearly in this country, or about one and a half bottles are used to each inhabitant. These figures are used to show the very small production and consumption per capita of California wine in this country—hardly five drops a day.

The quantity of wine produced in California is not one-fourth of the French output annually. Spain and Italy also lead this State. An average block of land in San Francisco is 275x412 feet. The California yearly output would cover this area to a depth of fifty feet and that of France to a depth of 220 feet.

Put in barrels, the annual wine yield here would weigh 440 million pounds, or 220,000 tons. The latter

would make a train of about 15,000 cars, with fifteen tons to the car. At \$15 per ton, the freight charges would be something like \$3,300,000.

Numerous cargoes of the wine go to the Atlantic seaboard by way of Cape Horn and Magellan straits. The Tehuantepec and Panama routes also handle large quantities. Enough of it went by the overland roads during the past two or three months to cause a serious shortage in refrigerator cars.

BIG GAS WELLS OPENED.

BAKERSFIELD, Jan. 3.—Forty million cubic feet of natural gas a day was added to the visible gas supply of California Wednesday night by the bringing in of a gas well by the Standard Oil Company on section 36-31-23 in the Buena Vista hills. It is the highest gasser now active on the Pacific coast and its roar may be heard six miles away.

The Standard will cap the well and turn its output over to the California Natural Gas company, which supplies Bakersfield and west side towns.

The gasser is 2500 feet deep and was drilled near the top of the Buena Vista hills with rotary tools, which are still in the hole. The gasser is near other big wells now producing.

REDUCTION IN WESTERN PACIFIC RATES.

The Western Pacific has announced a voluntary reduction in rates on certain commodities, these rates being applicable to points between this city and Magill and East Ely, on the line of the Nevada Northern. Some of the reductions follow. Canned goods, \$1.25 to \$1.15; table sauce, \$1.29 to \$1.17; cement, 43 cents to 40 cents; powder and explosives, \$2.28 to \$2.21; lumber, 31 cents to 28 cents; fruit and fresh vegetables, 94 to 86 cents; iron and steel (exception structural pieces), \$1.12 to \$1.05; structural iron, 94 to 84 cents; machinery, \$1.05 to 98 cents; nails, \$1.12 to \$1.07; paper, \$1.19½ to \$1.09½; soap, \$1.13 to \$1.03; sugar, \$1.20 to \$1.05.

The reductions are expected to enable San Francisco shippers to compete more strongly for the business between here and East Ely.

YEARLY REPORT OF BUREAU OF BUILDING INSPECTION.

Number, Cost and Classification of Buildings Erected in the Year 1912.

	Buildings.	Cost.

APPRECIATION OF REALTY VALUES

Fifty years ago New York was practically vacant country above Forty-second street. Even south of that point there was much unimproved land. At that time the railroads were beginning to populate the country through which their lines passed. They wanted business, both freight and passenger, and began a sort of campaign to encourage city people to move to the country. Real estate interests fought the railroads, claiming that there was no need for people to go forty or fifty miles outside the city to get into the country, for there was enough country right here to accommodate everybody.

To prove this the tax department made up a report in which it was shown that of the 141,456 building lots in Manhattan only 54,725 were improved, leaving 86,761 lots or two-thirds of the city unoccupied. Of the vacant lots the report showed that nearly 19,000 were south of Forty-second street, and that 78,000 were north of Forty-second street, 54,239 of which were above Eighty-sixth street.

The report closed by saying that there was room enough for all the rapid growth of the next 100 years, and that the railroad drains should not be permitted to go on or vacancies would still be larger. Subsequent years showed that these predictions were far astray, for in the next twenty-five years the unoccupied space in this city was cut down to not more

than 10,000 lots.

Though there are not many vacant lots in Manhattan now the supply of lots available for building improvement in this borough is probably as large today as it was fifty years ago. About 1000 buildings are torn down each year to make space for new buildings. It, therefore, is safe to say that more than half the buildings standing today will be torn down in the next fifty years or before the end of the century through which the tax department thought the supply of building lots in this city would last. New York Sun.

POTASH AND SALT DEPOSITS IN NEVADA.

Silver Peak marsh is a salt playa or dried-up lake of prehistoric origin about twenty miles west of Goldfield and twenty-five miles southwest of Tonopah, two well-known mining centers of Nevada. The exploration was made for the purpose of ascertaining whether deposits of potash salts in commercial quantities lie within easy reach of the surface. No extensive beds of such salts were discovered, although the salts in certain samples of brine contain as much as 3.43 and 3.80 per cent of potash (K₂O). Drill holes were sunk at several points in the old lake bed by means of a small portable drilling outfit, operated by a burro, the boring being carried to a depth of about fifty feet.

Practically the entire surface of the playa, thirty-two miles, is covered with salt that averages in depth about one-quarter of an inch. The upper muds, averaging probably ten feet thick, contain not less than 2 per cent of salt. It is estimated that no less than fifteen square miles of the northeastern part contains a ten-foot saline bed of which at least 60 per cent is salt. It is calculated from these moderate estimates that 15,000,000 tons of salt lies within forty feet of the surface. The high rate of evaporation, which would permit solar concentration of brines, the absence of long-continued rainfall to interfere with operations, the nearness of a railroad, and more especially the high degree of purity of the product as indicated by analyses of the brines, are extremely favorable features in regard to the possibility of utilizing these deposits.

Salt is now being produced on a small scale by Frank Porter of Silver Peak, who states that about 150 tons has been bagged and sold in three years.—Geological Survey Bulletin.

PURE WATER A NECESSITY.

Good Health Depends Primarily Upon Pure Air and Water.

The United States Geological Survey has made some elaborate reports in regard to the water supplies of the State, in many instances going into the analysis of the water itself and determining its use for drinking purposes.

The water supply of San Francisco is becoming a serious question. Not only as to quantity but also as to quality for drinking purposes. Fortunately the hills and mountains of the coast range abound in numerous springs and there is to be had in our city water for drinking purposes at a nominal figure that comes direct from the pure spring.

themselves. One of the best known of these is the **Crystal Spring Water Company**. It supplies water to offices and residences in large 5 gallon bottles with stands. The water comes direct from the Crystal Springs in San Mateo County and is absolutely pure. Analyses by Dr. Franklin T. Green, of the College of Pharmacy, University of California and Dr. Wm. P. Barbat, show the water to be absolutely free from organic and inorganic impurities. Further it contains the essential elements of pure spring water and is always cool and refreshing in the patent coolers that are furnished with the bottles. The office of the company is at 461 Valencia street.

RETARDATION OF DEVELOPMENT.

A study of the phenomena of growth of various groups of the same population has shown that early development is a concomitant of economic well-being, and that a characteristic of the poor is the general retardation in early childhood, and the later rapid growth. It follows from this that there is a corresponding, although not equal, retardation in early mental development, and a crowding of development processes later on, that probably place a considerable burden on the body and mind of the poor, which the well fed and cared for do not bear. The general laws of growth show also that a retardation kept up for an unduly long period can not be made up in the short period of rapid growth; so that it would seem that, on the whole, excessive retardation is an unfavorable element in the growth and development of the individual. Whether there are similar disadvantages in a considerable amount of early acceleration is not so clear.—Dr. Franz Boas, in Science.

SEATTLE FIRM LOSES CONTRACTS.

Employ Asiatics In Construction Work.

SACRAMENTO, Jan. 2.—Because an investigation indicates to the City Commission that the American Portable House Company of Seattle employs Japanese and Chinese in its building construction, that concern will not erect portable school houses for the Sacramento School Department.

The City Board of Education, of which members of the Commission are members, late Wednesday afternoon rescinded its action awarding the contract for the construction of the buildings to the Seattle concern.

The contract for the construction of the portable school houses, which will be used at Tenth and P streets, temporarily, to house children of the Capital School, was let about two weeks ago on the showing that the American Company was nearly \$1000 lower than the next lowest bid. The bid was \$3150. The lowest local bid was that of B. F. Lathrop, who offered to do the work for \$4724.

The School Board, after rescinding its action awarding the contract to the Seattle firm, voted to readvertise for bids. It is hoped by the Commissioners that bids of local contractors will be sufficiently low to keep the work at home.

The School Board was assisted in its investigation of the Seattle firm

by the local Building Trades Council, which was naturally interested in the matter.

FOREIGN TRADE OPPORTUNITIES.

[Inquiries in which addresses are omitted are on file at Bureau of Foreign and Domestic Commerce. In applying for addresses refer to file number.]

Consuls are requested to contribute to this department, and in doing so should in each instance state in what language correspondence should be conducted.

No. 10127. Bimetallic Wire.—The American charge d'affaires, Tangier, Morocco, has forwarded copies of the specifications and blank forms of proposals issued by the General Commission of Adjudications and Contracts for the Sheriefian Government of Morocco for the supply of bimetallic wire for the use of the administration. These papers can be obtained by interested firms from the Bureau of Foreign and Domestic Commerce.

No. 10131. Pumping plant.—Tenders are invited by the Wellington City Corporation for the supply and delivery of a Weir feed pump, wrought-steel piping, cast-iron fittings, etc., for the electric tramways department. Tenders made out on the proper form, will be received by the Town Clerk, Wellington, New Zealand, until February 6, 1913. Copies of the specifications and form of tender may be obtained from the office of the Tramway and Electrical Engineer, Harris Street, Wellington, on payment of \$5.11, which will be refunded on receipt of a bona fide tender. Local representation is necessary.

No. 10132. Grain elevators.—The Argentine Government invites tenders for grain elevators along railway lines in agricultural districts of an aggregate capacity of 1,000,000 tons, at an estimated cost of \$24,333,000.

No. 10133. Harbor works.—Tenders are invited relative to a important harbor works at Jaraguá, in the State of Alagoas, Brazil, and will be opened January 16, 1913, at the offices of the Directoria Geral, Ministerio de Viacao e Obras Publicas, Rio de Janeiro, Brazil. The price is put at about \$2,800,000. The works include the construction of wharves, docks, breakwaters, a bridge, railway lines, the carrying out of dredging operations, the provision of 3 locomotives, 30 wagons, 6 movable electric cranes, 1 fixed crane, etc. Local representation is necessary.

ESTATE BUILDS CAPITOL.

SALT LAKE CITY, Jan. 2.—The inheritance tax paid to the state of Utah by the estate of the late E. H. Harriman will cover about two-thirds of the cost of the erection of the state capitol, which was contracted for today. The estate paid the state nearly \$750,000 and this was set aside by the last legislature as a capitol fund. The building will cost \$1,040,000.

ARIZONA GREAT COPPER STATE.

Arizona has a recorded production of 3,494,333.111 pounds of copper, or 21.38 per cent of the total output of the United States since mining began. In 1911 Arizona produced 303,202,532

pounds of blister copper, as compared with 297,250,538 pounds in 1910. This is the largest output in the history of the state, according to E. S. Butler of the United States Geological Survey, and continues Arizona in first place among the copper-producing states. She produced 27.63 per cent of the total output of the country for 1911.

The steady output of copper from Arizona began about 1875, though there was intermittent production prior to that date, the earliest record of production being for 1862. Since 1880 the growth of the industry has been steady and rapid.

Nine copper-smelting plants operated within the State during the year 1912.

NORTH POINT SEWER OPENED.

The so called North Point sewer, the largest ever built in the city, costing \$1,500,000 and extending from the county line to the bay at the foot of Grant avenue, was opened for use for the first time Wednesday night.

An area of 11,500 acres is drained by the tunnel, which will afford drainage connection to the homes of 80 per cent of the city's population. One of the most important effects of the monster drain is that it removes the necessity of the many small sewers now discharging along the water front.

The number of outlets is reduced by the completion of the sewer from 125 to 5.

TEST S. P. ENGINES.

WASHINGTON (D. C.), December 30. The first annual report of the chief inspector of locomotive boilers of the Interstate Commerce Commission showed that the Southern Pacific Railroad owned 1,328 locomotives, in which 11,594 defects as to boilers were noted. Over 2,000 inspections of locomotives were made on this road during the last fiscal year, and 171 locomotives were ordered out of service for repairs or condemnation. The report covers boiler inspection on locomotives of all railroads in the West and elsewhere. The results were startling in some instances. The total number of defects discovered was 173,321 on about 48,768 locomotives that were found defective, and 3,377 locomotives were ordered out of service.

BIDS TO BE ASKED FOR DAMS.

SEATTLE, January 2.—By the adoption of a resolution by the Board of Public Works at its last meeting, it is made possible for contracting firms to submit bids for the construction of the Cedar Lake dam which is estimated to cost between \$1,000,000 and \$1,750,000.

The resolution reads as follows:

"That in order to definitely ascertain the cost of this work under the contract system, and if proved feasible and economical, to enter into a contract for same, the city engineer is hereby directed to prepare detail plans and specifications, etc., and to submit same to the Public Works Board for approval."

Superintendent of Buildings Ober voted for the contract system on this work but against certain restrictions which will be incorporated into the form of contract.

The dam in question will be one of the largest of its kind in the west, of

concrete construction and over 1500 feet long.

Plans will be ready for contractors about March 1st.

OSTRICH FARM AT BEACH.

Local capitalists will open the Golden Gate Ostrich Farm in the block bounded by 46th and 47th, Balboa and Sutro avenues in this city. This farm will be opened in January and will be the nucleus for an Ostrich exhibit at the Exposition in 1915. Robert Gurnett will be the manager of the farm, and he states that it will compare favorably with the ostrich farms in Sacramento, Oakland, Los Angeles and San Diego.

The buildings are now being erected for the housing of the ostriches within a few blocks of Sutro Heights. Twenty five birds will be installed in the local farm in January, and this number will be increased until the year of the Exposition, when it is expected that this city will boast the largest Ostrich Farm in the United States.

Gurnett states that there will be twelve pens and that the ostriches will be in pairs in these pens. Incubators will be used for the hatching of the birds. There will be a first-class Aviary in connection with the Ostrich Farm. It will be one of the show places in San Francisco.

NOTICE.

In a news item recently given out by the United States Geological Survey, the public was informed of the unwarranted use of cards bearing an official title by a private geologist connected with the Southern Pacific Co. which seemed to place the Government in a false light in connection with certain supposed petroleum lands in California. The press notice was an impersonal one, and some inquiry has been made as to the identity of this geologist. The statement is now made by the Geological Survey, as a matter of justice to other geologists who may be employed by the Southern Pacific Co., that Leon J. Pepperberg was the geologist referred to as having used semi-official Survey cards while in the employ of the railroad company.

LARGE INCREASE IN ILLINOIS AND OHIO COAL PRODUCTION.

Notwithstanding the 'two-months' shut down in the coal mines of Illinois in April and May, 1912, pending the adjustment of the wage agreement, it is estimated by E. W. Parker, of the United States Geological Survey, that the production of coal in the State during 1912 will show an increase of about 10 per cent over 1911. The favorable crop conditions caused an increased demand for coal, both for railroad and domestic fuel. This resulted in unusual activity at the mines during the last four months of the year, in spite of the exceptionally warm weather prevailing for that season and the small quantity of coal required for heating. The car shortage in the last third of the year was not an unmixt evil, for while at times annoying, it did not materially curtail the output and reacted beneficially in enabling operators to obtain generally higher prices. If cuts sufficient to meet all requirements for the full operation of the miner had been furnished in September and October, orders would have diminished consid-

erably, as many consumers and dealers placed duplicate orders with different producers in times of scarcity.

President-elect Wilson has stated that he is in favor of Philippine independence. Whether or not the motley population of the islands are fit for self-government or are capable of maintaining any kind of government is an open question. If we get rid of them it will certainly be a good thing for this country. They have been a costly experiment. And we are annually spending millions to maintain a colony in the orient, a place that is not a white man's country, and a place where we have no particular business.

We have long maintained what is known as the Monroe Doctrine. That is that the American continent is not to be considered a subject to colonization by European powers. And while we maintain this policy it is strangely inconsistent with our attitude in the far east.

Lumber and wine are important California products. More than 40 million dollars worth of these commodities were produced during the past year and a good part of it is exclusively California products. This is the only wine producing state. The foothills of the Golden State and the sunshine that bathes the hills of the Pacific slope produce the grape in abundant quantities. So that the only rival of the old world in this country is California and its wine is known the world over. Redwood is also a distinct California product. The vast forests of the northern part of the state furnish lumber that is shipped to various places. And together with the sugar pine the Sierra and the Coast ranges furnishes more lumber than the State needs.

WATER POWER RESERVATIONS MADE.

Water power reserves were created by the Secretary of the interior during October in California, Idaho, Montana, Oregon and Washington covering an area of 36,902 acres. The land was withdrawn from entry and the reserves made on the recommendation of the United States Geological Survey.

TO REVISE FLOOD CONTROL.

Major S. A. Cheney, United States Engineer in charge of the Sacramento River, has received formal instructions from the Federal Board of Army Engineers at Washington to proceed with an announced revision of the Sacramento Valley Flood Control Project. In accordance with his orders, Major Cheney has sent out, in the name of the California Debris Commission, the following circular, which will be sent to all residents of the valley who are interested in the proposed changes to be made in the project:

"The California Debris Commission has been called upon by the War Department for a report as to any subsequent information bearing upon the report of the Board of Engineers for rivers and harbors, dated December 27, 1910, on the control of floods in the Sacramento and San Joaquin Valleys.

"This report has been referred back to the Board of Engineers for examination and review by the Committee on Rivers and Harbors of the House of Representatives on December 2, 1912.

"As it has come to the notice of this Commission that few have expressed an interest in this matter, you are hereby informed that the Commission will convene to consider your views in the matter, preferably expressed in writing, not later than January 15, 1913."

The instructions received by Major Cheney were very brief, and practi-

cally leaves the matter of revision to his discretion, insofar as preparation of a report is concerned. Major Cheney is instructed, however, to submit his report at the earliest possible date.

NEW RAILROAD INTO LAKE COUNTY.

LAKEPORT (Lake Co.), January 6.—The construction of the Santa Rosa and Clear Lake Railroad, which is still a live issue, according to recent reports, will be a link in a new route between San Francisco Bay or north coast points and the Sacramento Valley. The line is to be extended from Clear Lake into the Sacramento Valley eventually.

The road will be part of the Golden West Scenic System, and will be a valuable traffic aid, replacing stage lines and freight teams in two directions. For all the north of the bay counties it will furnish a shorter route to Sacramento and other Valley points. It will be particularly advantageous to the thousands of Summer visitors to Lake County resorts.

MONTHLY REPORT OF STATE SECRETARY.

Secretary of State Frank C. Jordan last Friday afternoon announced the report for business transacted in his office for the month of December and for the year 1912. The report shows that the total receipts for 1912 was \$1,170,330.93. The department totals making up the general total for the year were as follows: Fees from the registration of motor vehicles, \$74,803; general office fees, \$281,249.18; corporation license taxes, \$808,873.75, and candidates filing fees, \$5,905. During the month of December the fees amounted to \$16,220.90; corporation license tax, \$6,143.75; registration of motor vehicles, \$6,594.50. There were 241 new corporation licenses issued, 43 corporations were dissolved.

CONSULTING EXPERT

Heating, Ventilating, Electrical Wiring, Plumbing, Etc.

Expert Architects assistant for laying out work as above. Highest references. Formerly Mechanical Engineer for State Department of Engineering also Bureau of Architecture of San Francisco.

Editorial Comment.

In last Sunday's edition of the Chronicle, called The Marvelous California Edition, it prints some quarter page pictures of what it calls the makers of California. And in that the face of Patrick Calhoun leads all the rest. Shades of our ancestors! This is the leading citizen of the state, the purest patriot and the one to whom we should look up for an ideal of citizenship. How much did Calhoun and Mullally and the rest of them pay for their pictures and the write up that graces the pages of the Chronicle? Is this the reward of the Chronicle's diligent defense of special privileges and its means of getting even for its faithful servitude of the special interests?

And these are the editions that are to exploit California resources and California citizenship and is to be sent throughout the world as a promotion edition. From the looks of the edition the makers of California are those who are able to pay for the advertisements.

The new Municipal Railway on Geary street has started out auspiciously. The cars are good and the service for the number of cars is excellent. It is to be hoped that the line will be extended to the fair site and on other streets as conditions will admit. For even if the system does not make any money on the start or if it goes behind the people will cheerfully bear the loss to get some relief from the domination of the trolley trust. This talk about the genius of Patrick Calhoun and the superlative wisdom of private ownership is all nonsense. The first requisite of a public utility is to serve the public. As conducted by Calhoun or private capital the first requisite is to pay the interest on the bonds and dividends on the capital stock about two-thirds of which represents nothing but promoters' fees. Under such conditions the public gets it in the neck. Labor is paid the least amount it can be paid and the cost of equipment and accommodations for passengers is kept at the lowest notch. If the public is served properly by the municipal railway a lot of this talk about the superior wisdom of financial magnates and the divine right of private capital will cease.

The reports in the newspapers state that this committee of investigation into the methods of the money trust has disclosed the fact that the support that J. Pierpont Morgan gave to the country in 1907 was simply to distribute thirty-nine millions of money belonging to the government. This

money was given to him without interest and he loaned it out at 6 per cent. The newspapers of the time had him pictured as some giant colossus or caryatid holding up the financial edifice that threatened to incontinently topple from turrent to foundation stone. The New York World at that time printed an editorial to the effect that while a business man, no matter if he had ten millions in good assets, could not go to the banks and borrow ten thousand dollars during November 1907. Yet the records showed that there was more money loaned during that month than in any other in the previous history of New York. And it was loaned to the inside directors of great banks and trust companies, who were thereby enabled to gobble up most of the gilt edged securities at a very low figure. Surely the method of these money barons do need investigation. It is high time that they be seen in their true light and be taken for what they are worth. Not condemned indiscriminately by cranks or lauded to the skies by snobs.

Statistics are usually uninteresting reading, but when they cover the result of a year's product they show facts in a more eloquent manner than words can convey. Bradstreet's annual statistical report shows the year 1912 to have been the most prosperous year in the history of the country. This in spite of the fact that in many instances money moved slowly and operations in various lines of business seemed a good deal at a standstill.

The aggregate productions of the principal cereals exceeds the aggregate of all previous years of the same cereals. Prices have been in the main lower for grain, particularly corn, which is the principal product of the Mississippi valley states. The cotton crop was smaller by something like two million bales than that of 1911, but owing to the increased price it was worth about 2.4 per cent more than that of last year.

Stocks sold for less. There was less activity on the stock exchange and there seemed to be evidence of public distrust in the securities generally offered to the public. This is not bad in the last resort as stock gambling is not a thing that brings any permanent prosperity and is not to be encouraged. While the market for good securities may have suffered in sympathy, the general effect has been to save the public money from their investments in stock juggling concerns.

So long as there is plenty of products raised the country is bound to be prosperous. There may be a slow movement in financial circles owing to readjustment but so long as the basis of prosperity is sound things will work out right in the end.

In regard to the investigation of the money trust the Los Angeles Times in a recent editorial has this to say:

"If there is a bitter fight over municipalization, it will get into the bond market. The millions behind the power companies (whose bonds for immense sums are out) will naturally head off the sale of the city's bonds, if possible—and they control most of the big bond buying companies."

This is the talk of the organ of the interests. If the city attempts to establish its own power and light plant from the Owens river project the money trust will head off the sale of the bonds. This has ever been the cry that if the people attempt reforms the moneyed men will withdraw their support and hard times will follow.

Either there is a money trust or such statements are untrue. The fact is that a few men do control the finances of the country. And in cases of this kind the impression is sought to be given that the money trust is a great deal more powerful than it really is.

The comment of The Los Angeles Times is on the formation of the \$100,000,000 power merger that has been organized to fight the city of Los Angeles. The State of California has experienced the effect of the money trust in its opposition to the disposal of the state highway bonds. The security is good and the interest is right yet there has been a boycott on the bonds as it is said to "teach the administration a lesson." The threat of the Times is that if the City of Los Angeles begins to furnish power to its citizens the bond market will be closed to it.

Surprises are constant in climatic conditions. The recent cold snap was an unprecedented experience in California, especially since citrus fruits have become such an important part of the products of the State. It is estimated that one-half of the crop is lost by reason of the unprecedented cold. It is a case that happens once in a while where weather conditions so happen to combine that the unexpected and unheard of happens.

It is to be hoped that the damage has been over estimated. Cold weather in California is a less common thing than frost in Florida. The Pacific Coast climate is noted for its regularity and freedom from changes and sudden extremes of temperature. It is one of the cases that presumably will happen anywhere in the world where conditions combine to produce an extraordinary circumstance.

In his biennial message to the Legislature in reviewing the work of the past two years Governor Johnson calls attention to a remarkable record of achievement. In speaking of the work of the present Railroad Commission the Governor says:

"At the extra session of the Legislature of 1911, the Public Utilities bill was passed. Since that time the Commission has done a wonderful work.

In the thirty-two years previous to June, 1911, there was less work done by the Railroad Commission of the State of California than has been done by the present Railroad Commission in any one month of its existence.

Probably during the thirty-two years of the existence of the Railroad Commission prior to 1911, ap-

proximately one hundred complaints were presented to that Commission, and in less than two years, to the new Commission, approximately two thousand complaints have been presented.

The Commission has acted with such justice, fairness and ability, that it has won the respect and regard of nearly all of those whose interests have come within its jurisdiction."

The beneficial results of the work of the Railroad Commission have become patent to everyone. The reductions of freight rates and the improvements of service are such that they are apparent to everyone.

The State Board of Control has also saved the State thousands of dollars in the administration of its institutions and at the same time broken up the ring of grafters that had been fattening at the public crib.

There is no disposition to rest on past laurels. The Governor recommends various measures of public policy for the consideration of the Legislature. Among them is his recommendation in regard to immigration, to see that the immigrants that will come at the opening of the canal do not stop in the cities. The point that he emphasizes is to prevent congestion in the cities and towns and to see that the country gets the population that it needs. Legislation favorable to flood control is also recommended. In general the Governor gives a fine showing of what actual Progressivism has accomplished in this State during two years. The State is now distinguished for advanced policies and government in the interest of the People as before it was notorious in the hands of corporation control. May the good work go on!

Among the reviews of the year for the State of California the increase of population is an important item. For on the increase of population depend primarily all production and local consumption of products and the commerce and trade generally of the State. The best method of estimating increase of population is through the reports of school attendance as the average per cent of population attending schools varies very little from year to year. These figures compiled at the office of the State Superintendent of Public Instruction show a substantial increase for the year.

State Superintendent Hyatt reports that the present attendance at the elementary schools of the State is 279,985 for 1912, as compared with 251,321 in 1910, when the Federal census was taken, or a gain in the two years' period of 28,664, and an attendance at the high schools of 37,954 in 1912, as compared with an attendance of 30,893 in 1910, or a gain of 7,061. The population of the State, according to the census figures of 1910, was 2,377,549. The ratio of the average daily school attendance in 1910, 282,214, to the Federal census, 2,377,549, was 8.42. This ratio applied to the average daily attendance for the present school year, 317,939, gives the population estimate for the State at the present time of 2,767,046, an estimated increase of 299,457, or 12.6 per cent. To appreciate what a large increase in the population of the State this is, it can be stated that this new population is equivalent to the population of the following six

cities, as shown by the last Federal census: Oakland, Alameda, Berkeley, Sacramento, San Jose and Vallejo. This increase in population has not been confined to any particular section of the State, but as shown by the reports of the different County Superintendents, the increased population is shown to have been distributed generally over all portions of the State. If the present rate of growth of the State is maintained during the next two years, California will have a population exceeding the 3,000,000 mark. This is a substantial and healthy showing and the increase seems to indicate a general increase of population of permanent citizenship.

Some of the Improvement Associations have entered a protest against the further employment of the Traction Expert Bion J. Arnold. What good the city is getting from the expense of employing this highly paid expert it is hard for the laymen to see. The charter amendment proposed by him was lost at the election and its language was so uncertain as to leave doubts in the minds of the voters just what would be its effect if passed. What is being done in the matter and what is the city getting for its money?

Snow in San Francisco is a novelty at any season. The last few days have been peculiar in many respects. Unprecedented low temperatures have been followed by rain and snow so that even the hills of the coast range have borne the appearance of an Eastern winter. Outside plumbing is still safe, however, and while California buildings may not generally be equipped with heating equipment sufficient to make it comfortable during such periods it is still the land of sunshine and flowers.

The Post Office Department has a great many kicks because of people mailing packages under the new parcels post system at mailing boxes and placing on them ordinary letter postage stamps. Instructions have been sent broadcast that special postage is required and that the parcels can only be mailed at central post office stations. As usual people pay no attention to the instructions or else forget them and the result is a lot of unnecessary work and vexatious delays to all concerned. If you have a parcel to mail procure parcels post stamps and take it to the nearest central station.

Federal Judge Anderson in sentencing the labor leaders remarked that government by injunction is better than government by dynamite. That is true but there is no reason why there should be government by either. In fact too much government by injunction is liable to result in government by dynamite. Particularly is this true in the case of the injunction by the State courts of Indiana to prevent the calling of a convention for the formation of a new State Constitution and which Governor Marshall has appealed to the Supreme Court of the United States. This injunction business has been greatly overdone in the service of the interest. The result has been to bring the courts into the contempt of good people and necessitated the movement for the recall of judges and the restoration of the government to the people.

The Architectural Side Of The Question Of Interior Illumination.

(Melvin Spencer in Western Canada Contractor)

With the improvements made in artificial lighting during the past few years, illuminating effects which were considered impossible not long ago, now form important parts of the architectural scheme of many of our more important buildings. It is encouraging to note this development and the satisfactory results attained, because it proves that wherever successful spectacular illumination is achieved, the architects and engineers have worked hand in hand. It is necessary that both architect and engineer should meet on common ground, and while the ideas of both may differ to a material extent there is a neutral ground, on which they both can agree if willing to compromise to a certain extent. In many cases, however, the engineers do not understand or appreciate the importance of the architectural effect, and if their recommendations were carried out exactly as given, the entire conception of an interior would be spoiled. On the other hand the architect often attempts to produce special effects in artificial illumination, keeping uppermost in his mind the architectural detail.

Results in the past have proven that this is disastrous, as it is seldom that an effective scheme of illumination, along special lines, can be worked out, unless most careful attention is paid to apparently minor and insignificant details, which have to be attended to when the plans are first drawn. Perhaps in no other branch of illumination is this more strikingly illustrated than in the use of cove lighting for interior work. In certain classes of interiors, architects have always been more or less in favor of this idea of lighting a room, but in nine cases out of ten, the results have been unsatisfactory both from a lighting as well as an architectural standpoint. The only reason for such results has been an insufficient understanding of the factors entering into the successful carrying out of this type of illumination.

A difference of a few inches in the position of a cornice will make or mar an installation of this kind. Equally important is the contour of the cove without the cornice. Often a slight change in the shape or treatment of a ceiling will make a remarkable difference in the efficiency and appearance of cove lighting.

There are many skilled engineers, who have instructed themselves in the essential principles of perspective and architectural details, and are willing to sacrifice an ideally perfect installation in order to preserve the architectural effect; where this is done, both the architectural beauty of a room may be preserved and the illumination will be successful.

Lighting Large Interiors.

With the use of properly designed reflectors, it is possible to light an interior of large dimensions, such as an

auditorium of a church, or dining room of a hotel, so that not a lamp is visible, and the light is evenly distributed over the ceiling. In cove lighting there is too often a blaze of light immediately above the cornice, producing a bad glare and comparative darkness in the center of the ceiling. This ruins the effect and purpose of concealed lighting, as in reality the lamps are not properly concealed, because due to the intense glare above the cornice the source of light is easily discovered, while the soft, subdued illumination desired is utterly lacking. When an architect first determines the treatment of an interior, rough plans or sketches should be forwarded to experts in illumination for suggestions. They can probably make slight changes which will materially improve results, and the design of the cove in the cornice may be left to them. A special reflector may then be designed that will direct the maximum flux of light where desired, so that an even illumination of the ceiling is possible; if these sketches are carefully followed by the plasterer, so that the cove is made to fit the special reflectors designed, successful results are the rule.

The difference between successful and unsuccessful installation is due largely to this preliminary consultation. The same applies to lighting of large interiors by means of reflectors concealed behind pillars or piers, as in the sanctuary of a church. If reflectors are not carefully designed, the tonal quality of light will be entirely lost, instead of having an evenly lighted interior, a decidedly spotty one will result. A conspicuous example of the better class of lighting of this kind is in the Cathedral of St. John the Divine, New York City, where the light is entirely concealed and remarkable for its even tone.

In church illumination, it is often desirable to equip lights of this character with dimmers, so that any degree of intensity can be secured, as it is often advisable to have dim religious light during certain ceremonies, and other occasions festive in nature, a blaze of light is desired. Church architecture, with its long vistas and vaulted ceilings is, as a rule, not adapted for fixtures, or rather, it is difficult to adapt fixtures for this style of architecture. In the better class of church interiors, at the present time, an effort is being made to do away with fixtures and secure a brilliantly lighted auditorium, with the lights concealed. The interior construction often determines the advisability of adopting this plan, but two or three schemes have been worked out successful in the larger churches throughout the country, that might be of passing interest.

One scheme consists of the use of strips of carefully designed reflectors, concealed behind the piers or tympanum of arches. In other cases, where a flat or arched ceiling is used, it is

often possible to incorporate in the ceiling design a decorative panel, using stained glass, and above the stained glass, among the rafters or false ceiling, to place powerful, especially designed reflectors, which will force the light through the stained glass and provide illumination for the auditorium. This opens up an infinite field for the elaboration of church work that will give results as effective by day as by night. The consumption of current by the latter method is often not as great as the use of fixtures involves, and the result, if properly designed reflectors are used, is uniformly successful. Often an ornamental corona or moulding is made, in which to set the stained glass panels, the design of which matters little to the efficiency of the system, but can be adapted to the needs of individual installations.

This system has been successfully applied in groined vaulted ceilings, and where such an ornament has been made it has produced a striking effect both day and night. The possibilities of this scheme in the treatment of interiors, such as auditoriums, ballrooms, restaurants, lodge rooms, etc., are endless, as it is possible to design a hanging ceiling, conceived as a unit of light, and decorative designs can be worked out with lighted portions as a part of the ceiling design. Arrangements can be made that, during the day, only sufficient light is used to make these panels luminous, so that the design conceived for a night effect will be equally as effective by day without wasteful loss of current. Some really remarkable installations of this character have been made, rooms 100 feet square and 70 feet high being perfectly lighted without a lamp being visible.

In considering the architectural effect of interiors, under artificial illuminations, the utmost attention should be paid to keeping the light source screened from the eye as much as possible. It is a well known fact that details which are quite indiscernable when brilliant lights are exposed to the eyes, appear with remarkable sharpness if the direct light is shielded from the retina. In many cheap vaudeville houses, where a quick change of scene is desired without lowering the curtain, brilliant lights are flashed in the eyes of the audience, with the result that movements on the stage are invisible. This is simply an exaggerated example of the effect of exposed lights and the blurring of details.

This principle has special application to scientific lighting of working surfaces, such as desks, draughting tables, etc. In the lighting of banks, the proper illumination of double desks, single desks, bookkeepers' desks, etc., are of special importance, and this item has been the source of considerable worry to the architect, as much atten-

tion has been paid to it and still results have been unsatisfactory. Generally, brackets with cone shades are used in various combinations, but results have always produced a bad glare line at the point where the light was reflected directly in the eye.

The Lighting of Banks.

A special system has been designed for the illumination of banking desks, whereby the principle of cross reflection is used, and the light is forced on the working plane at an angle approaching 180 degrees, so that no light is reflected directly into the eyes. The result is that no glare is produced. Cold drawn bronze is used as a framework for these desk lights, with the result that no direct light is visible to the eyes and the angles of reflection can be so designed that an even light is diffused over the working plane. The proper illumination of the cages is another problem which has always worried the architect, both from its practical and artistic side. Where brackets are used, the source of light is directly in the line of vision of the clerks, and the lamps are generally disfigured by the use of blotters or tissue paper used to lessen the glare, with the result that the dignified and harmonious appearance of the bank interior is ruined.

A New System.

There has recently been developed a scheme whereby the source of light serves as a cornice for the screen. Cold drawn bronze, in appropriate mouldings, is used for the cornice, and equipped with a ground glass diffusing door. Inside of this frame work correctly designed reflectors, with tungsten lamps, are placed, so that a continuous line of light results. By daylight, the appearance of the screen is symmetrical and dignified, and by night no exposed light source is visible. The same idea can be carried out on the partition screen, and where no counters are used blank mouldings can be employed, so that the entire cornice presents a uniform, harmonious appearance.

The Lighting of Hospitals.

The lighting of hospitals is of such a nature that very little significance can be attached to its architectural relation to the rest of the building, but as the architect is compelled to look out for the best interests of the people who are to use his building, and as proper lighting is of the utmost importance in hospital work, it is worthy of attention. For the ward rooms the eyes of the patients are generally in a weakened state, due to a more or less weak physical condition, care should be taken to protect the eyes from direct light, and for this reason, white enamelled indirect-lighting fixtures of a simple design and provided with a glass cover to keep dust from accumulating, should be provided. These are in keeping with the spotless appearance of the interior of ward rooms and can be easily cleaned and kept sanitary. In the operating room a white enamelled fixture can also be used, and care should be taken that a ventilated reflector is chosen, as high candle-power is required in this work and the heat generally developed by such lamps is a source of annoyance and sometimes of positive suffering to the surgeons.

Lighting Store Windows.

Even the lighting of a store window

has its architectural significance, since the finest and most carefully planned window can be spoiled by improper lighting. It now a generally accepted principle that the source of light should be totally screened and the light focused on the goods displayed, but very often the effect of the window is spoiled by an annoying black reflection showing lamps and reflectors in the back panel of the window. This can easily be avoided by a properly designed reflector. In many cases, where an open back, or a partially closed back is used, and where the source of light for the window display is visible from the interior of the store, it is advisable to use a drawn bronze moulding which will harmonize with the transom bar, thus giving a finished appearance to the window without the annoying glare generally present.

Very special problems in illumination come up for consideration in the architectural routine, such as the lighting of art galleries, squash courts, etc. In private residence work, it has often been difficult to make these special reflectors harmonize with the general scheme of the interior, but at the present time these reflectors are available in various moulding effects, so that the design can be carried out in any period and readily made to serve an ornamental purpose.

It is these problems which occur in ever-changing combinations that makes the treatment of illumination in relation to architecture a difficult problem. Each one needs special attention and care, but the solution can generally be found when perseverance, patience, and correctly designed reflectors, properly placed, are used.

Mixing a handful of burnt lime with 100 grams of linseed oil, boiling down to the usual consistency of putty, and allowing the plastic mass to spread out in a thin layer to dry in a place where it is not reached by the sun's rays, yields eventually a very hard putty, when required for use, it is made plastic by holding over the funnel of a lamp; on cooling, it regains its previous hardness.

An 18-inch vitrified clay pipe sewer recently failed by cracking in Savannah, Ga. The cracks in the pipe were longitudinal and occurred at the invert and top of the pipe. The director of public works, A. S. Guckenheimer, attributes the failure of the pipe partially to the nature of the soil in which it is laid, it having been necessary in constructing the sewer to saddle the pile and to lay the pipe in these saddles. Heavy traffic and the nature of the soil was the cause of the trouble. The sewer was laid at a depth of about 10 feet. At first it appeared as though the same conditions might exist for a greater distance, but excavations made at several points about 100 feet apart showed the sewer at these points in good condition, and the soil of a better nature than at the particular point where the break occurred. The remedy adopted was to have any sheet pile driven to make the excavation, to lay a solid concrete foundation, and to lay in the sewer on this concrete bed, carrying the concrete up practically to the top of the sewer.—Western Canada Contractor.

LAYING AND FINISHING HARDWOOD FLOORS.

The increasing popularity of hardwood floors in residences has been one of the interesting developments of the past decade. Until a few years ago it was considered sufficient for the reception hall and parlor to be floored with hardwood, but the residence owner of today usually demands that his entire house be treated in this manner.

The great beauty of hardwood flooring is one of the reasons for the favor accorded it, but the fact that it is more permanent, having little depreciation; that it enables the floors to be easily cleaned and thus is more sanitary, and finally, because a house with hardwood floors is more readily saleable than any other, the owner finds it advantageous to have them if they can possibly be afforded.

The fact that hardwood floors are an asset in favor of the sale of a house has caused many builders who make residences for immediate sale to put in hardwood floors, even if a sacrifice has to be made in some other part of the house. The real estate dealer who has homes for sale makes the fact that hardwood floors are to be found throughout prominent in his advertising.

There are, of course, hardwood floors and hardwood floors. The great demand for work of this kind has resulted in some rather hasty attempts to put jobs through, and now and then dissatisfaction has been the result. The work of putting down a hardwood floor is a task calling for competent labor, and even in the case of ordinary tongue-and-groove stock, which does not require the same expertness as that demanded of parquetry, the actual laying should not be relegated to the inexperienced workman.

Beginning at the beginning—the mill—hardwood flooring is made of white oak, red oak, maple and some other woods, though these are the leaders. Quartered oak, in view of its splendid figure, offers the greatest possibilities, and is consequently more popular than any other kind of flooring. Quartered red oak has a color that many people prize above that of white oak, and consequently much of it is put down. Maple has a fine, even grain like color, and is well adapted to flooring.

Inasmuch as flooring is comparatively thin, ranging from 5-16 to 13-16 inch in thickness, it is particularly susceptible to changes in the temperature and humidity. From the time that it is turned out of the mill until it is laid down, therefore, it should be carefully handled and exposed to as little variation in these connections as possible. In fine work, such as parquetry jobs, many manufacturers of flooring make and ship the material just before it is to be used, in order not to allow the squares to have an opportunity to absorb moisture or otherwise deteriorate.

If the builder or hardwood flooring contractor carries much stock on hand, it should be kept in a compartment which is well closed and which, preferably, should be well heated. In this way there will be no chance for flooring which has been purchased at a stiff price to come out of the warehouses anything but fit for service. In the case of special designs which have

to be manufactured to specification, there is, of course, no occasion for the use of heated storage rooms, since this work is put into the job as soon as it is received from the mill.

If the flooring is laid over a base of inferior wood, as is usually the case, it is absolutely essential that this be thoroughly dry. In order to insure the absence of moisture, it is desirable that the stock be kiln dried, and before the flooring is laid down the contractor, if he has not had charge of putting in the sub-floor, should make sure of his ground in this respect. If this is not done, the chances are that the floor will prove defective, and in that case a lot of explanations which will not explain as far as the house owner is concerned, will be in order.

Some time ago a flooring expert was called upon to lay down a large hardwood floor in what was to be the ballroom of a handsome residence in New York City. He made an examination of the sub-floor and found that it contained excessive moisture, not having been thoroughly dried. He explained this to the owners of the property, and pointed out that in order to secure good results it would be necessary to heat the room and allow the floor to dry for several weeks. The owners did not believe this to be practicable, and therefore ordered the work to be done immediately. It was laid with the understanding that the contractor did not assume responsibility for its permanent stability.

The ill effects of the moist underpinning were not evident immediately, but about six months after that they were easily apparent. The floor cracked in many places, and in some places sagged and in others buckled, reproducing the effect of the green flooring beneath. The surface, instead of being the beautiful, uniform expanse of brilliant hardwood that it was originally, was decidedly unattractive. The owner of the residence lost no time in informing the contractor that his prediction had come true, and authorized him to tear out the entire floor, substructure and all, and put in material that he could guarantee to do the work.

Similar trouble results when flooring is laid over concrete without proper protection. In a good many business buildings, even those which are comparatively small, it is getting to be customary to have the floors laid of some fireproof material, and this is frequently of cement construction. The concrete is, of course, put down wet, and while it sets after the crystallization process takes effect, it does not lose all of its moisture immediately, by any means. It is therefore evident that to put down a piece of thin hardwood flooring over this mass of moist stone, which is what the concrete really is, is to expose it to the most unfavorable conditions imaginable.

Sometimes an effort is made to get quick results by laying strips, upon which the hardwood floor is to rest, in the concrete at the time it sets. This is unsatisfactory, since the strips themselves will feel the effect of the moisture, and the flooring that is laid down over them will ultimately get the benefit of it as well. It is the best, and in fact the only safe plan, when concrete is used, to permit it to dry for

several months before the flooring is laid. If this is impossible the concrete should be waterproofed, and several strips of waterproof paper laid between the concrete and the wood above. A substructure of pine or other less expensive material should always be laid, so as to enable the surface structure to have a dry, firm foundation.

Occasionally where a hurry-up job is being put through, the hardwood flooring men are told to get busy when the building is not completely enclosed. This is a most hazardous undertaking, and to lay a floor in cold weather with doors and windows still open is running a risk that a careful workman doesn't like to take. Most flooring contractors find it advantageous to have charcoal heaters put in and to warm the rooms in which the flooring is to be put down with the idea of making assurance doubly sure. They arrange so that they are the last contractors in the building, and so that the structure can be closed as tight as the proverbial drum. In this way they eliminate practically every chance of faulty work, and insure satisfaction to the owner, to themselves and to the flooring manufacturer who turned out the material.

Even when 13-16 Inch stock is used in a residence where there is no concrete work, it is good policy to put the hardwood down over a sub-floor. It has gotten to be a common occurrence to see flooring of this type nailed down directly on the joists, without any supporting foundation. While this is not fatal in that it will cause the work to turn out badly, it is objectionable from other standpoints, and is not recommended. Greater permanence is assured by having a foundation structure, and as the cost of the latter is not great, this can usually be arranged for without increasing the expense of the floor to any considerable extent.

Finishing a hardwood floor, especially where there is a great deal of parquetry, is one of the hardest parts of the job. One reason for this is practically all other interior trim comes to the carpenter finished and sandpapered and ready to be fixed in its place. Formerly nearly all of the cabinet work required scraping and finishing by the carpenter, but with the improvement in the methods of the manufacturers, all of this, with the exception of the flooring, is now done at the mill. Owing to the fact that it is impossible to anticipate conditions under which the work is to be laid, it is best to have the flooring scraped after it is put down.

This puts it up to the carpenter to attend to that job, although as one flooring expert said, there are a large number of otherwise expert workmen who not only don't know how to scrape a hardwood floor, but don't know how to sharpen a scraper. Without attempting to go into details regarding this feature of the work, it may be stated that the floor should be scraped with the grain, and that uniformity in the finish is the attribute which must be secured.

While the work of the hardwood flooring man is complete, as far as his immediate responsibilities are concerned, after he has laid down the floor and scraped it until the proper

finish has been secured, it is good policy to carry the work a bit further, so as to include instructions to the owner of the property, if he is to occupy it as a residence or to the tenant who comes after.

The care of hardwood floors is an art which many people know little about, but fortunately there is getting to be a rather extensive literature on the subject. The proper use of wax and varnish, and the treatment of the floors after the first coat has been applied, are all topics which can be legitimately dealt with by the flooring man, for by explaining to the "ultimate consumer" the various problems to be met with in the use of hardwood floors, better appreciation of the work done and greater insurance of permanent satisfaction are attained.—C. H. Grain in The Building Age.

OIL-MIXED CONCRETE.

Concrete as a construction material has attained wide popularity. Nevertheless, it has faults which have rendered it of little value for certain classes of work. Perhaps the most serious of these faults is its porous, absorbent qualities. This is evidenced by the damp appearance of concrete houses during periods of wet weather, and in reservoirs that persist in losing water.

Until recently it has been impossible to produce a concrete mixture that would not absorb moisture. While carrying on experiments with a view to obtaining a non-absorbent, dustless road material, an engineer, Mr. L. W. Page, found that when a heavy, mineral residual oil was mixed with Portland cement paste, it entirely disappeared in the mixture, and, furthermore it did not separate from the other ingredients after the cement had hardened. The possibilities of oil-cement mixtures for waterproofing were recognized, and further extensive experiments were carried out in order to ascertain the physical qualities after oils had been added. The results are, briefly, these:

(1) Concrete containing oil has been demonstrated to be damp-proof.

(2) The admixture of oil does not affect the tensile strength of the concrete, where the mixture consists of one part of cement to three of sand, with the oil added, not to exceed 10 per cent of the weight of the cement used.

(3) The compressive strength of the concrete suffers to a slight extent where oil is used in the mixture.

(4) The bond of oil concrete to plain steel reinforcement is much less effective than when the oil is left out. In the cases where deformed steel or wire mesh was used, however, the bonding was found to be satisfactory.

(5) Petroleum residuum oils which conformed to somewhat scientific specifications were found to be the most suitable for this class of work and considerable extra care is necessary in the mixing of the concrete. In short the results of the experiments go to show that the use of oil in concrete has enlarged the field of usefulness of one of the most important building materials. Such structures as basement floors and walls, cisterns, silos, reservoirs, roofs and concrete blocks

can, in this way, be rendered damp-proof at a comparatively trifling expense.—Western Canada Contractor.

HOW TO PATCH A CONCRETE FLOOR.

When a cement floor surface begins to wear it is often desirable to patch it and the way in which this can be done to the best advantage is described in a recent paper prepared by President L. C. Watson, of the Abertshaw Construction Company, Boston, Mass. In this paper he gives the wrong way to do the work as well as the right way, and we present both herewith for the benefit of our readers:

The Wrong Way.—Commonly a sand and cement mortar is made, some cutting is done and the mortar is put in and scrubbed with a steel trowel until smooth. It is then covered up for awhile. If the concrete under the patch is left dry it soaks up the water of the mortar. As a result the mortar does not set. If the room is dry or hot the surface of the patch dries out and for the same reason it does not set. If the concrete under the patch is dusty the patch does not adhere to the concrete. If the materials in the mortar are not suitable, naturally the patch wears badly, particularly as it is obviously located at a point of severe wear.

The Right Way.—Cut down the worn place at least 1½ inch. This cutting should be carried into the strong unbroken concrete and the edges should be cleanly undercut. The bottom of the cut should then be swept out, clean-blown out with compressed air or a pair of bellows, if available, then thoroughly wet and scrubbed with a broom. In this way small loose particles of broken material which the chisel has driven into the surface are removed. A grout made of pure cement and water about the consistency of thin cream should be scrubbed into the pores with a broom or brush, both at the bottom and sides of the cut. Following this a stiffer grout, about the consistency of soft putty, should be thoroughly compressed and worked into the surface, which has already been spread with grout. Finally, before the grout is set, a mortar made of one part cement to one part crushed stone or gravel, consisting of graded sizes from ½ inch down to the smallest excluding dust, should be thoroughly mixed and put in place, then floated to a proper surface. Cover with wet bagging, wet sand, sawdust, or other available material. All trucking should be kept off and the surface kept thoroughly wet for at least one week or ten days.

If a particularly hard surface is required, 6-penny nails are sometimes mixed with the mortar and other nails stuck into the surface when the patch is finished. This will produce a surface which is extremely hard and durable.—Western Canada Contractor.

UNITED STATES CIVIL-SERVICE EXAMINATION.

LABORATORY ASSISTANT IN CERAMICS (MALE).

The United States Civil Service Commission announces an open competitive

examination for laboratory assistant in Ceramics, for men only, on January 22, 1913. From the register of eligibles resulting from this examination certificates of Standards, Department of Commerce and Labor, at salaries ranging from \$900 to \$1200 per annum, and vacancies as they may occur in other branches of the service requiring similar qualifications, unless it is found to be in the interest of the service to fill any vacancy by reinstatement, transfer, or promotion.

The person or persons appointed to this position will be stationed at the Pittsburgh, Pa., laboratory of the Bureau of Standards, and will assist in original investigations in the chemistry and physics of clay and clay products.

As only one application was received for the examination for this position announced to be held on December 11, 1912, qualified persons are urged to enter this examination.

Competitors will be examined in the following subjects, which will have the relative weights indicated:

Subjects.	Weights.
1. Practical and technical questions on ceramics, including also questions on geology and mineralogy	30
2. Elementary physics	15
3. General inorganic chemistry....	15
4. Thesis or report (to be submitted to the examiner on the date of the examination).....	15
5. Education and technical experience (in ceramics).....	25
Total	100

An educational training equivalent to at least four years of collegiate work in a technical school, which must include not less than one year's training in ceramics, is a prerequisite for consideration for this position. Applicants should also indicate on the application and examination form the extent of the college training they have received in elementary geology, general inorganic chemistry, elementary physics, and elementary mathematics, including trigonometry.

Persons who meet the requirements and desire this examination should at once apply to the United States Civil Service Commission, Washington, D. C., or to the secretary of the local board of examiners. No application will be accepted unless properly executed and filed with the Commission at Washington. In applying for this examination the exact title as given at the head of this announcement should be used.

SWIMMING POOL AT BELMONT SCHOOL.

The Watson Mantel & Tile Company are just completing a contract for tiling the swimming pool and the swimming pool room at the Belmont School for boys at Belmont, California. President Reid is making this one of the most up-to-date schools in the country, and one of the latest additions is the large swimming and bathing tank which is placed in a building complete in itself with cement exterior, and tiled T. roof with tile floors and walls on the interior. This will add very materially to the large number of buildings that have been constructed for furnishing the equipment of a

school where all modern improvements are being used. We do not believe there is another school of the kind in the country that will offer the splendid inducements for good healthy school work and the splendid environment that can be found in this academy that is so carefully conducted by President W. T. Reid and his assistants.

BLACK FILES SCHEDULE IN BANKRUPTCY.

The schedule of Marshall Black that has been filed in the United States District Court in involuntary bankruptcy shows liabilities of \$89,730 and assets of \$190,115. Of the debts \$79,876 are secured. The assets are composed of the following items: Choses in action against the Cressey Colony Company, \$21,500; stock in Alta Mesa Improvement Company, \$2000; stock in Bank of Palo Alto, \$500; stock in Marshall Black Investment Company, \$30,815; stock in Cressey Colony Company, \$60,800; stock in Cressey Townsite Company, \$700; stock in Masonic Temple Association, \$200; stock in Palo Alto Investment Company, \$1500. The schedule states that the foregoing is the book value of these items and that the true value is unknown.

The assets also include: Real estate, \$66,800; bills, etc., \$3400; cash on hand, \$600; money in bank, \$400; horses, cows and other animals, \$900.

EXPORTS AND IMPORTS SHOW GAIN FOR 1912.

The Custom-house statistics of imports and exports for the San Francisco district for December, 1912, are now available and show the statistics for the calendar year 1912 as follows:

Total imports, 62,744,188; domestic goods, 54,707,850; shipments to Alaska, 5,675,556; to Hawaii, 18,193,850; to Guam and Tutuila, 95,163. The total exports of domestic merchandise amounted to \$75,582,419. Gold bullion to the value of \$10,712,126 and silver bullion to the value of \$5,121,916 were also exported.

These figures do not include coin or currency nor foreign merchandise from bonded warehouses, nor merchandise in transit through the United States.

The exports and shipping trade by sea from the port for 1912 showed increases and one decrease (to Alaska) as follows: Imports, increase, \$6,668,864; exports, domestic goods, increase, \$11,280,817; shipments to Alaska, decrease, \$671,243; to Hawaii, increase, \$3,599,884; to Philippines, increase, \$186,142; exports to New Zealand, increase, \$174,930; to Australia, increase, \$659,738.

CARPENTERS' HALL SOLD.

Carpenters' hall, scene of the so-called graft trials, has been sold at public auction to Symons Brothers for \$1300. The building, a three-story brick structure, can not be moved intact, so that its value to the bidder is only that of salvage. It must be torn down and removed within 42 days, to make way for civic center buildings. The sale made Wednesday is subject to the confirmation of the mayor and supervisors.

Firms dealing news on special classes of buildings such as Banks, Churches, Schools, Hotels, etc., will find such items all classified and grouped under proper headings, commencing on this page. These same items are again repeated under "LOCALITIES" in the last part of our news department.

—APARTMENT HOUSES—

SAN FRANCISCO—Apartment house, 3 story and base, frame, \$30,000. Architect, Henry C. Smith, Humboldt Bank Bldg., S. F. Owner, Mrs. A. L. Brownlee. This building has been mentioned in these columns before when plans were first started. The structure will be erected on Jones street, and is to be arranged for a number of two and three room suites with wall beds and private baths. Interior will be finished in pine and redwood. There will be steam heat and a vacuum cleaning system. Bath rooms will be finished in tile and will have cement floors. The exterior will be covered with cement plaster on metal lath. Plans are complete and figures are being taken.

SAN FRANCISCO—Apartment house, 6 story and base. Class C construction. Cost not stated. Architects, Hladik & Thayer, Monadnock Bldg., S. F. Owner's name withheld. The building will occupy a very favorable site and will contain in the neighborhood of 120 rooms, which are to be arranged in two and three room suites with every modern convenience. There will be steam heat, wall beds, connecting baths and a vacuum cleaning system. Interior will be handsomely finished. The exterior of the building will probably be faced with pressed brick and terra cotta. Plans are being prepared and will be out for figures in the course of the next month.

OAKLAND, CAL.—Apartment house alterations, frame construction, \$30,000. Architect, A. W. Smith, 1019 Broadway, Oakland. Owner's name withheld. This work will include the removal of two three-story frame buildings from the present site to the rear of the lot and complete alteration of the same. When complete the new structure will contain 24 apartments of two and three rooms each. There will be connecting baths and wall beds. Steam heat will be installed. A vacuum cleaning system is also specified. The exterior of the building will be covered with cement plaster on metal lath. Plans have been out for figures and a contract will be awarded shortly.

OAKLAND, CAL.—Apartment house and stores, 2 story and base, frame, \$35,000. Architect, C. N. Cook, Rialto Bldg., S. F. Owner's name withheld. The building will be erected on a corner lot and has been arranged for eight stores on the first floor and 66 rooms on the upper floor. These will be arranged in two and three room apartments, all of which will have connecting baths and portal wall beds. A sleeping porch will be a feature in all apartments. Interior trim will be of pine and redwood. There will be steam heat. Baths will be finished in tile and will have cement floors. The exterior of the building will be covered with cement plaster. Patent store fronts are specified in all stores. Plans are complete and will be out for figures shortly.

OAKLAND, CAL.—Apartment house alterations, frame construction, \$3,000.

Architect, Olin S. Grove, 2911 Telegraph Ave., Berkeley. Owner, Mr. McLean. The present building, which is 32x70 feet, will be altered so as to contain a number of two and three room suites with baths. There will be complete new interior trim, new plumbing, plastering and electric work. Open fire places will be used with brick mantels. The exterior of the building will be covered with rustic. Plans are being prepared.

STOCKTON, SAN JOAQUIN CO., CAL.—Apartment house, 1 story and base. Class C construction. Cost not stated. Architect, Glenn Allen, 1936 Golden Gate Ave., S. F. Owners, Hone Builders' Investment and Securities Co., Stockton. The building will be erected at the corner of Eldorado and Flora streets and will contain a large number of apartments of two, three and four rooms each. There will be private baths, wall beds, steam heat, elevator service and a vacuum cleaning system. Interior finish will be of pine, redwood and some hardwoods. The exterior will be faced with pressed brick. Plans are complete and figures are being taken. An official call for bids appears in this issue. Bids will be opened on January 27th. Plans and specifications can be secured from the architect in San Francisco.

MERCED, MERCED CO., CAL.—Apartment house, 3 story and base, frame, \$27,500. Architects, Hladik & Thayer, Monadnock Bldg., S. F. Owner's name withheld. The building will contain a total of 16 apartments which will be arranged in two and three room suites. All apartments will have wall beds and private baths. A roof garden will be a feature of the building. The building has been designed in the Spanish Renaissance, the exterior being covered with cement plaster on metal lath. An elaborate entrance has been designed. Plans are complete and figures will be taken from contractors in Merced.

PORTLAND, ORE.—Apartment house, 2 story and base, reinforced concrete. Cost not stated. Architect, Fred S. Allerton, Wilcox Bldg., Portland. Owner's name withheld. The building will cover an area of 50x100 feet. There will be three stores on the first floor and five three room apartments with private baths on the upper floor. There will be steam heat, hot and cold running water and wall beds. The interior will be finished in pine throughout. The exterior will be faced with cement plaster. Plans are now being prepared.

OAKLAND, CAL.—Apartment house, 2 story and base, frame, \$10,000. Architect, M. L. Newsom, 812 Broadway, Oakland. Owner, Al. Wood. The building is to be erected at the corner of 29th and Grove streets and has been arranged for two stores on the first floor and four suites of three rooms each on the second floor. Steam heat and wall beds will be installed. All apartments will have connecting bath rooms. Interior finish will be of pine with some hardwood floors. The exterior of the building will be covered

with cement plaster on metal lath. Plans for this work are being prepared.

RICHMOND, CONTRA COSTA CO., CAL.—Apartment house, 3 story and base, frame, \$10,000. Architect, J. B. Osborn, 611 Macdonald Ave., Richmond. Owner, W. W. Felch. The building has been arranged for nine apartments all of which will have telephone connection with the entrance, portal wall beds and individual gas steam heaters. Interior finish will be of Jenesero. Entrance steps will be of terrazzo. Plate, art and leaded glass will be used. The exterior of the building will be covered with cement plaster. Plans are complete and figures are now being taken. A contract will be awarded within a day or two.

LOS ANGELES, CAL.—Apartment house, 4 story and base brick. Cost not stated. Architects, R. B. Young & Son, Lankershim Bldg., L. A. Owner, W. W. Middleoff. The building is to occupy a corner site and will contain a total of 90 rooms, which will be arranged in suites of two and three rooms each. All suites will have connecting baths and wall beds. Interior finish will be of pine, redwood and some hardwoods. Bath rooms will be finished in tile. There will be steam heat, elevator service and a vacuum cleaning system. The exterior of the building will be faced with ruffled brick. Plans are now being prepared.

FRESNO, FRESNO CO., CAL.—Apartment house, 6 story and base, brick and concrete, \$75,000. Architect, R. L. Felchlin, Fresno. Owners, E. L. Lacour and R. L. Felchlin. The building will be erected on Tulare street between N and M streets. Preliminary plans show a building containing about 10 suites of two and three rooms each. There will be steam heat, elevator service and wall beds. All apartments will have connecting baths. Further details have not been decided upon. The exterior will probably be faced with pressed brick. Plans are being prepared and the work will be supervised by Mr. Felchlin.

OCEAN PARK, LOS ANGELES CO., CAL.—Apartment house, 3 story and base, brick. Cost not stated. Architects, Shinghoff & Bna, Security Bldg., L. A. Owner, Ward Dawson, Wright and Cullender Bldg., L. A. The building will contain 56 rooms, which will be arranged in two and three room suites. There will be steam heat, elevator service, wall beds and connecting baths. Interior finish will be of pine throughout. The exterior of the building will be faced with pressed brick. Plans are complete and the work will be done by Day Labor.

BRIDGES, DAMS AND HARBOR WORK.

MARTINEZ, CONTRA COSTA CO., CAL.—Wharf, timber pile construction. Cost not stated. Engineer, J. C. Arnold, Martinez. Owners, Town of Martinez. Plans and specifications have received the official approval of the Town Trustees, and Federal aid in financing the construction is now being sought through Congressman Currie. The structure as planned will be 80 feet in width and 1300 feet long. Bids will not be called for until action has been taken by the Government. Announcement will be made in these columns when the work is advertised.

BRIDGES ETC

SAN FRANCISCO—Pier No. 37. Concrete pile construction. Cost not stated. Engineer, Assistant State Engineer, Ferry Bldg., S. F. Owners, State of California. Plans have been approved for the construction of this work and bids are now being taken. An official proposal for the work appears in another column of this issue. The pier will be similar in construction to several others recently contracted for by the State Board of Harbor Commissioners and now under construction. Bids will be opened on January 23rd.

SAN FRANCISCO—Pier No. 41. Concrete pile construction. Cost not stated. Engineer, Assistant State Engineer, Ferry Bldg., S. F. Owners, State of California. The Harbor Board Thursday approved plans and specifications submitted by Assistant Engineer Carl Uhlig, for pier 41, to be constructed at the foot of Stockton street. The new pier is to be 1,080 feet in length on one side and 880 feet on the other; 200 feet wide, with a spur track on each side; concrete pillars, supported by wooden piling, will be ten feet apart. The pier is to be built at an angle with the seawall, and will act as a breakwater for other docks. It is to be an open wharf, without roof, for handling heavy and bulky articles.

SAN FRANCISCO—Freight slip, wooden pile construction. Cost not stated. Engineer, Director of Works of the Panama-Pacific International Exposition, Exposition Bldg., S. F. Owners, Panama-Pacific International Exposition. Plans are complete and figures are now being taken for the construction of a freight slip at the Fair Site, Harbor View. The official proposal for this work appears in another column of this issue. Bids will be opened on January 18th. Bids will be opened by the Fair Commission on January 28th for furnishing and fabricating the structural steel for the apron of this slip. Complete information relative to this work may be obtained from the Director of Works, 617 Exposition Building.

PASADENA, LOS ANGELES CO., CAL.—Bridge, reinforced concrete, \$8,000. Engineer, City Engineer, Pasadena. Owners, City of Pasadena. Plans are being considered for the construction of a reinforced concrete bridge which will replace the wooden structure over the Arroyo Seco at Devils Gate. The engineer's estimate of this work is \$7,863, and the cost will be divided between the City of Pasadena and Los Angeles County.

CHURCHES.

SEATTLE, WASH.—Church, 2 story and base. Class A construction, \$150,000. Architects, Bobb & Mendel, Denny Bldg., Seattle. Owners, First Church of Christ, Scientist. Work of completing this structure will be commenced within a few days. It is estimated that the interior finish, plumbing, electric work and heating still to be done will cost in the neighborhood of \$75,000. Bids will be called for at once.

FACTORIES & WAREHOUSES

LIVERMORE, ALAMEDA CO., CAL. Factory group, 29 buildings, frame and corrugated iron. Cost not stated. Engineer, Engineering Dept., Coast Manufacturing and Supply Co., Elmhurst. Vice-President and General Manager A. H. Merritt states that building operations will be begun on their fuse works here about March 1, and that the plant will be running full blast by midsummer. There will be 29 buildings erected on their recently purchased property, and the total floor space in them will be between four and five acres. Most of these buildings will be small, but others will be 250 feet long. They will be built of corrugated iron, with hollow tile brick for fire walls. In addition to the factory buildings and an office building, there will be residences erected for General Manager Merritt, Assistant Manager T. W. Morris, Traveling Expert G. H. Judd and Superintendent A. S. Cole. There will also be bunk-houses for twenty Chinese workmen.

Contracts Awarded.

LOS ANGELES, CAL.—Factory group, 1 and 2 story and base, reinforced concrete. Cost not stated. Architects, Train & Williams, Exchange Bldg., L. A. Owners, Bradford Baking Co., Contractor, G. J. Ramsey, Pioneer Truck Co., 201 North Main St., L. A. Contract price not stated. Note: The present one-story building will be increased three stories in height. There will also be a two-story building, 74x45 feet, and a one-story structure triangular in shape, 165x120x200 feet. All work will be of reinforced concrete construction.

FLATS.

SAN FRANCISCO—Flats, 3 story and base, frame, \$9,000. Architect, John J. Foley, Monardnock Bldg., S. F. Owner's name withheld. The building will be erected on 18th street, between Valencia and Guerrero streets, and has been designed to contain one five-room and two six-room flats. Interior finish will be of pine throughout. There will be open fire places and tile mantels. Baths and entrance will be finished in tile and Alaska marble. The exterior of the building will be covered with cement plaster on metal lath. Plans are complete and figures are being taken.

SAN FRANCISCO—Flats, 2 story and base, frame, \$4,000. Architect, none. Owner, Julius Nicolaissen, 173 23rd Ave., S. F. The building will cover an area of 26x80 feet and will contain two modern flats of five and six rooms each. All interior finish will be of pine or redwood. There will be gas grates and tile mantels. Bath rooms will be finished in tile. The exterior of the building will be covered with rustic and

shiplap. Plans are complete and in the hands of the owner who will do the work by Day Labor.

SAN FRANCISCO—Flats, 2 story and base, frame, \$5,000. Architect, none. Owner, Oscar Thunberg, 678 9th Ave., S. F. The building will be erected in the Richmond District, and has been arranged for two modern flats of six rooms each. Interior finish will be of pine, redwood and hardwoods. Oak floors will be used in the principal rooms. There will be open fire places and brick or tile mantels. Baths will be finished in tile. The exterior of the building will be covered with rustic and shiplap. Plans are complete and the work will be done by Day Labor.

SAN FRANCISCO—Flats, 2 story and base, frame, \$4,500. Architects, Welsh & Carey, Western Metropolis Bank Bldg., S. F. Owner, M. W. Fay. This building will contain two modern flats of five and six rooms each. Interior finish will be of pine and redwood with some hardwood floors. There will be open fire places and tile or brick mantels. Bath rooms will be finished in tile with cement floors. The exterior of the building will be covered with cement plaster on metal lath. Plans are complete and figures are being taken.

OAKLAND, CAL.—Flats, 3 story and base, frame. Cost not stated. Architect, none. Owner, Delore Roberts, Sheldon Bldg., S. F. The owner has completed the working drawings for a three-story modern flat building, and is now taking figures for the plastering, plumbing, painting and electric work. The balance of the contract will be carried on by Day Labor. Mr. Roberts is president of the Roberts Bros. Construction Co.

GARAGES.

SAN FRANCISCO—Garage, 2 story and base, brick and steel. Cost not stated. Architects, Reid Bros., California-Pacific Bldg., S. F. Owners, Mary N., Lucy H. and Edith W. Allyn. The building will be erected on the south line of Mission street, between First and Second streets, and will have a frontage of nearly 50 feet and will extend through to a rear street. The first floor and basement will be of concrete. Upper floor will be arranged for lofts. The exterior will be faced with pressed brick. There will be metal window sash and frames. Plans are complete and figures are being taken.

SAN FRANCISCO—Garage, 2 story and base, reinforced concrete, \$25,000. Architect, A. Leo Ellis, Shreve Bldg., S. F. Owner's name withheld. The building will be erected on Van Ness avenue, and will be arranged for sales and display rooms on the first floor, shipping and repair shop on the upper floor. Interior of the sales rooms will be faced with cement plaster. Plans are now being prepared and will be complete in the course of the next month.

GOVERNMENT WORK AND SUPPLIES.

Hydraulic Apparatus, Milk River Project.

An advertisement appears elsewhere in this issue calling for bids to be opened at the office of the U. S. Reclamation Service, Los Angeles, Cal., January 22 for furnishing hydraulic apparatus for the St. Mary storage unit, Milk River project, Montana. Under the specifications there are to be furnished two 600-H. P. hydraulic turbines, two gate valves, two oil-pressure governors for 600-H. P. turbines, and service of erecting engineer for same.

Electrical Apparatus, Milk River Project.

On January 22 bids will be opened at the office of the U. S. Reclamation Service, Los Angeles, Cal., for furnishing electrical apparatus for St. Mary's storage unit, Milk River project, Mont. The proposal blank is divided into five items as follows:

- Item 1. 2 500-K. V. A. generators, with direct-connected exciters, complete.
- Item 2. 6 150-K. V. A. transformers, complete.
- Item 3. Switchboard apparatus.
- Item 4. 1 22,000-volt electrolytic lightning arrester.
- Item 5. Services of an erecting engineer.

Pearl Harbor, Fabricated Steel.

The following bid was received by the chief, bureau of yards and docks, Navy Department, Washington, D. C., on December 28 for furnishing fabricated structural steel and certain other material for pump well, delivered at the naval station, Pearl Harbor, H. T.: Ritter-Conley Mfg. Co., 55 Water St., Pittsburgh, Pa., \$9,075.

Pipe Line, Port Canby.

C. L. Houston, of Astoria, Ore., presented the successful bid, at \$2,225, for constructing 2,400 feet 4-inch pipe line at Port Canby, Wash.

HALLS AND SOCIETY BUILDINGS.

BERKELEY, ALAMEDA CO., CAL.—Club house, 2 story and base, frame, \$20,000. Architects, Parker & Kenyon, 214 Kearny St., S. F. Owners, Twentieth Century Club. The building will be erected at the corner of Derby and College avenue, and will contain besides the large assembly room, a library, banquet room, social hall and a number of small rooms. Interior will be finished in pine, redwood and hardwoods. Oak floors will be used throughout. There will be a central heating system and open fire places. Mantels will be of brick. The exterior of the

building will be covered with cement plaster on metal lath. Plans are complete and figures are being taken.

FRESNO, FRESNO CO., CAL.—Lodge hall, 1 story and base, brick. Cost not stated. Architects, Starbuck & Clark, Fresno. Owners, Knights of Pythias. The building is designed for a four-story structure, but only the first story will be erected at this time. The first floor will contain four stores. This work has been estimated to cost \$15,000. The architects are taking figures.

FRESNO, FRESNO CO., CAL.—Convention hall, 2 story and base, reinforced concrete. Cost not stated. Architect, C. K. Kirby, Fresno. Owners, City of Fresno. Bids will be received up to January 20th for the completion of the Rowell Convention Hall, construction of which was abandoned some time ago owing to lack of funds. Plans, specifications and complete information relative to this work may be secured from the architect.

Contracts Awarded.

SALT LAKE CITY, UTAH.—Capitol buildings. Class A construction, \$1,400,000. Architect's name not given. Owners, State of Utah. Contractors, James Stewart Co., New York. Contract calls for the completion of the work exclusive of the plumbing, heating and electric work. Contract price, \$1,040,000.

HOSPITALS.

SAN FRANCISCO—Hospital, 2 story and base, reinforced concrete. Cost not stated. Architect, Architectural Dept., Temporary City Hall Bldg., S. F. Owners, City and County of San Francisco. This building will be known as the Hospital for the Infirm Poor, and will be erected on the Relief Home Tract. Plans were previously out for figures, but the bid of the lowest man was rejected as being above the appropriation. New figures are now being taken. Bids will be opened on January 15th. Plans, specifications and full particulars can be secured from the Department of Architecture.

LOS ANGELES, CAL.—Hospital, 3 story and base, reinforced concrete. Cost not stated. Architect, Frank L. Stiff, Grosse Bldg., L. A. Owners, Westlake Hospital Association. The building will be of reinforced concrete construction, with curtain walls of brick. It will be of sufficient strength to sustain six additional stories. It will have hulk brick exterior facing, metal tile roof, tile corridors and baths, hardwood trim, steam heat, first class plumbing and telephone wiring. Plans are complete and figures will be called for shortly.

LOS ANGELES, CAL.—Hospital wards, 2, 2 story and base, reinforced concrete. Cost not stated. Architect, none. Owner, Los Angeles County. Plans for these two buildings and a two-story addition to the dining hall and several kitchen and stable buildings have been completed. Bids are now being called for and will be opened by the Board of Supervisors on January 27th. Full information relative to the work can be secured from the County Clerk.

HOTELS.

SAN FRANCISCO—Hotel, 8 story and base, brick and steel, \$85,000. Archi-

tecs, Hladik & Thayer, Monadnock Bldg., S. F. Owner's name withheld. The building will be erected in the Fifty Vara District, and will contain in the neighborhood of 200 rooms and bath. There will be steam heat, elevator service, a vacuum cleaning system and all other modern conveniences. Further details of construction have not been determined but will be given in these columns as the plans progress. Figures will be called for in the course of the next month.

SAN FRANCISCO—Hotel, 6 story and base, reinforced concrete, \$50,000. Architects, Hladik & Thayer, Monadnock Bldg., S. F. Owner's name withheld. This building will contain in the neighborhood of 120 rooms, nearly all of which will have connecting baths. Interior finish will be of pine and redwood with some oak and ornamental plaster in the lobby. There will be steam heat, elevator service and a vacuum cleaning system. The exterior will probably be faced with cement plaster. Detail plans are now being prepared and will be out for figures in three weeks or a month.

SAN FRANCISCO—Hotel, 4 story and base, brick and steel. Cost not stated. Architects, Reid Bros., California-Pacific Bldg., S. F. Owners, Peninsular Realty Co. The building will be erected at the northwest corner of Ellis and Fillmore streets. The first floor will be arranged for stores, the hotel entrance and lobby. Upper floors will be divided into about 120 rooms and baths. Interior finish will be of pine and redwood. There will be steam heat and elevator service. The exterior will be faced with pressed brick. Plans are now being prepared.

SAN FRANCISCO—Hotel, 7 story and base, brick and steel, \$70,000. Architect, N. W. Sexton, Chronicle Bldg., S. F. Owner's name withheld. The building will be erected in the north line of Sutter street, between Jones and Leavenworth streets, and will be strictly modern in all its appointments. There will be steam heat, elevator service and a vacuum cleaning system. Interior finish will be of pine, redwood and hardwoods. All rooms will have connecting baths. The exterior will be faced with pressed brick. Plans are being prepared.

OAKLAND, CAL.—Hotel, 7 story and base, brick and steel, \$70,000. Engineer, W. W. Breite, Clunie Bldg., S. F. Owners, Durst Bros., Oakland. The owners are now sub-letting all contracts. The steel contract has been awarded to P. A. Muller, 1601 Telegraph avenue, Oakland, at \$13,500. Figures are being taken for the brick, concrete, plastering, plumbing, electric work, heating, carpentry and mill work, marble, tile and terrazzo and elevators. The building will be 60x100 feet and will contain 30 rooms and 42 baths.

LONG BEACH, LOS ANGELES CO., CAL.—Hotel, 3 story and base, brick. Cost not stated. Architects, Kvsor & Biggar, Wright and Callender Bldg., L. A. Owners, Moore & Barnett. The building will cover an area of 50x162 feet. There will be nine stores and the hotel lobby in the first story and 51 rooms, 11 private baths and 1 public bath in the upper stories. There will be a concrete foundation and basement, steel beams and columns, enameled brick facing, plate and prism glass will be used in the store fronts. There will be galvanized iron cornice, com-

position roof, skylights and fire escapes. The interior trim and floors will be of pine except the lobby which will have a tile floor. There will be a lavatory in each room, hot water heater, plumbing, steam heat, and electric wiring. Plans are complete and figures are being taken.

SEATTLE, WASH.—Hotel, 5 story and base, reinforced concrete, \$75,000. Architect, Willis E. Dwyer, New York Bldg., Seattle. Owner, J. P. Jones. The plans provide for a 68x120 foot building, faced with brick, and the specifications include tar and gravel roofing, tile, steam heating, plate glass, terrazzo, one elevator, fire escapes, sheet metal, metal lath, hard plastering, sidewalk elevator, sidewalk lights, etc. Mr. Dwyer is now taking bids on the above and also mill work, iron, hardware, painting, brick, carpenter work, lumber, plumbing, electric wiring and electric fixtures. Plans and specifications are complete.

OAK KNOLL, LOS ANGELES CO., CAL.—Hotel addition, 2 story and base, reinforced concrete. Cost not stated. Architect, Myron Hunt, Hibernian Bldg., L. A. Owners, Wentworth Hotel Co. The addition will be 450x50 feet and will contain 78 guest rooms and 40 baths on each of the two floors. Interior finish will be of pine and hardwoods. Construction will be fireproof throughout. A number of frame bungalows are also to be erected on the hotel grounds, which comprise over 23 acres. Plans for the hotel addition are complete and figures are being taken.

LOS ANGELES, CAL.—Hotel, 2 story and base, brick. Cost not stated. Architect, A. E. Fetherstonhaugh, Ferguson Bldg., L. A. Owner, J. H. Call. The building will contain 90 guest rooms, a number of public baths and the main lobby and office. There will be steam heat, elevator service and a hot water heating system. Interior finish will be of pine. Bath rooms will have cement floors. The exterior of the building will be faced with ruffled brick. Plans are complete and bids are being taken.

LOS ANGELES, CAL.—Hotel, 6 story and base, reinforced concrete. Cost not stated. Architect, J. Martyn Haenke, Central Bldg., L. A. Owners, Hopper-MacFarlane-Duncan Co. The building will be erected on a lot 107x162 feet. The first floor will contain two stores besides the hotel entrance and lobby. Upper floors are to be arranged for a total of 130 guest rooms and 60 baths. Interior finish will be of pine and redwood with some hardwood. There will be furnace heat and a hot water heating system. The exterior will probably be faced with cement plaster. Preliminary plans only have been prepared.

Contracts Awarded

VANCOUVER, B. C.—Hotel, 4 story and base, brick, \$55,000. Architects, Brauntton & Leibert, Exchange Bldg., Vancouver. Owner, James Borland. Contractor, James Layfield, 1024 Broadway, Vancouver. Contract price, \$55,000.

VANCOUVER, B. C.—Hotel, 4 story and base, brick and steel, \$145,000. Architects, Parr, McKenzie & Day, Vancouver Bldg., Vancouver. Owners, W. J. Bowser and G. L. Wilson. Contractor, E. J. Ryan, 768 Granville St., Vancouver. Contract price, \$145,000.

OAKLAND, CAL.—Hotel, 2 story and base, frame, \$45,000. Architect, Herbert Muggs, 125 Alpine St., S. F. Own-

er, Joseph B. Coryell. Contractor, Charles W. Gompertz. Contract price, \$15,000.

RAILROAD CONST. STATIONS AND EQUIPMENT.

SEATTLE, WASH.—Freight depot, 1 and 3 story reinforced concrete buildings, \$100,000. Architects, Eng. Dept. Oregon-Washington Ry. and Navigation Co., Seattle. Owners, Oregon-Washington Railroad and Navigation Co. Contractors, J. M. Bruce & Co., American Bank Bldg., Seattle. Contract price between \$90,000 and \$100,000. The plans provide for the construction of a three-story 40x50 feet office building, a one-story 40x320 feet freight depot and a 40x760 feet brick driveway.

RESIDENCES.

SAN FRANCISCO—Residence, 2 story and base, frame, \$7,000. Architects, Hladik & Thayer, Monadnock Bldg., S. F. Owner's name withheld. The dwelling will be erected in the Richmond District and has been designed to contain eight rooms and bath. Interior finish will be of pine, redwood and hardwoods with oak floors in the principal rooms. There will be furnace heat and open fire places. Mantels will be of tile and brick. Bath rooms will be finished in tile. There will be an automatic water heater installed. The exterior will probably be covered with cement plaster on metal lath. Plans are now being prepared.

SAN FRANCISCO—Residence, 2 story and base, frame, \$4,000. Architect, Ernest Hildebrand, Crocker Bldg., S. F. Owners, Ernest Hildebrand and Antone Lettich. This dwelling has been mentioned in these columns before. Bids are now being taken for all parts of the work except the carpentry work. There will be furnace heat and open fire places with brick mantels. The interior finish will be of pine and redwood. Exterior will be covered with cement plaster on metal lath.

BERKELEY, ALAMEDA CO., CAL.—Residence, 2 story and base, frame, \$4,500. Architect, Olin S. Grove, 2911 Telegraph Ave., Berkeley. Owner, E. A. Janssen, Hearst Bldg., S. F. The house has been designed for an eight-room dwelling with bath, sleeping porch and laundry. Interior finish will be of pine with hardwood floors. There will be furnace heat and open fire places. Mantels will be of brick. Tile will be used in the bath room and kitchen. The exterior of the house will be covered with cement plaster on metal lath. Plans are being prepared and when complete the work will be done by Day Labor.

OAKLAND, CAL.—Residence, 2 story and base, frame, \$6,500. Architect, W. H. Ratcliff, Jr., First National Bank Bldg., Berkeley. Owner, Mrs. R. W. Baum. The house will contain in the neighborhood of nine rooms, baths, sleeping porches and laundry. Interior finish will be of pine, redwood and some hardwood. Floors will be of oak in all principal rooms. There will be furnace heat and open fire places. Mantels will be of tile. Tile will be used in the baths and kitchen. An automatic water heater will be installed. The exterior of the dwelling will be covered with cement plaster on metal

lath. Plans are complete and figures are now being taken.

OAKLAND, CAL.—Bungalow, 1½ story and base, frame, \$3,400. Architect, none. Owners, Junk-Riddell Co., 2247 Telegraph Ave., Berkeley. The house has been designed for a seven-room dwelling with bath, sleeping porches and laundry. Interior trim will be of pine, redwood and hardwoods. Oak floors will be used in three rooms. There will be furnace heat and open fire places. Mantels will be of brick. The exterior of the dwelling will be covered with shingles. Plans are complete and the work will be done by Day Labor.

PIEDMONT, ALAMEDA CO., CAL.—Residence, 2 story and base, frame, \$5,500. Architect, W. H. Judson, Albany Bldg., Oakland. Owner, E. Oppenheim. The house will contain seven rooms and bath. Interior finish will be of pine and redwood with oak floors in the living and dining rooms. There will be open fire places and brick mantels. Tile will be used in the bath room and kitchen. The exterior will be covered with cement plaster on metal lath. Plans are complete and figures are being taken.

BERKELEY, ALAMEDA CO., CAL.—Residence, 2 story and base, frame, \$3,800. Architect, none. Owner, W. S. Montgomery. The house has been designed for a seven-room dwelling with bath and laundry. Interior finish will be of pine and redwood. Floors will be of oak in all principal rooms. There will be open fire places with tile or brick mantels. Tile will also be used in the bath room and kitchen. The exterior of the house will be covered with cement plaster on metal lath. Plans are complete and in the hands of the owner who will do the work by Day Labor.

PIEDMONT, ALAMEDA CO., CAL.—Bungalow, 1 story and base, frame and concrete, \$12,000. Architect, A. Leo Ellis, Shreve Bldg., S. F. Owner's name withheld. Preliminary plans only have been prepared for this work and details of construction cannot be given at this time. The house will be handsomely finished in hardwoods. There will be a central heating system and open fire places. Besides the usual living rooms there will be several baths and sleeping porches. The exterior will probably be covered with cement plaster. Complete details will be given when plans are ready for figures.

SAN SALITO, MARIN CO., CAL.—Bungalow, 1 story and base, frame. Cost not stated. Architect, W. H. Judson, Albany Bldg., Oakland. Owner, Mr. Dreger. The dwelling will contain six rooms and bath. There will be a large rock terrace blasted out of the hillside with two windows. Interior finish will be of pine and redwood. Oak floors will be used in the living and dining rooms. Open fire places will also be used. Mantels will be of tile or brick. The exterior of the house will be covered with cement plaster. Plans are being prepared.

FRUITVALE, ALAMEDA CO., CAL.—Bungalows, 21, 1 story and base, frame, \$1,200 each. Architect, C. N. Cook, Rialto Bldg., S. F. Owners, Powell Bros., Harrison Ave. and Pearl St., Alameda. These cottages will contain from four to five rooms each. All interior finish will be of pine or red-

wood. There will be open fire places in the living rooms with tile or brick mantels. Exteriors will be covered with shingles, rustic and shiplap. Plans are being prepared and when complete the work will be done by Day Labor.

OAKLAND, CAL.—Hissidence, 2 story and base, frame, \$6,000. Architect, Charles W. McCall, Central Bank Bldg., Oakland. Owner, R. W. Krolitzsch. The house will be erected on Grand Avenue Heights, and will contain in the neighborhood of eight rooms, baths and sleeping porch. Interior finish will be of pine, redwood and hardwood. There will be furnace heat and open fire places with brick and tile mantels. Floors in the principal rooms will be of hardwood. Tile will be used in the baths and kitchen. There will be an automatic water heater. The exterior of the dwelling will be covered with cement plaster on metal lath. Plans are complete and figures are being taken.

ALBANY, CONTRA COSTA CO., CAL.—Bungalow, 1½ story and base, frame, \$2,000. Architect, none. Owners, Peake-Munro Co., 2135 Shattuck Ave., Berkeley. The bungalow will contain six rooms and bath. All interior finish will be of pine and redwood. Some hardwood floors will be used. There will be an open fire place and brick mantel in the living room. Bath will be finished in tile. The exterior of the dwelling will be covered with shingles. Plans are complete and the work will be done by Day Labor.

SCHOOLS.

SAN FRANCISCO—Removal of building, 4 story, Class A construction. Cost not stated. Architect, City Dept. of Architecture, Temporary City Hall, S. F. Owners, City and County of San Francisco. Bids will be opened on January 22 by the Board of Public Works for moving the present Commercial High School from its site on Grove street, between Larkin and Polk, to a new site on Fell street between Van Ness avenue and Franklin street. A bond of \$125,000 is required of the successful bidder. The building is the largest Class A structure that has ever been attempted to move in this city, and the feat will be watched with more than ordinary interest. The official proposal for this work appears in another column of this issue.

Contracts Awarded.

OAKLAND, CAL.—School, 1 story and base, frame. Cost not stated. Architect, J. J. Donovan, Security Bldg., Oakland. Owners, City of Oakland. Contractor, C. Christensen, Oakland. Contract price, \$5,494. For a complete list of the figures submitted for this work see under Oakland and Alameda County in this issue.

SEWERS, STREET WORK AND WATER SYSTEMS

SAN FRANCISCO—Water main and by-pass. Cost not stated. Engineer, Constructing Q. M. Dept., U. S. A., Fort Mason. Owners, United States Government. Bids will be received until 10 a. m. of January 16th for constructing additional 10-inch water main and by-pass at Fort Winfield Scott. Plans and specifications can be obtained from the Constructing Quartermaster at Fort

Foote Mixer on street paving
in Chico, California.

There's a Foote Mixer for every job!

Mason. The official proposal appears in another column of this issue.

SAN FRANCISCO—High Pressure and service water supply systems. Cost not stated. Engineer, Director of Works, Exposition Bldg., S. F. Owners, Panama-Pacific Exposition Co. Bids will be opened on January 28th for the construction of a high pressure water system and also for a service supply water system at the Exposition site, Harbor View. Full particulars and complete plans and specifications can be obtained from the Director of Works. The official proposal appears under another heading in this issue.

MILK RIVER PROJECT, MONTANA.

—Electrical and hydraulic apparatus. Cost not stated. Engineers, U. S. Reclamation Service, Federal Bldg., L. A. Owners, United States Government. Plans and specifications are complete and bids will be opened on January 22 by the Reclamation Service engineers in Los Angeles for furnishing electrical and hydraulic apparatus for the St. Mary's unit of the Milk River project.

STORES & OFFICE BUILDINGS.

SAN FRANCISCO—Stores and offices, 4 story and base, reinforced concrete, \$10,000. Architects, Frye & Schastey, Monadnock Bldg., S. F. Owners, Hop Woe Society. This will be one of the first high class commercial buildings to be erected in San Francisco's Chinatown. There will be several stores on the first floor and offices above. Interior will be finished in pine and hardwoods. There will be a central heating system. The exterior will be faced with pressed brick. Patent store

fronts will be used. Plans are complete and will be out for figures next week.

SAN FRANCISCO—Stores, 1 story and base, reinforced concrete. Cost not stated. Architect, none. Owners, N. A. and Sarah J. Dorn, Phelan Bldg., S. F. The building will be erected at the corner of Davis and Washington streets, in the wholesale district. There will be two stores with patent store fronts. The exterior will be faced with cement plaster. A contract for the excavating has been awarded to the Sibley Grading and Tearing Co., and plans for the balance of the work are out for figures.

SAN FRANCISCO—Stores and lofts, 2 story and base, brick, \$21,000. Architect, D. C. Coleman, Merchants' Exchange Bldg., S. F. Owner, M. Fisher. The building will be erected at the southeast corner of Pine and Van Ness avenue, and will cover an area of 80 x 84 feet. The first floor will be arranged for automobile sales rooms and the upper floor for light 'ofits. There will be a freight elevator. Interior finish will be of pine. The exterior of the building will be faced with cement plaster. Plans are complete and the work will be done by Day Labor.

OAKLAND, CAL.—Stores and offices, 12 story and base. Class A construction. Cost not stated. Architect, Edward T. Foulkes, Crocker Bldg., S. F. Owner, D. Franklin Oliver. The building will be erected at the corner of 14th and Franklin streets, the site of the present Maple Hall which will be moved to another part of the lot. Preliminary plans have been prepared, but no details of the construction can be

given at this time. The building will be fireproof.

PORTLAND, ORE.—Stores and offices, 6 story and base, reinforced concrete. Cost not stated. Architects, Whitehouse & Foulboux, Portland. Owners, Fidelity Trust Co. The building will cover and area of 50x100 feet. Plans provide for one large store on the first floor with a mezzanine. Upper floors will contain 21 offices to the floor, which will be arranged single or en suite. There will be steam heat, elevator service, mail chutes and a vacuum cleaning system. Interior partitions will be of terra cotta tile. There will be metal window sash and frames. The exterior of the building will be faced with cement plaster. Plans are complete and figures are being taken.

ALAMEDA, ALAMEDA CO., CAL.—Stores, 1 story and base. Class C construction. Cost not stated. Architect, Henry H. Meyers, Kohl Bldg., S. F. Owner, Mrs. C. S. Neal. The building will be erected on Park street near Central avenue, and will be arranged for several small stores. Interiors will be finished in pine and redwood. There will be a cement floor and patent store fronts. The exterior of the building will be covered with cement plaster on metal lath. Plans are complete and figures have been taken. A contract will be awarded within a few days.

LOS ANGELES, CAL.—Stores and lofts, 6 story and base. Class A construction. Cost not stated. Architects, R. B. Young & Son, Lankershim Bldg., L. A. Owner, Mrs. R. B. Young. This building is to be erected on 7th street. Details of construction are not yet settled and no particulars can be given at this time. The building will not be less than six stories in height and may be carried up to 12 or 14 stories. There will be a complete steel frame. Exterior walls will be of brick. Mr. Young states that actual construction will be started by March 1st.

Contracts Awarded.

LOS ANGELES, CAL.—Stores and offices, 12 story and base. Class A construction. Cost not stated. Architects, William Curlett & Son, Title Ins. Bldg., L. A. and Phelan Bldg., S. F. Owners, Merchants' Fireproof Building Co. Contractor, Weymouth Crowell, Story Bldg., L. A. foundations and footings only. Contract price, \$35,740.

PORTLAND, ORE.—Stores and offices, 6 story and base, reinforced concrete, \$100,000. Architect, J. B. Dantoff, Portland. Owners, Marcus and Eugene Coin. Contractors, Boyajohn-Arnold Co., Wilcox Bldg., Portland. Contract price, \$100,000.

LOS ANGELES, CAL.—Stores and lofts, 8 story and base, reinforced concrete, \$50,000. Architects, J. P. Blee and Norman F. Barber, L. A. Owner, Alexander Meyer. Contractors, Barber-Bradley Construction Co., 1224 East 15th St., L. A. Contract price, \$50,000.

THEATRES.

LOS ANGELES, CAL.—Theatre, 3 story and base. Class A construction. Cost not stated. Architects, Morgan, Walls & Morgan, Story Bldg., L. A. Owners, Egan School of Dramatic Arts. The building will cover an area of 50x120 feet. The main auditorium will have a seating capacity of about 150 people. Besides the main auditorium there will be music halls and a recital

hall, 30x88 feet. Both of these rooms will be finished in white and gold. Plans provide for a sunken garden the whole length of the building, at one end of which will be an open air stage. The second floor will contain a mezzanine gallery and general offices. The third floor is to be arranged for a number of studios, dance halls and recital rooms. There will be elevator service. Interior partitions will be of hollow tile. The exterior of the building will be faced with blue brick and terra cotta trimmings. Plans are complete and figures are being taken.

SEALED PROPOSALS.

NOTICE TO BIDDERS.

NOTICE is hereby given by the Board of Trustees of Hester School District in the County of Santa Clara, State of California, that sealed bids will be received by said Board at the office of H. C. Jones situated in the Knox Building at the northwest corner of First and Santa Clara streets, in the City of San Jose, County of Santa Clara, State of California, up to Saturday, the 1st day of February, 1913, at 10 o'clock a. m. of said day for furnishing the necessary materials and doing the necessary work in the erection and construction of a school building for said school district to be located therein on the Alameda, between Lenzen and Brown avenues, and for tearing down the building now on said site and removing the material from the grounds, according to the plans and specifications for the same prepared by the architect of said Board and which said plans and specifications are hereby referred to and made a part of this notice.

Copies of said plans and specifications are on file and will be open to inspection at the Builders' Exchange located at 113 West Santa Clara street, in said city, and bidders will find at both of said places a form of bid to be submitted.

Bids for separate work will be considered as the same appear in said plans and specifications or in said form of bid.

Notice is further given that at 10 o'clock a. m. of said 1st day of February, 1913, at said office of H. C. Jones said bids will be opened and considered by said Board.

The contract or contracts will be awarded to the lowest responsible bidder or bidders who will give such security as the Board may require. The Board, however, reserves the right to reject any and all bids.

Each bid must be accompanied by a certified check on a reliable bank for five per cent of the amount of the bid and made payable to H. C. Jones, Clerk of said Board of Trustees.

Dated January 4, 1913.

M. S. MOONE,

H. CENTER,

HERBERT C. JONES,

Board of Trustees of Hester School District.

NOTICE TO CONTRACTORS.

OFFICE OF THE BOARD OF STATE Harbor Commission, Union Depot and Ferry House, San Francisco, Cal., January 7, 1913.

Sealed proposals or bids will be received at this office at or prior to 11:00 o'clock a. m. on Thursday, January 24, 1913, for furnishing materials and con-

structing Pier No. 37, and adjacent Bulkhead Wharf, on the waterfront of the City and County of San Francisco, in accordance with the plans and specifications prepared therefor by the Assistant State Engineer and adopted by the Board November 21, 1912, and on file in this office, to which special reference is hereby made.

The materials to be used in this work shall consist of the requisite quantities of fresh cut, close grained, first-class Douglas yellow fir piles, merchantable yellow fir lumber, redwood lumber, Portland cement (which will be furnished the contractor by the Board), sand, crushed rock or gravel, reinforcing materials, castings, structural steel, rods, bolts, spikes, car springs, rails and fastenings, asphalt paving roofing, etc. All material used in the structures will be subjected to a rigid examination and test, and if found defective, undersize, unsuitable or not as specified will be condemned and must be removed from the work by the contractor at his expense.

No bid will be received unless it is made on a blank form furnished from this office and is accompanied by a certified check for an amount equal to five (5) per cent of the amount of the proposal; said check to be made payable to the order of the Secretary of the Board, as a guarantee on the part of the successful bidder that he will within six (6) days after the acceptance of the bid and the award of contract, enter into a written contract to do said work, according to the plans and specifications prepared therefor, and will also execute and file with the Board a bond in such sum as the Board may deem adequate, with two or more sureties, to be approved by said Board and conditioned for the faithful performance by the contractor of all the terms and conditions of said contract, nor will said bid be considered by the Board unless delivered to the secretary, or to the assistant secretary, at the office of the secretary, at or prior to 11:00 o'clock a. m. Thursday, January 23, 1913, at which time and place the bids will be opened. The Board reserves the right to reject any or all bids if deemed for the best interests of the State.

Bidders are invited to be present at the opening of the bids. Plans and specifications of this work to be had at Room No. 18, Ferry Building, upon depositing \$20.00 for same, which will be returned on return of plans and specifications.

Bidders are requested to mark envelopes containing bid, "Bid for Pier No. 37."

J. J. DWYER,

THOMAS S. WILLIAMS,

J. H. McALLUM,

Board of State Harbor Commissioners.

JEROME NEWMAN,

Assistant State Engineer.

LEO V. MERLE, JR.,

Secretary.

PROPOSALS FOR BUILDING.

BUILDING—Sealed proposals indorsed "Proposals for One Officer's Quarters" will be received at the bureau of yards and docks, Navy Department, Washington, D. C., until 11 o'clock a. m. February 15, 1913, and then and there publicly opened, for the construction of quarters for Inspector of ordnance (one frame house)

at the naval magazine, Puget Sound, Wash. Estimated cost, \$8,500. Plans and specifications can be obtained on application to the bureau or to the commandant of the navy yard, Puget Sound, Wash. H. R. STANFORD, chief of bureau.

ELECTRICAL APPARATUS—Department of the Interior, United States Reclamation Service, Washington, D. C., December 13, 1912.—Sealed proposals will be received at the office of the United States Reclamation Service, Los Angeles, Cal., until **2 o'clock p. m. January 22, 1913**, for furnishing electrical apparatus for St. Mary Storage Unit, Milk River project, Montana. For particulars address U. S. Reclamation Service, 605 Federal Building, Los Angeles, Cal., or Washington, D. C. A. P. DAVIS, acting director.

PROPOSALS FOR HYDRAULIC APPARATUS.

HYDRAULIC APPARATUS—Department of the Interior, United States Reclamation Service, Washington, D. C., December 13, 1912.—Sealed proposals will be received at the office of the United States Reclamation Service, Los Angeles, Cal., until **2 o'clock p. m. January 22, 1913**, for furnishing hydraulic apparatus for St. Mary Storage Unit, Milk River project, Montana. For particulars address U. S. Reclamation Service, 605 Federal Building, Los Angeles, Cal., or Washington, D. C. A. P. DAVIS, acting director.

PROPOSALS FOR BRIDGE STEEL.

FABRICATED STEEL AND FIELD RIVETS—Sealed proposals will be received at the office of the purchasing agent, bureau of supply, Manila, P. I., until **8 a. m. January 15, 1913**, and at the office of the insular purchasing agent, bureau of insular affairs, room 1530, 17 Battery Place, New York City, N. Y., U. S. A., until **7 p. m. January 14, 1913**, and then publicly opened, for furnishing all the fabricated steel and field rivets for: Two spans at 90 feet, one span at 100 feet and one span at 130 feet for Nueva Ecija bridges; seven spans at 160 feet for the Laoag bridge, Ilocos Norte, and one span at 160 feet for the Rugao bridge, Isabela, for the government of the Philippine Islands. Envelopes containing proposals should be plainly marked "Proposals for Fabricated Steel for Nueva Ecija, Laoag and Rugao Bridges." Instructions to bidders, general conditions, proposals, plans and specifications may be obtained and examined at the office or offices above named. Additional information will be furnished upon application. Bidders are requested to be present at the time stated above when bids for the work will be opened. Address all communications to the purchasing agent, bureau of supply, Manila, P. I., or insular purchasing agent, bureau of insular affairs, room 1530, 17 Battery Place, New York City, N. Y., U. S. A.

PROPOSALS FOR BOILERS.

BOILERS—Office of Depot Quartermaster, Seattle, Wash., December 28, 1912.—Sealed proposals will be received here until **11 o'clock a. m. January 28, 1913**, for repair work and installing new boilers for U. S. cableship Burnside. For information and pro-

posal blanks address W. H. MILLER, colonel, quartermaster corps, depot quartermaster.

PROPOSALS FOR MOVING BUILDING.

OFFICE OF THE BOARD OF PUBLIC WORKS of the City and County of San Francisco.

Sealed proposals will be received at this office between the hours of **2 o'clock p. m. and 3 o'clock p. m., on Wednesday, the 22nd day of January, 1913**, for doing the following work, including the furnishing of the necessary labor therefor, to wit:

The removal of the High School of Commerce Building from its present location on Grove street, between Larkin and Polk streets, to a lot on the northerly side of Fell street, between Franklin street and Van Ness avenue.

Progressive payments will be made.

Said work must be done in accordance with the specifications on file in the office of the Board of Public Works, to which reference is hereby made, and must be commenced within five (5) calendar days from the receipt of written notice from the Bureau of Public Works, and completed within two hundred and ten (210) calendar days thereafter.

The amount of bond for faithful performance of contract has been fixed at \$125,000.00.

All proposals offered must be accompanied by a check, certified by a responsible bank, payable to the order of the Clerk of the Supervisors, for an amount not less than ten per cent of the aggregate of the proposal.

Printed proposal forms will be furnished gratuitously upon application at the office of the architect, and all proposals must be made upon such forms.

The Board of Public Works reserves the right to reject any and all bids.

By order of the Board of Public Works, F. J. CHURCHILL, Secretary.

M. R. NORRIS, Acting Secretary Board of Education.

NOTICE TO CONTRACTORS.

OFFICE CONSTRUCTING QUARTERMAS-TER, Fort Mason, Cal., January 8th, 1913.—Sealed proposals, in triplicate, for constructing an additional 10 inch water main and By-Pass at Fort Winfield Scott, Cal., will be received here until **11 a. m., January 16th, 1913**, and then opened. Plans, specifications, blank forms and necessary information can be obtained here. Deposit of \$10.00 required to insure return of plans, etc. Envelopes containing proposals to be endorsed "Proposals for Water Main, Fort Winfield Scott" and addressed to LT. COL. GEO. MCK. WILLIAMSON, Q. M. Corps.

PROPOSALS FOR CONSTRUCTING BUILDING.

SEALED proposals will be received at the office of the Hogue Builders' Investment and Securities Company at Stockton, Cal., up to **12 o'clock, noon, January 27, 1913**, and at the office of Glenn Allen, Architect, 1396 Golden Gate avenue, San Francisco, up to **12 o'clock, noon, January 25, 1913**, for all of the labor and materials for the construction of a four-story brick Class "C" apartment building to be erected at the northwest corner of Eldorado and Flora streets, Stockton, Cal.

Plans may be seen at the office of the company at Stockton, or at the office of the architect at San Francisco. Contractors may bid on any or all portions of the work. Each bid is to be accompanied by a certified check for 10% of amount bid, payable to J. B. Henderson, Secretary. Said check to be forfeited by the successful bidder if he fails to enter into contract and give satisfactory bond within five (5) days of date of award.

The right is reserved to reject any or all bids, or to waive any formality in the interest of the company.

(Signed) J. B. HENDERSON.

NOTICE TO CONTRACTORS.

PANAMA-PACIFIC INTERNATIONAL EXPOSITION.

SEALED PROPOSALS will be received by the Buildings and Grounds Committee of the Panama-Pacific International Exposition Company at the office of the Director of Works, in the Exposition Building, Pine and Battery Streets, San Francisco, California, at 11 o'clock A. M., Tuesday, January 28, 1913, for the following work:

Contract No. 21.

For Fabricating and Furnishing Structural Steel for Freight Apron in accordance with the specifications on file in the office of the Director of Works.

Each proposal must be accompanied by a certified check payable to the order of the Panama-Pacific International Exposition Company or cash in the sum of ten (10) per cent of the amount bid, or the same will not be considered. When the award of con-

tract is made all checks will be returned to the respective bidders, except that filed with the accepted proposal or bid, which check will be returned upon the successful bidder signing the contract and filing the required bond. A bond in the sum of fifty (50) per cent of the contract price will be required for the faithful performance of the contract; the sureties thereon must be satisfactory to the Buildings and Grounds Committee of the Panama-Pacific International Exposition Company.

Progressive payments will be made. The right is reserved to reject any and all bids and to waive technical defects if in the interest of the Exposition Company.

Plans and specifications for the work may be obtained from the Director of Works, at Room 617 Exposition Bldg., by depositing \$25.00, which will be refunded upon the return of the plans and specifications in good condition.

By order of the Buildings and Grounds Committee.

WILLIAM H. CROCKER,
Chairman. (*)

Firms desiring news from certain localities like San Francisco, Los Angeles, Portland, Seattle, etc., will find all such items, commencing on this page, all carefully classified as to location. These same items are repeated in the fore part of the news department, under distinct headings such as Banks, Churches, Hotels, etc.

SAN FRANCISCO.

APARTMENT HOUSE—3 story and base, frame, \$30,000. San Francisco. Architect, Henry C. Smith, Humboldt Bank Bldg., S. F. Owner, Mrs. A. L. Brownlee. This building has been mentioned in these columns before when the plans were first started. The structure will be erected on Jones street, and is to be arranged for a number of two and three room suites with wall beds and private baths. Interior will be finished in pine and redwood. There will be steam heat and a vacuum cleaning system. Bath rooms will be finished in tile and will have cement floors. The exterior will be covered with cement plaster on metal lath. Plans are complete and figures are being taken.

APARTMENT HOUSE—6 story and base. Class C construction. Cost not stated. San Francisco. Architects, Hladik & Thayer, Monadnock Bldg., S. F. Owner's name withheld. The building will occupy a very favorable site and will contain in the neighborhood of 120 rooms, which are to be arranged in two and three room suites with every modern convenience. There will be steam heat, wall beds, connecting baths and a vacuum cleaning system. Interior will be handsomely finished. The exterior of the building will probably be faced with pressed brick and terra cotta. Plans are being prepared and will be out for figures in the course of the next month.

RESIDENCE—2 story and base, frame, \$7,000. San Francisco. Architects, Hladik & Thayer, Monadnock Building, S. F. Owner's name withheld. The dwelling will be erected in the Richmond District and has been designed to contain eight rooms, and bath. Interior finish will be of pine, redwood and hardwoods with oak floors in the principal rooms. There will be furnace heat and open fire places. Mantels will be of tile and brick. Bath rooms will be finished in tile. There will be an automatic water heater installed. The exterior will probably be covered with cement plaster on metal lath. Plans are now being prepared.

RESIDENCE—2 story and base, frame, \$4,000. Architect, Ernest Hildebrand, Crocker Bldg., S. F. Owners, Ernest Hildebrand and Antone Lettich. This building has been mentioned in these columns before. Bids are now being taken for all parts of the work except the carpentry work. There will be furnace heat and open fire places with brick mantels. The interior finish will be of pine and redwood. Exterior will be covered with cement plaster on metal lath.

PIER NO. 37—Concrete pier construction. Cost not stated. San Francisco. Engineer, Asst. State Engineer, Ferry Bldg., S. F. Owners, State of California. Plans have been approved for the construction of this work and bids are now being taken. An official proposal for the work appears in another column of this issue. The pier will be similar in construction to several others recently contracted for by the State Board of Harbor Commissioners and now under construction. Bids will be opened on January 23rd.

PIER NO. 41—Concrete pile construction. Cost not stated. San Francisco. Engineer, Asst. State Engineer, Ferry Bldg., S. F. Owners, State of California. The Harbor Board Thursday approved plans and specifications submitted by Assistant Engineer Carl Uhlig, for pier 41, to be constructed at the foot of Stockton street. The new pier is to be 1,080 feet in length on one side and 880 feet on the other; 200 feet wide, with a spur track on each side; concrete pillars, supported by wooden piling, will be ten feet apart. The pier is to be built at an angle with the seawall, and will act as a breakwater for other docks. It is to be an open wharf, without roof, for handling heavy and bulky articles.

FREIGHT SLIP—Wooden pile construction. Cost not stated. San Francisco. Engineer, Director of Works of the Panama-Pacific International Exposition, Exposition Bldg., S. F. Owners, Panama-Pacific International Exposition. Plans are complete and figures are now being taken for the construction of a freight slip at the Fair Site, Harbor View. The official proposal for this work appears in another column

of this issue. Bids will be opened on January 18th. Bids will be opened by the Fair Commission on January 28th for furnishing and fabricating the structural steel for the apron of the slip. Complete information relative to this work may be obtained from the Director of Works, 617 Exposition Bldg.

FLATS—3 story and base, frame, \$9,000. San Francisco. Architect, J. J. Foley, Monadnock Bldg., S. F. Owner's name withheld. The building will be erected on 18th street, between Valencia and Guerrero streets, and has been designed to contain one five-room and two six-room flats. Interior finish will be of pine throughout. There will be open fire places and tile mantels. Baths and entrance will be finished in tile and Alaska marble. The exterior of the building will be covered with cement plaster on metal lath. Plans are complete and figures are being taken.

FLATS—2 story and base, frame, \$4,000. San Francisco. Architect, none. Owner, Julius Nicolaissen 173 23rd Ave., S. F. The building will cover an area of 26x80 feet and will contain two modern flats of five and six rooms each. All interior finish will be of pine or redwood. There will be gas grates and tile mantels. Bath rooms will be finished in tile. The exterior of the building will be covered with rustic and shiplap. Plans are complete and in the hands of the owner who will do the work by Day Labor.

FLATS—2 story and base, frame, \$5,000. San Francisco. Architect, none. Owner, Oscar Thunberg, 678 9th Ave., S. F. The building will be erected in the Richmond District, and has been arranged for two modern flats of six rooms each. Interior finish will be of pine, redwood and hardwoods. Oak floors will be used in the principal rooms. There will be open fire places and brick or tile mantels. Baths will be finished in tile. The exterior of the building will be covered with rustic and shiplap. Plans are complete and the work will be done by Day Labor.

FLATS—2 story and base, frame, \$4,500. San Francisco, Architects, Welsh Carey, Western Metropolitan Bank Bldg., S. F. Owner, M. W. Fay. This work was mentioned here when the architects first started the plans. The building will contain two modern flats of five and six rooms each. Interior finish will be of pine and redwood with some hardwood floors. There will be open fire places and tile or brick mantels. Bath rooms will be finished in tile with cement floors. The exterior of the building will be covered with cement plaster on metal lath. Plans are complete and figures are being taken.

HIGH PRESSURE AND SERVICE WATER SUPPLY SYSTEMS—Cost not stated. San Francisco. Engineer, Director of Works, Exposition Bldg., S. F. Owners, Panama-Pacific Exposition Co. Bids will be opened on January 28th for the construction of a high pressure water system and also for a service supply water system at the Exposition site, Harbor View. Full particulars and complete plans and specifications can be obtained from the Director of Works. The official proposal appears under another heading in this issue.

GARAGE—2 story and base, brick and steel. Cost not stated. San Fran-

cisco. Architects, Reid Bros., California-Pacific Bldg., S. F. Owners, Mary N., Lucy H., and Edith W. Allyn. The building will be erected on the south line of Mission street, between First and Second streets, and will have a frontage of nearly 50 feet and will extend through to a rear street. The first floor and basement will be of concrete. Upper floor will be arranged for lofts. The exterior will be faced with pressed brick. There will be metal window sash and frames. Plans are complete and figures are being taken.

GARAGE—2 story and base, reinforced concrete, \$25,000. San Francisco. Architect, A. Leo Ellis, Shreve Bldg., S. F. Owner's name withheld. The building will be erected on Van Ness avenue, and will be arranged for sales and display rooms on the first floor, shipping and repair shop on the upper floor. Interior of the sales rooms will be finished in hardwoods and tile. The exterior of the building will be faced with cement plaster. Plans are now being prepared and will be complete in the course of the next month.

HOSPITAL—2 story and base, reinforced concrete. Cost not stated. San Francisco. Architect, Architectural Dept., Temporary City Hall Bldg., S. F. Owners, City and County of San Francisco. This building will be known as the Hospital for the Infirm Poor and will be erected on the Relief Home Tract. Plans were previously out for figures but the bid of the lowest man was rejected as being above the appropriation. New figures are now being taken. Bids will be opened on January 15th. Plans, specifications and full particulars can be secured from the Department of Architecture.

HOTEL—8 story and base, brick and steel, \$85,000. San Francisco. Architects, Hladik & Thayer, Monadnock Bldg., S. F. Owner's name withheld. The building will be erected in the Fifty Vara District, and will contain in the neighborhood of 200 rooms and baths. There will be steam heat, elevator service, a vacuum cleaning system and all other modern conveniences. Further details of construction have not been determined, but will be given in these columns as the plans progress. Figures will be called for in the course of the next month.

HOTEL—6 story and base, reinforced concrete, \$60,000. San Francisco. Architects, Hladik & Thayer, Monadnock Bldg., S. F. Owner's name withheld. This building will contain in the neighborhood of 120 rooms, nearly all of which will have connecting baths. Interior finish will be of pine and redwood with some oak and ornamental plaster in the lobby. There will be steam heat, elevator service and a vacuum cleaning system. The exterior will probably be faced with cement plaster. Detail plans are now being prepared and will be out for figures in three weeks or a month.

HOTEL—4 story and base, brick and steel. Cost not stated. San Francisco. Architects, Reid Bros., California-Pacific Bldg., S. F. Owners, Peninsula Realty Co. The building will be erected at the northwest corner of Ellis and Fillmore streets. The first floor will be arranged for stores, the hotel entrance and lobby. Upper floors will be divided into about 120 rooms and baths. Interior finish will be of pine and redwood. There will be steam heat and elevator service. The exterior will be

faced with pressed brick. Plans are now being prepared.

HOTEL—7 story and base, brick and steel, \$70,000. San Francisco. Architect, N. W. Sexton, Chronicle Bldg., S. F. Owner's name withheld. The building will be erected in the north line of Sutter street, between Jones and Leavenworth streets, and will be strictly modern in all its appointments. There will be steam heat, elevator service and a vacuum cleaning system. Interior finish will be of pine, redwood and hardwoods. All rooms will have connecting baths. The exterior will be faced with pressed brick. Plans are being prepared.

REMOVAL OF BUILDING—4 story Class A construction. Cost not stated. San Francisco. Architect, City Dept. of Architecture, Temporary City Hall, S. F. Owners, City and County of San Francisco. Bids will be opened on January 22 by the Board of Public Works for moving the present Commercial High School from its site on Grove street, between Larkin and Polk, to a new site on Fell street, between Van Ness avenue and Franklin street. A bond of \$125,000 is required of the successful bidder. The building is the largest Class A structure that has ever been attempted to move in this city, and the feat will be watched with more than ordinary interest. The official proposal for this work appears in another column of this issue.

STORES AND OFFICES—Reinforced concrete, \$40,000. San Francisco. Architects, Frye & Schastey, Monadnock Bldg., S. F. Owners, Hop Woe Society. This will be one of the first high class commercial buildings to be erected in San Francisco's Chinatown. There will be several stores on the first floor and offices above. Interior will be finished in pine and hardwoods. There will be a central heating system. The exterior will be faced with pressed brick. Patent store fronts will be used. Plans are complete and will be out for figures next week.

STORES—1 story and base, reinforced concrete. Cost not stated. San Francisco. Architect, none. Owners, N. A. and Sarah J. Dorn, Phelan Bldg., S. F. The building will be erected at the corner of Davis and Washington streets in the wholesale district. There will be two stores with patent store fronts. The exterior will be faced with cement plaster. A contract for the excavating has been awarded to the Sibley Grading and Teaming Co., and plans for the balance of the work are out for figures.

STORES AND LOFTS—2 story and base, brick, \$21,000. San Francisco. Architect, D. C. Coleman, Merchants' Exchange Bldg., S. F. Owner, M. Fisher. The building will be erected at the southeast corner of Pine and Van Ness avenue, and will cover an area of 80x84 feet. The first floor will be arranged for automobile sales rooms and the upper floor for light lofts. There will be a freight elevator. Interior finish will be of pine. The exterior of the building will be faced with cement plaster. Plans are complete and the work will be done by Day Labor.

WATER MAIN AND BY-PASS—Cost not stated. San Francisco. Engineer, Constructing Q. M. Dept., U. S. A., Fort Mason. Owners, United States Government. Bids will be received until 11 a. m. of January 16th for constructing additional 10-inch water main and By-

pass at Fort Winfield Scott. Plans and specifications can be obtained from the Constructing Quartermaster at Fort Mason. The official proposal appears in another column of this issue.

Exposition Co. Open Bids For Sewers.

Seven Bids Received For The Construction of Sanitary and Storm Water Sewers.

Seven sets of figures were received by the Panama-Pacific International Exposition Company on January 9th for the construction of sanitary and storm water sewers on the Exposition Site at Harbor View. Michael Murphy presented the lowest figure at \$28,350. From this amount bids ran as high as \$49,000. The following is a complete list of all figures received:

Sanitary and Storm Water Sewers.

Sunset Constr. Co.	\$32,000
Contra Costa Constr. Co.	49,200
Pringle-Dunn Co.	31,000
Healy-Tibbitts Constr. Co.	35,000
Hilmer & O'Connell	43,500
Michael Murphy	28,350
Edward Malley	43,700

Big Opportunities That Are Neglected.

Charles S. Paget, of Canton, Here to Tell Material Dealers of a Splendid New Field.

Charles S. Paget, a member of an old established firm, long identified with many prominent architectural and business projects in the Far East and notably in Southern China, is stopping at the Palace Hotel.

Mr. Paget is an associate member of the American Society of Civil Engineers and his long sojourn in the Orient has given him an insight into conditions, as they exist, in the new and growing republic possessed by few men in the profession. Mr. Paget is an American citizen who has spent eleven years in China and has become identified with the development and progress of the new Chinese Republic. He is here to stimulate American interest and enterprise in that country and would like to meet San Francisco dealers, manufacturers and exporters of building materials with a view of introducing American materials into Southern China.

In speaking of San Francisco and the possibilities at hand for the future development of a most valuable trade with China and the Far East, Mr. Paget said: "I am much impressed with the wonderful development of this city, the excellent and substantial character of its buildings and the wonderful recuperation of the city from the disastrous effects of the earthquake and fire and above all the optimistic spirit of the business men of the city. A wonderful opportunity lies before San Francisco in the development of trade with the ambitious and awaking China."

Mr. Paget's views on the splendid opportunities which lie before San Francisco in relation to trade with the Far East are in accord with those held by this paper. The "Builder" has, from time to time, made determined efforts to stimulate the interest of San Francisco firms in construction work abroad, printing advance news of large projects pending in the Far East, but with little success. Many incidents could be sighted of large construction enterprises upon which bids were called and notice given in the press of many Pacific Coast cities which attracted no bidders from this coast. The same condition is true, to a greater or less extent, of government and private work in Hawaii and the Philippine Islands.

Another determined effort will be made by the "Builder" in the near future to stimulate interest in construction work abroad by the publication of construction news from countries of which San Francisco is the logical shipping point. Various prominent business men will be interviewed to learn their stand on the subject and, in cases where possible, plans, specifications and complete information relative to the work will be secured from the authorities.

Mr. Paget will be in San Francisco for the next two or three weeks, after which he will visit Chicago and New York with the purpose in view of stimulating trade relations with the Orient. Later he will interview the merchants and manufacturers of London and Europe. As, in the case of most patriotic citizens who have spent years in foreign lands, Mr. Paget is decidedly American and his greatest ambition is to see his home country come into its own in the matter of foreign trade. As an American he is envious of the splendid energy with which the English and German merchants and manufacturers pursue the export trade opportunities and hopes to see the time when the United States and particularly the Pacific Coast cities will awake and grasp the chance offered to dominate this great commercial field.

BUILDING SUPERINTENDENT.

Glacken, Edwd. E., General building superintendent, architectural and structural; supervision of any class of building construction. Expert in reinforced concrete, including cost data, design, floor load, quantity surveying, etc. Address 568 Golden Gate Ave. Phone Franklin 7619.

Building Contracts Awarded.

OAKLAND AND ALAMEDA COUNTY.

APARTMENT HOUSE ALTERATIONS—Frame construction, \$30,000. Oakland, Cal. Architect, A. W. Smith, 1010 Broadway, Oakland. Owner's name withheld. This work will include the removal of two three-story frame buildings from the present site to the rear of the lot and complete alteration of the same. When complete the new structure will contain 24 apartments of two and three rooms each. There will be connecting baths and wall beds. Steam heat will be installed. A vacuum cleaning system is also specified. The exterior of the building will be covered with cement plaster on metal lath. Plans have been out for figures and a contract will be awarded shortly.

APARTMENT HOUSE AND STORES —3 story and base, frame, \$25,000. Oakland, Cal. Architect, C. N. Cook 14th Bldg., S. F. Owner's name withheld. The building will be erected on a corner lot and has been arranged for eight stores on the first and two for eight stores on the first. These will be arranged in two and three room apartments, all of which will have connecting baths and portal wall beds. A sleeping porch will be a feature of all apartments. Interior trim will be of pine and rewood. There will be steam heat. Baths will be finished in tile and will have cement floors. The exterior of the building will be covered with cement plaster. Patent store fronts are specified in all stores. Plans are complete and will be out for figures shortly.

APARTMENT HOUSE ALTERATIONS—Frame construction, \$25,000. Oakland, Cal. Architect, Chas S. Groves, 2311 Telegraph Ave., Berkeley. Owner, Mr. McLean. The present building, which is 32x70 feet, will be altered so as to contain a number of two and three room suites with bath. T. C.

will be complete new interior trim, new plumbing, plastering and electric work. Open fire places will be used with brick mantels. The exterior of the building will be covered with rustic stone and being prepared.

FABRIC FACTORY—29 buildings of brick and corrugated iron. Cost not stated. The Engine, Alameda Co., Cal. Electric, Engineering Dept., Coast Manufacturing and Supply Co., Eureka, Vice-President and General Manager A. H. Merritt states that building operations will be begun on these four works here about March 1, and that the plant will be running full blast by midsummer. There will be 29 buildings erected on their recently purchased property, and the total floor space in them will be between four and five acres. Most of these buildings will be small, but others will be 250 feet long. They will be built of corrugated iron, with hollow tile brick for fire walls. In addition to the factory buildings and an office building, there will be residences erected for General Manager Merritt, Assistant Manager T. W. Morris, Traveling Expert G. H. Todd and Superintendent A. S. Cole. There will also be bunkhouses for 20 Chinese workmen.

RESIDENCE—2 story and base, frame, \$1,500. Berkeley, Alameda Co., Cal. Architect, Olin S. Grove, 2911 Telegraph Ave., Berkeley. Owner, E. A. Janssen, Hearst Bldg., S. F. The house has been designed for an eight-room dwelling with bath, sleeping porch and laundry. Interior finish will be of pine with hardwood floors. There will be furnace heat and open fire places. Mantels will be of brick. Tile will be used in the bath room and kitchen. The exterior of the house will be covered with cement plaster on metal lath. Plans are being prepared and when complete the work will be done by Day Labor.

RESIDENCE—2 story and base, frame, \$6,500. Oakland, Cal. Architect, L. W. H. Ratcliff, Jr., First National Bank Bldg., Berkeley. Owner, Mrs. R. W. Baum. The house will contain in the neighborhood of nine rooms, baths, sleeping porches and laundry. Interior finish will be of pine, redwood and some hardwood. Floors will be of oak in all principal rooms. There will be furnace heat and open fire places. Mantels will be of tile. Tile will be used in the baths and kitchen. An automatic water heater will be installed. The exterior of the dwelling will be covered with cement plaster on metal lath. Plans are complete and figures are now being taken.

BUNGALOW—1½ story and base, frame, \$3,400. Oakland, Cal. Architect, none. Owners, Junk-Riddell Co., 2447 Telegraph Ave., Berkeley. The house has been designed for a seven-room dwelling with bath, sleeping porch and laundry. Interior trim will be of pine, redwood and hardwoods. Oak floors will be used in three rooms. There will be furnace heat and open fire places. Mantels will be of brick. The exterior of the dwelling will be covered with shingles. Plans are complete and the work will be done by Day Labor.

RESIDENCE—2 story and base, frame, \$2,500. Piedmont, Alameda Co., Cal. Architect, W. H. Jackson, Albany Bldg., Oakland. Owner, E. Oppenheim. The house will contain seven rooms and bath. Interior finish will be of

pine and redwood with oak floors in the living and dining rooms. There will be open fire places and brick mantels. Tile will be used in the bath room and kitchen. The exterior will be covered with cement plaster on metal lath. Plans are complete and figures are being taken.

RESIDENCE—2 story and base, frame, \$3,800. Berkeley, Alameda Co., Cal. Architect, none. Owner, W. S. Montgomery. The house has been designed for a seven-room dwelling with bath and laundry. Interior finish will be of pine and redwood. Floors will be of oak in all principal rooms. There will be open fire places with tile or brick mantels. Tile will also be used in the bath room and kitchen. The exterior of the house will be covered with cement plaster on metal lath. Plans are complete and in the hands of the owner who will do the work by day labor.

BUNGALOW—1 story and base, frame and concrete, \$12,000. Piedmont, Alameda Co., Cal. Architect, A. Leo Ellis, Shreve Bldg., S. F. Owner's name withheld. Preliminary plans only have been prepared for this work and details of construction cannot be given at this time. The house will be handsomely finished in hardwoods. There will be a central heating system and open fire places. Besides the usual living rooms there will be several baths and sleeping porches. The exterior will probably be covered with cement plaster. Complete details will be given when plans are ready for figures.

BUNGALOWS—21, 1 story and base, frame, \$1,200 each. Fruitvale, Alameda Co., Cal. Architect, C. N. Cook, Rialto Bldg., S. F. Owners, Powell Bros., Harrison Ave. and Pearl St., Alameda. These cottages will contain from four to five rooms each. All interior finish will be of pine or redwood. There will be open fire places in the living rooms with tile or brick mantels. Exteriors will be covered with shingles, rustic and shiplap. Plans are being prepared and when complete the work will be done by Day Labor.

APARTMENT HOUSE—2 story and base, frame, \$10,000. Oakland, Cal. Architect, M. L. Newsom, 812 Broadway, Oakland. Owner, Al Wood. The building is to be erected at the corner of 29th and Grove streets, and has been arranged for two stores on the first floor and four suites of three rooms each on the second floor. Steam heat and wall beds will be installed. All apartments will have connecting bath rooms. Interior finish will be of pine with some hardwood floors. The exterior of the building will be covered with cement plaster on metal lath. Plans for this work are being prepared.

FLATS—3 story and base, frame. Cost not stated. Oakland, Cal. Architect, none. Owner, Delore Roberts, Sheldon Bldg., S. F. The owner has completed the working drawings for a three-story modern flat building, and is now taking figures for the plastering, plumbing, painting and electric work. The balance of the contract will be carried on by Day Labor. Mr. Roberts is president of the Roberts Bros. Construction Co.

CLUB HOUSE—2 story and base, frame, \$20,000. Berkeley, Alameda Co., Cal. Architects, Parker & Kenyon, 244 Kearny St., S. F. Owners, Twentieth Century Club. The building will be

erected at the corner of Derby and College avenue, and will contain besides the large assembly room, a library, banquet room, social hall and a number of small rooms. Interior will be finished in pine, redwood and hardwoods. Oak floors will be used throughout. There will be a central heating system and open fire places. Mantels will be of brick. The exterior of the building will be covered with cement plaster on metal lath. Plans are complete and figures are being taken.

HOTEL—7 story and base, brick and steel, \$70,000. Oakland, Cal. Engineer, W. W. Breite, Clunie Bldg., S. F. Owners, Durst Bros., Oakland. The owners are now sub-letting all contracts. The steel work has been awarded to F. A. Muller, 1601 Telegraph avenue, Oakland, at \$13,500. Figures are being taken for the brick, concrete, plastering, plumbing, electric work, heating, carpentry and mill work, marble, tile and terrazzo and elevators. The building will be 60x100 feet and will contain 90 rooms and 42 baths.

RESIDENCE—2 story and base, frame, \$6,000. Oakland, Cal. Architect, Charles W. McCall, Central Bank Bldg., Oakland. Owner, R. W. Krobitzsch. The house will be erected in Grand Avenue Heights, and will contain in the neighborhood of eight rooms, baths and sleeping porch. Interior finish will be of pine, redwood and hardwood. There will be furnace heat and open fire places with brick and tile mantels. Floors in the principal rooms will be of hardwood. Tile will be used in the baths and kitchen. There will be an automatic water heater. The exterior of the dwelling will be covered with cement plaster on metal lath. Plans are complete and figures are being taken.

STORES AND OFFICES—12 story and base. Class A construction. Cost not stated. Oakland, Cal. Architect, Edward T. Foulkes, Crocker Bldg., S. F. Owner, D. Franklin Oliver. The building will be erected at the corner of 14th and Franklin streets, the site of the present Maple Hall, which will be moved to another part of the lot. Preliminary plans have been prepared, but no details of the construction can be given at this time. The building will be fireproof.

STORES—1 story and base. Class C construction. Cost not stated. Alameda, Alameda Co., Cal. Architect, Henry H. Meyers, Kohl Bldg., S. F. Owner, Mrs. C. S. Neal. The building will be erected on Park street near Central avenue, and will be arranged for several small stores. Interiors will be finished in pine and redwood. There will be a cement floor and patent store fronts. The exterior of the building will be covered with cement plaster on metal lath. Plans are complete and figures have been taken. A contract will be awarded within a few days.

Contracts Awarded.

HOTEL—2 story and base, frame, \$45,000. Oakland, Cal. Architect, Herbert Maggs, 125 Alpine St., S. F. Owner, James B. Coryell. Contractor, Charles Gompertz. Contract price, \$15,000.

SCHOOL—1 story and base, frame. Cost not stated. Oakland, Cal. Architect, J. J. Donovan, Secorly Bldg., Oakland. Owners, City of Oakland. Contractor, C. Christensen, Oakland. Contract price, \$5,194. For a complete list

of the figures submitted for this work see under Oakland and Alameda County in this issue.

BIDS FOR TENTH AVENUE SCHOOL

The following bids were opened at the Monday evening session of the Oakland Board of Education for the construction of the Tenth Avenue School. Plans for the work were prepared by Supervising Architect J. J. Donovan, Security Bldg., Oakland:

Tenth Avenue School.

TIMBER IN THE TROPICS.

One thing which the prophets of worldwide timber famine forget is the supply of tropical timber in a hundred jungles, waiting the demand of the white man. Until recently the coarser, commoner uses of tropical timber were hardly known outside the tropics. Mahogany, ebony, teak and rosewood were brought to northern cities for use in cabinet work, but the same ships which brought these tropical woods carried back pine for use in rough structural work in the tropics.

Of late the subtropical woods, cypress and eucalyptus have come to the front for all sorts of uses. Now "greenheart," an equatorial wood very common in Brazil and British Guiana, has been chosen for the locks of the Panama canal.

Investigators keep reporting that this or that tropical wood is really well fitted for ordinary use and can be had at a moderate price by the use of modern lumbering methods. Twenty years in the tropics will grow a forest larger than can be produced in a century in the north.

With the full utilization of the hot lands of earth the timber famine will be indefinitely postponed. — Chicago Journal.

MARIN, CONTRA COSTA AND SONOMA COUNTIES.

WHARF—Timber pile construction. Cost not stated. Martinez, Contra Costa Co., Cal. Engineer, J. C. Arnold, Martinez. Owners, Town of Martinez. Plans and specifications have received the official approval of the Town Trustees, and Federal aid in financing the construction is now being sought through Congressman Currie. The

structure as planned will be 80 feet in width and 1300 feet long. Bids will not be called for until action has been taken by the Government. Announcement will be made in these columns when the work is advertised.

BUNGALOW—1 story and base, frame. Cost not stated. Sausalito, Marin Co., Cal. Architect, W. H. Judson, Albany Bldg., Oakland. Owner, Mr. Dreger. The dwelling will contain six rooms and bath. There will be a large rock terrace blasted out of the hillside with two windows. Interior finish will be of pine and redwood. Oak floors will be used in the living and dining rooms. Open fire places will also be used. Mantels will be of tile or brick. The exterior of the house will be covered with cement plaster. Plans are being prepared.

APARTMENT HOUSE—3 story and base, frame, \$10,000. Richmond, Contra Costa Co., Cal. Architect, J. B. Ogborn, 611 Macdonald Ave., Richmond. Owner, W. W. Felch. The building has been arranged for nine apartments all of which will have telephone connection with the entrance, portal wall beds and individual gas heaters. Interior finish will be of Jenesero. Entrance steps will be of terrazzo. Plate, art and leaded glass will be used. The exterior of the building will be covered with cement plaster. Plans are complete and figures are now being taken. A contract will be awarded within a day or two.

BUNGALOW—1½ story and base, frame, \$2,000. Albany, Contra Costa Co., Cal. Architect, none. Owners, Peake-Munro Co., 2135 Shattuck Ave., Berkeley. The bungalow will contain six rooms and bath. All interior finish will be of pine and redwood. Some hardwood floors will be used. There will be an open fire place and brick mantel in the living room. Bath will be finished in tile. The exterior of the dwelling will be covered with shingles. Plans are complete and the work will be done by Day Labor.

APARTMENT HOUSE—6 story and base, brick and concrete, \$75,000. Fresno, Fresno Co., Cal. Architect, R. L. Felchlin, Fresno. Owners, E. L. Lacour and R. L. Felchlin. The building will be erected on Tulare street between N and M streets. Preliminary plans show a building containing about 40 suites of two and three rooms each. There will be steam heat, elevator service and wall beds. All apartments will have connecting baths. Further details have not been decided upon. The exterior will probably be faced with pressed brick. Plans are being prepared and the work will be supervised by Mr. Felchlin.

LOS ANGELES AND SOUTH-EARN CALIFORNIA.

HOSPITAL—3 story and base, reinforced concrete. Cost not stated. Los Angeles, Cal. Architect, Frank L. Stiff, Grosse Bldg., L. A. Owners, Westlake Hospital Association. The building will be of reinforced concrete construction, with curtain walls of brick. It will be of sufficient strength to sustain six additional stories. It will have blue brick exterior facing with metal tile roof. There will be tile corridors and baths. There will be hardwood trim, steam heat, first class plumbing and telephone wiring. Plans are complete and figure will be called for shortly.

HOTEL—3 story and base, brick. Cost not stated. Long Beach, Los Angeles Co., Cal. Architects, Kysor & Biggar, Wright and Callender Bldg., L. A. Owners, Moore & Barnett. The building will cover an area of 50x162 feet. There will be nine stores and the hotel lobby in the first story and 54 rooms, 14 private baths and 4 public baths in the upper stories. There will be a concrete foundation and basement, steel beams and columns. The exterior will be faced with enameled brick. Plate and prism glass will be used in the store fronts. There will be a galvanized iron cornice, composition roof, skylights, and fire escapes. The interior trim and floors will be of pine. A tile floor will be used in the lobby. There will be a lavatory in each room. There will be a hot water heater, plumbing, steam heat, electric wiring. Plans are complete and figures are being taken.

APARTMENT HOUSE—4 story and base, brick. Cost not stated. Los Angeles, Cal. Architect, R. B. Young & Son, Lankershim Bldg., L. A. Owner, W. W. Middlecoff. The building is to occupy a corner site and will contain a total of 90 rooms, which will be arranged in suites of two and three rooms each. All suites will have connecting baths and wall beds. Interior finish will be of pine, redwood and some hardwoods. Bath rooms will be finished in tile. There will be steam heat, elevator service and a vacuum cleaning system. The exterior of the building will be faced with ruffled brick. Plans are now being prepared.

HOTEL ADDITION—2 story and base, reinforced concrete. Cost not stated. Oak Knoll, Los Angeles Co., Cal. Architect, Myron Hunt, Hiernani Bldg., L. A. Owners, Wentworth Hotel Co. The addition will be 45x56 feet, and will contain 78 guest rooms and 40 baths on each of the two floors. Interior finish will be of pine and hardwoods. Construction will be fireproof throughout. A number of frame bungalows are also to be erected on the hotel grounds, which comprise over 23 acres. Plans for the hotel addition are complete and figures are being taken.

HOTEL—3 story and base, brick. Cost not stated. Los Angeles, Cal. Architect A. E. Fetherstonhaugh, Ferguson Bldg., L. A. Owner, J. H. Call. The building will contain 90 guest rooms, a number of public baths and the main lobby and office. There will be steam heat, elevator service and a hot water heating system. Interior finish will be of pine. Bath rooms will have cement floors. The exterior of the building will be faced with ruffled brick. Plans

are complete and bids are being taken.

HOSPITAL WARDS—2, 2 story and base, reinforced concrete. Cost not stated. Los Angeles, Cal. Architect, none. Owner, Los Angeles County. Plans for these two buildings and a two story addition to the dining hall and several kitchen and stable buildings have been completed. Bids are now being called for and will be opened by the Board of Supervisors on January 27th. Full information relative to the work can be secured from the County Clerk.

STORES AND LOFTS—6 story and base. Class A construction. Cost not stated. Los Angeles, Cal. Architects, R. B. Young & Son, Lankershim Bldg., L. A. Owner, Mrs. R. B. Young. This building is to be erected on 7th street. Details of construction are not yet settled and no particulars can be given at this time. The building will not be less than six stories in height and may be carried up to 12 or 14 stories. There will be a complete steel frame. Exterior walls will be of brick. Mr. Young states that actual construction will be started by March 1st.

THEATRE—3 story and base. Class A construction. Cost not stated. Los Angeles, Cal. Architects, Morgan, Walls & Morgan, Story Bldg., L. A. Owners, Egan School of Dramatic Arts. The building will cover an area of 160x120 feet. The main auditorium will have a seating capacity of about 450 people. Besides the main auditorium there will be music halls, recital hall, 30x88 feet. Both of these rooms will be finished in white and gold. Plans provide for a sunken garden the whole length of the building, at one end of which will be an open air stage. The second floor will contain a mezzanine gallery and general offices. The third floor is to be arranged for a number of studios, dance halls and recital rooms. There will be elevator service. Interior partitions will be of hollow tile. The exterior of the building will be faced with blue brick and terra cotta trimmings. Plans are complete and figures are being taken.

APARTMENT HOUSE—3 story and base, brick. Cost not stated. Ocean Park, Los Angeles Co., Cal. Architects, Slingsloff & Ena, Security Bldg., L. A. Owner, Ward Dawson, Wright and Callender Bldg., L. A. The building will contain 56 rooms, which will be arranged in two and three room suites. There will be steam heat, elevator service, wall beds and connecting baths. Interior finish will be of pine throughout. The exterior of the building will be faced with pressed brick. Plans are complete and the work will be done by Day Labor.

BRIDGE—Reinforced concrete \$8,000. Pasadena, Los Angeles Co., Cal. Engineer, City Engineer, Pasadena. Owners, City of Pasadena. Plans are being considered for the construction of a reinforced concrete bridge which will replace the wooden structure over the Arroyo Seco at Devil's Gate. The engineer's estimate of this work is \$7,863, and the cost will be divided between the City of Pasadena and Los Angeles County.

Contracts Awarded.

STORES AND OFFICES—12 story and base. Class A construction. Cost not stated. Los Angeles, Cal. Architects, William Curlett & Son, Title Ins. Bldg., L. A., and Phelan Bldg., S. F.

Owners, Merchants' Fireproof Building Co., Contractor, Weymouth Crowell, Story Bldg., L. A., foundations and footings only. Contract price, \$35,740.

FACTORY GROUP—1 and 2 story and base, reinforced concrete. Cost not stated. Los Angeles, Cal. Architects, Train & Williams, Exchange Bldg., L. A. Owners, Bradford Baking Co. Contractor, G. J. Ramsey, Pioneer Truck Co., 201 North Main St., L. A. Contract price not stated. Note: The present one-story building will be increased three stories in height. There will also be a two-story building, 74x45 feet, and a one-story structure triangular in shape, 165x120x200 feet. All will be of reinforced concrete construction.

SEATTLE AND WASHINGTON.

HOTEL—5 story and base, reinforced concrete, \$75,000. Seattle, Wash. Architect, Willis E. Dwyer, New York Bldg., Seattle. Owner, J. P. Jones. The plans provide for a 65x120 foot building, faced with brick, and the specifications include tar and gravel roofing, tile steam heating, plate glass, terrazzo, one elevator, fire escapes, sheet metal, metal lath, hard plastering, sidewalk elevator, sidewalk lights, etc. Mr. Dwyer is now taking bids on the above and also mill work, iron, hardware, painting, brick, carpenter work, lumber, plumbing, electric wiring and electric fixtures. Plans and specifications are complete.

ELECTRICAL AND HYDRAULIC APPARATUS—Cost not stated. Milk River Project, Montana. Engineers, U. S. Reclamation Service, Federal Bldg., L. A. Owners, United States Government. Plans and specifications are complete and bids will be opened on January 22 by the Reclamation Service engineers in Los Angeles for furnishing electrical and hydraulic apparatus for the St. Mary's unit of the Milk River project.

CHURCH—2 story and base. Class A construction, \$150,000. Seattle, Wash. Architects, Rebb & Mendel, Denny Bldg., Seattle. Owners, First Church of Christ, Scientist. Work of completing this structure will be commenced within a few days. It is estimated that the interior finish, plumbing, electric work and heating still to be done will cost in the neighborhood of \$75,000. Bids will be called for at once.

Contracts Awarded.

CON' AWARD

HOTEL—4 story and base, brick, \$55,000. Vancouver, B. C. Architects, Braunton & Leibert, Exchange Bldg., Vancouver. Owners, James Borland Co., Contractor, James Layfield, 1024 Broadway, Vancouver. Contract price, \$55,000.

HOTEL—4 story and base, brick and steel, \$145,000. Vancouver, B. C. Architects, Parr, McKenzie & Day, Vancouver Bldg., Vancouver. Owners, W. J. Bowser and G. J. Wilson. Contractor, E. J. Ryan, 768 Granville St., Vancouver. Contract price, \$145,000.

STORES AND OFFICES—6 story and base, reinforced concrete, \$100,000. Portland, Ore. Architect, J. B. Dantoff, Portland. Owners, Marcus and Eugene Cohn. Contractors, Royjohn-Arnold Co., Wilcox Bldg., Portland. Contract price, 100,000.

PORTLAND AND OREGON.

APARTMENT HOUSE—2 story and base, reinforced concrete. Cost not stated. Portland, Ore. Architect, Fred S. Allerton, Wilcox Bldg., Portland. Owner's name withheld. The building will cover an area of 50x100 feet. There will be three stores on the first floor and five three-room apartments with private baths on the upper floor. There will be steam heat, hot and cold running water and wall beds. The interior will be finished in pine throughout. The exterior will be faced with cement plaster. Plans are now being prepared.

STORES AND OFFICES—6 story and base, reinforced concrete. Cost not stated. Portland, Ore. Architects, Whitehouse & Foulhoux, Portland. Owners, Fidelity Trust Co. The building will cover an area of 50x100 feet. Plans provide for one large store on the first floor with a mezzanine. Upper floors will contain 21 offices to the floor, which will be arranged singly or en suite. There will be steam heat, elevator service, mail chutes and a vacuum cleaning system. Interior partitions will be of terra cotta tile. There will be metal window sash and frames. The exterior of the building will be faced with cement plaster. Plans are complete and figures are being taken.

205 12th, Okd.; marquee repairs; owner, Layman Real Estate Co., 1421 Broadway; contractor, J. R. D. MacKenzie, 431 15th; cost, \$180.

536-538 20th, Okd.; alterations; owner, Thos. H. B. Varney, 1304 Webster; cost, \$250.

1671 9th, Okd.; alterations; owner, Frank Gonsalves, Premises; cost, \$100.

767 53th, Okd.; fire repairs; owner,

A. Thompson, 6007 Shattuck; cost, \$151 Frank Young, 764 53th; contractor, E. 463 Central Ave., Ala.; addition to dwelling; owner, Marion Flisk, Prem.; contractor, Ed. Shaw, 5th and Central Ave.; cost, \$150.

1333 Park Ave., Ala.; carpet cleaning room; owner, Brown Furniture Co., 1339 Park; cost, \$150.

TOPOGRAPHIC DRAFTSMAN.

Copyist Topographic Draftsman.
February 5-6, 1913.

The United States Civil Service Commission announces an open competitive examination for topographic draftsman and copyist topographic draftsman, for both men and women, on February 5 and 6, 1913. From the register of eligibles resulting from this examination certification will be made to fill a vacancy in the position of topographic draftsman at \$1000 per annum in the Coast and Geodetic Survey, and vacancies as they may occur in the positions of topographic draftsman and copyist topographic draftsman, unless it is found to be in the interest of the service to fill any vacancy by reinstatement, transfer, or promotion.

The salary of the position of topographic draftsman ranges usually from \$1,000 to \$1,500 per annum, and for copyist topographic draftsman from \$900 to \$1,500 per annum.

Competitors will be examined in the following subjects, which will have the relative weights indicated:

TOPOGRAPHIC DRAFTSMAN.

Subjects.	Weights.
1. Drawing (a specimen of topographic drawing will be given for reproduction in india ink)...	35
2. Lettering (test of short words in different styles of lettering, and numbers are given.....)	35
3. Mathematics (comprising arithmetic, algebra to and including problems involving quadratics, plane and solid geometry, plane trigonometry, logarithms, mensuration, and projections)	30

Total 100
Time allowed, two days of seven hours each.

Competitors who fail to attain an average rating of at least 70 in the subjects of drawing and lettering will not be eligible for appointment. Not more than five hours will be allowed on the second day for the work in lettering. No submitted drawings will be accepted. Competitors who average 70 per cent or over in the subjects of drawing and lettering may also have their names entered on the copyist topographic-draftsman register, provided that they state in answer to Question 1 of the application that they desire both examinations.

All topographic-draftsman positions in the Departments of Washington are filled from this register, or, if there are no eligibles therefrom, from the copyist topographic-draftsman register.

COPY TOPOGRAPHIC DRAFTSMAN.

Subjects.	Weights.
1. Drawing (a specimen of topographic drawing will be given for reproduction in india ink) ..	50
2. Lettering (test of short words in different styles of lettering,	

and numbers are given). 50

Total 100

The tests in drawing and lettering are identical with those given in the topographic draughtsman examination. Competitors who take both examinations will take these tests but once. No multiple drawings will be accepted.

Time allowed, two days of seven and one hour, respectively.

Competitors will be furnished drawing paper, but they must supply themselves with drawing board not less than 15 inches square, pen, ink, and any other drawing materials which they deem necessary.

Age limit, 18 years or over on the date of the examination.

ASBESTOS FACTORY OPERATING.

REDWOOD CITY, January 10.—An asbestos factory is now in operation at Redwood City and the new process which was installed as an experiment has proven so successful that a \$75,000 building will be erected at once. The plans provide for a \$1,000,000 plant of which the proposed building is to be a unit.

EXPOSITION AND CITY HALL BONDS READY FOR DELIVERY.

Yesterday the last of the city bonds purchased in July by N. W. Halsey & Co. for a syndicate and amounting to \$5,608,000 were delivered. The bonds to be turned over are exposition bonds amounting to \$1,000,000, on which the premium to be paid is \$37,074 additional, and City Hall and Civic Center bonds amounting to \$308,000, on which the premium is \$15,715.70.

The accrued interests, which will also be paid to City Treasurer McDougall by the purchaser, amounts to \$9583.30 on the exposition bonds and \$585 on the City Hall and Civic Center bonds.

The amount of the bonds sold last July were: Exposition, \$1,000,000; City Hall and civic center, \$2,948,000; sewer, \$400,000; fire, \$680,000; school, \$400,000; hospital, \$180,000. The Exposition Company postponed calling for the proceeds of the exposition bonds until the money was needed, and the city saved interest by deferring delivery. Half of the \$1,000,000 and premium will be turned over to the Exposition Company now and the remainder is to be held by the city until March.

APPROPRIATIONS FOR PRESIDIO.

WASHINGTON, January 11.—At a conference between Secretary of War Stimson, Major-General Murray and Representative Kahn, plans for the expenditure of \$1,650,000 for new barracks, Quartermaster's building and stables at the Presidio were discussed. The plans recently worked out by the War Department to do away with isolated commands and posts and concentrate troops in brigades probably will result in transferring the cavalry now at the Presidio to Monterey and bringing to the Presidio in their place three full regiments of infantry.

To place the Presidio in shape to care for the increase in troops, to make room for the Federal exhibit building of the Panama-Pacific International Exposition in the Presidio grounds and to place the reservation in the best possible condition for the exposition, it was decided that Secretary Stimson will soon send to Congress supplementary estimates for

these purposes. The appropriation of \$1,650,000 will be divided as follows:

Removing the Presidio stables to another site and for new stables, \$450,000; for a new Quartermaster's depot at Fort Mason, \$100,000; for new barracks near the Presidio entrance, \$75,000. In order to make room for the Federal exhibit building it will be necessary to remove the present stables. New stables have been needed for some time, as the present ones are unsightly and old.

The Quartermaster's storehouse at Fort Mason will be needed also for exposition purposes. It is planned to make the new barracks at the Presidio entrance large enough for a regiment.

PERMANENT INJUNCTION AGAINST LUMBER TRUST.

NEW YORK, January 11.—The Government's petition for a permanent injunction against the Eastern States Retail Lumber Dealers' Association, alleged to be a combination in restraint of trade, was granted Thursday by the Federal District Court. Final arguments for and against the injunction were heard a few weeks ago.

The defendants include also the New York Lumber Trade Association, the Building Material Men's Association, the New Jersey Lumber Men's Protective Association, the Retail Lumber Men's Association, the Retail Lumber Men's Association of Baltimore, the Lumber Exchange of the District of Columbia and others.

The Government's petition, filed in 1911, alleged that the defendants were engaged in a conspiracy in restraint of interstate trade, operated through the instrumentality of blacklists, fines, and expulsion from membership, and that by trade agreements they arbitrarily fixed prices.

WASHINGTON, January 11.—The Government's victory at New York against the so-called lumber trust is regarded by officials of the Department of Justice as one of the most important accomplishments under the Sherman anti-trust law, because it limits in large measures the power and privileges of the much discussed "middle man" in commerce.

The decision is construed here as meaning that the consumer of lumber, untrammelled by the retailer, may purchase direct from the wholesaler or manufacturer, and the latter may sell direct to the public without the interference of a combination of retailers.

The issue decided was one of three civil proceedings and one criminal prosecution against retail lumber dealers' associations charged with conspiracy by various means to prevent the public from dealing directly with the manufacturer or wholesaler of lumber.

The lumber trust cases still pending, constituting in the aggregate a nationwide movement, are directed against the Michigan Retail Lumber Dealers' Association, filed at Detroit; the Colorado and Wyoming Lumber Dealers' Association, filed at Denver, and the Lumbermen's Secretaries' Bureau of Information, filed at St. Paul. In addition there is pending at Chicago an indictment charging the secretaries of fourteen retail lumbermen's associations, covering twenty-three states, from Pennsylvania to the Pacific Coast,

with conspiring to control the marketing of lumber through the retailer.

STATE BOARD PROPOSED FOR CITY WATER SUPPLIES.

SACRAMENTO, January 10.—A series of bills that are to directly affect the State Board of Health have been prepared and are in the possession of former Senator Louis H. Roseberry of Santa Barbara.

The majority of the bills propose minor changes in the present laws, but there is one which provides for supervision by the State Board of all city water supplies. A sanitary engineer to have charge of such supervision is provided for. The State Board is to see to it that the water supply is sanitary and its powers go to further.

Former Senator Roseberry is here in the interest of the measures.

WILL BUILD FERRY BOATS.

A contract for the construction of another steel ferry boat to be a duplicate of the Alameda, now under construction at the West Oakland ship yards, has been let by the Southern Pacific Company to the New Jersey Ship Building Works. The hull will cost \$98,000. The name of the new vessel will be the Santa Clara. A third contract will be let shortly for the San Mateo. This fleet will be placed on the broad gauge run. All of the vessels will be of steel, including the upper works. They will make the trip from pier to pier in 12 minutes. The Alameda will be placed in commission within six months. The two wheels will be operated independently by different engines.

ONE ADDITIONAL TREASURY BID.

Work Will Probably Be Awarded to Grant Fee Although Three Lovest Men Stand a Chance.

The greatest difference between the three lowest lump sum bids for the San Francisco Sub-Treasury Building is but \$13,200. While the bid of Grant Fee, \$384,300, is regarded as the one that will be accepted still with the twenty-four alternative propositions there can be no certainty of this until after all deductions have been compiled by the Supervising Architect's office. The three lowest figures were as follows: Grant Fee, \$384,300; Lindgren & Co., \$397,400 and Eugene Schuler, Wahpeton, S. D., \$397,500. Two local firms are represented and in all probability the work will go to one or the other.

One bid, that of Connors Bros., Lowell, Mass., was omitted from the list of figures received from Washington Monday, but was forwarded later and is \$407,437. The bid of the King Lumber Co., Charlottesville, Va., should read \$444,000.

NEW YORK ARCHITECTURE.

Judging from the remarks made about New York buildings by Achille Duchene, the French architect now over here, he is one of the not too numerous foreigners who realize that for things American to be different from things European is or may be

reason for commendation rather than for reprehension.

Our skyscrapers do not shock his artistic sensibilities; instead, he credits them with something of beauty, steadily increasing, as well as with a certain grandeur, and he rejoices over the many evidences he finds in this country of departure from the strict utilitarianism with which foreign critics so often charge us.

Especially enthusiastic is M. Duchene in his comments on the new Grand Central station as a triumphant attainment of beauty through simplicity of line. Those of us who have had occasion to observe, and inclination to observe carefully, that huge structure through its long approach to the completion now near, will fully agree with the French architect's praises of its magnificent severity. Frankly adapted in every detail to the purposes it is to serve, its gleaming corridors and lofty chambers are yet monumental, and to the sensitive they will always be a training and an education in applied esthetics.

The station is impressive without being depressive—an end not easy of attainment. The emotions it evidently gave to M. Duchene will be shared by more Americans than he perhaps believes. Certainly it proves that our builders can do more than copy the masterpieces of Europe, even if they have been, very properly, the humble students of those masterpieces.—New York Times.

SHIPBUILDING RECORD SHOWS AN INCREASE.

WASHINGTON, January 7.—Shipbuilding in the United States during the last six months of 1912 amounted to 791 vessels, aggregating 163,384 tons. This was an increase of 49,000 tons and seven vessels over the corresponding period of 1911. Seventy-three vessels were steel and the remainder of wooden construction. The total steel tonnage was 98,109.

GOLD PRODUCTION AND PRICES.

The increase in the world's production of gold during the year 1912 is due entirely to South Africa. That country shows an increase of about \$20,000,000, which not only compensates for a decrease of \$16,000,000 in the United States, Mexico and Australia, but leaves a net increase of \$4,000,000. The Transvaal is expected soon to reach its maximum production. As the higher levels of the mines become worked out and as mining at deeper levels proves unprofitable, it will begin to show a decrease. We must then look to the virgin fields of Rhodesia and to new fields yet to be discovered for maintenance of the present sale of production.

Great demand for gold from India, which country has swollen its imports of the metal from \$50,000,000 in 1909 to \$140,000,000 in 1912, has gone far to offset the effect on prices of the increased production in recent years. If that country continues to increase its consumption on the same scale, and if a demand arises from China and other Asiatic countries as they come into closer touch with Western civilization and commerce, the value of gold may return to the figure at which it stood

before the output began to boom. This is another way of stating that prices of commodities would recede.

Of course, the depressing effect of gold production on prices may be offset by counteracting causes, but at least the trend of prices would be less upward than if gold production were increasing simultaneously with a growth of demand for necessities out of proportion to growth of supply.—Portland Oregonian.

CIVIC CENTER PURCHASES.

Arrangements have been completed by the supervisors' building committee to purchase for civic center purposes the site of the old supreme court building at the northwest corner of Larkin and McAllister streets from Isaac Kohr for \$107,500, the lot being 120 by 137½ feet. The committee is also considering the purchase of additional land for the Cooper school for the price of \$13,550.

OCTOBER R. R. TRAFFIC BEATS ALL RECORDS.

The receipts and the expenses of the steam railways for the month of October, 1912, are greater than for any other month in their history. Net operating revenue, which is the gross income before anything has been taken out for taxes and rentals, interest on bonds, appropriations for betterments or dividends, averaged \$15.71 per mile of line per day, which contrasts with \$13.74 for October 1911, an increase of \$1.97. This is an increase per mile of line for the month of \$61.13, or 14.4 per cent.

The monthly summary of the Bureau of Railway Economics, compiled from the reports of railways to the Interstate Commerce Commission, covers for October 226,636 miles of line, or about 96 per cent of all the steam railway mileage of the United States. The aggregate net operating revenue for this mileage was \$107,440,518, which is greater by \$14,870,125 than that for October, 1911. The increases were due in greatest proportion to the freight traffic, which is always greater the year.

AFTER NEW BRIDGE FOR STATE HIGHWAY.

REDDING (Shasta Co.), January 8.—Now that the new Board of Supervisors has taken office, the City Trustees are making a move to secure the building of a new bridge across the Sacramento at the north end of Market street, this being necessary to have the State highway routed through the business center of Redding. Otherwise it will swing across the river over the Free Bridge, a mile south of Redding and thus sidetrack the city.

Mayor Harry W. Glover appeared before the Supervisors and asked for a conference. The Supervisors agreed to confer with the City Trustees.

The bridge, if it is built at all, will have to be erected at the joint cost of the city and county. It will cost at least \$50,000.

NEVADA BANKS PROSPER.

RENO (Nev.), January 8.—State Bank Examiner Eugene Howell's annual report to Governor T. L. Odde shows that the State banks of Nevada are in an excellent condition and that the practice of allowing over-

drafts has been almost entirely done away with. He reports the organization of the new bank of Wells, in Elko County, and that the Bullfrog Bank, which suspended in 1909, has paid 53½ per cent and that another dividend of about 5 per cent is soon to be declared.

EXPOSITION INCREASES STOCK.

The Board of Directors of the Panama-California Exposition Company of San Diego—the company that has charge of the exposition to be held in the South in 1915—has filed a certificate of increase of capital stock in the office of the Secretary of State. The capital stock has been increased from \$1,000,000 to \$3,500,000, an increase of \$2,500,000.

TO ELECTRIFY MILWAUKEE LINE.

WASHINGTON, January 8.—What Secretary Fisher believes to be the beginning of the electrification of all transcontinental railroads was marked Tuesday by a grant to the Great Falls (Montana) Power Company to transmit over public domain under strict Government regulations power for the electrification of 450 miles of tracks of the main line of the Chicago, Milwaukee and Puget Sound Railroad between Harlowtown, Mont., and Avery, Idaho.

The fact that the Great Falls Company was "willing to accept the fullest provisions for the protection of public interests, even where all it was asking was for a transmission line," is of even greater importance from the public-benefit view, asserted Secretary Fisher, than the further great electrification of railroads which must follow.

The grant, which is for fifty years, was worked out under the act of March 4, 1911, relating to electrical transmissions, telephone and telegraph lines.

TO REPRODUCE THE GRAND CANYON.

A gigantic replica of the Grand Canyon of Arizona, the most elaborate concession of its kind ever devised for a world's fair, is being arranged by the Santa Fe Railroad as its feature of participation in the 1915 Exposition. The concession will reach a cost of \$250,000.

The canyon will be shown on staff and canvas, with every device of the expert scene painter brought into use.

In obtaining the wonderful sunset colors of the canyon walls—colors which the master artists of this generation have tried in vain to duplicate on canvas—the architects of the scheme will resort to electrical illumination.

It is planned to give spectators a first glimpse of the artificial canyon from an observation platform. The rugged desert and its mighty chasms will open to view, with much the effect of well-known paintings of the canyon which hang in railroad offices and hotels all over the land.

ABATEMENT OF THE SMOKE NUISANCE.

Later cities have come to look to electricity to cure the great evil of soft coal burning locomotive smoke. New York city has eliminated the locomotive from all passenger trains enter-

PATENTS

WILLSON & CO.** Patent Attorneys Box 230 Willson Bldg. WASHINGTON, D. C.

ing that city, and Philadelphia has received assurance which justifies the expectation that electricity will in due time be used at Broad-street Station for local traffic at least. The smokeless locomotive for freight and passenger service alike is more promising for the general abolition of the railway smoky nuisance. If Pittsburg receives such a blessing, the growing murkiness of Philadelphia atmosphere must also give place again to the limpid clarity that formerly characterized it.

West Philadelphia particularly will have occasion to rejoice when the black smoke emitting locomotives disappear from that section. With the steady annual increase in the enormous business of the Pennsylvania Railroad, its locomotives have multiplied correspondingly, and the smoke which they scatter for miles over city residences has for thirty years past made many sections of that part of the city less and less desirable to live in. Nevertheless, because of other advantages, population continues to gain there, the people living in hope that the smoke nuisance will in some way be overcome.

That hope has been long disappointed, but the statement laid before the Council of Pittsburg will give it a new

basis. The people of that city have the strongest possible motive to fight the smoke nuisance, and if they succeed, their victory will redound to the common benefit of all afflicted in any degree by the same grievance.—Philadelphia Press.

The Parcels Post is causing a great howl to emanate from the express companies already. As yet it is only fragmentary and primitive compared to European countries yet it is a beginning made in the face of opposition by enormous wealth. John Wanamaker, who was at one time Postmaster General, has always been in favor of the Parcels Post and is also enthusiastically in favor of Government ownership of the telegraph and telephone.

In a recent interview in commenting upon the victory achieved in getting this much of parcels service by the government he is reported to have said:

"I want to see the two great servants of The People, the telegraph and the Post Office, reunited, and the telephone brought in to enhance the value of the combination.

Public interest, private needs, and the popular will call for these agencies to protect the great postal system of the country. The longer their employment is delayed, the greater the aggravation and injustice to The People, and the costlier it will be.

The electric current belongs to The People by right, and is bound to become their servant—not of a class, nor of one-sixty-fourth of the population, as at present.

I don't believe in the confiscation of vested rights; but if the Government can spend \$400,000,000 on the Panama Canal for limited interests, it could find money to purchase telegraph and telephone lines, and perhaps cable service."

In other words it is Wanamaker's opinion that the great public utilities

belong to the people because of their universal use and that no private monopoly should be allowed to control them.

Wanamaker is a merchant prince, the owner and head of one of the great department stores of the country. This is his idea of the Post Office, the telegraph and the telephone. The control of these great public utilities by the government is sure to come sooner or later. In the meantime the Pacific States Telephone Company still continues to hold possession of and operate the Home Telephone Company of this city in open and direct violation of their contract with the City and the terms of their franchise and in direct opposition to the expressed will of the People.

The permanent injunction secured by the Federal Government against the retail dealers in lumber combines promises to be far reaching in its effect. So far as reports go in the associated press dispatches, little can be said of the merits of the case. From the facts as given it would seem that the court had determined that the Trust had violated the Sherman Anti-trust law and had combined to raise prices to the consumer. Whether the reform expected will result remains to be seen.

The lumber combine is another demonstration of dealers over reaching themselves and becoming arrogant with the increase of power. If the dissolution of the combine results in cheaper lumber to the consumer, if it reduces unnecessary cost of distribution and unjust profit of the middle man the building business and the individual dealer will profit thereby. The decision of the court has been hailed with a good deal of satisfaction by the department of justice in Washington, according to reports. The public generally will await practical results.

Editorial Comment.

Some fifty cities reported to the American Contractor show an aggregate gain in building construction for the month of December, 1912, over the same month of 1911 of about 26 per cent. This is in a great measure due to the substantial gain recorded in New York which shows an increase of about 64 per cent and some of the more substantial cities throughout the middle west. Chicago being the only city of importance that showed any loss of comparative importance.

Building statistics are interesting in many particulars. If they are accurate they show an accurate index of prosperity and growth.

For instance, New York always shows a vast amount of money spent in building as does also Chicago, and in a less degree such cities as Cleveland, Pittsburgh, Boston and Baltimore. But Philadelphia, for instance, the third city in size shows a building record about equal to San Francisco. So also St. Louis, a sleepy old southern town of twice the size of San Francisco, shows a building record of far less amount. The cities that are doing things show substantial building records. Those that are simply marking time are those that have attained their growth and are no longer increasing in population. Statistics for December are shown in the following table:

	December, 1912	December, 1911
	Cost.	Cost.
Akron	\$ 254,085	\$ 175,770
Atlanta	918,490	324,678

Total

Senator Root, acting for the administration, has introduced into the Senate a bill to repeal that portion of the canal bill that provides for the exemption from tolls of American shipping. In doing this he is acting in the interests of the eight transcontinental railroad lines whose interests he serves.

This step will pass the matter up to Congress directly and there is every reason to suppose that the administration measure will get it just where the administration got it last November.

What treaty obligations would be violated by exempting American coastwise shipping is hard to see. But as Taft and Root believe that nobody has a right to be heard but the representatives of wealth the demand of the railroads is the only thing to be considered.

The Chinese republic is the country of the future. The oil empire is in a state of transformation. The rich valleys of the Yangtze and the Hoango that have for untold ages supported countless millions of people will awaken to modern progress and modern mechanical devices will transplant the antiquated methods of farming that have been used for thousands of years.

American capital and American products will find opportunity in the land of the celestial kingdom. Modern buildings and modern sanitation will supplant the old shacks of the pest ridden cities and it will only be a comparatively short time till the public and private life of the orientals will be modernized.

For the school master has been abroad in the land. The young Chinese have been educated abroad. They have become imbued with modern ideas of science, of politics and of govern-

ment. And they not only know the value of modern methods but they know the value of sanitation, of permanent construction and healthful conditions. So that when government buildings go up in the new China they are very likely to be constructed along modern lines. And as fast as may be and as fast as conditions will admit the cities will be made sanitary in a degree. This will necessarily involve modern construction. Here is an opportunity for American builders. In yesterday's *Bull* was printed an interview with Mr. Paget, an engineer who comes from Canton, China, and in it some suggestions are made to American builders to get into the work and look over the ground. Building must be done over there. There is no reason why Americans should not do it. If money is to be made there is no reason why Americans should not make it.

As usual the Senators and Assemblymen at Sacramento are introducing an untold number of bills. The trouble with us is that we are getting too many laws. The courts have hardly had time to construe a law till a lot of other measures are passed covering the subject so that one never knows what the situation is. Reforms are needed, more or less radical, but reform does not necessarily open the way to a lot of freak measures that nobody knows anything about.

OPPORTUNITY.

Master of human destinies am I;
Fame, Love and Fortune on my footsteps wait
Cities and fields I walk; I penetrate
Deserts and seas remote, and passing
by
Hovel and mart and palace, soon or late
I knock unbidden once at every gate!
If sleeping, wake—if feasting rise before
I turn away. It is the hour of fate,
And they who follow me gain every state
That mortals desire, and conquer every foe
Save Death; but those who doubt or
hesitate,
Condemned to failure, penury, and woe,
Seek me in vain, and uselessly implore—
I answer not and I return no more.

—John J. Ingalls.

THE REPLY.

They do me wrong who say I come no more
When once I knock and fail to find you in;
For every day I stand outside your door
And bid you wake, and rise to fight and win.
Wail not for perished chances passed away!
Weep not for golden ages on the wane!
Each night I burn the records of the day
At sunrise every soul is born again.
When down in mire, wring not your hands and weep.
I lend my arms to all who say,
"I can."
No shame-faced outcast ever sank so deep
But yet might rise and be again a man.
Art thou a mourner? Rouse thee from thy spell,

Art thou a sinner? Sins may be forgiven.

Each morning gives thee wings to flee from hell.

Each night a star to guide thy feet to Heaven.
—Wichita Beacon.

Sharp sand and gravel are not the only components of good concrete.

A five-story concrete building, the concrete being made of oyster shell from the reefs of Galveston Bay, has been erected at Galveston, Texas. The owners of the building and its constructors, Mr. Polin and G. Tietze, claim this material is better and cheaper than concrete made with gravel. Shell concrete built into a wall 3 feet high and 3 1/2 feet long in 1882 withstood the severe test of fire and water and is today as sound as when built. It is estimated that the shells of 5,896,000 oysters are imbedded in the walls of this building. This is said to be the only building of the kind in the world.

Telephotography or sending photographs by the telegraph is meeting with good success in Europe. Dr. Korn, the Berlin Scientist, is said to be sending photographs between stations located at Berlin, Paris and Monte Carlo and they are successfully used in press work. However, there is little demand for this sort of thing there as photographs can be sent between these stations by mail in a comparatively short space of time. For this reason he expects to take up the question of operating upon the Atlantic cable and is confident that he will be able to send photographs across the ocean. He is also considering the matter of coming to America in order to apply the system to a line between New York and San Francisco.

Some of the miscarriages of justice where special privilege has had control are well illustrated in a recent New York case which is stated in an editorial in the *Sacramento Bee* as follows:

"Sixteen years ago Miss Harriet Nugent was struck by a Metropolitan Railway Company's horse car in New York and so badly hurt her leg had to be amputated. In addition, the sight of her right eye was destroyed.

A lawyer named Benjamin Oppenheim took her case and gained a verdict for her of \$5000. The railway company appealed, and thirteen years ago caused Oppenheim to be disbarred from practicing law, on the ground that he had obtained witnesses to swear falsely.

But the other day, the higher Court sustained the original verdict of \$5000 and added \$6000 for interest. Besides that, it appears that the testimony upon which Oppenheim was disbarred was false and was manufactured against him at the instance of the Metropolitan Railway Company. Oppenheim will shortly be readmitted to the bar."

It is such methods as these that makes anarchists and dynamiters out of the people who suffer such wrongs and impositions.

These long delays of justice, the uncertainties of litigation, and the ability of rich litigants to keep matters forever in the courts is what has brought

about the necessity for industrial insurance and the abrogation of all claims for contributory negligence and the like.

In the above case not only the attorney rest under a cloud for thirteen years, but he was disbarred from practicing his profession for that period, all through perjured testimony procured by a wealthy company whose directors are the financial lights of this country.

The publishers of the *Boise Capital News* have been sentenced to ten days in jail and pay a fine of \$500 because they published a criticism of Colonel Roosevelt on their decision denying the right of the Progressive electors on the ballot.

This is certainly an unwarranted assumption of power and action without a warranted precedent. This criticism was made after the decision was rendered and the paper printed it as a matter of news. By what right the Supreme Court of Idaho punish the publishers of the *Boise News* for contempt is certainly something hard for any freedom loving citizen to see. They certainly assume a dignity which the constitution does not give them and arrogate to themselves a sanctity never conferred upon them by the people. No such power can be tolerated in a free country. Especially by a set of pig headed judges who only see their own side of a political question and are willing at all times to serve interests of wealth and privilege.

In a case of this sort the judges have the same redress against libel or slander that any other citizen has. If they can make any kind of a decision and then put any body in jail for criticizing them it is high time that a change is made. They are not only ready for the recall but the Idaho judges should themselves be in jail instead of the newspaper men.

Coating wood and glass by means of atomized metals is now a commercial process. Steam is used as a medium in much the same manner that air is used in painting and whitewashing. In illustrating the process an interesting incident is used in connection with the account of developments in the field of electricity, narrated in a recent number of the *Scientific American*:

A big tungsten bulb in a store window suddenly burned out and passers-by were astonished to note that the bulb took on the appearance of polished copper. Investigation showed that a thin film of copper covered the inner surface of the glass and formed a reflecting surface as fine as any silver mirror. The bulb hung vertically and the larger end was opaque, but the copper coating at the other end was thin enough to see through if held against a strong light. The explanation is simple. When the tungsten filament broke, a short circuit was produced on the copper supports, heating the copper until it vaporized (not difficult in a partial vacuum). The copper vapor coated the glass like so much dust, adhering more firmly, however. Atomized metals are now produced on a commercial scale for coating glass, wood and other objects. The usual procedure is to force the molten metal with a jet of steam against the object to be coated. The steam breaks up the metal into a very fine state of division and the particles adhere very well.

Progress Of The American Institute Of Architects As Indicated By Its History.

Extracts From Opening Address of President Walter Cook, of New York, at the 46th Annual Convention, Washington, D. C., December, 1912.

"The one thing that stands out in the history of the Institute is the constantly increasing interest of our members in its aims and its aspirations, and the constantly increasing unity in their views as to the best means of attaining these. Our one purpose is the encouragement of the best architecture, in every sense of the word; any advantage to the architects themselves—the improvement of their position in the community or of their material interests—follows as a matter of course; but this is not first in our minds. During the year which is nearly at an end a great deal has been accomplished, especially in furthering that education of the public toward a correct understanding of what we seek, which is our first and most pressing necessity.

"If the results of these efforts of ours have come but slowly it is perhaps in part our fault; for astonishing as it may seem, this public, or the best part of it, has listened to us with interest and good will, and in the great majority of instances has recognized the force of our arguments and the truth of what we have advanced. One example of this, and the most important one perhaps, has been the conduct of the competition for the capitol of the State of Missouri. Beginning as it did with certain conditions laid aside, which were, as we believe, not for the best interest of the State, the Capitol Commission invited a delegation of the Institute, which had called its attention to these conditions, to visit them and confer with them. This conference was a most satisfactory one, and the result was a competition for this great public building conducted in a manner which was eminently judicious, and which bids fair to add one more to our great and beautiful monuments. And recently the Capitol Board has sent its thanks to the committee of the Institute whose members advised with them. Certainly all our thanks are due to these enlightened gentlemen for the aid they have given to good art, and for the example they furnished to our whole country. And this is only one—the most prominent it is true—of many such incidents in affairs great and small, which go to prove that after all our countrymen are broadminded and patriotic and only need to have the truth shown them.

"Unfortunately we have to record one experience of a quite different nature. The Tarsney Act, authorizing the designing of our Government buildings by architects, has been repealed; and for the moment these great monuments of our country have been handed over to an official factory, to be turned out by the yard; for whatever the talent and the ability of the Supervising Architect of the Treasury, this is what must of necessity result. Nothing of this sort has ever happened in any civi-

lized country, so far as I know, unless our own unhappy experiment of years ago may be considered an exception. It is quite unnecessary for me to speak of the so-called arguments which were employed in urging this repeal—the plea of an economy which has we believe been shown not to exist, and certain others which displayed such an almost ludicrous ignorance of the whole subject, that we can but shrug our shoulders and say with Figaro, that we hasten to laugh, lest we be obliged to weep. But if any of our special guests of this year—sculptors, painters or authors—are unacquainted with them, we hope they will without delay read certain of the official documents which have been published, for they will find them most delectable. And they will certainly appreciate the logical sequence of this repeal—the establishment shortly of a special department of the Government for the manufacture of all sculpture and decorative paintings, followed rapidly by still another, whose duty shall be to turn out all odes, sonnets or lyric verse which may be needed to celebrate the achievements of our enlightened Republic.

However, we are hopeful and optimistic; we have faith in the sober second thoughts of our representatives in Congress; and we look forward with confidence to legislation in the near future which will not simply re-enact the Tarsney Act—for it had its imperfections—but will give us something even better for our country and its art.

"All of our experiences, be they victories or defeats, only serve to accentuate the need of which I have already spoken—the need to do all we can to enlighten our fellow-citizens in those matters which are our special province; to awaken their interest and better their understanding of what we do and how we do it. And the Institute during the past year has given its best attention to this subject. It has established its own special organ in the Journal; the first number of which is before you, and for which I bespeak your earnest support and its new Committee on Public Information has done good and faithful work, which will I feel assured result in much good.

"And here I wish to thank the earnest and hardworking members of the various committees to whom the affairs of the Institute have been entrusted, and to whom all of us are so much indebted. Nothing has more impressed me than the disinterested devotion to our common cause of so many busy men, who have willingly sacrificed for it their time and given to it their best service. I trust all our members will realize this, and that all will be eager and willing to add their own efforts whenever the occasion demands it. Our growing influence and power in the community rest upon this

—that we all work together for the good cause.

"As for the architectural work of our country and our time, to which we are devoting our lives, it moves on apace. Every day sees new and important buildings, and we admire and blame and criticize as the mood is upon us. It is very hard for us, who are so much in the thick of the battle, to see clearly and to give any calm-minded judgment upon it as a whole. But within a few months I have had the good fortune to talk with two fellow-architects of acknowledged eminence from across the water. Their verdict was one of enthusiastic praise for our achievements; and they made comparisons between what we are doing here, and what is done in other countries, which were most flattering to us. So I think we are justified in some self-congratulation."

Report of Committee on President's Address Made to and Approved by the 46th Annual Convention.

The President in his address makes the comment that the significant fact in the history of the Institute is the constantly increasing interest of its members in its aims and aspirations, and the constantly increasing unity in their views as to the best means of attaining these. The status of the architectural profession is still ill-defined in many parts of the United States. The issues with which the architects have had to reckon are complex and are rooted in stubborn conditions. Environments most various have wrought upon the ideas and the ideals of the architects themselves. It would be difficult to exaggerate the untoward character of some of these environments. Some of us—perhaps most of us—have been so closely involved in puzzling and trying situations that we have failed to see the entire field in its perspective and some of us have been prone to take a somewhat pessimistic view of the immediate outlook for the profession. It is therefore a cause for congratulation to the Institute that its president, a man of wide experience, high ideals, and singularly temperate mind, has been enabled, amid all the perplexing questions with which the Board has had to deal, so to preserve his sense of proportion and his wise optimism that he can deliberately affirm the constantly increasing interest of the members in the aims and aspirations of the Institute and, through all the divergencies of opinions, can note a constantly increasing unity in the views of the members as to the best means of carrying out the high purpose of the Institute.

Your committee believes that the President stands on firm ground when he asserts that, during the past year, marked progress has been made in ed-

menting the public toward a correct understanding of what we seek. But in this connection your committee cannot forbear to lay still further emphasis on the fundamental truth—that a genuine solidarity of opinion in the profession itself as to professional ideals is an indispensable pre-requisite to a proper recognition of status in the eyes of the public. The architects must themselves analyze and decide questions of ethics as between one another and as between themselves and the public with dispassionate forethought and with an eye single to the highest interest of the profession and the entire community. The first step toward the education of the community by the architects must be the education of the architects themselves.

The pulse of mind of your president is equally in evidence in his reference to the repeal of the Tarsney Act, which he treats as a disagreeable episode to be viewed philosophically rather than as a tragic finality calling for fierce invective. Viewed largely, man and his government and his institutions are but a passing show; and, if the tides of a democracy are sometimes destructive, we do well to remind ourselves that only in a society capable of change is there the possibility of progress. A generation of new lawmakers—like a generation of new children—has newly to be educated. The Institute's work is cut out for it. It hardly requires that we recommend a resolution instructing the president and the Board of Directors to take action in the premises. We venture to usurp the authority of this convention and to advise the president and the Board of Directors that it is the sense of the Institute that the President and the Board of Directors should, at the earliest time, take steps to prepare or cause to be prepared and, in due time, to submit to the proper congressional committee a bill for an act that shall not only replace the Tarsney Act but shall—as our president has said—"give us something even better for our country and its art."

Respectfully submitted,
THOMAS M. KELLOGG,
H. VAN BUREN MOGONIGLE,
ALLAN B. POND,

Chairman.

CORPORATION CHECK EXHIBITED IN DEMAND OF SOUTHERN PACIFIC AND UNITED RAILWAYS.

By Chas. K. McChutey in Sacramento Bee.

CHICAGO, January 9.—I was reading a number of things in various Bees the other evening, and I fell to wondering.

I wondered what the thinking people of California ten years from now would think of the alleged thinking people of the California of today.

What set me to thinking was the account of the supposedly important and insolent manner in which William Spruille, President of the Southern Pacific, and Patrick Calhoun, President of the United Railroads, had spoken of and to the Railroad Commission of that State.

And I rejoiced to find that John M. Eschleman, President of the Railroad Commission, had answered that impertinence and that insolence in a befitting manner.

What Brazen Threats Are These?

Have the voters of California paused to consider the insufferable cheek of these would-be dictators of the State—these mount-piecers of corporations which have controlled the State politically for years to the degradation of the State, and which now threaten political annihilation to all who dare stand in their path.

Do the People of California really understand it these men in so many words have told the Railroad Commission—the only one in the history of the State that ever was anything better than a tool of the Southern Pacific—that if its members dare to continue to legislate for The People and against the grinding exactions of the corporations, these corporations will make it their business to crush every honest man in any administrative office who stands in their pathway?

Influencing Some Employees.

Not only have they declared that, but the Southern Pacific has done more: It has induced some of its employees to appear before the Railroad Commission and threaten that body that the trainmen on the road would organize politically against the members of the Railroad Commission if that body did not stop bothering the company.

In plain English, the Southern Pacific avers it will raise again its pirate flag, and it will have a political organization of its employees to help it (make every official) walk the gangplank who does not knuckle down to its desires.

Eschleman's Manly Answer.

Chairman Eschleman has answered this arrogant insolence in fitting terms. He has demonstrated that the regulation of railroads in California by the People have been saved \$2,000,000 did not prevent the Southern Pacific in the last year making \$199,611 more than it did in the year preceding.

And he has shown also what a contemptible thing it is for the Southern Pacific to try to drum its employees into making the work of an honest Railroad Commission, in order that the State may be placed again at the mercy of Herrin's official lackeys—and all under the stale and lying pretense that honesty to The People means so much loss to the corporation that it will have to reduce wages in order to pay its way.

Calhoun's Brazen Insolence.

It would be inconceivable that insolence could go farther, were it not for the fact that Patrick Calhoun, President of the United Railroads, also took a hand at insulting and threatening the Commission.

Mr. Patrick Calhoun lives in San Francisco and not in San Quentin, not by reason of any righteous justice in the matter, but only because the Goddess with the 8 tails was cross-eyed if not blind when she selected Abraham Ruef as a victim instead of his employer.

The Boughten Mr. Calhoun.

The money value of this wholesale slaver by the prostitution of public officials applied on behalf of the United Railroads for permission from the Railroad Commission to issue five-year serial notes to the amount of \$5,000,000 to retire existing bonds of a part of its system.

The Commission declined to see the

United Railroad's books and accounts and records, in order to determine whether the permission should be granted. Calhoun not refused to allow the Commission to see any books, but he did so in an insolent and threatening speech. In a pompous and arrogant manner he talked about personal and property and sacred rights, and declared:

"It is better to face the rising sun at turn to the night that has passed, with all its noxious vapors, and to the animals and beasts of prey that skulk in the darkness."

The Calhoun Luck.

If Patrick Calhoun had any sense of the eternal fitness of things he would spend the remainder of his days in assisting the citizens of California to forget his crimes—not in forcing recollection thereof by his bitter assaults upon honest public officials.

It is extremely lucky for Patrick Calhoun that the night that has passed as well as the nights that are here, did not and do not see him entering out his heart in a State prison cell.

Are There Similar Entries?

Can it be that his indignation at the request of the Railroad Commission to examine the books of the United Railroads was all because of a guilty conscience?

Can it be that there are other entries in these books of a similarly illuminative character to that of over \$300,000 drawn by Patrick Calhoun for "special services."

Calhoun's Unclean Hands.

No matter what may be said of the Southern Pacific in this matter, at least William Spruille—so far as anybody knows—comes before the Commission with clean hands, even if in an insolent manner. Personally he is a very likable man.

But not all the perfumes of Arabia could cleanse the hands of Patrick Calhoun—the hand which directed the payment of the money which bribed the Supervisors of San Francisco—the hand which manipulated the scheme for which his brother plotter languishes in San Quentin—the hand which directed his general counsel to pay that money over to Abraham Ruef.

They Want to Breek Johnson.

This combination of the Southern Pacific and the United Railroads is no thing so much at the Railroad Commission as it is at the entire administration of Governor Hiram W. Johnson.

The powers that have been are anxious to be again. They seek to wreck politically the man who promised to kick Herrin and the Southern Pacific out of the government of California if he were elected Governor and who kept that promise.

Reiteration Sometimes Helping.

I am aware that in the writing to the citizens of California, I am but repeating, but diving into their ears that with which already they are perfectly familiar.

But iteration and iteration and "I named reiteration" is not a bad thing, sometimes, when the purpose is to cause the public indignation upon some particularly odious public offense.

Wanda That Same Thought.

And if anything more shameful has occurred in California in years than

the open threat of the Southern Pacific and the United Railroads to pull the members of the Railroad Commission politically if they do not desist from doing their duty by The People, then I fail to remember what it was.

And again I am thinking what the thinking people of ten years from now will think of the complacency of the alleged thinking people of the California of today under the brazen impudence and arrogant threats of the Southern Pacific and United Railroads.

PIKES PEAK NOT THE HIGHEST.

What is the highest mountain in Colorado? "Pikes Peak," nineteen persons out of twenty will answer, and incorrectly. The twentieth may know that the two highest mountains in the State are Mount Massive and Mount Elbert, both in Lake County, in the Leadville district. The altitude of each of these mountains, according to the United States Geological Survey, is 14,402 feet above sea level. The height of Pikes Peak is 14,108 feet. Moreover, there are fifty or sixty other peaks in Colorado approximately as high—over 14,000 feet. The lowest point in Colorado is 3,350 feet above sea level. Of all the States Colorado has the highest average altitude, estimated by the Geological Survey at 6,800 feet.

Although not the highest mountain, Pikes Peak is probably the best known peak in the United States. There was at one time a Weather Bureau station on its summit, and it now has a substantial railway station at the terminus of the highest railway line in North America. It can also be reached by an excellent wagon road and trail which connect the summit with Colorado Springs.

WASTE CONNECTIONS THAT DO THE WORK.

The "Forster" Closet Waste Connections are the latest, simplest and most sanitary waste connections on the market. The peculiar feature of the "Forster" Waste Connections is the groove, which prevents the packing from spreading, thus making the joint absolutely sanitary. The "Forster" Waste Connections ARE THE BEST. For sale at all dealers.

CHICAGO NEAR FAILURE.

CHICAGO, Jan. 17.—Mayor Harrison told a committee of aldermen and citizens that Chicago would find itself in bankruptcy soon unless the legislature gives financial relief.

Firms desiring news on special classes of buildings such as Banks, Churches, Schools, Hotels, etc., will find such items all classified and grouped under proper headings, commencing on this page. These same items are again repeated under "LOCALITIES" in the last part of our news department.

APARTMENT HOUSES.

SAN FRANCISCO.—Apartment house 6 story and base, brick and steel, \$125,000. Are feet, C. T. Ryland, 357 Polk St., S. F. Owners, L. Kingston Realty Co. Mr. Ryland has worked up only one-eighth scale drawings and the arrangement of the rooms, type of construction and all other details of the building have not been determined. Working drawings will be completed as rapidly as possible. Further information will be given as the plans progress. The building is to be erected on Sutter street west of Mason, and will have a frontage of 87 feet and a depth of 137½ feet.

SAN FRANCISCO.—Apartment house, 3 story and base, frame. Cost not stated. Architects, C. M. and A. F. Rousseau, Monadnock Bldg., S. F. Owners, Rousseau Realty Co. The building will be erected at the corner of 17th avenue and Lake street, and has been designed to contain six apartments of four rooms and bath each. The interior will be finished in pine, redwood and some hardwood. There will be a central heating system, wall beds and connecting baths. The exterior of the building will be covered with cement plaster on metal lath. Plans are complete and figures are being taken.

SAN FRANCISCO.—Apartment house, 6 story and base, reinforced concrete, \$55,000. Architect, David Salfeld, Clunie Bldg., S. F. Owner, Frank J. Klimm. This building has been mentioned here before when plans were first out for figures. It has been found necessary to revise the drawings to some extent and new figures will be called for shortly. The building will be arranged for several stores on the first floor and a large number of two and three room suites on the upper five floors. Plans provide for steam heat, elevator service and a vacuum cleaning system. Interior finish will be of pine and redwood. All suites will have wall beds and private bath room. The exterior of the building will be faced with cement plaster.

SAN FRANCISCO.—Apartment house, 5 story and base, reinforced concrete, \$75,000. Architects, O'Brien Bros., Clunie Bldg., S. F. Owner's name withheld. The building will be erected on Bush street and will have a frontage of 50 feet and a depth of 137½ feet. Interior will be arranged for ninety rooms, which will be divided into two and three room suites with private baths and separate entrances. There will be steam heat, elevator service and a vacuum cleaning system. Wall beds will be used throughout. Bath rooms will be finished in tile. The exterior of the building will be faced with white cement plaster. Plans are now being prepared.

SAN FRANCISCO.—Apartment house, 6 story and base, brick and steel, \$70,000. Architects, Miller & Chalmers, Lick Bldg., S. F. Owners, S. C. and S. G. Buckbee. This building will be erected on Jones street and has been

described in these columns before. The working drawings are now nearly complete and will go out for figures within a few days. The building will have a street frontage of 60 feet and a depth of 120 feet. Upper floors will be arranged in suites of two and three rooms with connecting baths. All apartments will have wall beds. There will be steam heat, elevator service and a vacuum cleaning system. The exterior will be faced with pressed brick.

SAN FRANCISCO.—Apartment house, 5 story and base, Class C construction, \$125,000. Architect, Arthur G. Scholz, Phelan Bldg., S. F. Owner, Patrick J. Garland. The building is to be erected at the corner of Geary and Larkin streets, and will contain in the neighborhood of 120 rooms, which will be arranged in suites of two and three rooms each. All apartments will have wall beds and private baths. Interior will be finished in pine, redwood and hardwood. Bath rooms will have cement floors. There will be steam heat, elevator service and a vacuum cleaning system. The exterior of the building will be faced with pressed brick. Plans are nearly complete and figures will be called for within a few days.

OAKLAND, CAL.—Apartment house, 3 story and base, frame, \$25,000. Architects, Thomas & Oliver, Pantages Theatre Bldg., Oakland. Owner, Mrs. Adelaide Welder. The building is to be erected on Castro street, near 14th, and will contain 18 suites of two and three rooms each. There will be steam heat and a vacuum cleaning system. All apartments will have connecting baths and wall beds. Interior finish will be of pine and redwood with some hardwood. Bath rooms will be finished in tile. Entrance lobby will be wainscoted with tile and have marble steps. The exterior of the building will be covered with cement plaster on metal lath. Plans are complete and figures are now being taken by the architects.

LOS ANGELES, CAL.—Apartment house, 5 story and base, Class B construction, \$125,000. Architect, J. W. Calhoun, Mason Bldg., L. A. Owner, A. L. Hill. The building will cover an area of 96x148 feet. Plans provide for a total of 183 guest rooms, which will be arranged in two, three and four room suites with baths and wall beds. There will also be a large lobby, amusement room, ball room, billiard room and ladies' parlor. Steam heat, automatic elevators and a vacuum cleaning system will be installed. Interior will be finished in pine and mahogany. Considerable tile and marble will be used. The exterior of the building will be faced with pressed brick. Plans are nearly complete and figures will be called for shortly.

LOS ANGELES, CAL.—Apartment house, Class A construction. Cost not stated. Architects, Train & Williams, Exchange Bldg., L. A. Owner, P. L. Auten. The building will be of the reinforced concrete type and will contain 228 rooms, which will be arranged in

large suites of from four to six rooms each. Interior finish will be of pine and hardwoods. Bath rooms will be finished in tile with composition floors. There will be steam heat, elevator service, wall beds and a vacuum cleaning system. Construction will be fireproof with metal window sash and frames and hollow tile interior partitions. The exterior will be faced with pressed brick. Plans are complete and figures are being taken.

LOS ANGELES, CAL. — Apartment house, 4 story and base, brick. Cost not stated. Architect, Leonard L. Jones, 1 W. Hellman Bldg., L. A. Owner, H. V. Bard. The building will be 50x140 feet and will contain 108 rooms, arranged in two and three room suites. All suites will have connecting baths and wall beds. Interior finish will be of pine. Bath rooms will have composition floors. There will be steam heat, elevator service and a vacuum cleaning system. The exterior of the building will be faced with pressed brick. Plans are being prepared.

LOS ANGELES, CAL. — Apartment house, 3 story and base, frame. Cost not stated. Architect, Leonard L. Jones, 1 W. Hellman Bldg., L. A. Owner, C. J. Christie. The building will be 50x121 feet, and will contain 72 rooms, arranged in two and three room suites with wall beds and private bath rooms. There will be steam heat and a hot water heating system. Interior finish will be of pine, redwood and some oak. Bath rooms will have tile walls and composition floors. The exterior of the building will be covered with cement plaster on metal lath. Plans are in the course of preparation.

OCEAN PARK, LOS ANGELES CO., CAL. — Apartment house, 4 story and base, brick, \$10,000. Architects, Ye Planry Building Co., Title Insurance Bldg., L. A. Owners, Hoyt Bros. The building will contain 55 rooms, arranged in suites of two and three rooms each with private bath and wall beds. Interior finish will be of pine and redwood. There will be steam heat. Hot and cold water will be supplied to all rooms. Bath rooms will have composition floors. The exterior of the building will be covered with cement plaster on metal lath. Plans are being prepared.

LOS ANGELES, CAL. — Apartment house, 3 story and base, brick. Cost not stated. Architect, Robert M. Taylor, Douglas Bldg., L. A. Owner, S. L. Weintraus. The building will cover an area of 50x90 feet and is to contain 51 rooms besides the lobby, amusement room and parlors. Suites will consist of two and three rooms each. There will be wall beds and private baths. Steam heat and elevators will be installed. Interior finish will be of pine, redwood and oak. The exterior of the building will be faced with pressed brick. Plans are complete and the work will be done by Day Labor.

SALEM, ORE. — Apartment house, 2 story and base, brick, \$30,000. Architect, Fred A. Legg, Salon. Owner, A. Hofer. The building is to be 75x120 feet and will contain a number of two, three and four room suites. There will be wall beds and connecting baths. Either steam or hot water heating system will be installed. The exterior will be faced with pressed brick. Interior partitions will be of tile. Interior finish is to be of pine and redwood

with some oak. Plans are being prepared.

Contracts Awarded.

VENICE, LOS ANGELES CO., CAL. — Apartment house, 3 story and base, brick, \$10,000. Architect's name not given. Owners, D. D. Smith and J. P. Mitchell. Contractors, Fireproof Construction Co., Venice. Contract price, \$10,000.

LONG BEACH, LOS ANGELES CO., CAL. — Apartment house, 3 story and base, brick, \$18,775. Architects, Austin & Lochridge, 18 Locust Ave., Long Beach. Owner, N. W. Ward. Contractor, J. W. Davidson, 325 Walnut St., Long Beach. Contract price, \$18,775. Note: This contract does not include the wall beds.

BANKS.

OAKLAND, CAL. — Bank addition, 1 story to 12 story Class A building. Cost not stated. Architect, L. B. Dutton, Chronicle Bldg., S. F. Owners First National Bank of Oakland. Preliminary plans are being prepared for an addition of one story to the present Class A building. This floor, like all of the upper stories, will be arranged for modern offices. Elevator service and steam heat will be extended, and the new portion of the building will be made identical with the rest of the structure. Plans are being prepared.

Contracts Awarded.

LODI, SAN JOAQUIN CO., CAL. — Bank, 1 story and base, reinforced concrete, \$25,000. Architect, Walter King, Elks' Bldg., Stockton. Owners, Bank of Lodi. Contractor, general construction, Lucas, \$31,975; plumbing, Henderson & Co., \$3,412.50; heating and ventilating, Gnekow, \$2,696. For a complete list of figures presented see under Sacramento, Stockton and Northern California in this issue.

BRIDGES, DAMS AND HARBOR WORK.

SAN FRANCISCO — Apparatus for freight slips. Cost not stated. Engineer, Director of Works, Exposition Bldg., S. F. Owners, Panama-Pacific International Exposition Co. Plans and specifications have been completed for the hydraulic plant to be installed to operate the freight slip aprons at the new dock on the Harbor View site. Bids will be opened on January 28th. The official proposals appears in this issue.

TACOMA, WASH. — Dock and warehouse, concrete and frame construction, \$200,000. Engineer, City Engineer, Tacoma. Owners, City of Tacoma. Commissioner of Works Owen Woods states that plans for this work are complete and that figures on the construction will be called for within a short time. The dock and warehouse are the first of several large municipal improvements to be made in Tacoma.

TACOMA, WASH. — Bridge, steel construction \$250,000. Engineer, Engineering Dept., Oregon-Washington Railroad and Navigation Co., M. B. Pajer, Supt., Tacoma. This company has recently announced their intention of constructing a large steel bridge on the tide water flats in Tacoma. Full particulars can be secured from Supt. Bayar.

MONROVIA, LOS ANGELES CO., CAL. — Bridge, concrete and steel. Cost not stated. Engineer, City Engineer, Monrovia. Owners, Towns of Monrovia and Arcadia. These two neighboring towns have instructed the City Engineers to prepare plans and specifications at once for a bridge to connect the two towns. None of the particulars have been published as yet.

PHOENIX, ARIZ. — Bridges, 2, steel and concrete, \$70,000. Engineer's name not given. Owners, San Carlos Indian Reservation. Congressman Carl Hayden has secured an appropriation of the above amount for the construction of two bridges and the Interior Department has ordered plans and specifications prepared.

CHURCHES.

TACOMA, WASH. — Church, 2 story and base, brick and concrete, \$50,000. Architect, R. E. Borhek, Savage-Scotfield Bldg., Tacoma. Owners, Pilgrim Congregational Church. The building will be erected on a corner site and is to be designed in the classic style of architecture. There will be a large main auditorium besides several Sunday school rooms, pastor's study, social rooms and parlors. There will be a central heating system. Interior finish will be of pine and ornamental plaster. The exterior will be faced with cement plaster. Plans are being prepared.

SPOKANE, WASH. — Church, 2 story and base, brick and concrete, \$40,000. Architect's name not given. Owner, Emmanuel Baptist Church. Plans and specifications are complete and figures are being taken by the Building Committee for the construction of this work. The building will contain besides a large main auditorium, Sunday school rooms, pastor's study, social hall and parlors. There will be steam heat and a modern system of ventilation. Interior will be finished in pine and ornamental plaster. The exterior of the building will be faced with cement plaster.

SEATTLE, WASH. — Church, 2 story and base, brick and concrete, \$50,000. Architect, David J. Myers, Central Bldg., Seattle. Owners, Westminster Presbyterian Church. The architect states that while plans and specifications for this work are complete construction has been postponed until spring. This action was taken by the members of the Building Committee in order that a contract for the entire structure might be let and that funds would be available.

Contracts Awarded.

LONG BEACH, LOS ANGELES CO., CAL. — Church, 1 story and base, brick. Cost not stated. Architects, Metcalf & Davies, Long Beach Bank Bldg., Long Beach. Owners, First Brethren Church. Contractors, Long Beach Brick Co., Sevins and Ximeno Sts., Long Beach. Contract price not stated.

FACTORIES & WAREHOUSES.

LONG BEACH, LOS ANGELES CO., CAL. — Warehouse, 1 story and base, reinforced concrete, \$30,000. Architect, George Harding, Citizens' National Bank Bldg., L. A. Owner, City Transfer, Van and Storage Co. The building will be 50x125 feet and fireproof throughout. There will be concrete

doors, metal window sash and frames and underwriters' doors. Freight elevators will be installed. Interior finish will be of pine. The exterior of the building will be faced with cement plaster. Plans are being prepared.

LOS ANGELES, CAL.—Warehouse, 1 story, reinforced concrete and steel. Cost not stated. Architect's name not given. Owners, Outer Harbor Dock and Wharf Co., Union Oil Bldg., L. A. The building will be 105 feet wide and 377 feet long. Construction throughout will be fireproof. Pile foundation is now being driven and the balance of the construction will follow at once. Work is being carried on under the personal direction of the owners, and full particulars can be secured from them.

FIRE HOUSES AND JAILS.

HOLLYWOOD, LOS ANGELES CO., CAL.—Fire and police department building, 2 story and base, brick, \$40,000. Architect, J. J. Backus. City Hall Bldg., L. A. Owners, City of Hollywood. The building will contain the offices of the department heads. There will be a central heating system, pine interior trim and modern plumbing. The exterior will be faced with pressed brick. Plans have received the approval of the Police and Fire Commissioners and the Art Commission. Bids will be taken by Mr. Backus for all parts of the work.

GARAGES.

LOS ANGELES, CAL.—Garage, 1 story and base, brick. Cost not stated. Architect, none. Owner, Mark G. Jones, Merchants' Trust Bldg., L. A. The building is to be erected on the site of an old residence on Flower street near 10th, and will be designed for a commercial garage. Mr. Jones has not selected an architect and no details of the building have been determined. Full particulars will be given in these columns as the plans progress.

LOS ANGELES, CAL.—Garage, 1 story and base, brick. Cost not stated. Architect, none. Owner, W. L. Riley, 210 S. Fremont St., L. A. The building will be erected on West Second street, and is to cover an area of 74x135 feet. There will be a cement floor, metal window sash and frames and special gasoline storage tanks. The exterior of the building will be faced with pressed brick. The owner is preparing the plans and the work will be done by Day Labor.

GOVERNMENT WORK AND SUPPLIES.

New Army Construction.

The army officers who have to do with the construction of barracks and quarters at army posts in the United States and in the Philippines have been much handicapped by lack of funds, and that situation is not likely to be improved by any action of Congress during the present session. The estimate has been cut to the bone. Of the total estimate of \$1,697,500 only \$270,000 is for new construction in this country, this being for work at Fort Slocum, Fort Sill, Fort Huachuca, Presidio of San Francisco, Fort Bliss, Fort Sam Houston, Fort Logan, Fort Mc-

Pherson and Governors Island. At the last named place it is proposed to construct a hangar for the new army hydro airplane at a cost of \$7,500. A part of the expense on this item will go for the shelter of troops in China, where the rates are considered high as compared with the rates in this country. For the Philippines it is hoped to obtain an appropriation of \$500,000, of which \$320,000 is for new construction of buildings for the permanent posts of Stotsenberg and McKinley and other places. It has been found that the earlier construction was inadequate, and it is now proposed to replace the nipa buildings with those of concrete construction, which will withstand the ravages of the insects and resist the effects of the typhoons.

Isthmian Canal Dry Dock.

The Navy Department is interested in the plans for a dry dock for use in connection with the operation of the Isthmian Canal. Colonel Goethals appeared before the House committee on appropriations at the last session and urged authorization for the construction of a dry dock and permanent docks and shops. He stated that this construction could be undertaken without increasing the total estimated appropriations for the construction of the canal. The main dry dock will be situated at Balboa on the Pacific side and will be capable of accommodating any vessel that can pass through the canal locks. It will have a length of 1,000 feet and a width of 110 feet and will be of the same size as the Pearl Harbor dry dock. The dry dock at Balboa will have a rock foundation and its sides will be lined with concrete. A similar auxiliary dry dock will also be built there. The Navy Department will be able to make use of the large dock, which has been designed and constructed to meet the requirements of the navy. The estimated cost of the dry dock will be \$1,719,000, while the total cost of the construction of the terminals, including wharves, shops, etc., will be \$1,658,000.

Puget Sound Navy Yard, Officers' Quarters.

The contract for the construction of two officers' quarters at the navy yard, Puget Sound, Wash., has been awarded to Carlson & Son, Seattle, Wash., at \$13,484.60.

Pearl Harbor, Magazine Buildings.

No action has yet been taken regarding the award of contract for constructing five magazine buildings at the naval training station, Pearl Harbor, H. T., bids for which were opened December 21st.

Building, Puget Sound, Wash.

The chief of the bureau of yards and docks, Navy Department, is calling for bids to be opened February 15th for the construction of one frame house at the naval magazine, Puget Sound, Wash. The structure is to be two stories and attic, with brick foundations, complete with hot water heating, plumbing, and electric wiring. The building is to be 12x28 feet.

Pearl Harbor, Structural Steel.

The contract for furnishing structural steel, etc., for pump well at the

naval station, Pearl Harbor, H. T., bids for which were opened December 28th, has been awarded to the Ritter-Conley Mfg. Co., Pittsburgh, Pa., at \$9,075.

Indian School Building.

The following bids were received by the Commissioner of Indian Affairs, Department of the Interior, Washington, D. C., on January 14th for the construction of a frame day school building for the Likely Day School, Cal.:

J. A. Blunt, Fort Bidwell, Cal., \$4,875, 180 days.

W. D. Lovell, Minneapolis, Minn., \$6,000; 100 days.

John Plato, Hemet, Riverside Co., Cal., \$6,985; 180 days.

Thomas Enson & H. P. Wood, Alturas, Cal., \$7,000.

Building, Fort D. A. Russell.

The following is schedule of the bids received at the office of the constructing quartermaster, Fort D. A. Russell, Wyo., on November 25, 1912, and December 18, 1912, respectively, for the construction of railroad spur, sidings, track scale, and scale house:

Item 1, bids received under original plans and specifications November 25; 2, bids received under modified plans and specifications December 18.

Union Pacific Railroad Co., Omaha, Neb., item 1, \$66,564.11.

R. N. La Fontaine, Cheyenne, Wyo., for scales only, item 1, Fairbanks, \$3,330; Strait, \$3,066.75; Howe, \$3,176.75; item 2, \$3,145; \$2,775, and \$2,991. For scale house, item 1, \$365; 2, \$350.35.

Hastings, Young & Dumm, Cheyenne, Wyo., item 1, \$68,900; 2, \$46,000.

Colorado & Southern Railway Co., Denver, Colo., item 1, \$72,000; 2, \$51,012.50.

Howard & Wood, Cheyenne, Wyo., item 2, \$48,200.

All bids received on November 25 were rejected by the chief, quartermaster corps, U. S. Army, by his office letter No. 38758, dated December 7, 1912, which letter also directed that steps be taken to readvertise the work for approximately five days—December 13 to December 18.

Under letting of December 18 the bid submitted by Messrs. Hastings, Young & Dumm, being the lowest bid received for the work complete, including installation of the "Strait" scale, and making a reduction of \$500 for the privilege of using "so-so A. S. C. E. section open-hearth rails," the chief of the quartermaster corps, U. S. Army, awarded the contract to that firm at total cost to the United States of \$46,100.

Philippine Construction Difficulties.

The War Department has received from the Philippines the plans for permanent construction, including concrete barracks, quarters, and stables, for the colonial army, consisting of four regiments of infantry, two regiments of cavalry, one regiment of field artillery, and auxiliary troops. The cost will be about \$200,000, exclusive of administration, storage, power plants, etc. To this, however, must be added the cost of storehouses and other buildings for the military establishment on the Luneta hill to replace the present structures, the cost of which will be \$2,000,000, making a total that

will be required to permanently house and provide for the colonial army of from \$8,000,000 to \$10,000,000. Work to the extent of \$1,000,000 only can be handled in the course of a year, owing to the labor and other existing conditions in the Philippines. There are many obstacles which the quartermasters find very trying. The supply of skilled labor and suitable foremen is far short of the demand, consequently it is usually necessary to pay a high price for inferior men. If every other condition were favorable this alone would constitute a serious handicap. New men cannot be imported as continuous employment cannot be guaranteed, and new men are of little value, because if they understand their business they cannot communicate their ideas to the native laborer, skilled or otherwise. The price is cheap, but the quality is correspondingly poor, and during considerable portions of the year the supply is also far short of the demand. Many features of Filipino labor, too numerous to mention, lead to the conclusion that it is not nearly so cheap as it looks on paper; in fact, its drawbacks make it practically as expensive as labor in the United States. Due to the undeveloped state of the country and the great distance from manufacturing materials are not cheap. Steel and cement must be brought from afar; stone (even for concrete work) is usually inaccessible and above the average cost in the United States; sand is about normal; hardware, plumbing, etc., must add cost of transportation to their original prices, and even the native woods, which are the only ones suitable for use there, cost from \$100 to \$150 per M in the market. None of the above items can be obtained in large quantities in even a reasonable short time, so that it requires watchfulness and foresight to avoid running out of materials and entailing the annoyance and money loss due to cessation of work.

Submarine Testing Dock.

One of the interesting recommendations made by the naval general board and submitted to Congress is that for a testing and wrecking dock that may be used for salving submarines of any size, docking submarines, and testing to determine resistance to external water pressure. It has been figured out that two docks of this description will ultimately be required for the Atlantic and one each for the Pacific coast, Hawaii, Panama, Guam, and the Philippines. There is great need of such docks in view of the increasing number of submarines and the age of some of the older vessels of that class. The plans of the Navy Department for this structure contemplate the building of a large cylinder which can be filled with water. Into this the submarine is placed and subjected to any degree of pressure, accomplishing the same results as sinking the submarine for 200 feet below the surface. This country was the first to exact this practical demonstration of the resistance of submarines to water pressure at great depth. Now all the nations have added that requirement to their contracts for submarine boats. The dock which it is proposed to build is similar to an Italian structure.

Electrical Transmission Line.

A committee has been appointed by the chairman of the Isthmian Canal Commission to:

1. Review the plans for the proposed high-tension power-transmission line across the isthmus.
2. Consider the various features of the telephone and telegraph cables, the possible disturbance to signal system, the probability of the future electrification of the Panama Railroad, and to
3. Make recommendations relative to the best and most economical construction to be employed for all the different electrical conductors, all phases of the matter being taken into consideration, including any protection to electrical lines, and to guard against any possible attempts to cut communication in time of war.

The committee consists of Messrs. Edward Schildhauer, Lieut. F. Mears, Capt. W. H. Rose, C. P. Bleakley, W. H. Fenley, and W. R. McCann.

Reclamation Work.

The Secretary of the Interior has authorized the Reclamation Service to award the following contracts for the construction of about 46 miles of the Vandallia south canal, Milk River irrigation project, Mont.: To J. E. Hilton, of Billings, Mont., schedules 1 and 3, involving the excavation of approximately 533,550 cubic yards of material, contract price \$118,150. To Charles Wilhite, of Boise, Idaho, schedule 2, involving the excavation of about 302,550 cubic yards of material, contract price, \$51,700. The work is situated on the south side of Milk River adjacent to the main line of the Great Northern Railway and in the vicinity of Vandallia, Tampico, Glasgow, and Nashua, Mont.

Construction of Army Quarters.

The chief of the quartermaster corps has approved the tentative plans for the construction of army quarters in the United States at a cost of \$143,000.

The services to be performed under this item will be done by contract. With the sum estimated it is contemplated to construct the following quarters:

Fort Riley, Kans., 1 double captain's quarters, \$16,000.

Fort Sill, Okla., 1 set (5 set) bachelor's officers' quarters, \$31,000.

Fort Huachuca, Ariz., 1 double captain's quarters, \$8,000.

Presidio of San Francisco, Cal., 2 field officers' quarters, \$20,000.

Fort Bliss, Tex., 3 double company officers' quarters, \$48,000.

Fort Sam Houston, Tex., quarters for employees of pack train, \$1,000.

Fort McPherson, Cal., 1 double set officers' quarters, \$16,000.

All of the above amount will be required for new construction.

Estimate is \$7,869.80 in excess of the amount expended for this purpose for the fiscal year 1912.

All of the foregoing construction has been approved by the Secretary of War and will be included in the 1914 estimates.

The amounts estimated for the above quarters are the amounts estimated by this office as the probable cost of such construction.

During the fiscal year 1912 officers' quarters were constructed as follows:

Did You Get the New

LIST ?

If not, write to

White Bros.

5th & Brannan Sts.

San Francisco

Schofield Barracks, Hawaii, officers' quarters, infantry post, \$86,000.

Schofield Barracks, Hawaii, flooring and framing tents, 1st infantry, \$10,000.20.

Fort Huachuca, Ariz., double set of officers' quarters, \$7,500.

Yosemite, Cal., 1 field officers' quarters, \$1,510.

Yosemite, Cal., 6 company officers' quarters, \$7,620.

Schofield Barracks, Hawaii, commencing construction of 5 field officers' quarters and 16 double officers' quarters, \$22,500.

For the fiscal year 1913 there was allotted \$206,000 to provide for construction of buildings under this item, as follows:

Fort Sheridan, Ill., teamsters' quarters, \$14,000.

Fort Huachuca, Ariz., 2 double sets of lieutenants' quarters, \$20,000.

Fort Huachuca, Ariz., double set of captain's quarters, \$12,000.

Limitation fixed by Congress for construction of officers' quarters in the United States: General's quarters, \$15,000; field officers' quarters, \$12,000; line officers' quarters, \$9,000.

Military Post at Fort Kamehameha.

The estimate submitted by the Secretary of War of \$158,500 for a coast artillery post in the Hawaiian Islands contains the following provision:

That the Secretary of War be and he is hereby authorized to establish on the military reservation at Fort Kamehameha a four company post for the accommodation of the coast artillery required to protect the naval base at Pearl Harbor on the island of Oahu, Hawaii: Provided, That a contract or contracts may be entered into by the Secretary of War for the construction of the necessary officers' quarters, barracks, administration building, dispensary with 12-bed emergency ward and operating room, guardhouse, and other necessary buildings, including their lighting and heating, water system, sewers, roads, and walks, to be paid for as appropriations may be from time to time he made by law not to exceed, in the aggregate, the sum of \$356,500, of which \$158,500 shall be immediately available.

Concerning this subject the report of the general staff is as follows:

The seacoast defenses protecting the naval base of Pearl Harbor, on the island of Oahu and located at the entrance to that harbor at the post of Kamehameha, are practically so far

completed as to require the presence at that post of the four companies of coast artillery troops which are to man and operate the defensive armament there located. These troops should be provided with shelter and stationed at the post at the earliest practicable date, not only to care for this armament, but to operate it in case of need.

The delay in estimating for the construction of this post has been due to a discussion of the question whether certain shallow ponds in the vicinity of the site should be filled, at a cost of about \$100,000, before the construction of the buildings of the post is undertaken. This question having been decided by the Secretary of War in the negative—that is, he having reached the conclusion that, inasmuch as suitable ground for the location of the buildings as of the post is available, that shelter for the troops should first and as promptly as possible be provided and that the question of filling the ponds should be left for future consideration—the following estimate of the cost of construction of the complete post is submitted:

Four barracks at \$30,000.....	\$120,000
One field officer's quarters.....	8,000
Night company officers' quarters (married) at \$6,000.....	48,000
One building, four bachelor suites, with officers' mess and club room	14,000
One administration building.....	10,000
One dispensary with 12-bed emergency ward and operating room	15,000
One combined quartermaster and commissary storehouse.....	16,000
Two double sets noncommissioned staff officers' quarters	12,000
One guardhouse and one stable	20,000
One combined artillery, engineer, and ordnance storehouse	8,000
One wagon shed	1,500
Quarters for four civilian employees	12,000
One post exchange building.....	25,000
Crematory	5,000
Water system	8,000
Sewer system	7,000
Roads and walks	15,000
Electric light	12,000

Total\$356,500

The foregoing estimate, as stated, is for the post, complete, inasmuch, however, as the total amount probably cannot be obtained this year, it is recommended that an estimate for \$158,500, or sufficient to provide for the shelter of one-half of the garrison (two companies of coast artillery), be submitted to Congress in detail as follows, with a view to starting the construction of shelter for this necessary garrison at the earliest date practicable:

Two barracks	\$60,000
Four company officers' quarters	24,000
One administration building	10,000
One dispensary, etc.....	15,000
One combined quartermaster and commissary storehouse.....	16,000
One double set noncommissioned staff officers' quarters.....	6,000
One crematory	5,000
One stable	6,000
One wagon shed	1,500
Water system	8,000
Sewer system	7,000

Total\$158,500

HALLS AND SOCIETY BUILDINGS.

MODESTO, STANISLAUS CO., CAL.—Lodge hall, 3 story and base, brick, \$20,000. Architect, Ralph P. Morrell, Yosemite Theatre Bldg., Stockton. Owner, John S. Tully. The first floor of the building will contain stores and an entrance to the lodge hall. Upper floors have been leased to the Modesto Elks. Interior finish will be of pine throughout. Steam heat will be installed with an oil burning furnace. The exterior will be faced with pressed brick. Plans are now being prepared and will be completed as rapidly as possible.

ANAHEIM, ORANGE CO., CAL.—Lodge hall, 2 story and base, brick, \$30,000. Architect, Oscar Lagnan, Anaheim. Owners, Anaheim Masonic Temple Association. The building will cover an area of 90x125 feet. The first floor will be arranged for two stores. There will be a number of offices in the front portion of the second floor and lodge rooms in the rear. A central heating system will be installed. Interior finish will be of pine and oak. The exterior of the building will be faced with pressed brick. Plans have been approved and bids will probably be called for at the next meeting of the owners on January 20th.

PORT ANGELES, WASH.—Lodge hall, 3 story and base, brick, \$50,000. Architect, Julian Everett, Walker Bldg., Seattle. Owners, Port Angeles Elks' Hall Association. The building will be 80x100 feet. The first floor will contain stores and the upper two floors large and finely finished lodge rooms. There will be steam heating and elevator service. Interior finish will be of pine and hardwood. The exterior will be faced with pressed brick. Plans are complete and figures have been taken under advisement.

PORTLAND, ORE.—Auditorium, 2 story and base, Class A construction, \$100,000. Architect, Freedlander, New York. Owners, City of Portland. Mr. Freedlander has just returned to New York to complete the working drawings for this big structure, which will occupy an entire city block. The main auditorium will have a seating capacity of 16,000 people. In addition there will be a completely equipped kitchen, banquet room, smoking rooms and a ball room. Construction will be fireproof throughout. Auditorium floor is to be flat. Exterior will be faced with terra cotta. Bids will be called for in the spring.

HOSPITALS.

SAN FRANCISCO, Hospital, 1 story and base, reinforced concrete. Cost not stated. Architect, Charles Peter Weeks, Mutual Bank Bldg., S. F. Owners, Union Iron Works. This building is a part of the program of improvement that the company has underway. The structure will be Class A in all respects, and will contain the most modern equipment throughout. Interior will be finished in pine, tile and hardwood. There will be a central heating system. The exterior will be faced with cement plaster. Plans are now being prepared.

LOS ANGELES, CAL., Hospital, 3 story and base, brick and concrete. Cost not stated. Architect, Frank L.

Stoff, Gro. Bldg., L. A. Owners, Westlake Hospital Association. The building will contain a number of wards both public and private. Foundations and bearing walls have been designed to carry three additional stories. There will be steam heat and elevator service. Interior finish will be of pine and hardwoods with all corridors finished in tile. The exterior will be faced with pressed brick. Roof will be of metal tile. Plans are complete and figures are being taken.

LOS ANGELES, CAL.—Hospital addition, 1 story Class A construction. Cost not stated. Architects, Elsen & Son, Wilcox Bldg., L. A. Owners, Columbia Hospital. The addition will be of one story to a present four-story concrete building, and is designed for an operating pavilion. Construction will be Class A throughout. Similar additions are planned for the central building and the west wing. Bids will be called for at once on the addition above mentioned.

Contracts Awarded.

SAN FRANCISCO—Hospital, 2 story and base, reinforced concrete, \$15,000. Architects, City Dept. of Architecture, Temporary City Hall Bldg., S. F. Owners, City and County of San Francisco. Contractor, James McLaughlin, 244 Kearny St., S. F. Contract price, \$16,960. Note: This work has been out for figures before and the same contractor was then low on the work. For a complete list of all figures presented see under San Francisco in this issue.

HOTELS.

SAN FRANCISCO—Hotel, 7 story and base, Class C construction, \$75,000. Architect, W. H. Weeks, 75 Post St., S. F. Owners, Charles C. Judson Co. This building will be erected on Ellis street, west of Mason, and will contain a total of over 120 rooms. Nearly all rooms will have private baths. There will be steam heat, elevator service and a vacuum cleaning system. Interior finish will be of pine, redwood and oak with ornamental plaster in the lobby. The first floor will contain stores, lobby and hotel office. The exterior will be faced with pressed brick. Plans are complete and figures are being taken.

SAN FRANCISCO—Hotel, 3 story and base, brick. Cost not stated. Architect, Joseph Cohen, 45 Kearny St., S. F. Owners, Louis Friedman and Samuel Gerson. The building will be erected on Kearny street, near Washington, and has been arranged for stores on the first floor and about 30 guest rooms on the upper floors. The interior will be finished in pine and redwood. There will be hot and cold running water supplied to all rooms. The exterior will be faced with pressed brick. Plans are complete and figures are being taken.

OCEAN PARK, LOS ANGELES CO., CAL.—Hotel, 5 story and base, reinforced concrete. Cost not stated. Architect, Frank T. Keely, Consolidated Realty Bldg., L. A. Owners, Messrs. Simpson and Kramer. Construction will be Class A in all respects, with concrete floors and hollow tile interior partitions. There will be a total of 100 guest rooms and 66 baths. Steam heat, two elevators and a vacuum cleaning system will be installed. Interior finish will be of pine, red-

wood and some hardwood. Lobby, office and parlors will have ornamental plaster decoration. The exterior will be faced with cement plaster with the inlays. Plans are complete and figures are being taken.

LOS ANGELES, CAL.—Hotel, 2 story and base, brick. Cost not stated. Architects, Hudson & Munsell, Stinson Bldg., L. A. Owner, Dr. W. T. Covington. The first floor will be arranged for stores and the upper floor for a number of single rooms. There will be several baths. Interior finish will be of pine throughout. Hot and cold running water will be supplied to all rooms. The exterior will be faced with pressed brick. Plans are complete and ready for figures.

LOS ANGELES, CAL.—Hotel, 3 or 4 story and base, brick. Cost not stated. Architect, Frank M. Tyler, Hilberman Bldg., L. A. Owner, A. W. Ross. The building will be 47x140 feet. The first floor will contain the hotel lobby and several stores. Upper floors have been arranged for 27 guest rooms and 10 baths on each floor. Interior finish will be of pine and redwood. There will be steam heat and, if a four-story building is erected, an elevator. All rooms will be supplied with hot and cold running water. The stores will have patent fronts. The exterior of the building will be faced with pressed brick. Plans are being prepared and when complete the work will be done by Day Labor.

SANTA MONICA, LOS ANGELES CO., CAL.—Hotel, 3 story and base, brick. Cost not stated. Architect, S. Tilden Norton, Title Insurance Bldg., L. A. Owners, Henry Klein and Adolf Schwartz. The building, which has been arranged for stores on the first floor, will be 46x90 feet. Upper three floors will contain a total of 30 rooms and 4 baths. Interior finish will be of pine. There will be steam heat and hot and cold running water. Metal window frames and sash will be used. The exterior of the building will be faced with pressed brick. Plans are complete and figures will be called for at once.

PORTLAND, ORE.—Hotel, 4 story and base, brick, \$50,000. Architect, Robert F. Tegen, Sweetland Bldg., Portland. Owner, Alfred Parkhurst. The proposed structure is to be erected on a corner and will cover an area of 100x100 feet. The first floor will contain several stores and the entrance to the upper floors. A large number of single rooms and public and private baths will occupy the remainder of the building. Construction will be of the mill type. There will be steam heat, elevator service and hot and cold running water. The exterior will be faced with pressed brick. Plans are now being prepared.

SAN DIEGO, CAL.—Hotel, 3 story and base, brick, \$20,000. Architect, John S. Siebert, San Diego. Owner, R. W. Harris. The building will be erected on State street between D and E streets, and has been arranged for stores on the first floor and 10 guest rooms and 15 baths on the upper two floors. A central heating system will be installed. Interior finish will be of pine and redwood. The exterior will be faced with pressed brick. Plans are being prepared.

Contracts Awarded.

LONG BEACH, LOS ANGELES CO., CAL.—Hotel, 3 story and base, brick and steel, \$45,000. Architects, Kysor & Biggar, Wright and Cullender Bldg., L. A. Owners, Jos. Barnett and R. M. Moore. Contractor, C. J. Hargis, 653 Olive St., Long Beach. Contract price, \$45,000.

PORTLAND, ORE.—Hotel addition, 5 story and base, brick, \$45,000. Architects, Bennes & Hendricks, Portland. Owners, Golden West Hotel. Contractors, Bravton Engineering Co., Portland. Contract price, \$45,000.

RESIDENCES.

SAN FRANCISCO—Residences, 2 2 story and base, frame, \$7,250 each. Architect, E. E. Young, 251 Kearny St., S. F. Owner, Matthew A. Little, 1347 4th avenue. Each of these houses will be designed to contain eight rooms and bath. Interior finish will be of pine, redwood and some hardwood. Floors will be of oak in the principal rooms. There will be furnace heat and open fire places. Mantels will be of brick. Bath rooms are to be finished in tile with composition floors. Ruid water heaters will be installed. The exteriors will be covered with cement plaster on metal lath. Plans are complete and the work will be done by Day Labor.

SAN FRANCISCO—Residence, 2 story and base, frame, \$2,500. Architect, none. Owner, A. R. Lapham, 1853 McAllister St., S. F. The house will contain six rooms and bath. Interior finish will be of pine and redwood. Some oak floors will be used. There will be a large open fire place with tile mantel in the living room. Bath and kitchen will be finished in tile. The exterior of the building will be covered with rustic and shiplap. Plans are complete and the work is to be done by Day Labor.

SAN FRANCISCO—Residence, 2 story and base, frame, \$2,000. Architect, none. Owner, R. E. Seeger, 67 Bernal Ave., S. F. The house will contain six rooms and bath. All interior finish will be of pine or redwood. Some oak floors will be used. There will be an open fire place and brick mantel in the living room. Tile will be used in the bath and kitchen. The exterior of the house will be covered with shiplap. Plans are complete and in the hands of the owner who will do the work by Day Labor.

SAN FRANCISCO—Residence, 2 story and base, frame, \$4,000. Architect, Theo. S. Boelm, Hayes Bldg., S. F. Owners, Pockman Building Co., Mills Bldg. The house has been designed for an eight-room dwelling with bath. Interior finish will be of pine and redwood. Oak floors will be used in the living, dining room and reception hall. There will be furnace heat and open fire places. Mantels will be of tile and brick. Tile will be used in the bath room and kitchen. The exterior of the dwelling will be covered with cement plaster on metal lath. Plans are complete and the work will be done by Day Labor.

SAN FRANCISCO—Residence, 2 story and base, frame, \$3,000. Architect, none. Owner, Emil Rudland, 3162 Clement St., S. F. The house will contain seven

rooms and bath. All interior finish will be of either pine or redwood. Hardwood floors will be used in the principal rooms. Open fire places are to be installed in the living and dining rooms. Mantels will be of brick. Tile will be used in the bath room and kitchen. The exterior of the house will be covered with rustic and shiplap. Plans are in the hands of the owner and the work will be done by Day Labor.

SAN FRANCISCO—Residence, 2 story and base, frame, \$3,000. Architect, O. E. Evans, 2104 Mission St., S. F. Owner, James Welsh. This house has been designed for a seven-room dwelling with bath. Interior will be finished in pine and redwood. Oak floors will be used in the principal rooms. There will be open fire places with tile or brick mantels. The exterior will be covered with rustic and cement plaster on metal lath. Plans are complete and the work will be done by Day Labor.

PIEDMONT, ALAMEDA CO., CAL.—Bungalows, 2, 1 story and base, frame, \$3,000 each. Architect, none. Owners, Becker and Eliel, 1762 Broadway, Oakland. These houses will contain six and seven rooms, bath and sleeping porches. Interior finish will be of pine, redwood and some oak. Hardwood floors will be used in the living and dining rooms. There will be furnace heat and open fire places. Mantels will be of tile and brick. Tile will be used in the kitchens and bath rooms. The exteriors will be covered with cement plaster on metal lath. Plans are to be completed at once and the work will be done by Day Labor.

OAKLAND, CAL.—Residence, 2 story and base, frame, \$5,000. Architect, none. Owners, Oakland Building Co., Security Bank Bldg., Oakland. The house has been designed to contain eight rooms, bath and sleeping porch. Interior finish will be of pine, redwood and oak. Oak floors will be used in the principal rooms. There will be furnace heat and open fire places. Mantels will be of brick. Tile will be used in the bath room and kitchen. The exterior of the dwelling will be covered with cement plaster on metal lath. Plans are complete and the work will be done by Day Labor.

OAKLAND, CAL.—Residence, 2 story and base, frame, \$9,000. Architect, Charles W. McCall, Central Bank Bldg., Oakland. Owner's name withheld. The dwelling will be erected in Adams Point and will contain in the neighborhood of ten rooms, bath and sleeping porch. Interior finish will be of pine, redwood and hardwood with oak floors in the principal rooms. There will be a central heating system and automatic water heaters installed. The bath rooms will be finished in tile. There will be open fire places and brick and tile mantels. The exterior of the house will be covered with cement plaster on metal lath. Plans are being prepared.

PIEDMONT, ALAMEDA CO., CAL.—Residence, 2 story and base, frame, \$4,500. Architect, C. W. Dickey, Central Bank Bldg., Oakland. Owner, Irving H. Kahn. The dwelling will contain seven rooms, bath and sleeping porch. A garage will be erected on the rear of the same lot. Interior finish will be of pine with some hardwoods.

infenced concrete school building to be erected in the city of Portland. The second unit will contain six class rooms. Construction will be identical with that of the present building. Plans are complete and bids will be called for on January 22nd.

RONITO INDIAN SCHOOL, NEW MEXICO.—School, 2 story and base, brick. Cost not stated. Architect, Dept. of Interior, Washington, D. C. Owners, United States Government. Plans and specifications can be secured from the Interior Department at Washington, D. C., for the construction of this building. Bids will be opened in Washington, D. C., on February 12th.

Contracts Awarded.

SANTA ANA, ORANGE CO., CAL.—Schools, 2, 1 story and base, brick and concrete, \$10,000 and \$35,000. Architects, Wilkey & Davies, Story Bldg., L. A. Owners, Santa Ana Polytechnic High School District. Contract for the Manual Arts building was awarded to George C. Condon, Home Bldg., Santa Ana. Contract price, \$40,724; and the contract for the Fine Arts building was awarded to David Irvine, 1209 West 36th St., Santa Ana. Contract price, \$26,000.

CORONADO BEACH, SAN DIEGO CO., CAL.—School, 2 story and base, brick and steel, \$65,000. Architects, Quayle Bros. & Cressey, Savoy Theatre Bldg., San Diego. Owners, Coronado Beach School District. Contractors, Wuester Construction Co., Coronado Beach. Contract price, \$64,800. Note: This contract does not include plumbing, heating or composition roofing.

SEWERS, STREET WORK AND WATER SYSTEMS

SAN FRANCISCO.—Power station, 1 story and base, reinforced concrete, \$15,000. Engineers, Engineering Dept. Pacific Gas and Electric Co., 445 Sutter St., S. F. Owners, Pacific Gas and Electric Co. This building will be erected on Mechanic Place near Post street, and is designed for a steam plant. There will be a cement floor and metal window sash and frames. The exterior will be faced with cement plaster. Bids will be taken by the Purchasing Dept. of the Pacific Gas and Electric Co.

RIVERSIDE, RIVERSIDE CO., CAL.—Municipal water system, \$1,600,000. Engineer, City Engineer, Riverside. Owners, City of Riverside. Bonds to the amount above mentioned were recently voted to purchase the present water supply system of Riverside and to construct extensive new additions to both the domestic and fire supply systems. Work will be undertaken within a few weeks.

HANFORD, KINGS CO., CAL.—Sewer system, \$80,000. Engineer, City Engineer, Hanford. Owners, City of Hanford. Notice has been sent to all bidders on this work of an extension in time of opening figures until January 27th. Bids were to have been opened on January 20th.

STORES AND OFFICES.

SAN FRANCISCO. Stores addition, 1 story to present 3 story Class A building. Cost not stated. Architect, G. A. Applegarth, Call Bldg., S. F. Owner, A. B. Spreckels. The Spreckels building on California street near Drumm

style is to be enlarged. The same classic style of architecture will be followed out and the exterior is to be faced with terra cotta. The steel frame will be extended. Plans for this work are now being prepared.

LOS ANGELES, CAL.—Stores and lodge hall, 2 story and base, brick. Cost not stated. Architect, Arthur L. Acker, Story Bldg., L. A. Owner, Emma Oswald. The building will be 50x110 feet. The first floor will contain two stores and the upper floor is to be arranged for a lodge hall with a complete stage. Several offices are also provided for on this floor. Floors in the stores will be of cement. Gas steam radiators will be used. Interior finish will be of pine. There will be patent store fronts. The exterior of the building will be faced with pressed brick. Plans are complete and figures are being taken.

LOS ANGELES, CAL.—Loft building, 10 story and base, reinforced concrete. Cost not stated. Architects, Austin & Pennell, Wright and Callender Bldg., L. A. Owners, Hill Street Lot Co. Preliminary plans only have been prepared, but these show a structure 58x165 feet of reinforced concrete throughout. The exterior will be faced with cement plaster with tile inlays. There will be both freight and passenger elevators, steam heat and modern plumbing. The structure is to be used for light manufacturing purposes. There will be metal window sash, sidewalk elevators and copper cornice. Plans are being prepared. The project is being handled by Alex. MacKellan, 421 Story Bldg., L. A.

VANCOUVER, B. C.—Offices, 1 story and base, reinforced concrete, \$45,000. Architects, Braunton & Leibert, Exchange Bldg., Vancouver. Owners, Standard Fruit and Industrial Co. The first floor will contain the offices of the owners and will be finished in marble, tile and mahogany. Basement is to contain the safety deposit vaults and customers' rooms. Upper floors will be arranged for modern offices. There will be steam heat, elevator service and a vacuum cleaning system. The exterior of the building will be faced with stone and terra cotta. Plans are being prepared.

LOS ANGELES, CAL. Stores, 1 story and base, brick. Cost not stated. Architects, Morgan, Wallis & Morgan, Story Bldg., L. A. Owner, D. Rothlier. The building will occupy a corner site and will cover an area of 100x100 feet. There will be a cement floor, patent store fronts, marble and tile base and wainscoting. Interior finish will be of pine throughout. The exterior of the building will be faced with pressed brick. Plans for this work are now being prepared.

SAN DIEGO, CAL. Stores and offices, 4 story and base, brick and steel. Cost not stated. Architects, Quayle Bros. & Cressey, Savoy Theatre Bldg., San Diego. Owner, R. G. Miller, Prop. of the Owl Drug Co. The present building at the corner of 40 and D streets is to be wrecked and a new four-story building erected on the site. The first floor will contain stores and the upper floors modern offices. There will be steam heat, elevator service and a vacuum cleaning system. Interior finish will be largely of metal. The exterior will be faced with pressed brick. Plans are now being prepared.

LOS ANGELES, CAL.—Market

story and base, brick. Cost not stated. Architects, Eisen & Son, Wilcox Bldg., L. A. Owners, Jeffries & Lenk. The structure will cover an area of 95x210 feet. There will be a cement floor, patent store fronts, considerable tile and marble work, ice boxes and refrigerating plant. The exterior will be faced with pressed brick. Plans are being prepared.

TACOMA, WASH.—Stores and lofts, 3 story and base, brick and concrete, \$30,000. Architects, Heath & Gove, National Realty Bldg., Tacoma. Owners, Wallis & Sons. The building will be erected on So. C street. The first floor will be occupied by the owners who are engaged in the retail business. Upper floors will be arranged for lofts. There will be steam heat, elevator service and metal window sash and frames. The exterior will be faced with pressed brick. Interior finish will be of pine throughout. Plans are now complete and figures will be called for at once.

PORTLAND, ORE.—Stores and offices, 12 story and base, Class A construction, \$350,000. Architects, Whidden & Lewis, Portland. Owner, Theodore B. Wilcox. This building is to be erected at the corner of West Park and Washington streets, and when complete will be known as the Physicians' Bldg. All special requirements of the various professional men will be incorporated in the specifications. The first floor will be arranged for stores. Upper floors will contain a large number of offices arranged en suite. There will be steam heat, elevator service, a vacuum cleaning system and mail chutes. Interior will be handsomely finished in metal and hardwoods. Exterior will be faced with terra cotta. Plans are being prepared.

Contracts Awarded.

SAN FRANCISCO.—Stores, 1 story and base, Class C construction, \$25,000. Architects, Reid Bros., California-Pacific Bldg., S. F. Owners, Peninsular Realty Co. Contractors, Stockholm and Allyn, Monadnock Bldg., S. F. Contract price, \$25,000.

THEATRES.

CORVALLIS, ORE.—Theatre, 2 story and base, brick and concrete, \$30,000. Architect, George Post, Salem. Owner, M. Porter. The building will contain a main auditorium seating in the neighborhood of 900 people. Construction will be of reinforced concrete with exterior walls of pressed brick and terra cotta. A central heating system will be installed. Interior will be finished in metal and ornamental plaster. Floors will be of concrete. Stage equipment will be let under a separate contract. Plans are now being prepared.

Contracts Awarded.

FREMONT, WASH.—Theatre, 1 story and base reinforced concrete, \$15,000. Architect, Max Umbrecht, 6104 1st St., Seattle. Owner, A. G. Lemmonick. Contractor, H. A. Hatfield. Contract price, \$15,000.

LOS ANGELES, CAL.—Theatre, 1 story and base, reinforced concrete, \$17,000. Architect, A. Lawrence Valk, Union Oil Bldg., L. A. Owner, Buel Realty Co. Contractor, Harrell & Osborn, 1000 Bond St., L. A. Contract price, \$14,000.

SEALED PROPOSALS.

PROPOSALS FOR GRADING.

GRADING—Sealed proposals, indorsed "Proposals for Grading" will be received at the bureau of yards and docks, Navy Department, Washington, D. C., until 11 o'clock a. m. February 8, 1913, and then and there publicly opened, for grading (about 26,000 cubic yards) at the navy yard, Puget Sound, Wash. Amount available, \$10,000. Plans and specifications can be obtained on application to the bureau or to the commandant of the navy yard named. H. R. STANFORD, chief of bureau.

PROPOSALS FOR BUILDING.

BUILDING—Sealed proposals will be received at the office of the light house inspector, custom house, Portland, Ore., until 2 o'clock p. m. February 3, 1913, and then opened, for furnishing the materials and labor of all kinds necessary for the construction, erection and delivery of a light and fog signal building at Point Wilson, Wash. Blank proposals and particulars may be obtained by addressing the light house inspector, Portland, Ore.

PROPOSALS FOR CANAL SUPPLIES.

CANAL CIRCULAR 756—Proposals for Hose, Packing, Rubber, Belting, Wrought Steel Pipe, Valves, Back Cocks and Water Closet Seats.—Sealed proposals will be received at the office of the general purchasing officer, Isthmian Canal Commission, Washington, D. C., until 10:30 a. m. February 3, 1913, at which time they will be opened in public, for furnishing the above-mentioned articles. Blanks and general information relating to this circular (No. 756) may be obtained from this office or the offices of the assistant purchasing agents, 1086 North Point street, San Francisco, Cal.; also from the United States engineer offices in the following cities: Seattle, Wash., Los Angeles Cal., and Commercial Club, Tacoma, Wash. F. C. BOGGS, major, corps of engineers, U. S. Army, general purchasing officer.

NOTICE TO CONTRACTORS.

PANAMA-PACIFIC INTERNATIONAL EXPOSITION.

SEALED PROPOSALS will be received by the Buildings and Grounds Committee of the Panama-Pacific International Exposition Company at the office of the Director of Works, in the Exposition Building, Pine and Battery Streets, San Francisco, California, at 11 a. m., on Tuesday, January 28, 1913.

Contract No. 22.
For furnishing and erecting Hydraulic Plant complete for operating the Panama-Pacific International Exposition Company at the office of the Director of Works.

Each proposal must be accompanied by a certified check payable to the order of the Panama-Pacific International Exposition Company or cash in the sum of ten (10) per cent of the amount bid, or the same will not be considered. When the contract is made all checks will be returned to the respective bidders, except that filed with the accepted proposal or bid, which check will be returned upon the successful bidder signing the contract and filing the required bond. A bond in the sum of fifty (50) per cent of the contract price will be required for the faithful performance of the contract, the sureties thereon must be satisfactory to the Buildings and Grounds Committee of the Panama-Pacific International Exposition Company.
Progressive payments will be made.

The right is reserved to reject any and all bids and to waive technical defects if in the interest of the Exposition Company.

Plans and specifications for the work may be obtained from the Director of Works, at Room 61, Exposition Building, by depositing \$25.00, which will be refunded upon the return of the plans and specifications in good condition.

By order of the Buildings and Grounds Committee.

WILLIAM H. CROCKER,
Chairman. (S)

NOTICE TO CONTRACTORS.

SEALED BIDS will be received at the office of the Comptroller, University of California, Berkeley, at 10 A. M. on Wednesday, January 23, 1913, on the Hog House at the University Farm at Davis.

Plans and specifications are on file in said office and may be obtained upon payment of \$5.00. A copy of the plans may be seen at the office of the Daily Pacific Builder, 560 Mission Street, San Francisco.

No bids will be received unless accompanied by a certified check or bond equal to 10% of the bid to secure execution of the contract by the successful bidder. The right is reserved to reject any and all bids.

THE REGENTS OF THE UNIVERSITY OF CALIFORNIA. (S)

NOTICE TO CONTRACTORS.

Office of the Board of State Harbor Commission, Union Depot and Ferry House, San Francisco, Cal., January 20, 1913.

SEALED PROPOSALS or bids will be received at this office at 10:00 o'clock A. M. on Thursday February 6, 1913, for furnishing materials and constructing Pier No. 29, and adjacent Bulkhead Wharf, on the water-front of the city and County of San Francisco, in accordance with the plans and specifications prepared therefor by the Assistant State Engineer and adopted by the Board December 5, 1912, and on file in this office, to which special reference is hereby made.

The materials to be used in this work shall consist of the requisite quantities of fresh cut close-grained, Douglas yellow fir piles, merchantable yellow fir lumber, redwood lumber, Portland cement (which will be furnished by the Contractor), crushed sand, crushed rock or gravel, reinforcing materials, castings, structural steel, rods, bolts, spikes, cut springs, rails and fittings, asphalt paving, etc. All material used in the structures will be subjected to a rigid examination and to test and if found defective, unsuitable or not as specified will be condemned and must be removed from the work by the Contractor at his expense.

No bid will be received unless it is made in a blank form furnished from this office, and is accompanied by a certified check for an amount equal to five (5) per cent of the amount of the proposal; said check to be made payable to the order of the Secretary of the Board, as a guarantee on the part of the successful bidder that he will within six (6) days after the acceptance of the bid and the award of the contract, enter into a written contract to do said work, according to the plans and specifications, prepared therefor and will also execute and file with the contract a bond in such sum as the Board may deem adequate, with two or more sureties, to be approved by said Board and conditioned for the faithful performance of the contract. The Contractor will be bound by the terms and conditions of said Contract, nor will said bid be considered by the Board unless delivered to the Secretary, or the Assistant Secretary, at the office of the Secretary, at or prior to 11:30 o'clock A. M. Thursday, February 3, 1913, at which time and place the bids will be opened. The Board reserves the right to reject any or all bids if deemed for the best interests of the State.

Bidders are permitted to examine and copy of this work to be had at Room No. 18, Ferry Building, upon depositing \$20.00 or same, which will be returned on return of plans and specifications.

Bidders are requested to mark en-

velops containing bid, "Bid for Pier No. 29."

NOTICE TO BIDDERS.

NOTICE is hereby given by the Board of Trustees of Hester School District in the County of Santa Clara, State of California, that sealed bids will be received by said Board at the office of H. C. Jones situated in the Knox Building at the northwest corner of First and Santa Clara streets, in the City of San Jose, County of Santa Clara, State of California, up to Saturday, the 1st day of February, 1913, at 10 o'clock a. m. of said day for furnishing the necessary materials and doing the necessary work in the erection and construction of a school building for said school district to be located therein on the Alameda, between Lenzen and Brown avenues, and for tearing down the building now on said site and removing the material from the grounds, according to the plans and specifications for the same prepared by the architect of said Board and which said plans and specifications are hereby referred to and made a part of this notice.

Copies of said plans and specifications are on file and will be open to inspection at the Builders' Exchange located at 113 West Santa Clara street, in said city, and bidders will find at both of said places a form of bid to be submitted.

Bids for separate work will be considered as the same appear in said plans and specifications or in said form of bid.

Notice is further given that at 10 o'clock a. m. of said 1st day of February, 1913, at said office of H. C. Jones said bids will be opened and considered by said Board.

The contract or contracts will be awarded to the lowest responsible bidder or bidders who will give such security as the Board may require. The Board, however, reserves the right to reject any and all bids.

Each bid must be accompanied by a certified check on a reliable bank for five per cent of the amount of the bid and made payable to H. C. Jones, Clerk of said Board of Trustees.

Dated January 4, 1913.

M. S. MOORE,

H. CENTER,

HUBBERT C. JONES,

Board of Trustees of Hester School District.

PROPOSALS FOR BUILDING.

BUILDING—Sealed proposals indorsed "Proposals for One Officer's Quarters" will be received at the bureau of yards and docks, Navy Department, Washington, D. C., until 11 o'clock a. m. February 15, 1913, and then and there publicly opened, for the construction of quarters for inspector of ordnance (one frame house) at the naval magazine, Puget Sound, Wash. Estimated cost, \$5,500. Plans and specifications can be obtained on application to the bureau or to the commandant of the navy yard, Puget Sound, Wash. H. R. STANFORD, chief of bureau.

Firms desiring news from certain localities like San Francisco, Los Angeles, Portland, Seattle, etc., will find all such items, commencing on this page, all carefully classified as to location. These same items are repeated in the fore part of the news department, under distinct headings such as Banks, Churches, Hotels, etc.

SAN FRANCISCO.

RESIDENCES—2, 2 story and base, frame, \$7,250, each, San Francisco. Architect, E. E. Young, 251 Kearny St., S. F. Owner, Matthew A. Little, 1347 4th Ave. Each of these houses will be designed to contain eight rooms and bath. Interior finish will be of pine, redwood and some hardwood. Floors will be of oak in the principal rooms. There will be furnace heat and open fire places. Mantels will be of brick. Bath rooms are to be finished in tile with composition floors. Ruid water heaters will be installed. The exteriors will be covered with cement plaster on metal lath. Plans are complete and the work will be done by Day Labor.

RESIDENCE—2 story and base, frame, \$2,500, San Francisco. Architect, none. Owner, A. R. Lapham, 1853 McAllister St., S. F. The house will contain six rooms and bath. Interior finish will be of pine and redwood. Some oak floors will be used. There will be a large open fire place with tile mantel in the living room. Bath and kitchen will be finished in tile. The exterior of the dwelling will be covered with rustic and shiplap. Plans are complete and the work is to be done by Day Labor.

RESIDENCE—2 story and base, frame, \$2,000, San Francisco. Architect, none. Owner, R. E. Seeger, 67 Bernal Ave., S. F. The house will contain six rooms and bath. All interior finish will be of pine or redwood. Some oak floors will be used. There will be and open fire place and brick mantel in the living room. Tile will be used in the bath and kitchen. The exterior of the house will be covered with shiplap. Plans are complete and in the hands of the owner who will do the work by Day Labor.

RESIDENCE—2 story and base, frame, \$4,000, San Francisco. Architect, Theo. S. Boehm, Hewes Bldg., S. F. Owners, Pochman Building Co., Mills Bldg. The house has been designed for an eight-room dwelling with bath. Interior finish will be of pine and redwood. Oak floors will be used in the living, dining room and reception hall. There will be furnace heat and open fire places. Mantels will be of tile and brick. Tile will be used in the bath room and kitchen. The exterior of the dwelling will be covered with cement plaster on metal lath. Plans are complete and the work will be done by Day Labor.

RESIDENCE—2 story and base, frame, \$3,000, San Francisco. Architect, none. Owner, Emil Rubland, 2102 Clement St., S. F. The house will contain seven rooms and bath. All interior finish will be of either pine or redwood. Hardwood floors will be used in the principal rooms. Open fire places are to be installed in the living and dining rooms. Mantels will be of brick. Tile will be used in the bath room and kitchen. The exterior of the house will be covered with rustic and

shiplap. Plans are in the hands of the owner and the work will be done by Day Labor.

RESIDENCE—2 story and base, frame, \$3,000, San Francisco. Architect, O. E. Evans, 2101 Mission St., S. F. Owner, James Welsh. This house has been designed for a seven-room dwelling with bath. Interior will be finished in pine and redwood. Oak floors will be used in the principal rooms. There will be open fire places with tile or brick mantels. The exterior will be covered with rustic and cement plaster on metal lath. Plans are complete and the work will be done by Day Labor.

APARTMENT HOUSE—6 story and base, brick and steel, \$125,000, San Francisco. Architect, C. T. Ryland, 337 Polk St., S. F. Owners, Lexington Realty Co. Mr. Ryland has worked up only one-eighth scale drawings and the arrangement of the rooms, type of construction and other details of the building have not been determined. Working drawings will be completed as rapidly as possible. Further information will be given as the plans progress. The building is to be erected on Sutter Street west of Mason, and will have a frontage of 87 feet and a depth of 137½ feet.

APARTMENT HOUSE—3 story and base, frame. Cost not stated, San Francisco. Architects, C. M. and A. F. Rousseau, Monadnock Bldg., S. F. Owners, Rousseau Realty Co. The building will be erected at the corner of 7th Avenue and Lake Street, and has been designed to contain six apartments of four rooms and bath each. The interior will be finished in pine, redwood and some hardwood. There will be a central heating system, wall beds and connecting baths. The exterior of the building will be covered with cement plaster on metal lath. Plans are complete and figures are being taken.

APARTMENT HOUSE—6 story and base, reinforced concrete, \$55,000, San Francisco. Architect, David Salfeld, Clunie Bldg., S. F. Owner, Frank J. Klimm. This building has been mentioned here before when plans were first out for figures. It has been found necessary to revise the drawings to some extent and new figures will be called for shortly. The building will be arranged for seven stories on the first floor and a large number of two and three room suites on the upper five floors. Plans provide for steam heat, elevator service and a vacuum cleaning system. Interior finish will be of pine and oak. All suites will have wall beds and private bath room. The exterior of the building will be faced with cement plaster.

APARTMENT HOUSE—5 story and base, reinforced concrete, \$3,000, San Francisco. Architect, O'Brien Bros., Clunie Bldg., S. F. Owner, same with-held. The building will be erected on Bush Street and will have a frontage of 50 feet and a depth of 137½ feet. Interior will be arranged for 90 rooms

which will be divided into two and three room suites with private bath and separate entrances. There will be steam heat, elevator service and a vacuum cleaning system. Wall beds will be used throughout. Bath rooms will be finished in tile. The exterior of the building will be faced with white cement plaster. Plans are now being prepared.

APARTMENT HOUSE—6 story and base, brick and steel, \$70,000, San Francisco. Architects, Miller & Collesnail, Lick Bldg., S. F. Owners, S. C. and S. G. Buckbee. This building will be erected on Jones Street and has been described in these columns before. The working drawings are now nearly complete and will go out for figures within a few days. The building will have a street frontage of 60 feet and a depth of 120 feet. Upper floors will be arranged in suites of two and three rooms with connecting baths. All apartments will have wall beds. There will be steam heat, elevator service and a vacuum cleaning system. The exterior will be faced with pressed brick.

APARTMENT HOUSE—3 story and base, Class C construction, \$125,000, San Francisco. Architect, Arthur G. Scholz, Phelan Bldg., S. F. Owner, Patrick J. Gartland. The building is to be erected at the corner of Geary and Larkin Streets, and will contain in the neighborhood of 120 rooms, which will be arranged in suites of two and three rooms each. All apartments will have wall beds and private baths. Interior will be finished in pine, redwood and hardwood. Bath rooms will have cement floors. There will be steam heat, elevator service and a vacuum cleaning system. The exterior of the building will be faced with pressed brick. Plans are nearly complete and figures will be called for within a few days.

APPARATUS FOR FREIGHT SLIPS—Cost not stated, San Francisco. Engineer, Director of Works, Exposition Bldg., S. F. Owners, Panama-Pacific International Exposition Co. Plans and specifications have been completed for the hydraulic plant to be installed to operate the freight slip aprons at the new dock on the Harbor View site. Bids will be opened on January 28th. The official proposal appears in this issue.

HOSPITAL—1 story and base, reinforced concrete. Cost not stated, San Francisco. Architect, Charles Peter Weeks, Mutual Bank Bldg., S. F. Owners, Union Iron Works. This building is a part of the program of improvement that the company has underway. The structure will be Class A in all respects and will contain the most modern equipment throughout. Interior will be finished in pine, tile and hardwood. There will be a central heating system. The exterior will be faced with cement plaster. Plans are now being prepared.

MOTEL—7 story and base, Class C construction, \$75,000, San Francisco. Architect, W. H. Weeks, 75 Post St., S. F. Owners, Charles C. Judson Co. This building will be erected on Ellis Street, west of Mason, and will contain a total of over 120 rooms. Nearly all rooms will have private baths. There will be steam heat, elevator service and a vacuum cleaning system. Interior finish will be of pine, redwood and oak with ornamental plaster in

the lobby. The first floor will contain stores, lobby and hotel office. The exterior will be faced with pressed brick. Plans are complete and figures are being taken.

HOTEL—3 story and base, brick. Cost not stated. San Francisco. Architect, Joseph Cahen, 45 Kearny St., S. F. Owners, Louis Friedman and Samuel Gerson. The building will be erected on Kearny street near Washington, and has been arranged for stores on the first floor and about 30 guest rooms on the upper floors. The interior will be finished in pine and redwood. There will be hot and cold running water supplied to all rooms. The exterior will be faced with pressed brick. Plans are complete and figures are being taken.

RESIDENCE—1 story and base, frame, \$2,500. San Francisco. Architect, none. Owner, Frank B. Russi, 440 Davis street, S. F. The house will contain six rooms and bath. Interior finish will be of pine and redwood. Oak floors will be used in the living and dining rooms. There will be a large open fire place and tile or brick mantel in the living room. Bath and kitchen will have some tile wainscot. The exterior of the house will be covered with rustic. Plans are in the hands of the owner and the work will be done by Day Labor.

SCHOOL REMOVAL—1 story and base. Class A construction. Cost not stated. San Francisco. Architects, City Dept. of Architecture, Temporary City Hall Bldg., S. F. Owners, City and County of San Francisco. A contract will be let within a few days by the Board of Public Works for the removal of the Commercial High School from its present site on Grove street, between Larkin and Polk streets, to a site on Fell street, between Franklin and Van Ness avenue. A bond of \$125,000 is required of the contractor.

POWER STATION—1 story and base, reinforced concrete, \$15,000. San Francisco. Engineers, Engineering Dept. Pacific Gas and Electric Co., 445 Sutter St., S. F. Owners, Pacific Gas and Electric Co. This building will be erected on Meacham Place, near Post street, and is designed for a steam plant. There will be a cement floor and metal window sash and frames. The exterior will be faced with cement plaster. Bids will be taken by the Purchasing Dept. of the Pacific Gas and Electric Co.

STORES ADDITION—1 story to present 3 story Class A building. Cost not stated. San Francisco. Architect, G. A. Applegarth, Call Bldg., S. F. Owner, A. B. Spreckels. The Spreckels' building on California street near Drumm is to be enlarged. The same classic style of architecture will be followed out and the exterior is to be faced with terra cotta. The steel frame will be extended. Plans for this work are now being prepared.

LOS ANGELES, CAL.—Stores, 1 and 2 story and base, brick, \$20,000. Architect, none. Owners, Los Angeles Suburban Homes Co. Contractors, Ye Planny Building Co., Title Insurance Bldg., L. A. Contract price, \$18,000.

Contracts Awarded.

HOSPITAL—2 story and base, reinforced concrete, \$45,000. San Francisco. Architects, City Dept. of Architecture, Temporary City Hall Bldg., S. F. Owners, City and County of San Francisco. Contractor, James Mc-

Laughlin, 211 Kearny St., S. F. Contract price, \$46,960. Note: This work has been out for figures before and the same contractor was then low on the work. For a complete list of all figures presented see under San Francisco in this issue.

STORAGE—1 story and base, Class C construction, \$25,000. San Francisco. Architects, Reid Bros., California-Pacific Bldg., S. F. Owners, Pentastar Realty Co. Contractors, Stockholm & Alyn, Monadnock Bldg., S. F. Contract price, \$25,000.

Freight Slip Bids Opened Saturday.

**Panama-Pacific Company Will Award
Contract for Ferry Freight Slip to
Healy-Tibbitts.**

Four bids for the construction of a ferry freight slip and approaches thereto were received Saturday morning at 11 o'clock by the Director of Works of the Panama-Pacific International Exposition Company. The work is for the building of the slip only and bids for the structural steel, aprons and hydraulic machinery for the operation of the aprons will be opened on January 28th. The following is a complete list of the figures as presented:

Ferry Freight Slip.

Healy-Tibbitts Constr. Co., \$39,340
Thompson Bridge Co., 40,410
Mercer-Fraser Co., 42,292
Hyde-Harjes Co., 44,783

The work will probably be awarded to the Healy-Tibbitts Construction Co.

City Bids Opened.

**James L. McLaughlin is Again Low Man
For Hospital Work and McSheehy
Bros. Also Land A Contract.**

The building is to be located on 8th street, near 13th, and will consist of 12 rooms. The building will be covered with cement plaster and will have tile floors. Plans are being prepared.

Oakland Builders' Annual Banquet.

Annual Membership Meeting and Banquet of the Oakland Exchange Proves a Brilliant Affair.

The Annual Membership Meeting of the Oakland Builders' Exchange was called to order at 4 P. M. last Saturday. The following men were elected to serve as Directors for the coming year: E. G. Hunt, Geo. B. Waddell, T. Sexton, Wm. Makin, J. F. Dingwell, P. T. Kennedy, A. A. Edwal, Javik Howard, James Pedgrift, C. G. Chipchase and Frank Robinson. In recognition of the faithful and intelligent services of the Secretary, P. E. Bradhoff, he was unanimously voted an additional fifty dollars a month salary.

The banquet was held in the evening at the Hotel Oakland. About one hundred and ninety members and guests were present. An elaborate banquet was served after which the guests listened to a number of excellent speakers. The following is a list of the speakers of the evening:

Mayor Noy, of Alameda; Mayor Craig, of Piedmont; John J. Donovan, City Architect of Oakland; President Wilson, Vice-President Eddie Brandon and the Hon. Mr. Kent, all of San Francisco Builders' Exchange; Harry Anderson, Commissioner of Public Works; A. A. Denison, Secretary of the Chamber of Commerce; Chas. W. Gompertz, Vice-President of the General Contractors' Association of San Francisco; L. N. Cobbleddick, L. C. Fraser Jr., and Jimmy McVey. A quartette composed of Frank Oates, Jimmy McVey, Harry Miller and Chas. Learn rendered several fine selections. Telegrams and letters of regrets, congratulations and best wishes were received from the chief executives of the following cities: Mayor Mott, of Oakland; Mayor J. Stitt Wilson, of Berkeley; Mayor James Rolph Jr., of San Francisco; Mayor J. C. Owens, of Richmond.

The affair was one of the most enjoyable ever given by the Builders' Exchange.

SAN JOSE AND SANTA CLARA VALLEY.

RESIDENCE — 2 story and base, frame, \$7,000. Menlo Park, San Mateo Co., Cal. Architect, William C. Hays, Foxcroft Bldg., S. F. Owner, Dr. Howard Morrow. The dwelling will con-

tain eight rooms, baths and sleeping porch. Interior finish will be of pine, redwood and hardwoods. Oak floor will be used throughout except in the bath rooms, which will have composition floors and will be finished in tile. There will be furnace heat and one fire places. Mantels will be of brick and tile. Tile will be used in the kitchen. An automatic water heater will be installed. The exterior of the dwelling will be covered with cement plaster and shiplap. Plans are being prepared.

RESIDENCE — 2 story and base, frame, \$50,000. Fair Oaks, San Mateo Co., Cal. Architects, Bliss & Pavlin, Balboa Bldg., S. F. Owner, John Stern. The dwelling is to be designed for a large and palatial country home. There will be in the neighborhood of fourteen rooms, several baths, laundry and a garage. The grounds will also be laid out in the Italian style. Interior finish will be of pine, redwood and hardwoods. Floors will be of oak throughout. There will be a central heating system, open fire places and mantels of brick and tile. Bath rooms will be finished in tile and will have composition floors. The exterior of the house will probably be covered with cement plaster on metal lath. Plans are now being prepared for this work.

FRESNO, MODESTO, STANISLAUS AND CENTRAL CALIFORNIA.

LODGE HALL—3 story and base,
 brick, \$20,000. Modesto, Stanislaus Co.,
 Cal. Architect, Ralph P. Morrell, Yo-
 semite Theatre Bldg., Stockton. Owner,
 John S. Tully. The first floor of
 the building will contain stores and
 an entrance to the lodge hall. Upper
 floors have been leased to the Modesto
 Elks. Interior finish will be of pine
 throughout. Steam heat will be in-
 stalled with an oil burning furnace.
 The exterior will be faced with pressed
 brick. Plans are now being prepared
 and will be completed as rapidly as
 possible.

SEWER SYSTEM—\$80,000. Hanford,
 Kings Co., Cal. Engineer, City Engi-
 neer, Hanford. Owners, City of Han-
 ford. Notice has been sent to all bid-
 ders on this work of an extension of
 time of opening figures until January
 27th. Bids were to have been opened
 on January 20th.

LODGE HALL—4 story and base,
 brick. Cost not stated. Fresno, Fresno
 Co., Cal. Architects, Starbuck & Clark,
 Fresno. Owners, Knights of Pythias.
 The building is designed for a four-
 story structure, but only the first story
 will be erected at this time. The first
 floor will contain four stores. This
 work has been estimated to cost \$15,-
 000. The architects are taking figures.

LOS ANGELES AND SOUTHERN CALIFORNIA.

APARTMENT HOUSE—5 story and base. Class B construction, \$125,000. Los Angeles, Cal. Architect, J. W. Chalmers, Mason Bldg., L. A. Owner, A. L. Hill. The building will cover an area of 96x148 feet. Plans provide for a total of 183 guest rooms, which will be arranged in two, three and four room suites with baths and wall beds. There will also be a large lobby, amusement room, ball room, billiard room and ladies' parlor. Steam heat, automatic elevators and a vacuum cleaning system will be installed. Interior will be finished in pine and mahogany. Considerable tile and marble will be used. The exterior of the building will be faced with pressed brick. Plans are nearly complete and figures will be called for shortly.

APARTMENT HOUSE—Class A con-

struction cost not stated. Los Angeles, Cal. Architects, Train & Willson, Exchange Bldg., L. A. Owner, H. J. Ayres. The building will be of the reinforced concrete type and will contain 120 rooms, which will be arranged in large suites of from four to six rooms each. Interior finish will be of pine and hardwoods. Bath rooms will be finished in tile with composition floors. There will be steam heat, elevator service, wall beds and a vacuum cleaning system. Construction will be fireproof with metal window sash and frame and hollow tile interior partitions. The exterior will be faced with pressed brick. Plans are complete and figures are being taken.

APARTMENT HOUSE—4 story and base, brick. Cost not stated. Los Angeles, Cal. Architect, Leonard L. Jones, I. W. Hellman Bldg., L. A. Owner, H. V. Bard. The building will be 65x110 feet, and will contain 168 rooms arranged in two and three room suites. All suites will have connecting baths and wall beds. Interior finish will be of pine. Bath rooms will have composition floors. There will be steam heat, elevator service and a vacuum cleaning system. The exterior of the building will be faced with pressed brick. Plans are now being prepared.

APARTMENT HOUSE—3 story and base, frame. Cost not stated. Los Angeles, Cal. Architect, Leonard L. Jones, I. W. Hellman Bldg., L. A. Owner, C. J. Christie. The building will be 50x121 feet, and will contain 72 rooms arranged in two and three room suites with wall beds and private bath rooms. There will be steam heat and a hot water heating system. Interior finish will be of pine, redwood and some oak. Bath rooms will have tile walls and composition floors. The exterior of the building will be covered with cement plaster on metal lath. Plans are in the course of preparation.

APARTMENT HOUSE—4 story and base, brick, \$40,000. Ocean Park, Los Angeles Co., Cal. Architects, Ye Planny Building Co., Title Insurance Bldg., L. A. Owners, Hoyt Bros. The building will contain 55 rooms arranged in suites of two and three rooms each with private bath and wall beds. Interior finish will be of pine and redwood. There will be steam heat. Hot and cold water will be supplied to all rooms. Bath rooms will have composition floors. The exterior of the building will be covered with cement plaster on metal lath. Plans are being prepared.

HOTEL—5 story and base, reinforced concrete. Cost not stated. Ocean Park, Los Angeles Co., Cal. Architect, Frank T. Koglev, Consolidated Realty Bldg., L. A. Owners, Messrs. Stinemann and Kramer. Construction will be Class A in all respects with concrete floors and hollow tile interior partitions. There will be a total of 100 guest rooms and 66 baths. Steam heat, two elevators and a vacuum cleaning system will be installed. Interior finish will be of pine, redwood and some hardwood. Lobby, office and parlors will have ornamental plaster decoration. The exterior will be faced with cement plaster with the inlays. Plans are complete and figures are being taken.

HOTEL—2 story and base, brick. Cost not stated. Los Angeles, Cal. Architects, Hudson & Mangell, Stimson

Bldg., L. A. Owner, Dr. W. T. Covington. The first floor will be arranged for stores and the upper floor for number of single rooms. There will be several baths. Interior finish will be of pine throughout. Hot and cold running water will be supplied to a rooms. The exterior will be face with pressed brick. Plans are complete and ready for figures.

HOTEL—2 or 4 story and base, brick. Cost not stated. Los Angeles, Cal. Architect, Frank M. Tyler, Hibernian Bldg., L. A. Owner, A. W. Ross. The building will be 47x140 feet. The first floor will contain the hotel lobby and several stores. Upper floors have been arranged for 27 guest rooms and 10 baths on each floor. Interior finish will be of pine and redwood. There will be steam heat and, if a four story building is erected, an elevator. All rooms will be supplied with hot and cold running water. The stores will have patent fronts. The exterior of the building will be faced with pressed brick. Plans are being prepared and when complete the work will be done by Day Labor.

HOTEL—3 story and base, brick. Cost not stated. Santa Monica, Los Angeles Co., Cal. Architect, S. Tilden Norton, Title Insurance Bldg., L. A. Owners, Henry Klein and Adol. Schwartz. The building, which has been arranged for stores on the first floor, will be 40x90 feet. Upper three floors will contain a total of thirty rooms and four baths. Interior finish will be of pine. There will be steam heat and hot and cold running water. Metal window frames and sash will be used. The exterior of the building will be faced with pressed brick. Plans are complete and figures will be called for at once.

SCHOOL—1, 1 story and 1, 2 story and base, brick. Cost not stated. Huntington Park, Los Angeles Co., Cal. Architect, Robert M. Taylor, Douglas Bldg., L. A. Owners, Huntington Park School District. The main building will be two stories in height and will cover an area of 122x176 feet. The domestic science building will be 39x71 feet and one story high. Both buildings are designed in the classic style and will be faced with pressed brick. Interior finish will be of pine and pine and hardwood floors will be used. There will be a central heating system. Bonds in the sum of \$65,000 have been voted. Plans are being prepared.

STORES AND LODGE HALL—2 story and base, brick. Cost not stated. Los Angeles, Cal. Architect, Arthur L. Acker, Story Bldg., L. A. Owner, Emma Oswald. The building will be 50x110 feet. The first floor will contain two stores and the upper floor is to be arranged for a lodge hall with a complete stage. Several offices are also to be provided for on this floor. Floors in the stores will be of cement. Gas steam radiators will be used. Interior finish will be of pine. There will be patent store fronts. The exterior of the building will be faced with pressed brick. Plans are complete and figures are being taken.

LOFT BUILDING—10 story and base, reinforced concrete. Cost not stated. Los Angeles, Cal. Architects, Austin & Pennell, Wright and Callender Bldg., L. A. Owners Hill Street Lot Co. Preliminary plans only have been prepared but these show a structure 58x165 feet

of reinforced concrete throughout. There will be both freight and passenger elevators, steam heat and modern plumbing. The structure is to be used for light manufacturing purposes. There will be metal window sash, sidewalk elevators and copper cornice. Plans are being prepared. The project is being handled by Alex MacKeigan, 421 Story Bldg., L. A.

APARTMENT HOUSE—3 story and base, brick. Cost not stated. Los Angeles, Cal. Architect, Robert M. Taylor, Douglas Bldg., L. A. Owner, S. L. Weintraub. The building will cover an area of 50x90 feet, and is to contain 51 rooms besides the lobby, amusement room and parlors. Suites will consist of two and three rooms each. There will be wall beds and private baths. Steam heat and elevators will be installed. Interior finish will be of pine, redwood and oak. The exterior of the building will be faced with pressed brick. Plans are complete and the work will be done by Day Labor.

BRIDGE—Concrete and steel. Cost not stated. Monrovia, Los Angeles Co., Cal. Engineer, City Engineer, Monrovia. Owners, Towns of Monrovia and Arcadia. These two neighboring towns have instructed the City Engineers to prepare plans and specifications at once for a bridge to connect the two towns. None of the particulars have been published as yet.

BRIDGES—2, steel and concrete, \$70,000. Phoenix, Ariz. Engineer's name not given. Owners, San Carlos Indian Reservation. Congressman Carl Hayden has secured an appropriation of the above amount for the construction of two bridges, and the Interior Department has ordered plans and specifications prepared.

FIRE AND POLICE DEPARTMENT BUILDING—2 story and base, brick, \$40,000. Hollywood, Los Angeles Co., Cal. Architect, J. J. Backus, City Hall Bldg., L. A. Owners, City of Hollywood. The building will contain the offices of the department heads. There will be a central heating system, pine interior trim and modern plumbing. The exterior will be faced with pressed brick. Plans have received the approval of the Police and Fire Commissioners and the Art Commission. Bids will be taken by Mr. Backus for all parts of the work.

WAREHOUSE—4 story and base, reinforced concrete, \$30,000. Long Beach, Los Angeles Co., Cal. Architect, George Harding, Citizens' National Bank Bldg., L. A. Owners, City Transfer, Van and Storage Co. The building will be 50x125 feet and fireproof throughout. There will be concrete floors, metal window sash and frames and underwriters' doors. Freight elevators will be installed. Interior finish will be of pine. The exterior of the building will be faced with cement plaster. Plans are being prepared.

WAREHOUSE—1 story, reinforced concrete and steel. Cost not stated. Los Angeles, Cal. Architect's name not given. Owners, Outer Harbor Dock and Wharf Co., Union Oil Building, L. A. The building will be 105 feet wide and 577 feet long. Construction throughout will be fireproof. Pile foundation is now being driven and the balance of the construction will follow at once. Work is being carried on under the personal direction of the owners, and full particulars can be secured from them.

GARAGE—1 story and base, brick. Cost not stated. Los Angeles, Cal. Architect, none. Owner, Mark G. Jones, Merchants' Trust Bldg., L. A. The building is to be erected on the site of an old residence on Flower street near 10th, and will be designed for a commercial garage. Mr. Jones has not selected an architect and no details of the building have been determined. Full particulars will be given in these columns as the plans progress.

GARAGE—1 story and base, brick. Cost not stated. Los Angeles, Cal. Architect, none. Owner, W. L. Riley, 210 So. Fremont St., L. A. The building will be erected on West Second street, and is to cover an area of 74x125 feet. There will be a cement floor, metal window sash and frames and special gasoline storage tanks. The exterior of the building will be faced with pressed brick. The owner is preparing the plans and the work will be done by Day Labor.

LODGE HALL—2 story and base, brick, \$30,000. Anaheim, Orange Co., Cal. Architect, Oscar Lagman, Anaheim. Owners, Anaheim Masonic Temple Association. The building will cover an area of 90x125 feet. The first floor will be arranged for two stores. There will be a number of offices in the front portion of the second floor and lodge rooms in the rear. A central heating system will be installed. Interior finish will be of pine and oak. The exterior of the building will be faced with pressed brick. Plans have been approved and bids will probably be called for at the next meeting of the owners on January 20th.

HOSPITAL—3 story and base, brick and concrete. Cost not stated. Los Angeles, Cal. Architect, Frank L. Stiff, Grosse Bldg., L. A. Owners, Westlake Hospital Association. The building will contain a number of wards, both public and private. Foundations and bearing walls have been designed to carry three additional stories. There will be steam heat and elevator service. Interior finish will be of pine and hardwoods with all corridors finished in tile. The exterior will be faced with pressed brick. Roof will be of metal tile. Plans are complete and figures are being taken.

HOSPITAL ADDITION—1 story. Class A construction. Cost not stated. Los Angeles, Cal. Architects, Eisen & Son, Wilcox Bldg., L. A. Owners, Columbia Hospital. The addition will be of one story to a present four-story concrete building, and is designed for an operating pavilion. Construction will be Class A throughout. Similar additions are planned for the central building and the west wing. Bids will be called for at once on the addition above mentioned.

HOTEL—3 story and base, brick, \$26,000. San Diego, Cal. Architect, John S. Siebert, San Diego. Owner, B. W. Harris. The building will be erected on State street, between D and E streets, and has been arranged for stores on the first floor and 40 guest rooms and 15 baths on the upper two floors. A central heating system will be installed. Interior finish will be of pine and redwood. The exterior will be faced with pressed brick. Plans are being prepared.

RESIDENCE—2 story and base, brick and frame, \$35,000. Los Angeles, Cal. Architect, A. F. Rosenheim, H. W.

Hellman Bldg., L. A. Owner, J. C. Rives. The dwelling has been designed for a 12-room house with several baths. Interior finish will be of pine, redwood and mahogany. Hardwood floors will be used throughout. Bath rooms will be finished in tile. There will be a central heating system and open fire places. Mantels will be of tile and brick. An automatic water heater will be installed. The exterior of the dwelling will be covered with pressed brick veneer. Plans are being prepared.

SCHOOL—2 story and base, brick. Cost not stated. Bonito Indian School, New Mexico. Architect, Dept. of Interior, Washington, D. C. Owners, United States Government. Plans and specifications can be secured from the Interior Department at Washington, D. C., for the construction of this building. Bids will be opened in Washington, D. C., on February 12th.

MUNICIPAL WATER SYSTEM—\$1,600,000. Riverside, Riverside Co., Cal. Engineer, City Engineer, Riverside. Owners, City of Riverside. Bonds to the amount above mentioned were recently voted to purchase the present water supply system of Riverside and to construct extensive new additions to both the domestic and fire supply systems. Work will be undertaken within a few weeks.

STORES—1 story and base, brick. Cost not stated. Los Angeles, Cal. Architects, Morgan, Walls & Morgan, Story Bldg., L. A. Owner, D. Botillier. The building will occupy a corner site and will cover an area of 100x100 feet. There will be a cement floor, patent store fronts, marble and tile base and wainscoting. Interior finish will be of pine throughout. The exterior of the building will be faced with pressed brick. Plans for this work are now being prepared.

STORES AND OFFICES—4 story and base, brick and steel. Cost not stated. San Diego, Cal. Architects, Quayle Bros. & Cressy, Savoy Theatre Bldg., San Diego. Owner, R. G. Miller, Pres. of the Owl Drug Co. The present building at the corner of 4th and D streets is to be wrecked and a new four-story building erected on the site. The first floor will contain stores and the upper floors modern offices. There will be steam heat, elevator service and a vacuum cleaning system. Interior finish will be largely of metal. The exterior will be faced with pressed brick. Plans are now being prepared.

MARKET—2 story and base, brick. Cost not stated. Los Angeles, Cal. Architects, Eisen & Son, Wilcox Bldg., L. A. Owners, Jeffries and Lenk. The structure will cover an area of 95x210 feet. There will be a cement floor, patent store fronts, considerable tile and marble work, ice boxes and a refrigerating plant. The exterior will be faced with pressed brick. Plans are being prepared.

Contracts Awarded.

APARTMENT HOUSE—3 story and base, brick, \$40,000. Venice, Los Angeles Co., Cal. Architect's name not given. Owners, D. D. Smith and J. F. Mitchell. Contractors, Fireproof Construction Co., Venice. Contract price, \$40,000.

APARTMENT HOUSE—3 story and base, brick, \$18,775. Long Beach, Los Angeles Co., Cal. Architects, Austin & Lochridge, 18 Locust Ave., Long

Seattle. Owners, Hoquiam School District. The building will cover a ground area of 89x175 feet. There will be a number of standard sized class rooms, an auditorium seating 450 people, manual training and domestic science departments and all other requirements of a modern high school. Roof will be carried on steel trusses. Stairways and halls will be of reinforced concrete. There will be a steam heating system and fan ventilation. The exterior of the building will be faced with cream colored terra cotta. Plans will be completed within a week.

STORIES AND LOFTS—3 story and base, brick and concrete, \$30,000. Tacoma, Wash. Architects, Heath & Gove, National Realty Bldg., Tacoma. Owners, Wallis & Sons. The building will be erected on So. C street. The first floor will be occupied by the owners, who are engaged in the retail business. Upper floors will be arranged for lofts. There will be steam heat, elevator service and metal window sash and frames. The exterior will be faced with pressed brick. Interior finish will be of pine throughout. Plans are now complete and figures will be called for at once.

Contracts Awarded.

THEATRE—1 story and base, reinforced concrete, \$15,000. Bremerton, Wash. Architect, Max Umbrecht, Globe Block, Seattle. Owner, A. G. Benbenick. Contractor, H. A. Hatfield, Bremerton. Contract price, \$15,000.

FOREIGN TRADE OPPORTUNITIES.

[Inquiries in which addresses are omitted are on file at Bureau of Foreign and Domestic Commerce. In applying for addresses refer to file numbers.]

Consuls are requested to contribute to this department, and in doing so should in each instance state in what language correspondence should be conducted.

No. 10146.—A prominent furniture dealer in a foreign country informs an American consulate that he desires catalogues of American furniture of the following description: Chairs, rocking chairs, settees, etc., of round bent wood with cane seats, strong but of a very cheap grade, iron bedsteads of the simplest and cheapest grades. This merchant secures the wood furniture from European countries, but desires to purchase in the United States. Cheapness is the prime requisite for his class of trade. Catalogues in French, and prices quoted in francs with dimensions in the metric system, the preferred, but catalogues in English can be used if necessary. Dimensions of goods packed ready for shipment should be quoted f. o. b. New York, N. Y., or Mobile, Ala.

No. 10148. Galvanized iron, zinc, barbed wire, etc.—The Bureau of Foreign and Domestic Commerce is in receipt of a communication from a business man in Porto Rico requesting to be put in touch with American manufacturers of galvanized iron, barbed wire, etc.

No. 10151. Electric clocks.—The American consulate at Buenos Aires, Argentina, has forwarded a call for tenders for electric clocks to be installed by the municipality in various localities of the city; also translation of the provisions. Bids should be ad-

ressed to the Subsecretaria de Hacienda de la Municipalidad, Buenos Aires, Argentina, and will received until February 10, 1913.

No. 10152. Chemicals.—A large and important firm in a European country informs one of the commercial agents of the Department of Commerce and Labor that it is very anxious to get in touch with producers of carbonate of magnesia, phosphate of Florida, nitrate of potash, and sulphate of copper. The firm mentioned is the largest importer of chemicals in the country and has many branch connections. It is prepared to meet terms of payment, provided the goods and prices are satisfactory. Correspondence may be conducted in English.

No. 10153. Furniture, watches, shoes, silverware, paints, hardware, etc.—The Bureau of Foreign and Domestic Commerce is in receipt of a communication from a business man in a South American country stating that he has been established in business in that country for many years and would like to represent American manufacturers of office furniture, boots, and shoes, watches and clocks, silverplated articles, paints, hardware, printing paper for newspapers, etc. He furnishes references. Correspondence may be in English.

No. 10154. Wooden sectional bookcases.—A prominent firm of importers and wholesalers in the Levant has informed an American consulate that it desires to be put in touch with American manufacturers and exporters of wooden sectional bookcases. Catalogues, prices, and discounts should be forwarded and quotations submitted c. i. f. certain city. American sectional bookcases are generally admired in that region, and if the matter is given proper attention good results should be obtained. Correspondence should preferably be in German or French.

No. 10155. Copper, brass, bronze, iron, and steel manufacturers.—An American consular officer in Italy reports that a local firm desires to represent on the local market American manufacturers of the following lines: Aluminum plates and ingots, brass and bronze ingots, copper ingots and tubing of large sizes, extra heavy anchor chains, steel plates for shipbuilding, steel tubes of large diameter for marine boilers, a single iron and brass tubing especially adapted for metal beds, the tubing to be square and not round. The firm is willing to be in a position to push the sale in Italy of the above lines and can furnish references. Correspondence in English, Italian, or French.

No. 10184. Office furniture.—A report from an American consul in a European country states that a local dealer in office furniture and office supplies has asked to be supplied with catalogues of American office furniture. Correspondence may be in English.

No. 10185. Lumber.—A large German dealer in over-sea lumber and wood informs an American consulate that he desires to be placed in communication with American dealers in raw materials of lumber, with a view to making arrangements for regular importations. Direct correspondence giving prices, terms, etc., is desired, and references are preferred in the German language.

No. 10186. Boilers, engines, machinery,

etc., automobiles, etc.—An American consul reports that a firm in a European country desires to receive catalogues of American engines, mounted and unmounted, turbine motors, all kinds of pumps, machinery, and all kinds of boilers, engine weights, etc. The firm is a large American general contractor and desires to certain extent to be supplied with goods in England.

No. 10187. Locomotives, motor boats, engines, machinery, pumps, etc.—A large American firm, who besides running a large manufacturing line of the large locomotives in the country in which it is located, also builds and now manufactures a number of the largest and most modern in the city, informs an American consular office that he desires catalogues and prices on the following articles: Narrow gauge locomotives, motor boats, kerosene and turbine engines, connected with centrifugal pumps for flow machinery for the purpose of delivering material in the construction of buildings, brick-making machines (wet process), steam saws, etc. for large sawcutting work. Prices should be quoted c. i. f. city of destination, but if this is not possible, then f. o. b. American seaport, with freight rates to destination, in which case it is desired that shipping weights and measurements be stated. Correspondence may be in English but Russian would be preferred.

No. 10191. Novelties and office specialties.—An American consular officer in Canada reports that business men in his district have requested the names of American manufacturers of novelties and office specialties. He desires to enter into direct correspondence with the manufacturers of such articles.

No. 10195. Cement factory.—A report from an American consular officer contains receipt of a communication from the mayor of a city in the district in which he is appointed for the establishment of a cement factory. The mayor would like to have an American engineer assist in the proposition and construction of a cement factory made with cement of American origin on the territory of the city mentioned.

No. 10197. Fire apparatus.—An American consul reports that in an industrial country the fire engines selling in that country could profit by being made of American make. The fire engines in that country will be of the American type, and the responding demand for the necessities of cities and towns is increasing. The consul is desirous of being further informed as to the possibilities of doing business in this line.

No. 10198. Fire apparatus.—An American consul reports that in an industrial country the fire engines selling in that country could profit by being made of American make. The fire engines in that country will be of the American type, and the responding demand for the necessities of cities and towns is increasing. The consul is desirous of being further informed as to the possibilities of doing business in this line.

No. 10199. Fire apparatus.—An American consul reports that in an industrial country the fire engines selling in that country could profit by being made of American make. The fire engines in that country will be of the American type, and the responding demand for the necessities of cities and towns is increasing. The consul is desirous of being further informed as to the possibilities of doing business in this line.

No. 29. S. Machinery and electrical appliances.—A report from an American consular officer states that a foreign firm some time ago was granted a concession for the distribution of electrical power for various purposes. The power plants and repair shops are at present under construction and will be in operation during the spring of 1912. The company is now in the market for power-house and machinery, steel cables, wire, batteries, generators, electric motors, glass insulators, tools, and implements of all kinds, as well as all sorts of electrical appliances, such as lamps, stoves, irons, chandeliers, etc. Showrooms have been opened for the exhibition of such articles.

NEW INVENTIONS.

PRODUCTION OF RUTILE IN 1912.

Returns received by Frank L. Hess, of the United States Geological Survey, indicate that there was only one American producer of rutile in 1912—the American Rutile Co. At its mine and mill at Roseland, Nelson County, Va., this company produced 275 tons of concentrates carrying from 80 to 85 per cent of titanic oxide. The principal impurity is iron oxide carried in an iron-rich mineral which from its black color is supposed to be ilmenite. The ilmenite is easily separated from the rutile by an electro-magnet and 100 tons of such purified concentrate were produced which carried 84 per cent or more of titanic oxide. The separated material carries from 50 to 60 per cent of titanic oxide and as much as 42.3 per cent of iron oxide. It is especially adapted for making ferro-titanium. The company allowed its plant to remain idle during 1911 and did not begin operations in 1912 until June. During the year a Wetherill magnetic separator was put into operation and a pulverizer was added.

The company works ore of two sorts, phases of the same rock mass. One phase is composed mostly of feldspar, quartz, and rutile. The other contains considerable hornblende and ilmenite besides the constituents named. From the first phase a light red rutile, very free from iron, is obtained which concentrates to more than 94 per cent of titanic oxide. The rutile obtained from the other phase of the rock is somewhat darker colored than that from the first phase.

The company's product is sold for making ferro-titanium for use in the

manufacture of steel, in electrodes of the "magnetite" arc lamp, in the ceramic trade, and dyeing leather and textiles. Prices range from \$30 to \$160 a ton according to percentage of titanic oxide and quantity. Pulverized rutile and extra pure grades sell for higher prices.

Some prospecting for rutile was done at Magnet Cove, Ark., during the year, but no production was reported.

PRODUCTION OF TUNGSTEN ORE IN 1912.

The quantity of tungsten ore mined and marketed in the United States during 1912, according to preliminary figures collected by Frank L. Hess, of the United States Geological Survey, was equivalent to about 1,290 tons carrying 60 per cent of tungsten trioxide and was valued at \$492,000, besides which a smaller quantity was mined but not marketed. This is an increase over the output of 1911, which was equivalent to 1,139 tons of 60 per cent ore and was valued at \$407,955. The average price paid per unit (the unit is 1 per cent of a short ton, or 20 pounds, of tungsten trioxide) was about \$6.35 in 1912, compared with \$4.59 in 1911, but the extreme variation seems to have been less in 1912 than in the previous year. Although higher than in 1911, the price paid was unsatisfactory to the miner. It ranged from \$5.80 to \$7.25 per unit for ore running 60 per cent or more of tungsten trioxide, and \$8 was being quoted at the close of the year. Probably more concentrates were sold at \$6 than at any other figure.

The price seems rather anomalous, for ordinarily the price of tungsten ores varies with the fluctuations of the steel trade, rising and falling as the demand for steel increases or decreases. During 1912 the steel trade has been remarkably brisk and the trade in tool steel seems to have been especially good, following a reported large sale for automobiles and other articles in which much tool steel is used, but the price for tungsten has not risen as much as might have been expected. There do not seem to have been sufficient new discoveries or developments of old deposits to have over supplied the market, but it is known that a considerable quantity of concentrates had been stored and it is possible that the use of this stored stock may have prevented an otherwise natural rise. The present outlook is for higher prices during 1913.

As usual, the largest production from any single district was made from the unique ferberite deposits of Boulder County, Colo. About 1,200 tons of ore of various grades were shipped out, equivalent to 775 tons of 60 per cent ore. The Primos Mining and Milling Co. and the Wolf Tongue Mining Co. are the largest producers in the district. The Wolf Tongue Mining Co., which works its properties by a leasing system, introduced an important new feature during the year by furnishing electric hoists free to its lessees and the company also pays a portion of the cost of sinking each shaft. The lessee pays for the cost of electric current used. It seems probable that this innovation will lead to an increase in production from the

properties during 1912, unless the price could drop seriously.

In California the Atolia Mining Co., which controls the Atolia field, at the north edge of San Bernardino County, increased the production of its remarkably pure scheelite over that of 1911 and was the largest individual producer in the United States. A small quantity of scheelite was also taken at in the Stringer district, a few miles north and west of Atolia. A discovery of scheelite was reported on the west side of the Rand Mountains, but no ore was sold. A few tons of mixed wolframite and scheelite were shipped from the vicinity of Nippon, in the east end of San Bernardino County.

In Arizona a few tons of hubnerite concentrates were shipped from the Dry Placers and some ore from the claims near Dragon; hubnerite ore was shipped from Arivaca to Denver, for concentration; and some scheelite concentrates were shipped from Oracle, where scheelite is associated with gold and silver ores. Small shipments of hubnerite were made from Osceola and Tondout Mountain, Nev., and Patterson Creek, Idaho. A small quantity of hubnerite was concentrated at Loon Lake, Wash., but none was shipped. A small shipment of wolframite was made from Lordsburg, N. Mex.

NEW DRYING PROCESS.

Kiln Invented by United States Forestry Service to Dry Woods of State.

A party of California lumbermen is being made up to attend the opening of the experimental dry-kiln back of North Berkeley, upon the completion of drying experiments on California soft woods.

During the past two Winters this kiln, which embodies some radically new ideas in construction and operation, has been thoroughly tried out on California-grown eucalyptus and acacias. Before closing the experiments, however, it has been decided to demonstrate the applicability of the process developed to the ordinary commercial woods of California, including sugar and Western yellow (white) pine, white and red fir. A carload of these species, donated for the tests by the Diamond Match Company of Chico, is on the way to Berkeley.

In order to make the tests as severe as possible, only thick wide stock, fresh from the saw, will be used. The United States Forest Service, which is responsible for the design of the kiln and the method of operation, is confident that the successful drying of California soft woods is only a matter of demonstration. This belief is based, not on actual practice, but on theory. Whether the theory is correct will be shown about February 1st, when it is expected the dried lumber will be ready for removal from the kiln.

The Forest Service has been studying these questions for years, and it has been demonstrated that the type of kiln to be used must allow absolute control of temperature, humidity and flow of air, the three factors affecting kiln-drying. The kiln has been patented and the patent assigned to the people of the United

States so that anybody can construct one without paying royalties to the inventor.

Any lumberman or wood user who may desire to witness the opening of the kiln should communicate with the District Forester in this city for further particulars.

CONSTRUCTION WORK IN MEXICO.

New Railroad Hospital and Improvements in City Jail.

The National Railways of Mexico have for some time been considering the erection of a hospital for the benefit of their employees and have now definitely decided to commence this work some time during the month of January, 1913.

The hospital will be erected on lands belonging to the company near Popotla, a suburb of Mexico City. It will be equipped with all modern conveniences, and it is expected that its two wards will have a capacity for 150 patients. The grounds surrounding the building will be beautified by ample gardens. The corps of doctors in attendance will be of the best.

At the last session of the Board of Prison Supervision plans and specifications were presented for the construction on lands at the south of the city prison of buildings for shops for shoe and clothing manufactures and carpenter work. These plans were approved and the new construction work commenced on January 1, 1913. These new shops will call for the purchase and installation of new machinery and supplies.

INTERNATIONAL PARCELS POST.

Postmaster-General Hitchcock has decided, after conference with official postoffice departments that distinctive postal parcel post stamps might be used for the payment of postage on packages sent to foreign countries on international parcel post. That decision was telegraphed immediately to the postmasters of all important cities.

It follows, therefore, that both the ordinary postage stamps and the distinctive parcel post stamp may be used in forwarding packages by parcel post to foreign countries. Under the law, however, ordinary postage stamps may not be used to pay postage upon packages sent by parcel post from and to points in this country.

Postmasters have been notified, too, that packages sent to a foreign country by international parcel post cannot be insured as domestic parcels are, but they may be registered as in the past.

UNION PACIFIC TO LEASE CENTRAL PACIFIC.

NEW YORK, January 16.—It was learned from an authoritative source in New York Wednesday that the Union Pacific Railroad Company plans to take over the Central Pacific Railroad Company by lease from the Southern Pacific Company, and this way meet the requirements imposed by the Supreme Court in its decree ordering the dissolution of the Union and Southern Pacific.

Just how the Union Pacific is to assume the Central's obligations to the Southern Pacific has not yet been determined, but it is supposed that the

transfer of the lease, if consummated, will involve the transfer of some of the \$125,000,000 Southern Pacific stock now owned by the Union Pacific.

RIVER RANCH SOLD.

SACRAMENTO, Jan. 13.—E. L. Miller of Enid, Oklahoma, has bought from J. P. Johnston of Nicolaus, a 303 acre tract paying \$17,000. The deal was made by the Trainor-Desmond Company.

Miller is in Sacramento and has announced that he proposes making the tract a fine dairy farm on which will be produced alfalfa and high-class milk cows. The 303 acres is in the Natomas Consolidated Reclamation District north of the city.

Another deal reported by the of 100 acres of land near Riego, formerly owned by M. E. Murphy to the Natomas, for about \$4,000.

WATSONVILLE, January 18.—Bids will be called for at once by Architect Douglass for plans for a new fruit cannery which is to be erected here before the coming fruit season. More than 300 men will be employed in the plant, which will put up strawberries, apricots and other fruits grown in the Pajaro valley. Already the Crown Cordial and Extract Company, which is behind the venture, has contracted for the delivery of 12,000 crates of strawberries in May.

SELECT SITE FOR BRIDGE.

REDDING (Shasta Co.), January 18. A site for the proposed Market Street bridge across the Sacramento River—the structure that is required to bring the State highway through the business heart of Redding—has been chosen by the City Trustees. The site is near the Reid Ferry.

The Trustees, apparently, favor a concrete bridge, rather than a steel structure. Plans and specifications will be prepared at once and bids advertised for. As this will be done under the supervision of the State highway engineers, and whatever bridge is built will have to meet with their approval before acceptance.

HEARING FOR CHANGE IN HIGHWAY.

RED BLUFF (Tehama Co.), January 18.—Assemblyman Harry Polsley of Red Bluff has sent notification that he has taken up with Engineer Fletcher of the State Highway Commission the change, requested by the grand jury, in the survey of the State highway from Croning to Red Bluff and that Fletcher has called a hearing for January 20th.

NEW STEEL WORKS IN NEW SOUTH WALES.

SYDNEY, Australia, January 10.—Articles are appearing recently in the local press regarding the proposal to build in New South Wales extensive steel works at an estimated ultimate cost of about \$5,000,000. To present the proposition is possible, although certain minor questions will not be answered until the end of the Broken Hill General Managers of the Broken Hill Proprietary Company, the concern proposing the steel works, is quoted as saying that the company intends to

Editorial Comment.

Besides the Liberal Arts, the manu-
factures and inventions and the regular
exhibits which go to make up a
World's Fair, the most interesting part
is the great 'side show or playground
where all kinds of concessions are
given for the purpose of entertaining
the visitor. Not a little of the ad-
vertisement of the great exposition is
obtained in accounts of unique con-
cessions asked for and secured by
numerous corporations and individuals
seeking rights from the World's Fair
Directors.

Some idea of the magnitude and
scope of these concessions can be
gained from the report of those al-
ready granted and the investment
which each represents:

Public stenographic booths.....	\$150,000
Grand Canyon of Arizona.....	250,000
Infant incubators.....	25,000
Panama canal.....	150,000
Panamanian souvenirs.....	25,000
Forty-nine Camp.....	100,000
California candies.....	10,000
Ice palace and hockey arena.....	150,000
Aeroscope.....	100,000
Trionan.....	60,000
Creation.....	160,000
Evolution of Dreadnought.....	150,000
Cyclorama Battle of Gettysburg.....	25,000
Human Roulette.....	15,000
Racing coaster.....	60,000
Scenic Railway.....	60,000
The Old Mill.....	15,000

Total.....\$1,505,000
These, in all probability, will be but
a small fraction of the total conces-
sions, and but a small part of the in-
finite variety of amusements that will
be offered to the visitor. Besides the
great show itself, with its architecture
and its color and its lighting, there
will be this varied playground where
recreation and amusement can be
sought when the eye and mind is tired
of viewing the pageants and progress
of the world.

The Post Office reports a steady
growth in business of the Parcels Post.
This in spite of the fact that it is
hampered with the restrictions of re-
quiring special stamps and the de-
livery of packages at the stations in-
stead of at mail boxes.

The delivery of packages at the cen-
tral stations may be necessary under
the present force and equipment of the
Post Office Department but there seems
to be no excuse for requiring special
stamps.

All that Uncle Sam gets out of it is
the amount paid for the stamps and
why any particular kind of stamps
should be required is hard for any
thinking person to see. Perhaps this

was a compromise with the Express
companies who have so long robbed
the people and usurped their rights that
they think they have a divine right to
over-charge them.

For years and years the people have
been paying more to send any parcel
the shortest distance within their own
state than it would cost them to send
to Australia or the farthest continent
on the face of the earth. It took
somebody with the backbone of Gover-
nor Johnson to walk out of a conven-
tion dominated by the powers that be
to bring about conditions where a
Parcels Post could be established. It
is only a question of time till the
special stamp requirement will be
abolished, till the central station de-
livery will be abandoned and till the
zone system will be eliminated. The
Parcels Post is needed. The people are
moving and it will come in course of
time.

The question of raising enough
money to meet the expenses of the
State for the next two years is the
principal thing that confronts the
present legislature. And under the
present tax scheme the rates can be
equalized by the legislature or an ad-
ditional tax can be levied on private
property to provide additional revenue.
'Under the present schedule it seems
that the corporations are getting the
best of it.

"Figures made public by Governor
Johnson show that the ordinary tax-
payer, under the present taxation
scheme, pays \$1.1386 upon each \$100
actual value of his property. The
railroads and street railways, \$0.9092;
the gas and electric companies, \$0.75;
the telegraph and telephone com-
panies, \$0.9660; the car companies
(Pullman Company only), \$0.8813; the
express companies (Wells, Fargo &
Company only), \$1.5413.

These figures indicate as nearly as
figures can indicate anything that the
express company is paying a higher
proportionate tax than The People, and
all the other corporations a lower pro-
portionate tax.

If the corporations were paying
the same proportionate tax as The
People, there would be no threatened
deficit in the State Treasury."

By a two-thirds vote in each house
the rate of taxation on gross earnings
on the several classes of public service
corporations may be increased. The
obviously just method is to increase
the tax on these corporations and
equalize their share of the burden.

These corporations are now having
a hearing before the committees of the
legislature. When facts are known
and publicity is given to these meas-
ures it is very improbable that indirect
measures will be put through or unjust
taxes levied

With reference to the recall movement now in progress against Police Judge Weller the Fresno Republican has this to say in regard to

WOMEN VS. CRIMINALS.

The movement of the women of San Francisco to recall Police Judge Charles Weller introduces a new and revolutionary element into San Francisco politics.

Like the police judges of San Francisco have had to reckon, as a chief factor in their elections, with the underworld of the city—the criminals and the sympathizers with criminals. The underworld had a very large and compact block of organized votes, and these votes were very much interested in the question of police judges. The general body of the citizenship was very little interested. As against a scattered and indifferent majority a united and interested minority is usually invincible. A few exceptional men have been able to resist this combination, and San Francisco has always had some good police judges. But the majority of them have been and still are the products of the politics of the very criminals who come before them. This is a startling statement, but it is well within the bounds of literal and unexaggerated truth.

Now comes an organization of women and starts a petition to recall Judge Weller. His immediate offense is the reducing of the bail of a man held by Judge Shortall for criminal assault on a young girl. Judge Shortall has fixed the bail at \$3000, which the defendant could not raise. Judge Weller, knowing nothing about the case except the statement of the attorney who made the application, reduced the bail to \$1000, which the accused paid and skipped out. It turns out that even this \$1000 was the largest bail Judge Weller had ever exacted, in cases of this sort. His usual bail on charges of assault on girls, has been from \$50 to \$500, and in some apparently conclusive cases he had refused to hold the defendant at all. And he has not only fixed low bail himself (which the culprits when they knew the case was dangerous, forfeited) but has arbitrarily stepped in and reduced the higher bail fixed by other judges, when the cases first came before those other judges. The women think this is the sort of exercise of judicial discretion which ought to be appealed to the people instead of the Supreme Court, and they have taken steps to make that appeal. Judge Weller's defense is that his father was a Colonel in the Mexican war, that he is good to his family, and that it has been customary in San Francisco of one police judge to butt in and reduce the bail fixed by another.

The organized women in San Francisco have more votes than all the tenderloin can muster—probably more votes than the tenderloin and the saloons combined. They have also the means of publicity to arouse the votes of the decent men and the unorganized women. And if they can make the police judges of San Francisco more afraid of their political power than they are of that of the underworld, they will have worked the greatest revolution ever proposed, in the inner life of the metropolis.

Incidentally, this illustrates the sort of cases in which the recall of judges is going to be (and ought to be) applied.

Among the activities that are now occupying the attention of commerce and trade is the growing development of South American continent. For the Southern hemisphere has remained the last to be exploited in the history of the world. Only Australia has advanced to any comparative degree of modern development and that for two reasons. One that it was made a land of exile and a penal colony for Great Britain and another that it has been a large gold producing country since 1848, both reasons that brought population in considerable quantities.

South America on the other hand has remained comparatively undeveloped till recent years. Argentina has of recent years been assuming importance in the world's trade. Buenos Aires has come forward as one of the world's principal ports. And as a consequence the United States is awakening to the fact that in South America there is an important source of trade. The report of the Department of Commerce and Labor shows that our exports to South America in 1902 amounted to 38 million dollars while in 1912 they had increased to 138 million dollars.

South America needs many things of American manufacture. Farm implements, tools of agriculture, building material, such as hardware and finished work and all the equipment that a new country, rich in natural resources, can utilize. Attention from now on will be directed to the Southern continents. Climate's conditions in the southern hemisphere have long been an impediment to progress. But many parts of South America are as well adapted to agriculture and for the home of white men as any other part of the world. Trade with this continent is of ever increasing importance.

Tom Lawson's claim that the Stock Exchange is the cause of many of the ills that afflict us in the matter of high cost of living and the waste of money seems to find ample confirmation in the increase of securities that are daily offered to the public. According to reports no less than two billions of securities were issued by corporations in the United States last year. This is twice as much as the national debt at the close of the War of the Rebellion. And as these issues of securities meant a good deal of investment it follows a great deal of the money of every man went into these securities. This vast amount of evidence of indebtedness shows the importance of enactment of blue-sky laws for the protection of investors. The New York state Superintendent of Banking recommends that mortgage, loan and investment concerns be put under more complete supervision by the banking department. Such a supervision would be a good idea here. California is a peculiarly fertile field for the wild cat promoter and the flotation of stock schemes. It is a land of fortunes in mines, in oil, and in furms. The public should be protected against the fakers who exploit its possibilities in bubble schemes and deceive the unwary. The blue sky law has worked well other places. It ought to do equally well here.

Not content with the working of the present lien law which has worked so satisfactorily the Assemblymen and Senators from the South have introduced bills in both the Senate and the Assembly to amend the lien law which would in effect restore the old law and in fact make it more artificial and unsatisfactory than that indirect and artificial act. This movement has apparently assumed formidable proportions as the chairman of the judiciary committees in both houses are sponsors for the bills that have been introduced.

Builders and those interested in the building business should at once become active and see that the present law is not changed, at least not changed back to the old technical act where nobody knew where he stood and opened all kinds of avenue for fraud by the scoundrels that have dragged the building business into the mire.

It is time for everyone to get busy and see what is doing in this line and keep what you have gained. The banks and the title companies are always on the job. They are always seeking privileges and they get them principally because the other people are inactive. They are now seeking to put something over in the matter of this amendment to the lien law and it is high time that you talk to your Senator and Assemblyman about it.

The building record for the past twelve months in the city of New York shows more than twelve thousand permits to have been issued representing a total expenditure of more than \$207,000,000. This expenditure, of more than 17 millions per month, represents a growth in population of thousands of people. Were this expenditure made for dwellings for single families it would represent homes for more than 60,000 people. More than 30 million was expended during the year for office buildings so that aside from general construction the building record shows that business is expanding and more room is needed for the centralized business of the country.

The Continental Building & Loan Association is again in the public eye. Upon the advice of the Attorney-General the Building and Loan Commissioner has taken possession. He has found it difficult to get peace officers to aid him for the reason that Gavin McNab is the attorney for the Continental. Whatever may be the merits of the controversy it is certain that the Continental has no superior rights before the law simply because Gavin McNab happens to be its attorney. It is entirely probable that in any other case the Chief of Police would not have hesitated to give aid to the Building & Loan Commissioner on the advice of the Attorney-General.

If the books of the Continental show crooked bookkeeping the public should know it. McNab's statement that Walker is the associate of Marshall Black has nothing to do with the merits of the case. If the affairs of the concern are to be wound up and if it is the duty of the Building and Loan Commissioner to take charge until the matter is adjudicated then he should take charge no matter what political boss is in control.

The Science Of Sanitation And Hygiene Applied To Building Construction.

By George Fordyce, Architect, Calgary,
In Western Canada Contractor.

Sanitation is the science of sanitary conditions and of preserving health, synonymous with Hygiene. The word sanitation is, however, usually restricted to the methods and apparatus for making and maintaining houses in a healthy condition. It is by no means a modern science, traces of it having been found in the oldest remains of habitations and cities. In the prehistoric era, man, or, as we now call them, savages, lived in a natural state, i. e., without the aid of any elaborate devices for sheltering himself from the elements, and did not congregate together in large numbers. In conditions such as these, nature performed all the sanitation necessary, without scientific aid. When, however, man departed from the natural state and congregated together, forming habitations and cities, nature obviously could not cope with these unnatural conditions without the scientific aid of man. Thus sanitation became a necessity, nature still performing her work, but not without the aid of man. Amongst the ancients, the Romans brought sanitation to the highest degree of perfection as is shown by the remains of baths, aqueducts and sewers built by them, some of the latter being still in use, having been used continuously since being built over two thousand years ago.

Reverting back to the usual interpretation of the word sanitation, being the making and maintaining of the houses in a sanitary or healthy condition, the three main factors necessary to make and maintain houses in the above condition are ventilation, water supply and drainage.

Ventilation consists in supplying fresh pure air, warmed or cooled to a comfortable temperature, to drive out that which has become vitiated or used up. Ventilation may be broadly classified as natural or mechanical, the former being usually sufficient in private dwelling houses and other small buildings, the latter having to be resorted to in the case of large public buildings, factories, etc. Natural ventilation may be considered as that produced without mechanical power for the admission and escape of air. Buildings of ordinary construction receive some ventilation whenever the temperature inside is different from that of the surrounding air. Further ventilation is afforded by indirect or direct-indirect radiators, fire places, open windows, etc. Whenever air is introduced into a room as by indirect heating an equal amount of air must be driven out, or if the air is drawn from a room as by a fireplace or other hot-air flue an equal amount of air must enter the room, thus causing ventilation.

Mechanical ventilation, rendered necessary where a large number of people are congregated together in a comparatively small cubic space, requires power for the admission and expulsion of air. The power for moving air

is usually operated by a fan operated by mechanical means, and may be effectual in two ways, first by the Plenum system, in which air is forced into the room at the proper temperature, second by the vacuum system, in which the vitiated air is exhausted from the room. The amount of air required for ventilation varies according to the nature of the room ventilated; churches, theatres, etc., requiring about 2,500 cubic feet per sitting hour, hospitals requiring about 5,000 cubic feet per bed per hour, and factories, where dust is very prevalent, requiring a much larger amount. The velocity of air due to ventilation should not exceed five feet per second else a perceptible draught will be felt.

In order to preserve the health of the inhabitants of dwellings an ample supply of good water is essential both for drinking and cleansing purposes. In up-to-date cities a continuous supply of water at all hours is available. This elaborate system of water distribution was of humble origin, from distribution by water carriers from natural sources on to an intermittent supply by means of pipes to cisterns and so on to the present system of continuous supply. Where necessary, water is purified by being passed through filter beds, then conveyed to reservoirs, preferably covered ones, and from thence distributed to the various points by means of aqueducts and pipes. Materials used in the construction of reservoirs, aqueducts, cisterns and pipes ought to be of such a nature that there is no danger of the water being contaminated by contact therewith. The pipes used for the distribution of water throughout dwellings are usually of galvanized iron or lead, the latter being suitable in most cases except where the water is of such a nature that it is contaminated by contact with lead, causing lead poisoning to those who drink it. In such cases galvanized iron or tin-lined lead pipes may be used.

In the case of isolated buildings a private supply is necessary and where a well is dug or bored, great care ought to be taken that there is no danger of contamination of the water in the well owing to infiltration from drains or cesspools. Connections from supply pipes to baths, wash basins, etc., may be made direct, but in the case of connections to water closets, slop sinks, etc., intervention is necessary by means of small independent cisterns, rendered necessary both for flushing purposes and to remove the danger of contamination from soil in the basin. The amount of water necessary for household purposes is about twenty-five gallons per day for each person, varying to some extent owing to the climatic conditions of the country.

Drainage, or to make dry, is the drawing off of water by rivers or other channels, but in connection with dwelling houses is usually taken to mean

the method and apparatus for removing excreta and waste water.

All apparatus in connection with drainage ought to be constructed in as simple a manner as possible without destroying efficiency and should be as far as possible self-cleansing. All corners and crevices where dirt would have a tendency to collect ought, if possible, to be avoided, and where unavoidable, as in the case of traps, should be accessible for cleansing purposes. In no case should the waste or soil from fittings discharge into pipes or drains without the interception of a trap, which trap ought to have ample water seal, and, where there is any danger of it being siphoned, should be back-ventilated. All pipes and drains for carrying off the discharge from the various fittings should be constructed in such a manner that they can be thoroughly water and air flushed. In dwellings of ordinary size, the former is accomplished by the discharge, which is largely composed of water from the various fittings. In large buildings and city drainage systems it is in many cases, preferably automatic, at the extremity or extremities of the drainage system to accomplish flushing the drains.

A house drain before it enters a street drain or sewer is sometimes trapped near the sewer, and immediately on the side of the trap next the house is a fresh air inlet taken from near the ground level, and at the extremity or extremities of the drain pipe or pipes with open lids to be carried above all windows or other openings, thus providing a foul air outlet from the drains, and, in conjunction with the fresh air inlet, thoroughly air-flushing the drainage system. The system of connecting the sewer without a trap is preferable to above, provided fixtures are efficiently trapped. Where the ground is of a wet nature, provision should be made for draining same in the vicinity of dwellings, which is usually accomplished by means of open tile drains discharging into soil drain through a trap. It is also necessary so as to ensure the health of the inhabitants to prevent the rising and penetrating of water into walls by means of damp-proof courses and preferably to lay same over the whole area of the building. The sewage from cities and isolated buildings where it cannot be got rid of by being discharged into the sea or other large volume of water where there is no danger of pollution to same, ought to be treated by being passed through a vessel called a septic tank, where the sewage undergoes various natural processes of fermentation, putrefaction and purification and thereafter through filter beds, thus rendering the effluent harmless.

Sunlight being a great disinfectant and impartor of health, ample provision should be made for its admission to dwellings bedrooms especially ought to have a sunny aspect. In the perfect

city and dwellings from a sanitary point of view, disease could not be contracted by contamination or infection, but in a perfection is unattainable disease occurs and then sanitation comes into play to combat and suppress it.

Hospitals should, above all things, be thoroughly sanitary and constructed in such a manner that every part thereof can be thoroughly cleaned, all corners and crevices, where dirt and material of an infectious nature could accumulate to be avoided. Hospitals for infectious diseases should be isolated from all other dwellings, and the various infectious diseases isolated from each other, preferably by being treated in separate and isolated buildings.

In cities, there is a large amount of garbage and waste material which can not be discarded into sewers and must be got rid of by other means. In some cases there are places where rubbish is allowed to be deposited, this method of getting rid of it or rather of not getting rid of it is unsatisfactory, as an accumulation of garbage breeds disease in many forms. The most satisfactory way of dealing with garbage is by having it burned in a refuse destructor, or, as is done in some cases, by having it carried out to sea and deposited there. Sanitation in every way ought to be of vital interest to mankind, aiming as it does at the prevention of disease in every form. Not only does it promote bodily health but also mental health, which is the outcome of a healthy body.

WATERPROOFING CONCRETE ROOFS.

In an address before the Paint and Varnish Society of London, Robert Cathcart said:

Concrete, no matter in what mixture it is made, has a coefficient of expansion and contraction, and in roof work particular attention has to be paid to the placing of steel and its temperature stresses upon the surfaces. The question of protection of roofs in America, he said, is causing a great deal of trouble. The most efficient protection against moisture would be an application of sand and gravel. With regard to condensation on the inner side of the roof, engineers should embody in their specifications a certain thickness and should have a layer of clinker so as to provide insulation against expansion and contraction that might take place between the upper and lower surface. When speaking of acid treatments for exterior surfaces, he meant that the acid was used to remove the small film of mortar on the face so as to give a surface texture. The aggregate might be composed of white silica sand and small broken granite and sometimes felspar and carborundum, with occasionally broken brick or tiles or marble or gravel. In connection with the aggregate much could be planned ahead for the treatment of the surface.

With regard to "old-fashioned" methods, the soap of alum and grease might be a little more than ten years old, but had not been successful. The amount of sand matter applied to the voidage was so small in comparison with the vehicle used that it was not really homogeneous and there was not a uniform surface on which to coat. Linseed oil was unsuitable on concrete

on account of green concrete being austic. He had not heard of tannic acid rendering the cement nonporous.

SUGGESTIONS OF USE AND VALUE.

Noteworthy suggestions were made in an address delivered recently by President J. W. L. Corning, of the Minnesota State Association of Builders' Exchanges, who says:

"An era of specialized industries has developed a custom in building lines for material men to submit bids on their special lines to the general contractor upon which he in turn bases his general proposal.

"This custom has been of great value to the owner but has brought a train of evils that we believe could be eliminated to the benefit of the architects, contractors, sub-contractors and material men and result in bringing about a condition whereby the architect's ideals might be more fully carried out; the owner might receive what he thinks he bargained for, the contractor and material men might receive a rational and safe margin of profit; misunderstanding be lessened, and the product be a credit to all.

"In order that existing evils might be remedied and that the better conditions referred to be brought about, the Minnesota State Association of Builders' Exchanges appointed a committee of its members some time ago to confer with a committee from the Minnesota Chapter, American Institute of Architects. As a result of conferences of these committees and of a canvass of hundreds of operators and architects throughout the State and adjoining territory, the following suggestions for securing uniformity in plans and specifications have been compiled:

"First.—That specifications be indexed and divided into numbered paragraphs covering the various lines of materials entering into the construction of buildings, with sub-headings of the various parts, so that each material man or sub-contractor may find his special part of the building clearly defined under its own heading. To assist architects in getting results we have prepared a schedule, which we enclose, of headings and sub-headings, and recommend its general use:

"Second.—That floor plans or elevations be drawn at not less than $\frac{1}{4}$ -inch scale.

"Third.—That each set of plans have, when estimates are called for, scale drawings of interior fixtures, such as stairs, wainscotings, mantels, book cases, linen cupboards, kitchen and pantry fixtures, etc.

"Fourth.—That each set of plans have, when estimates are called for, at least one sheet of details drawn at not less than $\frac{1}{4}$ -inch scale, showing stone, metal, terra cotta, or wood cornice, barge work, frames, for all outside windows and transoms and for all partition sash and interior finish, cut some, etc.

"Sixth.—That the size of brick openings be marked on plans of elevations.

"Seventh.—That the kind of wood for each room be well defined in the specifications or on the floor plans.

"Eighth.—That the plans indicate the various parts that are brick, cement, stone, artificial stone, terra cotta, slate, marble, glass, metal, wood, etc.

"Ninth.—That piping plans distin-

guish heating, refrigerating and water pipes for covering.

"Tenth.—That finishing hardware be reserved for the owner to select and pay for.

"Eleventh.—That leaded and ornamental glass be reserved for the owner to select and pay for, or that the price per square foot be stated in the specifications.

"Twelfth.—That gas and electric fixtures be reserved for the owner to select and pay for.

"Thirteenth.—That specifications should not contain clause requiring contractors, at their own expense, to furnish labor or material not shown on plans or called for in specifications.

"Fourteenth.—That in order that further uniformity might prevail it is requested that the symbols prepared by the Standardization Committee of the Minneapolis Architectural Club and sent to the architects by that association, be generally used."

SAND FOUNDATIONS FOR HIGH BUILDINGS.

Sand, being almost incompressible under ordinary conditions, can sustain very heavy loads with slight or negligible compression. When it directly overlies rock or other thick hard stratum, and is securely confined or otherwise protected against possibility of lateral displacement, it forms a satisfactory foundation and will carry heavy loads with safety as long as these conditions are maintained. It transmits pressure laterally so that a heavy vertical load may produce considerable horizontal thrust, and to resist it the sand must be confined horizontally by natural or artificial means. At considerable depths below the surface the weight of the superincumbent material affords resistance to transverse or upward pressure, and is equivalent to lateral confinement for ordinary pressures. This resistance, of course, ceases whenever an excavation is made below and adjacent to the point of application of vertical pressure.

The presence of water makes a great difference in the character of the sand, so that the drainage of wet sand or the saturation of dry sand under pressure is an important matter, while flowing water passing through sand, especially if fine, is very likely to carry the grains with it or produce a considerable movement. Careful consideration must therefore be given to these factors when it is proposed to build heavy structures on sand foundations. If any chances in the amount of water in the sand are possible, adequate safeguards to maintain the conditions must be adopted. Many heavy buildings of moderate height, including some of the earlier steel cage skyscrapers, have foundations on sand, usually only a few feet below the surface, and these foundations in many instances have proved entirely reliable. Almost all of them are at or above ground water level. Formerly they were made with timber and masonry footings, then of concrete, and now almost entirely of reinforced concrete or of steel beams enclosed in concrete.

Some buildings have a monolithic foundation slab covering the entire area. While theoretically this distributes the load uniformly and produces the smallest unit pressure, it is gen-

erally very difficult and expensive to avoid excessive stresses in the distribution, and some such footings, especially those of concrete without adequate reinforcement, have become badly cracked and broken and have permitted serious settlement. It is therefore the general practice now to support the columns singly or in small groups on isolated separate footings, proportioned to reduce the loads to substantially the same unit pressure on all.

The Spreckels Building, San Francisco, 15 stories high, was built about fifteen years ago with all of its columns seated on a double grillage of continuous I-beams reaching entirely across the lot in both directions and embedded in a mass of concrete more than $4\frac{1}{2}$ feet thick, resting on wet sand 25 feet below the surface of the street. This has proved satisfactory, enduring severe earthquake shocks, which it was expected to resist.

The columns of the St. Paul Building, a 26-story structure in New York, have steel beam and girder grillage, with concrete footings on the wet sand about 30 feet below the street. The sand was loaded to 8,000 pounds per square foot, and in several years has settled only a fraction of an inch, and with such regularity that it has been unnecessary to adopt the special provisions designed for compensating irregular or excessive settlement.

In the new Municipal building, New York, part of the foundations are carried to solid rock and part supported on wet sand, nearly 90 feet below the surface. This building is 25 stories high and has a 15-story central tower rising to a height of 580 feet above the street. The pressure on the sand is 12,000 pounds per square foot, and this pressure was adopted after making preliminary and full-size pier tests which showed settlements of less than 3-16 and $\frac{1}{2}$ inch, respectively, under the working load. A large proportion of the ultimate load has now been applied and the sand foundations show slight settlement, not exceeding the amounts indicated by the tests. The rock foundations show settlements of about $\frac{1}{4}$ inch, attributed to adjustment of bearings. The settlements in both cases are so small that no injury to the superstructure is anticipated.

The foundations of the 34-story building in Cincinnati consist of steel grillages enclosed in concrete and imposing a load of 11,000 pounds per square foot on dry sand about 50 feet below the street. In this case the foundations carry an estimated total load of about 104,000,000 pounds and occupy about 70 per cent of the entire area of the building. No allowance whatever has been made for settlement, but it is expected that the full load may cause a packing of from $\frac{1}{4}$ inch to possibly $\frac{1}{2}$ inch.

The comparison of these foundations of sand with those carried through quicksand to deep rock is difficult, but it seems that the large saving effected by the former justified the very careful considerations of both types, and a study of rational and practical methods of protecting the sand. So far, reliance appears to have largely been placed on carrying the footings to a considerable depth rather than enclosing them with some protecting barrier that might in some cases prove simple and economical.—Engineering Record.

Firms desiring news on special classes of buildings such as Banks, Churches, Schools, Hotels, etc., will find such items all classified and grouped under proper headings, commencing on this page. These same items are again repeated under "LOCALITIES" in the last part of our news department.

—APARTMENT HOUSES—

SAN FRANCISCO—Apartment house, 3 story and base, frame, \$30,000. Architect, E. H. Denke, Humboldt Bank Bldg., S. F. Owner, Max Kolander. The building will be erected on a corner site and will cover a considerable ground area. Interior will be arranged for two and three room suites with wall beds and private baths. There will be steam heat. Bath rooms will be finished in tile. The interior will be finished in pine, redwood and some hardwoods. Iron fire escapes will be installed. The exterior of the building will be covered with shiplap and brick veneer. Plans are now being prepared.

SAN FRANCISCO—Apartment house, 3 story and base, frame, \$10,000. Architect, Charles J. Rousseau, Phelan Bldg., S. F. Owner, Louis D. Stoff. The building will be arranged for six apartments designed on the apartment flat style. All suites will have private baths and wall beds. Interior finish will be of pine, redwood and elm. Bath rooms will be finished in tile. There will be steam heat and a hot water heating system. The exterior of the building will be covered with cement plaster and figures are being taken.

SAN FRANCISCO—Apartment house, 3 story and base, frame, \$10,000. Architect, J. C. Kincannon, 1179 Hayes St., S. F. Owners, Metropolis Investment Co. The building will have a frontage of 28 feet and a depth of 87 feet. The interior has been arranged for six apartment flats of four rooms and bath each. Interior finish will be of pine, redwood and some elm. Wall beds will be used throughout. There will be a central heating system and hot water heaters. Bath rooms will be finished in tile. The exterior of the building will be covered with cement plaster on metal lath. Plans are complete and the work will be done by Day Labor.

OAKLAND, CAL.—Apartment house, 2 story and base, frame, \$1,500. Architect, A. W. Smith, 1010 Broadway. Oakland. Owner, B. D. Phillips. The building will contain four three-room suites with bath. Interior finish will be of pine and redwood. Wall beds will be used throughout. Hot water heaters will be installed. The exterior of the building will be covered with shiplap. Plans are complete and figures are being taken.

PORTLAND, ORE.—Apartment house, 3 story and base, reinforced concrete, \$20,000. Architects, Butterworth and Stephenson Co., Portland. Owners, Butterworth and Stephenson Co. According to the present plan the building will contain 22 apartments, of which 18 will consist of three rooms with private bath and the remainder will be two-room suites. It is the intention of the owners to equip the building with disappearing beds, built in refrigerators and oil burning steam heating plant. Each suite will have private telephone connection, a gas range and complete plumbing fixtures. Provision is also made for installing

a vacuum cleaning plant. The exterior will be plain with but little ornamentation, and the interior is arranged so that all rooms have outside light and ventilation. Separate bids are wanted for the heating, piping, plumbing, tile work and wiring contracts only.

PORTLAND, ORE.—Apartment house, 2 story and base, brick, \$25,000. Architect, C. A. Duke, Falling Bldg., Portland. Owner, Edward Kleist. The building will cover an area of 100x100 feet. The first floor will be arranged for seven retail stores and the upper floor will contain six suites of four rooms each and a number of offices. There will be patent store fronts. Interior finish will be of pine. A central heating system will be installed. The exterior of the building will be faced with pressed brick. Plans for this work are being prepared.

SAN FRANCISCO—Apartment house, 3 story and base, frame, \$20,000. Architect, Henry C. Smith, Humboldt Bank Bldg., S. F. Owner, Mr. Hunter. The building will be erected on Washington St., near Taylor, and is to contain a number of two and three room suites with wall beds and private bath rooms. Interior finish will be of pine and redwood with some elm veneer. There will be a central heating system and a hot water plant. Vacuum cleaning will also be installed. The exterior of the building will be covered with brick veneer and cement plaster. Plans are nearly ready for figures.

LONG BEACH, LOS ANGELES CO., CAL.—Apartment house, 3 story and base, frame, \$20,000. Architects, Metcalf & Davies, Long Beach Bank Bldg., Long Beach. Owner, W. E. Babb. The building will be 42x70 feet and will be arranged to contain 36 rooms, which will be divided in 14 suites of two and three rooms each. All suites will have connecting baths and wall beds. Some hardwood floors will be used. A central heating system will be installed. The exterior of the building will be covered with cement plaster on metal lath. Provision is made for a garage in the rear of the lot. Plans are complete and the work will be done by Day Labor.

SAN PEDRO, LOS ANGELES CO., CAL.—Apartment house, 3 story and base, frame, \$16,000. Architect, none. Owner, William Crocker, San Pedro. The building is to contain 34 rooms, which will be arranged in 23 suites of two and three rooms each. The building will cover an area of 40x110 feet. Interior finish will be of pine, redwood and some hardwood. A central heating system will be installed. All suites will be equipped with wall beds. Private bath rooms will be arranged for each apartment. The exterior of the building will be covered with rustic. Plans are complete and the work will be done by Day Labor.

PASADENA, LOS ANGELES CO., CAL.—Apartment house, 3 story and base, brick, \$50,000. Architect, A. L. Reed, 276 West Ocean Ave., Long Beach. Owner, Mrs. Edwin Grebel. The building will cover an area of 94x142 feet and is to be arranged for 12 suites of three rooms, 40 suites of two rooms

Law and Bankruptcy Cases

Telephone Kearny 2622

615 Phelan Building, San Francisco

Contracts Awarded.

LOS ANGELES, CAL.—Apartment house, 3 story and base brick, \$25,000. Architect not given. Owner, O. Wilson. Contract for George M. 150-ton, Los Angeles Investment Bldg., L. A. Contract price \$71,250.

BANKS

KINGSBURG, FRESNO CO., CAL.—Bank, 1 story and base, brick. Cost not stated. Architect, Eugene Mathewson, Fresno. Owners, First National Bank of Kingsburg. The preliminary plans for this building show a structure in the classic style with a large public space and general office, besides a private office for the president and a directors' room. Interior will be finished in hardwood, tile and ornamental iron and bronze. There will be special coin vaults. The exterior of the building will probably be faced with pressed brick. Plans are being prepared.

PASADENA, LOS ANGELES CO., CAL.—Bank and offices, 1 story and base, Class A construction, \$100,000. Architect, C. F. Whittlesey, Haight and Clayton Sts., S. F. Owners, Citizens' Savings Bank of Pasadena. The one-story building now on the site was designed to carry six additional stories, and the original plans will be followed as closely as possible. Construction will be of reinforced concrete and absolutely fireproof throughout. The owners will probably select a local architect to make certain revisions in the plans and to superintend the work. Complete information is not available at this time.

BRIDGES, DAMS AND HARBOR WORK.

SAN FRANCISCO—Wharf construction, reinforced concrete, \$300,000. Engineer, Assistant State Engineer Newman, Ferry Bldg., S. F. Owners, State of California. Plans have been completed and approved for the construction of Pier No. 39, which will be erected adjoining Pier No. 37. Construction will be similar to that used by the Government at the Army Transport Docks at Port Mason. Bids will be received by the State Board of Harbor Commissioners, Ferry Bldg., S. F., on February 6th. Complete plans and specifications can be secured from Engineer Newman. The official proposal appears in another column of this issue.

SAN FRANCISCO—Wharf construction, reinforced concrete, \$500,000. Engineer, Assistant State Engineer Newman, Ferry Bldg., S. F. Owners, State of California. Plans have been approved by the State Board of Control for the construction of Pier No. 41, and also for two ferry freight slips which are to be erected adjoining Pier No. 41. The pier will 1010 feet long and 200 feet wide, of the reinforced concrete type. Freight slips will be constructed of creosoted wooden piles and are estimated to cost \$200,000. Pier No. 41 will cost \$500,000. Bids will be called for within the next week or ten days for this work.

SAN FRANCISCO—Wharf construction, reinforced concrete, \$500,000. Engineer, Assistant State Engineer Newman, Ferry Bldg., S. F. Owners, State of California. Bids for the construction

tion of Pier No. 37 were opened at Thursday's session of the State Board of Harbor Commissioners and show the Thompson Bridge Co. low at \$475,200. For a complete list of the figures presented see under San Francisco in this issue.

MARTINEZ, CONTRA COSTA CO., CAL.—Wharf construction, wooden pile, \$23,000. Engineer, J. C. Arnold. Gazette Bldg., Martinez. Owners, Town of Martinez. Additional information relative to this project has been received from Engineer J. C. Arnold. The wharf and approach will be of wooden pile construction. The wharf proper will be 150x50 feet. The approach 30x1300 feet. There will be four pile units 20 feet on centers. Plans have received the approval of the Town Trustees.

JELLY FORD, TEHAMA CO., CAL.—Bridge, steel and concrete. Cost not stated. Engineer, County Surveyor W. F. Luning, Red Bluff. Owners, Tehama County. County Surveyor Luning informs us that while his office has been instructed to prepare plans for a highway bridge over the Sacramento River at this point, that the recent high water has made it impossible to get soundings and complete the survey. As soon as this work can be completed plans will be drawn and complete information will then be published.

DYERVILLE, HUMBOLDT CO., CAL.—Bridge, steel and concrete, \$25,000. Engineer, County Surveyor George W. Conners, Eureka. Owners, Humboldt County. Plans and specifications have been approved for a steel and concrete highway bridge over the South Fork of the Eel River and bids will be called for shortly. Plans provide for a structure 300 feet long and having a roadway 21 feet wide. Complete information can be secured from the County Surveyor at Eureka.

Contracts Awarded.

PORT ANGELES, WASH.—Bridge, steel and concrete, \$50,000. Engineer's name not given. Owners, Clallam County. Contractors, International Contracting Co., Central Bldg., Seattle. Contract price, \$50,000.

BELLINGHAM, WASH.—Dock and warehouse, frame construction, wooden piles. Architects, Blackwell & Baker, Northern Bank Bldg., Seattle. Owners, Inland Navigation Co. Contractor, A. J. Risse, Bellingham. Contract price, \$35,000.

CHURCHES.

CROWS LANDING, STANISLAUS CO., CAL.—Church, 1 story, frame construction, \$10,500. Architect, John J. Foley, Monadnock Bldg., S. F. Owners, Roman Catholic Church. The building is to be designed in the Spanish Colonial style with the exterior faced with cement plaster. Roof will be covered with red metal tile. Interior will be finished in pine and ornamental plaster. The main auditorium will have a seating capacity of 350 people. The architect is now completing the working drawings.

LONG BEACH, LOS ANGELES CO., CAL.—Church, 1 story and base, reinforced concrete. Cost not stated. Architect, Elmer Grey, Wright and Callender Bldg., L. A. Owners, First Church of Christ Scientist. The structure will cover a ground area of 90x110 feet, and will be arranged for a

and 12 one-room apartments. All suites will have wall beds and connecting outfits. There will be steam heat, elevator service and a vacuum cleaning system. Interior will be finished in pine, redwood and hardwoods. Considerable tile will be used in the lobby and entrance vestibule. Bath rooms will have composition floors. The exterior of the building will be faced with pressed brick. Plans are being prepared.

GLENDALE, LOS ANGELES CO., CAL.—Apartment house, 2 story and base, brick, \$20,000. Architects, Pacific Home Builders, 331 So. Hill St., L. A. Owners, Pacific Home Builders. The building will cover an area of 100x60 feet. The first floor will contain four stores and the second floor four apartments of five rooms and bath each. All interior finish will be of pine or redwood. A hot water plant will be installed. All suites will have wall beds and private bath rooms. The exterior of the building will be faced with pressed brick. Plans are complete and the work will be done by Day Labor.

LOS ANGELES, CAL.—Apartment house, 4 story and base, brick. Cost not stated. Architect, C. C. Rittenhouse, Wilcox Bldg., L. A. Owner's name withheld. The structure will cover a ground area of 50x170 feet, and will be arranged for 120 rooms, divided into two and three room suites. There will also be a large lobby, parlors and amusement room. All suites will have wall beds, private baths and separate entrances. Interior finish will be of pine and hardwood. Bath rooms will be finished in tile and will have composition floors. There will be steam heat, elevator service and a vacuum cleaning system. The exterior of the house will be faced with pressed brick. Plans are being prepared.

SEATTLE, WASH.—Apartment house, 5 story and base, reinforced concrete, \$475,000. Architect, W. P. White, Walker Bldg., Seattle. Owner's name withheld. This building will cover an area of 100x100 feet. The interior of the building is to be arranged for large apartments of from five to eight rooms each. There will be 25 suites. Interior finish will be of pine and hardwoods. All baths will be wainscoted with tile and will have composition flooring. Plans provide for steam heat, elevator service and a vacuum cleaning system. Construction will be fireproof throughout. The exterior of the building will be faced with white glazed terra cotta. Plans will be complete and ready for figures within the next thirty days.

large auditorium on the first floor and Sunday School rooms in the basement. All of the basement except two feet will be above ground. Construction will be of reinforced concrete with reinforced concrete floor slabs, steel roof trusses and a clay tile roof. Interior will be finished in pine and hardwoods. There will be a central heating system and a vacuum cleaning plant. Art glass will be used in the windows. The exterior will be faced with cement plaster. Plans are complete and figures are being taken for the various parts of the work.

LOS ANGELES, CAL.—Church, 1 story and base, stone and concrete, \$20,000. Architect, R. M. Taylor, Douglas Bldg., L. A. Owners, Church of Jesus Christ. This work has been mentioned here before. The foundation work is complete and plans for the superstructure will be completed in a day or two. The exterior will be faced with Utah sandstone. Interior will be finished in pine and hardwoods. A central heating system is to be installed. Work will be carried on by Day Labor under the superintendence of Samuel Daley.

COLTON, SAN BERNARDINO CO., CAL.—Church, 1 story and base, brick, \$10,000. Architect, Norman F. Marsh, Broadway Central Bldg., L. A. Owners, Jewel Memorial M. E. Church. Plans are being prepared for a much larger church, but only a portion of the structure will be erected this year. Construction will be of brick with the exterior faced with pressed brick. Interior finish will be of pine. The sum of \$10,000 is available for construction at once. Plans will be completed as rapidly as possible.

SEATTLE, WASH.—Church, 2 story and base, brick and concrete, \$40,000. Architect, B. Marcus Pretica, Empire Bldg., Seattle. Owners, Jewish Synagogue. Working drawings for this building are complete and specifications are being written. The building will be faced with white glazed brick. Interior finish will be of mahogany. Dome will be shingled with copper shingles. There will be a central heating system. Bids will be called for within a few days.

COURT HOUSES.

BOISE, IDAHO—Capitol buildings, \$700,000. Architect's name not given. Owners, State of Idaho. The legislature will shortly act on appropriation of \$700,000 for completing the State Capitol buildings at Boise. It is understood that the measure is very favorably thought of and that no opposition will be raised.

SEATTLE, WASH.—County Court house and city hall, 7 story and base, Class A construction, \$1,000,000. Architect, A. Warren Gould, American Bank Bldg., Seattle. Owners, City of Seattle and King County. Bonds to the amount of \$950,000 have been sold by the county and the architect reports that plans will be ready for figures by the middle of February. The structure is to cover an area of 240x240 feet, and will have a complete steel frame, reinforced exterior walls and pressed brick facing. The Chamber of Commerce has had the plans experted and placed an estimate of \$1,700,000 on the cost of the building.

FACTORIES & WAREHOUSES.

SAN FRANCISCO—Factory, 1 story, galvanized iron, \$5,000. Architect, B. V. Woods, 331 27th Ave., S. F. Owners, Clinton Fireproofing Co., 211 Mutual Bank Bldg., S. F. This building is to be erected as a shop warehouse and yard, and will be located on Townsend near Stanford. There will be a concrete foundation and exterior walls of galvanized iron. Construction will be carried on by Day Labor.

LOS ANGELES, CAL.—Warehouse, 2 story and base, Class A construction. Cost not stated. Architects, Hudson & Munsell, Stimson Bldg., L. A. Owners, John A. Roehling Sons Co. The building will cover a ground area of 25,000 square feet. There will be a complete steel frame, brick walls, faced with blue pressed brick. Floors throughout will be of reinforced concrete. Metal window sash and frames and fireproof doors will be used. There will be three elevators. The front portion of the building will contain the general offices of the company and will be finished in oak. Plans are complete and figures are being taken on the work.

Contracts Awarded.

SACRAMENTO, CAL.—Factory, group of concrete buildings. Cost not stated. Architect's name not given. Owners, Libby, McNeil & Libby. Contractors, Thomas H. Day's Son, Monadnock Bldg., S. F. Contract price not stated. Note: It is understood that the owners will expend in the neighborhood of \$185,000 on a plant.

FIRE HOUSES.

Contracts Awarded.

OAKLAND, CAL.—Fire house, 1 story and base, frame, \$5,000. Architect, City Architect J. J. Donovan, Security Bank Bldg., Oakland. Owners, City of Oakland. Contractors, Tislian Bros., Oakland. Contract price, \$4,268. For a complete list of these figures see under Oakland and Alameda County in this issue.

BAKERSFIELD, KERN CO., CAL.—Fire houses, 2, 1 story and base, frame, \$10,000. Architect, O. L. Clarke, Brower Bldg., Bakersfield. Owners, City of Bakersfield. Contractor, M. T. Kean, Bakersfield. Contract price, \$10,700. Other bids presented were, D. A. Evans, \$12,696; Brown & Paynter, \$14,875, and Geo. M. Kilkinson, \$11,800.

FLATS.

SAN FRANCISCO—Flats, 2 story and base, frame, \$3,000. Architect, none. Owner, Thomas M. Jones, 37 Guerrero St., S. F. The building will cover an area of 25x37 feet and is arranged to contain two modern flats of five and six rooms. Interior finish will be of pine throughout. Some oak flooring will be used. There will be gas grates and tile mantels. The exterior of the building will be covered with rustic and cement plaster on metal lath. Plans are complete and in the hands of the owner who will do the work by Day Labor.

GARAGES.

SAN FRANCISCO—Garage, 1 story and base, brick and steel. Cost not stated. Architect, Henry C. Smith,

Humboldt Bank Bldg., S. F. Owner, Mr. McCrae. The building will be erected on Golden Gate avenue near Larkin street. The interior is to be arranged for the automobile business. Floors will be of cement. Offices will occupy the front portion of the structure and repair room and shipping departments the balance. Interior finish will be of pine and hardwood. Tile will also be used to a considerable extent. The exterior of the building will be faced with pressed brick. Patent store fronts are to be specified.

SAN FRANCISCO—Garage, 1 story and base, Class A construction, \$30,000. Architects, Fabre & Bearwald, Western Metropolis Bank Bldg., S. F. Owner, Henry Ohlandt, Jr. The building is to be erected at the southwest corner of Grove and Frederick streets, and will cover a considerable ground area. There will be some steel, brick exterior walls, faced with pressed brick, and concrete floors. Special storage tanks will be installed for gasoline. A completely equipped machine shop will occupy a part of the building, the balance of the space being given over to storage room. Plans are now being prepared.

LOS ANGELES, CAL.—Garage, 1 story and base, brick. Cost not stated. Architects, Austin & Pennell, Wright and Callender Bldg., L. A. Owner, Nathan Blanchard. The building will cover a ground area of 50x170 feet and is to be designed for a commercial garage. The floor will be of cement. There will be metal window frames and sash and fireproof doors. Some structural steel will be used. The exterior of the building will be faced with pressed brick. Plans are nearly complete and figures will be called for shortly.

GOVERNMENT WORK AND SUPPLIES.

Hospital, Puget Sound.

Bids are to be opened February 21 at the bureau of yards and docks, Navy Department, for the construction of hospital buildings at the Puget Sound Naval Station, Washington. Four one-story buildings are required, being one administration building with attic, two wards, and one boiler house, all to be complete with plumbing, water, steam, and electric systems in place. The buildings are to be of frame construction on brick or concrete foundations; outside walls provided with rustic siding and inside walls covered with composition boards; roofs to be covered with rubberoid or equivalent; buildings are to be heated by steam and lighted by electricity. General dimensions as follows: Wards, 71x23 feet; wings, 8x15 feet; administration buildings, 24x38 feet; boiler house 24x24 feet.

Goat Island, Lumber.

The Lighthouse Inspector, 18th district, San Francisco, Cal., opened the following bids for furnishing certain lumber to be used in making repairs to wharf at Goat Island lighthouse depot: Loop Lumber Co., \$1,320.70; accepted. Portland Lumber Co., \$1,459.60. Olson-Mahoney Lumber Co., \$1,380.70.

Pearl Harbor, H. T., Magazine Building.

The contract for the construction of five magazine buildings at the U. S. naval station, Pearl Harbor, H. T., has

been awarded to the Lord-Young Engineering Co., Honolulu, H. T., at \$79,600.

Water for Reclamation Work.

The Secretary of the Interior has approved a contract with the Kittitas reclamation district of Washington for furnishing water stored in Yakima lakes by the Government upon a basis of payment of \$882,000, with a readjustment of cost in case the total cost of the storage system shall be ascertained to require a greater payment by the district on the basis of acre-foot storage to be delivered under the contract.

More Island, Cal., Magazine Building.

The following bids were received by the chief, bureau of yards and docks, Navy Department, Washington, D. C., for the construction of one steel frame corrugated steel-covered magazine building at the Mare Island navy yard, Cal.:

Item 1, building complete; 2, price per bay to be added to or deducted from Item 1 should Government decide to extend or reduce the length of the building by one or more bays.

Gutleben Bros., 907 Monadnock Building, San Francisco, Cal., Item 1, \$8,450; 2, \$800.

Penn Bridge Co., Washington, D. C., Item 1, \$9,740; 2, \$1,080.

Judson Mfg. Co., 819 Folsom street, San Francisco, Cal., Item 1, \$8,990; 2, \$927.

W. N. Concannon Co., Monadnock Building, San Francisco, Cal., item 1, \$9,366; 2, \$1,100.

Grant Fee, 2140 16th street, San Francisco, Cal., Item 1, \$9,250; 2, \$950.

Pringle, Dunn & Co., 338 Pine street, San Francisco, Cal., Item 1, \$10,349; 2, \$1,400.

B. F. Owsley, 1141 Phelan Building, San Francisco, Cal., item 1, \$9,893.

HALLS AND SOCIETY BUILDINGS.

ALAMEDA, ALAMEDA CO., CAL.—Yacht Club alterations, frame construction, \$3,000. Architects, William H. Crim, Jr., and Hamilton Murdoch, associated, 425 Kearny St., S. F. Owners, Encinal Yacht Club. This work will include the construction of additional boat room space on the first floor and a number of porches. The main assembly hall will also be considerably enlarged. Trim throughout will be of pine. There will be new plastering, electric work, plumbing and painting. Plans are now out for figures.

OAKLAND, CAL.—Baseball bleachers, frame construction, \$150,000. Architect, Walter J. Matthews, 927 Broadway, Oakland. Owners, Oakland Baseball Park Co. Plans are complete and now out for figures for a new baseball park in Oakland. The ground space to be covered by the bleachers is 19208 70 feet. Bleachers will be 70 feet high. It is estimated that over one million feet of lumber will be required.

LOS ANGELES, CAL.—Lodge hall, 4 story and base, Class B construction, \$75,000. Architect, Albert C. Martin, Higgins Bldg., L. A. Owners, Knights of Columbus. The sketches which have been adopted provide for a four-story and basement building of Class B construction, 62½x160 feet. The first and second stories will be devoted to the

auditorium which will have a stage, gallery, lounging rooms, lobby, etc. The third story will contain the main lodge room, ante rooms, smoking rooms, kitchen and store rooms and living quarters for the employees will be in the fourth story. There will be hand ball courts on the roof. The basement will contain the gymnasium, locker rooms, swimming pool and heating plant. The exterior will probably be faced with terra cotta. Working drawings will be completed at once.

FRESNO, FRESNO CO., CAL.—Convention hall, brick and concrete construction, \$45,000. Architect, C. K. Kirby, Jr., Fresno. Owners, City of Fresno. All bids recently asked for for the finishing construction of this building have been rejected and new bids will be called for at once. The amount of \$45,000 is available for the work. Complete information can be secured from Architect Kirby.

TAPT, KERN CO., CAL.—Lodge hall, 2 story and base, brick, \$20,000. Architect's name not given. Owners, Odd Fellows Building Committee. Preliminary sketches show a building containing two stores on the first floor and a large lodge hall and offices on the second floor. Interior finish will be of pine and redwood. The exterior of the building will be faced with pressed brick. Plans will be out for figures shortly. Additional information will appear in an early issue of this publication.

Contracts Awarded.

SAN FRANCISCO.—Subtreasury, 2 story and base, Class A construction, \$384,300. Architect, Milton J. Dyer, Cleveland, Ohio. Owners, United States Government. Contractor, Grant Fee, Monadnock Bldg., S. F. Contract price, \$384,300. Note: The report current in building circles for the last two weeks to the effect that new figures were to be called for on the construction of this building are without foundation, as the Treasury Department has authorized the award of contract to Grant Fee, the lowest bidder.

HOSPITALS.

OAKLAND, CAL.—Hospital, frame construction, \$10,000. Architect, Chester H. Miller, Foxcroft Bldg., S. F. Owners, Society for the Prevention of Cruelty to Animals. These buildings will be known as the Animal Home and will all be of frame construction. There will be a keeper's cottage, ambulance house, large barn, with accommodations for eight head of horses, box stalls, wire runs for dogs and cats, large dog house and three corrals for horses and cows. Work will be started as soon as the weather permits. The work will be done by Day Labor.

HOTELS.

SAN FRANCISCO.—Hotel and store, 3 story and base, frame, \$10,000. Architect, John F. Haner, 3579 19th St., S. F. Owner's name withheld. The building will be erected on Lombard near Lyon street. The first floor will contain a store. Basement is to be arranged for a billiard hall and the two upper floors will contain 18 single rooms. Interior finish will be of pine and redwood throughout. All rooms will be supplied with running water. The exterior of the building will be

covered with rustic and shiplap. Plans are being prepared and figures will be called for shortly.

SAN FRANCISCO.—Hotel, 7 story and base, Class C construction, \$125,000. Architects, Smith & Stewart, 244 Kearny St., S. F. Owner, A. O. Stewart. The building will be erected in the north line of Ellis street, 87½ feet east of Mason. The property is regarded as one of the most choice sites remaining vacant. The building will be designed for a high class hotel with all modern conveniences, including steam heat, elevator service, vacuum cleaning system and hot and cold running water. The exterior will probably be faced with pressed brick. Plans are being prepared.

SAN FRANCISCO.—Hotel alterations, brick and steel construction. Cost not stated. Architect, none. Owner, A. Nestori, 516 Pacific St. The work includes the construction of an additional story and considerable concrete work. There will be new plastering, electric work, painting and plumbing. The exterior of the new portion of the building will be faced with cement plaster. Plans are complete and the work will be done by Day Labor.

SAN FRANCISCO.—Hotel, 7 story and base, Class B construction, \$90,000. Architect, John F. Haner, 3579 19th St., S. F. Owners, Sacramento capital. The building will be erected on lower Market street near Second and will cover an area of 50x88 feet. There will be two stores besides the hotel entrance on the first floor. Upper floors will be arranged for 80 rooms, several baths and a large dining room. Interior finish will be of pine and hardwoods. There will be steam heat, elevator service and a vacuum cleaning system. The exterior of the building will be faced with pressed brick. Plans are now being prepared and figures will be called for shortly.

LOS ANGELES, CAL.—Hotel, 3 story and base, brick, \$45,000. Architect, none. Owners, California Real Estate and Building Co., 631 South Spring St., L. A. The building will be erected at the corner of 6th and Ceres streets, and will cover an area of 75x100 feet. There will be one store besides the main hotel office and lobby on the first floor. Upper floors will be divided into 70 guest rooms and 18 baths. There will be steam heat, elevator service and a hot water heating plant. The interior of the building will be finished in pine and redwood with some oak and ornamental plaster used in the lobby. The exterior will be faced with pressed brick. The owners con-

struct all of their own buildings, but will be in the market shortly for the various materials.

LOS ANGELES, CAL.—Hotel and store, 2 story and base, brick. Cost not stated. Architects, Austin & Pennell, Wright and Callender Bldg., L. A. Owner, Walter J. Fisher. The building will be 32x93 feet. There will be stores on the first floor and 12 guest rooms on the second floor. The building will connect with a structure at the corner of Grand street, and the rooming house will be conducted by the same management. Interior finish will be of pine. The exterior will be faced with pressed brick. Plans are being prepared.

YOSEMITE VALLEY, CAL.—Hotel, 2 or 3 story and base, stone and steel construction, \$250,000. Architect, Myron Hunt, Hibernian Bldg., L. A., associated with Engineer Pierre Zucco, Mechanics' Institute Bldg., S. F. Owner, Frank A. Miller. Mr. Miller, who is proprietor of the Glenwood Mission Inn at Riverside is negotiating with the United States Government for a long term lease on property in the Yosemite Valley on which he will construct a magnificent tourist hotel. Mr. Miller's plans also contemplate the construction of a \$75,000 hotel at Glacier Point. He and his architect and engineer are now in the Yosemite Valley and on their return details of the building will be obtainable.

SAN DIEGO, CAL.—Hotel, 4 story and base, brick and steel, \$200,000. Architect, W. S. Hebbard, Grant Bldg., San Diego. Owner's name withheld. Plans for this building, which are now out for figures, show a structure covering a large ground area and arranged for stores and an arcade on the first floor. Upper floors will contain a large number of guest rooms. Construction will be fireproof. A contract will be awarded for the work by the first of February.

PASADENA, LOS ANGELES CO., CAL.—Hotel addition, 2 story, reinforced concrete. Cost not stated. Architect, Myron Hunt Hibernian Bldg., L. A. Owner, Wentworth Hotel Co. The two additional stories will add 150 guest rooms to the hotel. All rooms will have connecting baths. Construction will be entirely of reinforced concrete. The exterior of the building will be faced with cement plaster. A clay tile roof is specified. Bids are now being taken for the general construction, roof tile, plumbing, steam heating, electric work and bath room tile.

PORTLAND, ORE.—Hotel, 3 story and base, brick and steel, \$10,000. Architects, Bennet & Hendricks, Henry Bldg., Portland. Owner, Otto W. Nelson. The building is to be 50x90 feet, and is arranged for five stories besides the hotel lobby on the first floor and a total of 41 guest rooms and 10 baths on the upper floors. There will be steam heat and running water in all rooms. The exterior of the building will be faced with pressed brick. Interior finish will be of pine throughout. Patent store fronts are specified. Plans for the work are now being completed.

Contracts Awarded.

OAKLAND, CAL.—Hotel, 7 story and base, brick and steel, \$89,000. Architect, Clay N. Burrell, Albany Bldg., Oakland. Engineer, W. W. Breite, Clunie Bldg., S. F. Owners, Purst

Bros. Contractor, F. A. Muller. Contract price, \$80,000. Note: This building will cover an area of 40x100 feet.

—LIBRARIES—

SEATTLE, WASH.—Library, 2 story and base, brick, \$35,000. Architect, W. Mariny Somervell, Waite Bldg., Seattle. Owners City of Seattle. The building, which has been mentioned here before, will contain an auditorium in the basement, two main reading rooms on the first and second floors and the stack rooms and librarian's office. There will be a central heating system. Interior finish will be of hardwoods and metal. Metal shelving will be used. The exterior of the building will be faced with pressed brick and terra cotta. Plans are complete and bids will be opened on February 3rd. Plans can be secured from the architect, J. T. Jennings is Secretary of the Seattle Public Library Committee.

—POST OFFICES—

GRAND JUNCTION, COLO.—Post office, 2 story and base, fireproof construction. Cost not stated. Architect, Oscar Wenderoth, Washington, D. C. Owners, United States Government. The building will cover a ground area of approximately 5,700 square feet, and will contain the usual rooms and departments. Construction will be fireproof except ceiling and roof. The exterior of the building will be faced with stone. Roof will be of tin. Plans are complete and figures are being taken for the construction, complete, including the heating, plumbing, electric conduits and lighting fixtures. Bids will be opened on March 5th at Washington, D. C. Plans and specifications can be secured from the architect.

RAILROAD CONST., STATIONS AND EQUIPMENT.

PORTLAND, ORE.—Union station. Class A construction, \$3,000,000. Architects, Emil Schacht & Son, Commonwealth Bldg., Portland. Owners, Hill and Harriman interests. A report from Portland states that the above mentioned architects have been commissioned to prepare plans for a union station. The report cannot be verified in this city, and no details of the proposed structure are obtainable.

RESIDENCES.

SAN FRANCISCO—Residence, 1 story and base, frame, \$2,000. Architect, J. M. Ceary, 23rd and Folsom Sts., S. F. Owner, Louis Fortney. The dwelling will contain six rooms and bath. Interior finish will be of pine, Hungarian ash and oak. Oak floors will be used in the living and dining rooms. There will be open fire places and brick or tile mantels. Tile will be used in the kitchen and bath room. The exterior of the house will be covered with shingles. Plans are complete and the work will be done by Day Labor.

SAN FRANCISCO—Residences, 2, 2 story and base, frame, \$3,000 each. Architect, none. Owner, Thomas Hamill, 17th Avenue and California street, S. F. The e house will each contain six rooms and bath. Interior finish will be of pine, redwood and some hard-

wood. Oak floors will be used in the principal rooms. There will be open fire places in the living rooms with tile and brick mantels. Bath rooms and kitchens will have tile wainscot. The exteriors will be covered with rustic, shingles and cement plaster on metal lath. Plans are in the hands of the owner and the work will be done by Day Labor.

SAN FRANCISCO—Residences, 1 1/2 and 2 story and base, frame, \$2,000 each. Architect, none. Owners, Oscar Heyman and Bros., 742 Market St., S. F. These houses will contain from five to six rooms each. Interiors will be finished in pine and redwood throughout. Some hardwood flooring will be used. There will be open fire places and tile or brick mantels. Tile will be used in the baths and kitchens. The exteriors will be covered with rustic, shingles or shiplap. Plans are in the hands of the owners and the work will be done by Day Labor.

OAKLAND, CAL.—Bungalows, 2, 1 story and base, frame, \$2,000 each. Architect, Ivan C. Satterlee, 470 13th St., Oakland. Owner, C. M. MacGregor. Each of these dwellings has been designed to contain five rooms and bath. All interior finish will be of pine or redwood. Hardwood floors will be used in the living and dining rooms. There will be large open fire places with attractive tile or brick mantels. Tile will be used in the bath rooms and kitchens. The exteriors will be covered with rustic. The plans are complete and the work will be done by Day Labor.

BERKELEY, ALAMEDA CO., CAL.—Residence, 2 story and base, frame, \$5,000. Architect, John Hudson Thomas, First National Bank Bldg., Berkeley. Owner, George H. Richardson. This dwelling has been mentioned here before when plans were first started. The working drawings are now complete and figures will be called for shortly. Interior finish will be of pine, redwood and hardwood. Oak floors will be used in the principal rooms. There will be furnace heat and open fire places. Mantels will be of brick and tile. An automatic water heater will be installed. Tile will be used in the bath room and kitchen. The exterior of the dwelling will be covered with cement plaster on metal lath.

OAKLAND, CAL.—Residence, 1 1/2 story and base, frame, \$3,800. Architect, Clay N. Burrell, Albany Bldg., Oakland. Owner, C. S. Cook. The dwelling will contain seven rooms and bath. Interior finish will be of pine, redwood and some hardwoods. Oak floors will be used in the principal rooms. There will be furnace heat and open fire places. Mantels will be of brick. An automatic water heater will be installed. The exterior of the house will be covered with cement plaster on metal lath. A contract has been awarded to F. A. Muller, and he is now taking subdivisions on all parts of the work.

OAKLAND, CAL.—Residence, 2 story and base, frame, \$3,200. Architect, none. Owner, J. C. McQuillin, 2804 Stuart St., Berkeley. The house has been designed for a seven-room dwelling with bath and sleeping porch. Interior finish will be of pine and redwood with hardwood floors in the principal rooms. There will be furnace heat. The sum of \$53 is allowed for a mantel and the same amount for finish hardware. Tile will be used in

the bath room and kitchen. The exterior of the dwelling will be covered with cement plaster. Plans are complete and the work will be done by Day Labor.

OAKLAND, CAL.—Bungalow, 1 story and base, frame, \$1,000. Architect, W. H. Judson Albany Bldg., Oakland. Owner, Mr. Richel. The house will contain four rooms and bath. All interior finish will be of pine or redwood. An open fire place with tile or brick mantel will be used in the living room. The exterior of the dwelling will be finished with rustic. Plans are complete and figures are being taken.

OAKLAND, CAL.—Residence, 2 story and base, frame, \$3,500. Architect, John F. Hauser, 3579 19th St., S. E. Owner's name withheld. The dwelling will be erected in Boulevard Park and will contain seven rooms, bath and sleeping porch. Interior finish will be of pine and redwood with oak floors in the principal rooms. There will be furnace heat and open fire places. Mantels will be of tile or brick. An automatic water heater will be installed. Tile will be used in the bath room and kitchen. The exterior of the house will be covered with rustic. Plans are complete and figures are being taken.

BERKELEY, ALAMEDA CO., CAL.—Residence, 2 story and base, frame, \$3,000. Architect, none. Owners, Allan & Glenday, 1621 Broadway, Oakland. The dwelling has been designed for a six-room house with bath and sleeping porch. Interior finish will be of pine and redwood with some hardwood floors. There will be furnace heat and open fire places. Mantels will be of tile or brick. Tile will be used in the bath room and kitchen. The exterior of the dwelling will be covered with cement plaster on metal lath. Plans are complete and the work will be done by Day Labor.

SAN FRANCISCO—Residences, 2, 2 story and base, frame, \$4,000 and \$5,000. Architect, Theo. S. Boehn, David Hewes Bldg., S. F. Owners Pockman Building Co. Both of these dwellings will be erected on 13th avenue near Anza, and each will contain seven rooms and bath. Interiors will be finished in pine, redwood and some hardwood. Oak floors will be used in the principal rooms. There will be large open fire places and brick or tile mantels. Tile will be used in the baths and kitchens. Automatic water heaters will be installed. The exteriors will be covered with cement plaster on metal lath. Plans are complete and the work will be done by Day Labor.

PICAYOUNT, ALAMEDA CO., CAL.—Residence, 2 story and base, frame, \$4,000. Architect, none. Owner, Lester B. Bieff, 1098 Grand Ave., Oakland. The dwelling has been designed for a seven-room house with bath and sleeping porch. Interior trim will be of pine and redwood. Oak floors will be used in three of the rooms. There will be furnace heat and open fire places. Mantels will be of brick. Tile will be used in the bath room and kitchen. The exterior of the dwelling will be covered with cement plaster on metal lath. Plans are complete and the work will be done by Day Labor.

BERKELEY, ALAMEDA CO., CAL.—Residence, 2 story and base, frame, \$3,000. Architect, none. Owners, Allan & Glenday, 1621 Broadway, Oakland. The dwelling will contain six rooms, bath and sleeping porch. All interior

finish will be of pine or redwood. Hardwood floors will be used throughout. A central heating system will be installed and a large open fire place will be a feature of the main living room. Tile will be used in the bath and kitchen. Mantel will be of brick. The exterior of the house will be covered with cement plaster. Plans are complete and the work will be done by Day Labor.

BERKELEY, ALAMEDA CO., CAL.—Residence, 2 story and base, frame, \$3,000. Architect, Olin S. Grove, 2911 Telegraph Ave., Berkeley. Owner, D. L. Levy. The dwelling has been designed for a six-room house with bath and sleeping porch. Interior will be finished in pine and redwood. Hardwood floors will be used in the living and dining rooms. There will be furnace heat and open fire place. Mantel will be of brick. Tile will be used in the bath room and kitchen. The exterior will be covered with cement plaster. Plans are being prepared.

HILLSBORO, SAN MATEO CO., CAL.—Residence, 3 story and base. Class A construction, \$500,000. Architects, Willis Polk & Co., Merchants' Exchange Bldg., S. F. Owner, Charles Templeton Crocker. The old country residence of Mr. Crocker, known as Uplands and which has long been one of the show places of the peninsula, is to be practically wrecked and a new and more pretentious home erected on the old site. The new dwelling will be the finest country place in Hillsboro, and with the exception of Mary Pauline Payne's home at Menlo Park, the most costly place on the peninsula. Construction will be of steel and reinforced concrete, with hollow tile partitions and fireproof construction throughout. Interior finish will be of hardwoods, marble and tile. A large amount of ornamental plaster will be used. There will be the most improved system of heating, an elevator and dumb waiters. Vacuum cleaning and a refrigerating plant will also be installed. The exterior of the dwelling will be faced with terra cotta. Plans are complete and figures for the work are being taken by the architects.

SAN DIEGO, CAL.—Residence, 2 story and base, frame, \$50,000. Architects, Greene & Greene, Boston Bldg., Pasadena. Owner, Mrs. Mary Kew. The dwelling is designed in the Old English style with a plaster on shingle exterior ornamented with heavy beams. The first floor will be finished in oak throughout and the second in white enamel. All rooms will have hardwood floors. A central heating system and open fire places will be installed. A garage in keeping with the residence will also be erected. A large amount of concrete terraces are to be erected and landscape gardening on a large scale is contemplated. The work will be done by Day Labor.

Contracts Awarded.

LOS ANGELES, CAL.—Residence, 2 story and base, frame, \$20,000. Architects, Hudson & Munsell, Stinson Bldg., L. A. Owner, X. Elisser, Contractor, Thomas K. Miller, 3450 So. Figueroa St., L. A. This contract has been awarded on the percentage basis, 12.8.

LOS ANGELES, CAL.—Tile and marble top 12 story office building, \$70,500. Architects, Morgan, Walls & Morgan, Story Bldg., L. A. Owner, W. L. Hollingsworth, Contractor, B. V. Collins,

945 So. Los Angeles St., L. A., marble and tile work. Contract price, \$70,500.

SCHOOLS.

SAN FRANCISCO—Moving school, 3 story, Class A construction, \$150,000. Architects, City Dept. of Architecture, Temporary City Hall Bldg., S. F. Owners, City and County of San Francisco. Three figures were received by the Board of Public Works for moving the High School of Commerce. The lowest figure was received from the Sound Construction Co., Seattle, and calls for an expenditure of \$151,000. For a complete list of all figures see under San Francisco in this issue.

OAKLAND, CAL.—School, 2 story and base, reinforced concrete, \$84,000. Architect, City Architect J. J. Donovan, Security Bldg., Oakland. Owners, City of Oakland. This building will be erected on Grand street near Perry, and will contain 12 class rooms and an assembly hall. Construction will be of reinforced concrete throughout. Interior will be faced with cement plaster. Plans are complete and figures will be opened by the Board of Education on February 17th. The official proposals appears in another column of this issue.

OAKLAND, CAL.—School, 1 story and base, reinforced concrete, \$64,000. Architect, City Architect J. J. Donovan, Security Bldg., Oakland. Owners, City of Oakland. The building will be known as the 54th Street School, and will be erected on 54th street near Market. There will be six class rooms, kindergarten, assembly hall, club room and teachers' and principal's rooms. A central heating system will be installed. The exterior of the building will be faced with cement plaster. Plans are complete and figures will be opened by the Board of Education on February 10th. Plans and specifications can be secured from the architect.

OAKLAND, CAL.—School, 1 story and base, reinforced concrete, \$65,000. Architect, City Architect J. J. Donovan, Security Bldg., Oakland. Owners, City of Oakland. Bids opened for the construction of the 13th Avenue School show McLaren & Peterson low at \$61,225. For a complete list of all figures presented see under Oakland and Alameda County in this issue.

GALT, SACRAMENTO CO., CAL.—School, 2 story and base, brick, \$15,000. Architect, C. H. Russell, Humboldt Bank Bldg., S. F. Owners, Galt Joint Union High School. Bids opened for this work have been taken under advertisement, and all checks except four have been returned. The work attracted an unusually large number of figures. A complete list of the bids may be found under the heading of Sacramento, Stockton and Northern California in this issue.

EL MODENA, ORANGE CO., CAL.—School, 1 story and base, brick, \$25,000. Architect, H. M. Patterson, O. T. Johnson Bldg., L. A. Owners, El Modena School District. The building has been arranged to contain six standard size class rooms, teachers' rooms and principal's offices, besides a large auditorium seating 350 people. A complete stage will be a part of the auditorium. There will be a central heating system. Interior finish will be of pine. The exterior of the building will be faced with pressed brick. Plans

are complete and figures are being taken. Plans can be secured from the architect.

ORANGE, ORANGE CO., CAL.—Schools, 2, 2 story and base, brick and frame, \$40,000. Architect, Fred H. Eley, Hervey-Pinley Bldg., Santa Ana. Owners, Orange Union High School District. These two buildings, the science building and manual arts building, will be 50x100 and 60x100 respectively. Interiors will be finished in pine throughout. Heat will be supplied from the present system. The exteriors will be faced with cement plaster. The cost price does not include the machinery and equipment, which will be installed later. Plans are complete and figures are being taken. Bids will be opened by the Board of Education on February 21st. Plans can be secured from the architect.

SEWERS, STREET WORK AND WATER SYSTEMS

SAN FRANCISCO—Power station, 1 story and base, concrete. Cost not stated. Architect, Frederick H. Meyer, Bankers' Investment Bldg., S. E. Owners, Pacific Gas and Electric Co. This building, designed for a sub-station, will be erected on Townsend street, between 1st and 2nd streets. Construction will be of reinforced concrete throughout with concrete floor. The exterior of the building will be faced with cement plaster. Plans are complete and figures are now being taken.

OXNARD, VENTURA CO., CAL.—Water system. Cost not stated. Engineers, Olmsted & Gillelen, Wright and Callender Bldg., L. A. Owners, City of Oxnard. Attorney Blackstock of Oxnard has just received word from the Appellate Court that the bonds voted by the people of Oxnard over a year ago for the construction of a water and light system in that city are legal. Steps will be taken at once towards entering into contracts for the construction of the system.

RIVERSIDE, RIVERSIDE CO., CAL.—Consolidation and extension of water systems. Cost not stated. Engineers, Burns & McDonnell, Kansas City, Mo. Owners, City of Riverside. The above named engineers have been retained by the city to prepare plans for the consolidation of the two water systems for the purchase of which \$1,000,000 in bonds were voted. A number of important extensions will also be planned.

Contracts Awarded.

LOS ANGELES, CAL.—Steel and concrete water tank, \$9,000. Engineer, County Engineer, L. A. Owners, Los Angeles County. Contractors, Security Contracting Co., Union Oil Bldg., L. A. Contract price, \$9,553.

LOS ANGELES, CAL.—Sewer system, 6 miles, \$550,000. Engineer, City Dept. of Engineering, L. A. Owners, City of Los Angeles. Contractors, Holt & Jeffery, Hinkley Block, Seattle. Contract price, \$528,844.34. Note: This sewer is known as the Arroya de la Brea.

BAKERSFIELD, KERN CO., CAL.—Water mains and hydrants. Cost not stated. Engineer, City Engineer, Bakersfield. Owners, City of Bakersfield. Contractor, Max Gundlach, Bakersfield, water pipe, \$2,546.65; Greenberg & Sons, Bakersfield, 35 fire

hydrants. Contract price not stated.

PRESIDIO OF SAN FRANCISCO—Water main and by-pass, \$3,049. Engineers, Constructing Quartermasters' Dept., U. S. A., Fort Mason, Owners, U. S. Government. Contractor, Philip Schuyler, First National Bank Bldg., Oakland. Contract price, \$3,049.

STORES & OFFICE BUILDINGS.

SEATTLE, WASH.—Stores alterations and additions, concrete and brick construction, \$60,000. Architect, Harlan Thomas, Eilers Bldg., Seattle. Owners, Arcade Building. The present front will be removed and an arcade effect will be constructed on both street frontages. Interior partitions will be removed. An automatic sprinkler system will be installed. New electric wiring, plumbing, painting and plastering are called for in the specifications. New store fixtures will also be constructed. Plans for this work are nearly complete and figures will be called for shortly.

PORTLAND, ORE.—Stores, 1 story and base, brick and steel. Cost not stated. Architects, Emil Schacht & Son, Portland. Owner, Fred B. Brown. The building will cover an area of 90x100 feet. The space has been arranged for four stores and a moving picture house. There will be plate glass display windows with patent store fronts. Interior finish will be of pine and some hardwood. The exterior of the building will be faced with pressed brick. Plans are now being prepared.

LOS ANGELES, CAL.—Stores, 1 story and base, brick. Cost not stated. Architects, Morgan, Walls & Morgan, Story Bldg., L. A. Owner, D. Botillier.

The building will be erected on Main street and will cover a ground area of 100x100 feet. A number of modern stores will be arranged for, all of which will have patent store fronts and plate glass windows. Interior finish will be of pine and redwood with some hardwoods used in the display windows. A cement floor will cover the entire area. The exterior of the building will be faced with pressed brick. Plans are complete and figures are being taken.

Contracts Awarded.

LOS ANGELES, CAL.—Lofts, 10 story and base, Class A construction, \$100,000. Architects, Austin & Pennell, Wright and Callender Bldg., L. A. Owners, Knickerbocker Fireproof Building Co. Contractor, J. V. McNeil, Citizens' National Bank Bldg., L. A. Contract price, \$100,000.

LOS ANGELES, CAL.—Lofts, 7 story and base, reinforced concrete, \$70,000. Architect, S. Tilden Norton, Title Insurance Bldg., L. A. Owner, J. Kahn. Contractor, J. V. McNeil, Citizens' National Bank Bldg., L. A. Contract price, \$70,000.

SEALED PROPOSALS.

PROPOSALS FOR PUMPING PLANT.

SEALED bids or proposals are invited to be delivered to the Board of Park Directors of the City of Oakland, at its office, City Hall Annex, 128 Broadway, Oakland, California, on Thursday, the 30th day of January, 1915, between the hours of 2 o'clock and 3 o'clock p. m., for furnishing necessary labor and materials for and in the construction of 1 deep well pump-

log plant and centrifugal pumping plant in Mosswood Park for the Board of Park Directors of the City of Oakland, Alameda County, California said pumping plant to be constructed by successful bidders therefor in accordance with the plans and specifications therefor said plans and specifications being on file in the office of said Board of Park Directors to which reference is hereby made for full details and description of said work. Proposals shall be made upon blank forms which will be furnished by the secretary of the Board of Park Directors upon application. All work done and material furnished shall be to the approval of C. F. Allardt, Mechanical Engineer, and to the acceptance of the Board of Park Directors.

Work shall be commenced within ten (10) days and shall be completed within sixty (60) days from date of contract.

Each bid must be accompanied by a check of ten per cent of amount of bid, payable to "Frank R. Thompson, Clerk of the City Council" certified by a responsible bank, which check shall be forfeited to the City of Oakland should the bidder receiving an award fail within ten (10) days after acceptance of bid to enter into a contract and furnish the bond required as set forth in this notice.

The Board of Park Directors reserves the right to reject any or all bids.

By order of the Board of Park Directors,
HENRY F. VOGT,
Secretary.

PROPOSALS FOR BUILDING.

TREASURY DEPARTMENT—Office of the Supervising Architect, Washington, D. C., January 17, 1913.—Sealed proposals will be received at this office until 3 o'clock p. m. on the 28th day of February, 1913, and then opened for the construction, complete (including plumbing, gas piping, heating apparatus, electric conduit and wiring, and lighting fixtures), of the United States post office and courthouse at Pocatello, Idaho. The building is three stories and basement, with a ground area of approximately 4,500 square feet, fireproof construction, stone and brick facing, tin roof. Drawings and specifications may be obtained from the custodian of site at Pocatello, Idaho, or at this office, at the discretion of the Supervising Architect.

O. WENDELOTTH,
Supervising Architect.

PROPOSALS FOR BUILDING.

BRICK SCHOOLHOUSE—Department of the Interior, Office of Indian Affairs, Washington, D. C., December 27, 1912.—Sealed proposals, plainly marked on the outside of the sealed envelope "Proposals for Brick Schoolhouse, Pueblo Bonito Indian School, New Mexico," and addressed to the Commissioner of Indian Affairs, Washington, D. C., will be received at the Indian Office until 2 o'clock p. m., February 12, 1913, for furnishing materials and labor for the erection of a brick schoolhouse at the Pueblo Bonito Indian School, N. Mex., in strict accordance with the plans, specifications, and instructions to bidders, which may be examined at the office, the offices of the supervisor of construction, Denver, Colo., the Post, Denver, Colo.; the U. S. Indian warehouse, San Francisco, Cal., and at the school. For further

information apply to the superintendent of the Pueblo Bonito Indian School, Crownpoint, N. Mex. F. H. ABBOTT, acting commissioner.

PROPOSALS FOR ROAD WORK.

ROADWORK—Constructing Quartermaster's office, Vancouver Barracks, Wash.—Sealed proposals, in triplicate, will be received in this office until 11 a. m., February 4, 1913, and then publicly opened for the construction of walks, curbs, gutters, etc., at this post. Full information furnished on application. A deposit of \$5 will be required to insure return of plans, specifications, etc. Envelopes containing proposals to be indorsed "Proposals for Walks, Etc.," and addressed to the Constructing Quartermaster.

PROPOSALS FOR BUILDING.

THE BOARD OF EDUCATION OF the City of Oakland, State of California, requests and will receive bids for the furnishing of all the materials, labor, and workmanship required in connection with the construction and completion of a one (1) story reinforced concrete and wood frame school building to be known as the Fifty-fourth and Market Street School, to be erected on the block of land located on the westerly side of Market street, between 53rd and 54th streets; also for the furnishing of all materials, labor and workmanship required in connection with the construction and completion of a two (2) story and basement reinforced concrete frame school building to be known as the Perry School, and to be erected on block of land located on the westerly side of Grand avenue between Perry street and Santa Clara avenue, both such blocks of land being in the City of Oakland, Alameda County, State of California.

All said materials, labor and workmanship for each of the above named buildings is to consist of that required by, and be in accordance with the plans, drawings and specifications prepared therefor and now on file in the office of John J. Donovan, the Supervising Architect of the City of Oakland, to which said plans and specifications reference is hereby made.

All proposals for each of the said buildings shall be made upon and conform to the requirements of the forms of proposals, prepared and furnished by the City, through the Supervising Architect, and shall be enclosed in sealed envelopes, endorsed "Bid for (name of school)," addressed to the Board of Education. The proposal for the Fifty-fourth and Market Street School shall be deposited by the bidder or his agent, with the Board, while in session, between 430 and 530 o'clock p. m., Pacific Time, on the 10th day of February, 1913, and the proposal for the Perry School shall be deposited by the bidder, or his agent, with the Board while in session between 430 and 530 o'clock p. m., Pacific Time, on the 17th day of February, all in the rooms of the Board in the City Hall Annex, No. 572 Broadway, Oakland, California, and at the expiration of each of the times named the respective bids will be opened, examined and publicly defined in open session of the Board.

No bid will be received or considered which is not accompanied by a check, certified by a responsible bank, payable to the order of Frank R. Thompson, City Clerk, in an amount not less than ten per centum (10%) of

the aggregate amount of the proposal. Said check shall be forfeited to and retained by the City if the successful bidder fails or refuses to execute the contract in the required forms to be provided by the City as required by the Charter of the City of Oakland within twenty (20) days after receiving notice of award.

The contract for the furnishing of all the labor and material entering into the construction and completion of each of the said buildings, including plumbing, heating, ventilating, electric work and other equipment indicated on the drawings or called for in the specifications, is to be let or awarded as a whole or general contract. No bid which combines the two buildings in one figure will be considered.

All information relative to the requirements for bidding, and all directions necessary to explain and make definite any of the provisions of the specifications or drawings will be given by the Supervising Architect upon application at his office.

The right is reserved to the Board in accordance with the provisions of the Charter of the City of Oakland, to reject any or all bids submitted.

By order of the Board of Education of the City of Oakland, California,

R. B. S. YORK,
Secretary of the Board of Education of the City of Oakland.

PROPOSALS FOR BRIDGE WORK.

STEEL BRIDGE—Department of the Interior, Office of Indian Affairs, Washington, D. C.—Sealed proposals plainly marked on the outside of the sealed envelope "Proposals for Steel Bridge Across the Clearwater River, Red Lake Reservation, Minnesota," and addressed to the Commissioner of Indian Affairs, Washington, D. C., will be received at the Indian Office until 2 o'clock p. m., February 19, 1913, for furnishing materials and labor for the erection of a riveted steel highway bridge across the Clearwater River, Red Lake Indian Reservation, Minnesota, in strict accordance with the plans, specifications and instructions to bidders, which may be examined at this office, the offices of the supervisor of construction, Denver, Colo., and at the school. For further information apply to the superintendent of the Red Lake Indian School, Red Lake, Minn. F. H. ABBOTT, acting commissioner.

PROPOSALS FOR BUILDINGS.

BUILDING—Sealed proposals, indorsed "Proposals for Contagious Group Buildings," will be received at the Bureau of yards and docks, Navy Department, Washington, D. C., until 11 o'clock a. m., February 21, 1913, and then and there publicly opened for hospital buildings at the naval hospital reservation, Puget Sound, Wash. Estimated cost, \$12,000. Plans and specifications can be obtained on application to the bureau or to the commandant of the navy yard, Bremerton, Wash. H. R. STANFORD, chief of bureau.

TREASURY DEPARTMENT—Office of the Supervising Architect, Washington, D. C., January 22, 1913.—Sealed proposals will be received at this office until 3 o'clock p. m. on the 5th day of March, 1913, and then opened, for the construction (including plumbing, gas piping, heating apparatus, electric conduits and wiring, interior lighting

structures, and approaches) of the United States post office at Grand Junction, Colo. The building is to be two stories and basement, and has a ground area of approximately 5,700 square feet; fireproof construction, except ceiling and roof; brick and stone facing and tin roof. Drawings and specifications may be obtained from the custodian of site at Grand Junction, Colo., or at this office, at the discretion of the Supervising Architect. O. WENDEROTH, Supervising Architect. (*)

NOTICE TO CONTRACTORS.

PANAMA-PACIFIC INTERNATIONAL EXPOSITION.

SEALED PROPOSALS will be received by the Buildings and Grounds Committee of the Panama-Pacific International Exposition Company at the office of the Director of Works, in the Exposition Building, Pine and Battery Streets, San Francisco, California, at 11 A. M., Friday, January 31, 1913.

Work For Contract No. 18.
Grading Sites for Liberal Arts Building, Court of Honor, North Entrance to Court of Honor, North Road and Fulton Basin Docks in accordance with the

specifications on file in the office of the Director of Works.

Each proposal must be accompanied by a certified check payable to the order of the Panama-Pacific International Exposition Company or cash in the sum of ten (10) per cent of the amount bid, or the same will not be considered. When the award of contract is made all checks will be returned to the respective bidders, except that filed with the accepted proposal or bid, which check will be returned upon the successful bidder signing the contract and filing the required bond. A bond in the sum of fifty (50) per cent of the contract price will be required for the faithful performance of the contract; the sureties thereon must be satisfactory to the Buildings and Grounds Committee of the Panama-Pacific International Exposition Company.

Progressive payments will be made. The right is reserved to reject any and all bids and to waive technical defects if in the interest of the Exposition Company.

Plans and specifications for the work may be obtained from the Director of Works, at Room 617 Exposition Building, by depositing \$5.00, which will be refunded upon the return of the plans and specifications in good condition.

By order of the Buildings and Grounds Committee.

WILLIAM H. CROCKER,
Chairman. (*)

Firms desiring news from certain localities like San Francisco, Los Angeles, Portland, Seattle, etc., will find all such items, commencing on this page, all carefully classified as to location. These same items are repeated in the fore part of the news department, under distinct headings such as Banks, Churches, Hotels, etc.

SAN FRANCISCO.

WHARF CONSTRUCTION — Reinforced concrete, \$500,000. San Francisco. Engineer, Assistant State Engineer Newman, Ferry Bldg., S. F. Owners, State of California. Bids for the construction of Pier No. 37 were opened at Thursday's session of the State Board of Harbor Commissioners and show the Thompson Bridge Co., low at \$175,200. For a complete list of the figures presented see under San Francisco in this issue.

APARTMENT HOUSE—3 story and base, frame, \$30,000. San Francisco. Architect, E. N. Denke, Humboldt Bank Bldg., S. F. Owner, Max Kolander. The building will be erected on a corner site and will cover a considerable ground area. Interior will be arranged for two and three room suites with wall beds and private baths. There will be steam heat. Bath rooms will be finished in tile. The interior will be finished in pine, redwood and some hardwoods. Iron fire escapes will be installed. The exterior of the building will be covered with shiplap and brick veneer. Plans are now being prepared.

WHARF CONSTRUCTION — Reinforced concrete, \$500,000. San Francisco. Engineer, Assistant State Engineer Newman, Ferry Bldg., S. F. Owners, State of California. Plans have been completed and approved for the construction of Pier No. 39 which will be erected adjoining Pier No. 37. Construction will be similar to that used by the Government at the Army Transport Docks at Fort Mason. Bids will be received by the State Board of Harbor Commissioners, Ferry Bldg., S. F., on February 6th. Complete plans and specifications can be secured from Engineer Newman. The official proposal appears in another column of this issue.

APARTMENT HOUSE—3 story and

base, frame, \$10,000. San Francisco. Architect, J. G. Kincannon, 1179 Hayes St., S. F. Owners, Metropolis Investment Co. The building will have a frontage of 28 feet and a depth of 87 feet. The interior has been arranged for six apartment flats of four rooms and bath each. Interior finish will be of pine, redwood and some elm. Wall beds will be used throughout. There will be a central heating system and hot water heaters. Bath rooms will be finished in tile. The exterior of the building will be covered with cement plaster on metal lath. Plans are complete and the work will be done by Day Labor.

RESIDENCES—1, 1½ and 2 story and base, frame, \$2,000 each. San Francisco. Architect, none. Owners, Oscar Heyman & Bros., 742 Market St., S. F. These houses will contain from five to six rooms each. Interiors will be finished in pine and redwood throughout. Some hardwood flooring will be used. There will be open fire places and tile or brick mantels. Tile will be used in the baths and kitchens. The exteriors will be covered with rustic, shingles or shiplap. Plans are in the hands of the owners and the work will be done by Day Labor.

WHARF CONSTRUCTION — Reinforced concrete, \$500,000. San Francisco. Engineer, Assistant State Engineer Newman, Ferry Bldg., S. F. Owners, State of California. Plans have been approved by the State Board of Control for the construction of Pier No. 41 and also for two Ferry Freight Ships, which are to be erected adjoining Pier No. 41. The pier will be 1010 feet long and 200 feet wide, of the reinforced concrete type. Freight ships will be constructed of cerosated wood-on piles and are estimated to cost \$200,000. Pier No. 41 will cost \$500,000. Bids will be called for within the next week or ten days for this work.

APARTMENT HOUSE—3 story and base, frame, \$10,000. San Francisco.

Architect, Charles J. Rousseau, Phelan Bldg., S. F. Owner, Louis D. Stoff. The building will be arranged for six apartments designed on the apartment flat style. All suites will have private bath and wall beds. Interior finish will be of pine, redwood and elm. Bath rooms will be finished in tile. There will be steam heat and a hot water heating system. The exterior of the building will be covered with cement plaster and shiplap. Plans are complete and figures are being taken.

RESIDENCE — 1 story and base, frame, \$2,000. San Francisco. Architect, J. M. Coary, 23rd and Polson Sts., S. F. Owner, Louis Fortney. The dwelling will contain six rooms and bath. Interior finish will be of pine, Hungarian ash and oak. Oak floors will be used in the living and dining rooms. There will be open fire places and brick or tile mantels. Tile will be used in the kitchen and bath room. The exterior of the house will be covered with shingles. Plans are complete and the work will be done by Day Labor.

RESIDENCES—2, 2 story and base, frame, \$3,000 each. San Francisco. Architect, none. Owner, Thomas Hamill, 17th Ave. and California St., S. F. These houses will each contain six rooms and bath. Interior finish will be of pine, redwood and some hardwood. Oak floors will be used in the principal rooms. There will be open fire places in the living rooms with tile and brick mantels. Bath rooms and kitchens will have the wainscot. The exterior will be covered with rustic, shingles and cement plaster on metal lath. Plans are in the hands of the owner and the work will be done by Day Labor.

RESIDENCES—2, 2 story and base, frame, \$4,000 and \$5,000. San Francisco. Architect, Theo. S. Boehn, David Hewes Bldg., S. F. Owners, Pockman Building Co. Both of these dwellings will be erected on 13th Ave. near Anza, and each will contain seven rooms and bath. Interiors will be finished in pine, redwood and some hardwood. Oak floors will be used in the principal rooms. There will be large open fire places and brick or tile mantels. Tile will be used in the baths and kitchens. Automatic water heaters will be installed. The exteriors will be covered with cement plaster on metal lath. Plans are complete and the work will be done by Day Labor.

APARTMENT HOUSE—3 story and base, frame, \$20,000. San Francisco. Architect, Henry C. Smith, Humboldt Bank Bldg., S. F. Owner, Mr. Hunter. The building will be erected on Washington St., near Taylor, and is to contain a number of two and three room suites with wall beds and private bath rooms. Interior finish will be of pine and redwood with some elm veneer. There will be a central heating system and a hot water plant. Vacuum cleaning will also be installed. The exterior of the building will be covered with brick veneer and cement plaster. Plans are nearly ready for figures.

FACTORY—1 story, galvanized iron, \$5,000. San Francisco. Architect, B. V. Woods, 331 17th Ave., S. F. Owners, Clinton Fireproofing Co., 213 Mutual Bank Bldg., S. F. This building is to be erected as a shop warehouse and yard and will be located on Townsend near Stanford. There will be a concrete foundation and exterior walls of galvanized iron. Construction will be carried on by Day Labor.

FLATS—2-story and base, frame, \$3,000. Architect, none. San Francisco. Owner, Thomas M. Jones, 37 Guerrero St., S. F. The building will cover an area of 2x57 feet, and is arranged to contain two modern flats of five and six rooms. Interior finish will be of pine throughout. Some oak flooring will be used. There will be gas grates and tile mantels. The exterior of the building will be covered with rustic and cement plaster on metal lath. Plans are complete and in the hands of the owner, who will do the work by day labor.

GARAGE—1 story and base, brick and steel. Cost not stated. San Francisco. Architect, Henry C. Smith, Humboldt Bank Bldg., S. F. Owner, Mr. McCrae. The building will be erected on Golden Gate avenue, near Larkin street. The interior is to be arranged for the automobile business. Floors will be of cement. Offices will occupy the front portion of the structure and repair room and shipping departments the balance. Interior finish will be of pine and hardwood. The wall will also be used to a considerable extent. The exterior of the building will be faced with pressed brick. Patent store fronts are to be specified.

GARAGE—1 story and base. Class A construction, \$30,000. San Francisco. Architects, Fabre & Bearwald, Western Metropolis Bank Bldg., S. F. Owner, Henry Ohlandt, Jr. The building is to be erected at the southwest corner of Grove and Broderick streets and will cover a considerable ground area. There will be some steel, brick exterior walls, faced with pressed brick and concrete floors. Special store tanks will be installed for gasoline. A completely equipped machine shop will occupy a part of the building, the balance of the space being given over to storage room. Plans are now being prepared.

HOTEL AND STORE—3 story and base, frame, \$10,000. San Francisco. Architect, John F. Haner, 3579 19th St., S. F. Owner's name withheld. The building will be erected on Lombard near Lyon street. The first floor will contain a store. Basement is to be arranged for a billiard hall and the two upper floors will contain 18 single rooms. Interior finish will be of pine and redwood throughout. All rooms will be supplied with running water. The exterior of the building will be covered with rustic and shiplap. Plans are being prepared and figures will be called for shortly.

HOTEL—7 story and base. Class C construction, \$125,000. San Francisco. Architects, Smith & Stewart, 244 Kearny St., S. F. Owner, A. O. Stewart. The building will be erected in the north line of Ellis street, 87½ feet east of Mason. The property is regarded as one of the most choice sites remaining vacant. The building will be designed for a high class hotel with all modern conveniences, including steam heat, elevator service, vacuum cleaning system and hot and cold running water. The exterior will probably be faced with pressed brick. Plans are being prepared.

HOTEL ALTERATIONS—Brick and steel construction. Cost not stated. San Francisco. Architect, none. Owner, A. Nestori, 516 Pacific St. The work includes the construction of an additional story and considerable concrete work. There will be new plas-

tering, electric work, painting and stonework. The exterior of the new portion of the building will be faced with cement plaster. Plans are complete and the work will be done by day labor.

HOTEL—7 story and base. Class B construction, \$90,000. San Francisco. Architect, John P. Haner, 3579 19th St. Owners, Sacramento capital. The building will be erected on lower Market street, near Second, and will cover an area of 50x88 feet. There will be two stories besides the hotel entrance on the first floor. Upper floors will be arranged for 80 rooms, several baths and a large dining room. Interior finish will be of pine and hardwoods. There will be steam heat, elevator service and a vacuum cleaning system. The exterior of the building will be faced with pressed brick. Plans are now being prepared and figures will be called for shortly.

MOVING SCHOOL—3 story, Class A construction, \$150,000. San Francisco. Architects, City Dept. of Architecture, Temporary City Hall Bldg., S. F. Owners, City and County of San Francisco. Three figures were received by the Board of Public Works for moving the High School of Commerce. The lowest figure was received from the Sound Construction Co., of Seattle, and calls for an expenditure of \$151,000. For a complete list of all figures see under San Francisco in this issue.

POWER STATION—1 story and base, concrete. Cost not stated. San Francisco. Architect, Frederick H. Meyer, Bankers' Investment Bldg., S. F. Owners, Pacific Gas and Electric Co. This building, designed for a sub-station, will be erected on Townsend street, between 1st and 2nd streets. Construction will be of reinforced concrete throughout with concrete floor. The exterior of the building will be faced with cement plaster. Plans are complete and figures are now being taken.

HOTEL—2 or 3 story and base, stone and steel construction, \$250,000. Yosemite Valley, Cal. Architect, Myron Hunt, Hibernian Bldg., L. A., associated with Engineer Pierre Zucco, Mechanics' Institute Bldg., S. F. Owner, Frank A. Miller. Mr. Miller, who is proprietor of the Glenwood Mission Inn at Riverside is negotiating with the United States Government for a long term lease on property in the Yosemite Valley on which he will construct a magnificent tourist hotel. Mr. Miller's plans also contemplate the construction of a \$75,000 hotel at Glacier Point. He and his architect and engineer are now in the Yosemite Valley and on their return details of the building will be obtained.

POST OFFICE—2 story and base, fireproof construction. Cost not stated. Grand Junction Colo. Architect, Oscar Wenderoth Washington, D. C. Owners, United States Government. The building will cover a ground area of approximately 5,700 square feet and will contain the usual rooms and departments. Construction will be fireproof except ceiling and roof. The exterior of the building will be faced with stone. Roof will be of tin. Plans are complete and figures are being taken for the construction, complete, including heating, plumbing, electric conduits and lighting fixtures. Bids will be opened on March 5th at Washington, D. C. Plans and specifications can be secured from the architect.

Contracts Awarded.

SUBTREASURY—2 story and base. Class A construction, \$384,300. San Francisco. Architect, Milton J. Dyer, Cleveland, Ohio. Owners, United States Government. Contractor, Grant Fee, Monadnock Bldg., S. F. Contract price, \$384,300. Note: The report current in building circles for the last two weeks to the effect that new figures were to be called for on the construction of this building are without foundation, as the Treasury Department has authorized the award of contract to Grant Fee, the lowest bidder.

WATER MAIN AND BY-PASS—\$3,049. Presidio of San Francisco. Engineers, Constructing Quartermasters' Dept., U. S. A., Fort Mason. Owners, U. S. Government. Contractor, Philip Schuyler, First National Bank Bldg., Oakland. Contract price, \$3,049.

Bids Opened For State Harbor Work In S. F.

Bids For Construction of Pier No. 37 Show Thompson Bridge Company Low Men at \$475,200.

The State Board of Harbor Commissioners opened four sets of bids for the construction of Pier No. 37 and adjacent wharf work on Thursday, January 23rd. Pier No. 37 will be erected at the foot of Kearny street and is to be of reinforced concrete construction. Bids were asked for on two separate propositions. Proposition No. 1 as per plans and specifications and Proposition No. 2 including extra supports for outfall of North Point Main sewer. The lowest figures were received from the Thompson Bridge Company and they will probably be awarded the contract. Their bids of \$475,200 and \$483,700 are well within the Assistant State Engineer's estimate for the work. The following is a list of bids received:

Construction of Pier No. 37.
Thompson Bridge Co., Proposition No. 1, \$475,200; Prop. No. 2, \$483,700.
Pacific Wakefield Co., Proposition No. 1, \$617,000; Prop. No. 2, \$625,000.
F. Rolandi, Proposition No. 1, \$687,523; Prop. No. 2, add \$6,500.

OAKLAND AND ALAMEDA COUNTY.

APARTMENT HOUSE—2 story and base, frame, \$4,500. Oakland, Cal. Architect, A. W. Smith, 1010 Broadway, Oakland. Owner, B. D. Phillips. The building will contain four three-room suites with bath. Interior finish will be of pine and redwood. Wall beds will be used throughout. Hot water heaters will be installed. The exterior of the building will be covered with shiplap. Plans are complete and figures are being taken.

BUNGALOWS—2, 1 story and base, frame, \$2,000 each. Oakland, Cal. Architect, Ivan C. Satterlee, 470 13th St., Oakland. Owner, C. M. MacGregor. Each of these dwellings has been designed to contain five rooms and bath. All interior finish will be of pine or redwood. Hardwood

floors will be used in the living and dining rooms. There will be large open fire places with attractive tile or brick mantels. Tile will be used in the bath rooms and kitchens. The exteriors will be covered with rustic. The plans are complete and work will be done by Day Labor.

RESIDENCE—2 story and base, frame, \$5,000. Berkeley, Alameda Co., Cal. Architect, John Hudson Thomas, First National Bank Bldg., Berkeley. Owner, George H. Richardson. This dwelling has been mentioned here before when plans were first started. The working drawings are now complete and figures will be called for shortly. Interior finish will be of pine, redwood and hardwood. Oak floors will be used in the principal rooms. There will be furnace heat and open fire places. Mantels will be of brick and tile. An automatic water heater will be installed. Tile will be used in the bath room and kitchen. The exterior of the dwelling will be covered with cement plaster on metal lath.

RESIDENCE—1½ story and base, frame, \$3,800. Oakland, Cal. Architect, Clay N. Burrell, Albany Bldg., Oakland. Owner, C. S. Cook. The dwelling will contain seven rooms and bath. Interior finish will be of pine, redwood and some hardwoods. Oak floors will be used in the principal rooms. There will be furnace heat and open fire places. Mantels will be of brick. An automatic water heater will be installed. The exterior of the house will be covered with cement plaster on metal lath. A contract has been awarded to F. A. Muller, and he is now taking subgroups on all parts of the work.

RESIDENCE—2 story and base, frame, \$3,200. Oakland, Cal. Architect, none. Owner, J. C. McQuillin, 2804 Stuart St., Berkeley. The house has been designed for a seven room dwelling with bath and sleeping porch. Interior finish will be of pine and redwood with hardwood floors in the principal rooms. There will be furnace heat. The sum of \$35 is allowed for a mantel and the same amount for finish hardware. Tile will be used in the bath room and kitchen. The exterior of the dwelling will be covered with cement plaster. Plans are complete and the work will be done by Day Labor.

BUNGALOW—1 story and base, frame, \$1,000. Oakland, Cal. Architect, W. H. Judson, Albany Bldg., Oakland. Owner, Mr. Richel. The house will contain four rooms and bath. All interior finish will be of pine or redwood. An open fire place with tile or brick mantel will be used in the living room. The exterior of the dwelling will be finished with rustic. Plans are complete and figures are being taken.

RESIDENCE—2 story and base, frame, \$3,500. Oakland, Cal. Architect, John F. Haner, 3579 19th St., S. F. Owner's name withheld. The dwelling will be erected in Boulevard Park and will contain seven rooms, bath and sleeping porch. Interior finish will be of pine and redwood with oak floors in the principal rooms. There will be furnace heat and open fire places. Mantels will be of tile or brick. An automatic water heater will be installed. Tile will be used in the bath room and kitchen. The exterior of the house will be covered with rustic. Plans are complete and figures are being taken.

RESIDENCE—2 story and base,

frame, \$3,000. Berkeley, Alameda Co., Cal. Architect, none. Owners, Allan & Glenday, 1621 Broadway, Oakland. The dwelling has been designed for a six-room house with bath and sleeping porch. Interior finish will be of pine and redwood with some hardwood floors. There will be furnace heat and open fire places. Mantels will be of tile or brick. Tile will be used in the bath room and kitchen. The exterior of the dwelling will be covered with cement plaster on metal lath. Plans are complete and the work will be done by Day Labor.

RESIDENCE—2 story and base, frame, \$1,000. Piedmont, Alameda Co., Cal. Architect, none. Owner, Lester B. Rieff, 1098 Grand Ave., Oakland. The dwelling has been designed for a seven-room house with bath and sleeping porch. Interior trim will be of pine and redwood. Oak floors will be used in three of the rooms. There will be furnace heat and open fire places. Mantels will be of brick. Tile will be used in the bath room and kitchen. The exterior of the dwelling will be covered with cement plaster on metal lath. Plans are complete and the work will be done by Day Labor.

RESIDENCE—2 story and base, frame, \$3,000. Berkeley, Alameda Co., Cal. Architect, none. Owners, Allan & Glenday, 1621 Broadway, Oakland. The dwelling will contain six rooms, bath and sleeping porch. All interior finish will be of pine or redwood. Hardwood floors will be used throughout. A central heating system will be installed and large open fire places will be a feature of the main living room. Tile will be used in the bath and kitchen. Mantel will be of brick. The exterior of the house will be covered with cement plaster. Plans are complete and the work will be done by Day Labor.

RESIDENCE—2 story and base, frame, \$3,000. Berkeley, Alameda Co., Cal. Architect, Olin S. Grove, 2911 Telegraph Ave., Berkeley. Owner, D. L. Levy. The dwelling has been designed for a six-room house with bath and sleeping porch. Interior will be finished in pine and redwood. Hardwood floors will be used in the living and dining rooms. There will be furnace heat and open fire place. Mantel will be of brick. Tile will be used in the bath room and kitchen. The exterior will be covered with cement plaster. Plans are being prepared.

YACHT CLUB ALTERATIONS—Frame construction, \$3,000. Alameda, Alameda Co., Cal. Architects, William H. Crim, Jr., and Hamilton Murdoch, associated 425 Kearny St., S. F. Owners, Encinal Yacht Club. This work will include the construction of additional boat space on the first floor and a number of porches. The main assembly room will also be considerably enlarged. Trim throughout will be of pine. There will be new plastering, electric work, plumbing and painting. Plans are now out for figures.

BASEBALL BLEACHERS—Frame construction, \$150,000. Oakland, Cal. Architect, Walter J. Mathews, 927 Broadway, Oakland. Owners, Oakland Baseball Park Co. Plans are complete and now out for figures for a new baseball park in Oakland. The ground space to be covered by the bleachers is 192x76 feet. Bleachers will be 20 feet high. It is estimated that over 1,000,000 feet of lumber will be required.

HOSPITAL—Frame construction,

\$10,000. Oakland, Cal. Architect, Chester H. Miller, Foxcroft Bldg., S. F. Owners, Society for the Prevention of Cruelty to Animals. These buildings will be known as the Animal Home and will all be of frame construction. There will be a keeper's cottage, ambulance house, large barn with accommodations for eight head of horses, box stalls, wire runs for dogs and cats, large dog house and three corrals for horses and cows. Work will be started as soon as the weather permits. The work will be done by Day Labor.

SCHOOL—2 story and base, reinforced concrete, \$81,000. Oakland, Cal. Architect, City Architect J. J. Donovan, Security Bldg., Oakland. Owners, City of Oakland. This building will be erected on Grand street near Perry, and will contain 12 class rooms and an assembly hall. Construction will be of reinforced concrete throughout. Interior will be finished in pine. A central heating system will be installed. The exterior will be faced with cement plaster. Plans are complete and figures will be opened by the Board of Education on February 17th. The official proposal appears in another column of this issue.

SCHOOL—1 story and base, reinforced concrete, \$64,000. Oakland, Cal. Architect, City Architect J. J. Donovan, Security Bldg., Oakland. Owners, City of Oakland. The building will be known as the 54th Street School, and will be erected on 54th street near Market. There will be six class rooms, kindergarten, assembly hall, club room, and teachers' and principals' rooms. A central heating system will be installed. The exterior of the building will be faced with cement plaster. Plans are complete and figures will be opened by the Board of Education on February 10th. Plans and specifications can be secured from the architect.

SCHOOL—1 story and base, reinforced concrete, \$65,000. Oakland, Cal. Architect, City Architect J. J. Donovan, Security Bldg., Oakland. Owners, City of Oakland. Bids opened for the construction of the 13th Avenue School show McLaren & Peterson low at \$61,225. For a complete list of all figures presented see under Oakland and Alameda County in this issue.

Contracts Awarded.

FIRE HOUSE—1 story and base, frame, \$5,000. Oakland, Cal. Architect, City Architect J. J. Donovan, Security Bank Bldg., Oakland. Owners, City of Oakland. Contractors Tisslau Bros., Oakland. Contract price, \$1,245. For a complete list of these figures see under Oakland and Alameda County in this issue.

HOTEL—7 story and base, brick and steel, \$80,000. Oakland, Cal. Architect, Clay N. Burrell, Albany Bldg., Oakland. Engineer, W. W. Britte, Clunie Bldg., S. F. Owners, Durst Bros. Contractor, F. A. Muller. Contract price, \$80,000. Note: This building will cover an area of 10,000 feet.

HIGH LAND DEAL.

VREKA (Siskiyou Co.), January 22—Arthur L. Emory of Palo Alto and associates have purchased 1,080 acres of outcutter land lying about five miles north of Edgewood. They will establish a large stock ranch on the tract. The Orr Lake Lumber Company deeded 3,040 acres and William L. Hobbs 1,910 acres.

Building Contracts.

MARIN COUNTY.

BLOCK BDED BY GRAND, MAGNOLIA and Acacia Aves, San Rafael. Steam heating for three-story Class "C" building.

SAN JOSE AND THE SANTA CLARA VALLEY.

RESIDENCE — 3 story and base, Class A construction, \$500,000. Hillsboro, San Mateo Co., Cal. Architects, Willis Polk & Co., Merchants Exchange Bldg., S. F. Owner, Charles Templeton Crocker. The old country residence of Mr. Crocker, known as Uplands, and which has long been one of the show places of the peninsula, is to be practically wrecked and a new and far more pretentious home erected on the old site. The new dwelling will be the finest country place in Hillsboro, and with the exception of Mary Pauline Payne's home at Menlo Park, the most costly place on the peninsula. Construction will be of steel and reinforced concrete, with hollow tile partitions and fireproof construction throughout. Interior finish will be of hardwoods, Marble and tile. A large amount of ornamental plaster will be used. There will be the most improved system of heating, and vacuum and dumb waiters. Vacuum cleaning and a refrigerating plant will also be installed. The exterior of the dwelling will be faced with terra cotta. Plans are complete and figures for the work are being taken by the architects.

SACRAMENTO, STOCKTON & NORTHERN CALIFORNIA.

BRIDGE—Steel and concrete. Cost
not stated. Jelly Ford, Tehama Co. Cal.
Engineer, County Surveyor W. F.
Luning, Red Bluff Owners, Tehama
County. County Surveyor Luning in-
forms us that while his office has been
instructed to prepare plans for a high-
way bridge over the Sacramento River
at this point, that the recent high
water has made it impossible to get
soundings and complete the survey.
As soon as this work can be completed
plans will be drawn and complete in-
formation will then be published.

BRIDGE—Steel and concrete. \$25,000.
Dyerville, Humboldt Co., Cal. Engi-
neer, County Surveyor George W. Con-
ners, Eureka. Owners, Humboldt
County. Plans and specifications have
been approved for a steel and concrete
highway bridge over the South Fork
of the Bel River, and bids will be

called for shortly. Plans provide for
a structure 300 feet long and having a
roadway 21 feet wide. Complete infor-
mation can be secured from the County
Surveyor at Eureka.

SCHOOL—2 story and base, brick,
\$15,000. Galt, Sacramento Co. Cal. Archi-
tect, C. H. Russell, Humboldt Bank
Bldg., S. F. Owners, Galt Joint Union
High School. Bids opened for this
work have been taken under advice-
ment and all checks except four have
been returned. The work attracted an
unusually large number of figures. A
complete list of the bids may be found
under the heading of Sacramento,
Stockton and Northern California in
this issue.

Contracts Awarded.

FACTO A—Group of concrete build-
ings. Cost not stated. Sacramento,
Cal. Architect's name not given. Own-
ers, Libby, McNeil & Libby. Contrac-
tors, Thomas H. Day's Son, Mondrack
Bldg., S. F. Contract price not stated.
Note: It is understood that the own-
ers will expend in the neighborhood of
\$185,000 on a plant.

Galt School Work Proves Attractive.

Thirteen Figures Received for General
Construction. Four Firms' Bids
Under Advisement.

Bids were opened by the Board of
School Trustees at Galt, Sacramento
County, on Tuesday January 21st, for
the construction of the new two-story
and basement brick high school build-
ing. Plans were prepared by Archi-
tect C. H. Russell, Humboldt Bank
Bldg., San Francisco. The work proved
attractive to a number of firms and 13
bids were submitted for the general
construction. Bids have been taken
under advisement and all checks re-
turned except those of Graham & Jen-
sen, Peterson & Wilson, Bert T. Owsley
and O. B. Ackerman & Son. Bids were
asked for on the general construction
with the following alternatives: (a)
general construction; (b) substituting
common brick for pressed brick in rear
walls, deduct; (c) substituting wood
for galvanized iron in main cornice,
deduct; (d) omitting Rutty wall plugs,
deduct; (e) substituting pine for maple
flooring in study hall, deduct; (f) omit-
ting Silocel and substituting felt, de-
duct; (g) omitting Pacco damp-proof-
ing, deduct. The following is a com-
plete list of all figures received.

General Construction.

T. P. Frost: (a) \$42,000; (b) \$1,600;
(c) \$350; (d) \$300; (e) 275; (f) \$200;
(g) \$240.
Peterson & Wilson, San Francisco: (a)
\$40,253; (b) \$1,065; (c) \$500; (d) \$15;
(e) \$285; (f) \$470; (g) \$300.
F. C. Fawcett: (a) \$41,994; (b) \$500;
(c) \$400; (d) \$60; (e) \$200; (f) \$230;
(g) \$220.
Graham & Jensen, San Francisco: (a)
\$41,000; (b) \$1,500; (c) \$500; (d) \$300;
(e) \$250; (f) \$500; (g) \$500.
Bert T. Owsley, S. F.: (a) \$40,970; (b)
\$1,200; (c) \$375; (d) \$150; (e) \$125;
(f) \$300; (g) \$240.
McGillivray Constr. Co., Sacramento:
(a) \$43,980; (b) \$1,809; (c) \$295; (d)
\$110; (e) \$139; (f) \$250; (g) \$329.

Murcell & Haley, Sacramento (a) \$39,447; (b) omitted.
 J. H. Wygant and P. Gallagher: (a) \$41,900; (b) \$930; (c) \$435; (d) \$150; (e) \$15; (f) \$295; (g) \$240.
 H. B. Ackerman & Son, Oakland: (a) \$41,089; (b) \$1,700; (c) \$50; (d) \$100; (e) \$177; (f) \$117; (g) \$99.
 George W. Martin & Son, Sacramento: (a) \$42,050; (b) \$1,950; (c) \$233; (d) \$35; (e) \$130; (f) \$120; (g) \$220.
 Campbell & Turner, Sacramento: (a) \$43,370; (b) \$1,615; (c) \$350; (d) \$300; (e) \$220; (f) \$250; (g) \$240.
 Siller Bros., Sacramento: (a) \$45,590; (b) omitted; (c) \$512; (d) \$50; (e) \$137; (f) \$220; (g) \$250.

FRESNO, MODESTO, STANISLAUS AND CENTRAL CALIFORNIA.

BANK—1 story and base, brick. Cost not stated. Kingsburg, Fresno Co., Cal.

Architect, Eugene Mathewson, Fresno. Owners, First National Bank of Kingsburg. The preliminary plans for this building show a structure in the classic style with a large public space and general office, besides a private office for the president and a directors' room. Interior will be finished in hardwood, tile and ornamental iron and bronze. There will be special coin vaults. The exterior of the building will probably be faced with pressed brick. Plans are being prepared.

CHURCH—1 story, frame construction, \$10,500. Cross Landing, Stanislaus Co., Cal. Architect, John J. Foley, Monadnock Bldg., S. F. Owners, Roman Catholic Church. The building is to be designed in the Spanish Colonial style with the exterior faced with cement plaster. Roof will be covered with red metal tile. Interior will be finished in pine and ornamental plaster. The main auditorium will have a seating capacity of 350 people. The architect is now completing the working drawings.

CONVENTION HALL—Brick and concrete construction, \$45,000. Fresno, Fresno Co., Cal. Architect, C. K. Kirby, Jr., Fresno. Owners, City of Fresno. All bids recently asked for for the finishing construction of this building have been rejected, and new bids will be called for at once. The amount of \$45,000 is available for the work. Complete information can be secured from Architect Kirby.

LODGE HALL—2 story and base, brick, \$20,000. Taft, Kern Co., Cal. Architect's name not given. Owners, Odd Fellows Building Committee. Preliminary sketches show a building containing two stores on the first floor and a large lodge hall and offices on the second floor. Interior finish will be of pine and redwood. The exterior of the building will be faced with pressed brick. Plans will be out for figures shortly. Additional information will appear in an early issue of this publication.

Contracts Awarded.

FIRE HOUSES, 2, 1 story and base, frame, \$10,000. Bakersfield, Kern Co., Cal. Architect, O. L. Clark, Brower Bldg., Bakersfield. Owners, City of Bakersfield. Contractor, M. T. Kean, Bakersfield. Contract price, \$10,700. Other bids presented were: D. A. Evans, \$12,696; Brown & Paynter, \$14,875; and Geo. M. Wilkinson, \$11,800.

WATER MAINS AND HYDRANTS—Cost not stated. Bakersfield, Kern Co., Cal. Engineer, City Eng., Bakersfield. Owners, City of Bakersfield. Contractor, Max Gundlach, Bakersfield, water pipe, \$2,546.65; Greenberg & Sons, Bakersfield, 35 fire hydrants. Contract price not stated.

LOS ANGELES AND SOUTHERN CALIFORNIA.

RESIDENCE—2 story and base, frame, \$50,000. San Diego, Cal. Architects, Greene & Greene, Boston bldg., Pasadena. Owner, Mrs. Mary Jew. The dwelling is designed in the old English style with a plaster and hinge exterior ornamented with heavy beams. The first floor will be finished in oak throughout and the second in white enamel. All rooms will have hardwood floors. A central heating system and open fire places will be installed. A garage in keeping with the residence will also be erected. A large amount of concrete terraces are to be erected and landscape gardening on a large scale is contemplated. The work will be done by Day Labor.

CHURCH—1 story and base, reinforced concrete. Cost not stated. Long Beach, Los Angeles Co., Cal. Architect, Elmer Grey, Wright and Callender Bldg., L. A. Owners, First Church of Christ, Scientist. The structure will cover a ground area of 90x140 feet, and will be arranged for a large auditorium on the first floor and Sunday school rooms in the basement. All of the basement except two feet will be above ground. Construction will be of reinforced concrete with reinforced concrete floor slabs, steel roof trusses and a clay tile roof. Interior will be finished in pine and hardwoods. There will be a central heating system and vacuum cleaning plant. Art glass will be used in the windows. The exterior will be faced with cement plaster. Plans are complete and figures are being taken for the various parts of the work.

WAREHOUSE—3 story and base. Class A construction. Cost not stated. Los Angeles, Cal. Architects, Hudson & Munsell, Stimson Bldg., L. A. Owners, John A. Roehling Sons Co. The building will cover a ground area of 25,000 square feet. There will be a complete steel frame, brick walls, faced with blue pressed brick. Floors throughout will be of reinforced concrete. Metal window sash and frames and fireproof doors will be used. There will be three elevators. The front portion of the building will contain the general offices of the company and will be finished in oak. Plans are complete and figures are being taken on the work.

HOTEL—3 story and base, brick, \$15,000. Los Angeles, Cal. Architect, none. Owners, California Real Estate and Building Co., 621 South Spring St., L. A. The building will be erected at the corner of 6th and Ceres streets, and will cover an area of 75x100 feet. There will be one store besides the main hotel office and lobby on the first floor. Upper floors will be divided into 70 guest rooms and 18 baths. There will be steam heat, elevator service and a hot water heating plant. The interior of the building will be finished in pine and redwood with some oak and ornamental plaster used in the lobby. The exterior will be faced with pressed brick. The owners construct all of their own buildings, but will be in the market shortly for the various materials.

HOTEL AND STORE—2 story and base, brick. Cost not stated. Los Angeles, Cal. Architects, Austin & Pennington, Wright and Callender Bldg., L. A. Owner, Walter H. Fisher. The building will be 32x93 feet. There will be

stores on the first floor and 12 guest rooms on the second floor. The building will connect with a structure at the corner of Grand street, and the rooming house will be conducted by the same management. Interior finish will be of pine. The exterior will be faced with pressed brick. Plans are being prepared.

SCHOOL—1 story and base, brick, \$25,000. El Modena, Orange Co., Cal. Architect, H. M. Patterson, O. T. Johnson Bldg., L. A. Owners, El Modena School District. The building has been arranged to contain six standard size class rooms, teachers' rooms and principal's offices, besides a large auditorium seating 350 people. A complete stage will be a part of the auditorium. There will be a central heating system. Interior finish will be of pine. The exterior of the building will be faced with pressed brick. Plans are complete and figures are being taken. Plans can be secured from the architect.

SCHOOLS—2, 2 story and base, brick and frame, \$10,000. Orange, Orange Co., Cal. Architect, Fred H. Eley, Hervey-Pinley Bldg., Santa Ana. Owners, Orange Union High School District. These two buildings, the science building and manual arts building, will be 50x100 and 60x100 feet respectively. Interiors will be finished in pine throughout. Heat will be supplied from the present system. The exteriors will be faced with cement plaster. The cost price does not include the machinery and equipment which will be installed later. Plans are complete and figures are being taken. Bids will be opened by the Board of Education on February 21st. Plans can be secured from the architect.

APARTMENT HOUSE—3 story and base, frame, \$20,000. Long Beach, Los Angeles Co., Cal. Architects, Metcalf & Davies, Long Beach Bank Bldg., Long Beach. Owner, W. E. Babb. The building will be 12x70 feet and will be arranged to contain 36 rooms, which will be divided in 14 suites of two and three rooms each. All suites will have connecting baths and wall beds. Some hardwood floors will be used. A central heating system will be installed. The exterior of the building will be covered with cement plaster on metal lath. Provision is made for a garage in the rear of the lot. Plans are complete and the work will be done by Day Labor.

APARTMENT HOUSE—3 story and base, frame, \$16,000. San Pedro, Los Angeles Co., Cal. Architect, none. Owner, William Crocker, San Pedro. The building is to contain 54 rooms, which will be arranged in 23 suites of two and three rooms each. The building will cover an area of 40x110 feet. Interior finish will be of pine, redwood and some hardwood. A central heating system will be installed. All suites will be equipped with wall beds. Private bath rooms will be arranged for each apartment. The exterior of the building will be covered with rustic. Plans are complete and the work will be done by Day Labor.

APARTMENT HOUSE—3 story and base, brick, \$50,000. Pasadena, Los Angeles Co., Cal. Architect, A. L. Reed, 236 West Ocean Ave., Long Beach. Owner, Mrs. Edwin Grebel. The building will cover an area of 94x112 feet, and is to be arranged for 12 suites of three rooms, 40 suites of two rooms

and 12 one-room apartments. All suites will have wall beds and connecting baths. There will be steam heat, elevator service and a vacuum cleaning system. Interior will be finished in pine, redwood and hardwoods. Considerable tile will be used in the lobby and entrance vestibule. Bath rooms will have composition floors. The exterior of the building will be faced with pressed brick. Plans are being prepared.

APARTMENT HOUSE—2 story and base, brick, \$20,000. Glendale, Los Angeles Co., Cal. Architects, Pacific Home Builders, 331 So. Hill St., L. A. Owners, Pacific Home Builders. The building will cover an area of 100x60 feet. The first floor will contain four stores and the second floor four apartments of five rooms and bath each. All interior finish will be of pine or redwood. A hot water plant will be installed. All suites will have wall beds and private bath rooms. The exterior of the building will be faced with pressed brick. Plans are complete and the work will be done by Day Labor.

APARTMENT HOUSE—4 story and base, brick. Cost not stated. Los Angeles, Cal. Architect, C. C. Rittenhouse, Wilcox Bldg., L. A. Owner's name withheld. The structure will cover a ground area of 50x170 feet and will be arranged for 120 rooms, divided into two and three room suites. There will also be a large lobby, parlors and amusement room. All suites will have wall beds, private bath and separate entrances. Interior finish will be of pine and hardwood. Bath rooms will be finished in tile and will have composition floors. There will be steam heat, elevator service and a vacuum cleaning system. The exterior of the house will be faced with pressed brick. Plans are being prepared.

BANK AND OFFICES—7 story and base. Class A construction, \$100,000. Pasadena, Los Angeles Co., Cal. Architect, C. E. Whittlesey, Haight and Clayton Sts., S. F. Owners, Citizens' Savings Bank of Pasadena. The one-story building now on the site was designed to carry six additional stories and the original plans will be followed as closely as possible. Construction will be of reinforced concrete and absolutely fireproof throughout. The owners will probably select a local architect to make certain revisions in the plans and to superintend the work. Complete information is not available at this time.

CHURCH—1 story and base, stone and concrete, \$20,000. Los Angeles, Cal. Architect, R. M. Taylor, Douglas Bldg., L. A. Owners, Church of Jesus Christ. This work has been mentioned here before. The foundation work is completed and plans for a superstructure will be completed in a day or two. The exterior will be faced with Utah sandstone. Interior will be finished in pine and hardwoods. A central heating system is to be installed. Work will be carried on by Day Labor under the superintendence of Samuel Babey.

CHURCH—1 story and base, brick, \$10,000. Colton, San Bernardino Co., Cal. Architect, Norman F. Marsden, Broadway Central Bldg., L. A. Owners, Jewel Memorial M. E. Church. Plans are being prepared for a much larger church but only a portion of the structure will be erected this year. Construction will be of brick with the ex-

STORY ADDITION—Will be same brick. Interior finish will be of pine. The sum of \$10,000 is probable for construction of this addition, which will be completed as soon as possible.

BARABEE—1 story and base brick. Cost not stated. Los Angeles, Cal. Architects, Austin & Pennell, Wright and Callender Bldg. L. A. Owner, Nathan B. Barabee. The building will cover a ground area of 50x170 feet, and is to be designed for a commercial garage. The floor will be of cement. There will be large window frames and sash and overhead doors. Some structural steel will be used. The exterior of the building will be faced with pressed brick. Plans are nearly complete and figures will be called for shortly.

LOBBY HALL—1 story and base, Class B construction, \$55,000. Los Angeles, Cal. Architect, Albert C. Martin, Higgins Bldg. L. A. Owner's, Knights of Colum bus. The sketches which have been submitted provide for a four-story and basement building of Class B construction, 62x110 feet. The first and second stories will be devoted to the auditorium which will have a stage, gallery, lounge rooms, lobby, etc. The third story will contain the main lodge room, ante rooms, smoking rooms, kitchen and store rooms, and three quarters for the employees will be on the fourth story. There will be hand ball courts on the roof. The basement will contain the gymnasium, locker rooms, swimming pool and heating plant. The exterior will probably be faced with terra cotta. Working drawings will be completed at once.

HOTEL—1 story and base, brick and steel, \$200,000. San Diego, Cal. Architect, W. S. Hebbard, Grant Bldg., San Diego. Owner's name withheld. Plans for this building, which are now out for figures, show a structure covering a large ground area and arranged for stores and an arcade on the first floor. Upper floors will contain a large number of guest rooms. Construction will be fireproof. A contract will be awarded for the work by the first of February.

HOTEL ADDITION—2 story reinforced concrete. Cost not stated. Pasadena, Los Angeles Co., Cal. Architect, Myron Hunt, Hibernian Bldg., L. A. Owner, Wentworth Hotel Co. The two additional stories will add 150 guest rooms to the hotel. All rooms will have connecting baths. Construction will be entirely of reinforced concrete. The exterior of the building will be faced with cement plaster. A clay tile roof is specified. Bids are now being taken for the general construction, roof tile, plumbing, steam heating, electric work and bath room tile.

WATER SYSTEM—Cost not stated. Oxnard, Ventura Co., Cal. Engineers, Olmsted & Gillette, Wright and Callender Bldg., L. A. Owners, City of Oxnard. Attorney Blacklock of Oxnard has just received word from the Appellate Court that the bonds voted by the people of Oxnard over a year ago for the construction of a water and light system in that city are legal. Steps will be taken at once towards entering into contracts for the construction of the system.

CONSOLIDATION AND EXTENSION OF WATER SYSTEMS—Cost not stated. Riverside, Riverside Co., Cal. Engineers, Burns & McDonnell, Kansas City, Mo. Owners, City of Riverside. The above named engineers have been

retained by the city to prepare plans for the consolidation of the two water systems for the purchase of which \$1,600,000 in bonds were voted. A number of important extensions will also be planned.

STORES—1 story and base, brick. Cost not stated. Los Angeles, Cal. Architects, Morgan, Walls & Morgan, Story Bldg., L. A. Owner, D. Bottlinger. The building will be erected on Main street and will cover a ground area of 100x100 feet. A number of modern stories will be arranged for, all of which will have patent store fronts and plate glass windows. Interior finish will be of pine and redwood with some hardwoods used in the display windows. A cement floor will cover the entire area. The exterior of the building will be faced with pressed brick. Plans are complete and figures are being taken.

Contracts Awarded.

RESIDENCE—2 story and base, frame, \$20,000. Los Angeles, Cal. Architects, Hudson & Munsell, Stimson Bldg., L. A. Owner, N. Elsasner, Contractor, Thomas K. Miller, 3550 So. Figueroa St., L. A. This contract has been awarded on the percentage basis.

LOFTS—40 story and base, Class A construction, \$100,000. Los Angeles, Cal. Architects, Austin & Pennell, Wright and Callender Bldg., L. A. Owners, Knickerbocker Fireproof Building Co. Contractor, J. V. McNeil, Citizens' National Bank Bldg., L. A. Contract price, \$100,000.

LOFTS—7 story and base, reinforced concrete, \$70,000. Los Angeles, Cal. Architect, S. Tilden Norton, Title Insurance Bldg., L. A. Owner, J. Kahn, Contractor, J. V. McNeil, Citizens' National Bank Bldg., L. A. Contract price, \$70,000.

APARTMENT HOUSE—3 story and base, brick, \$35,000. Los Angeles, Cal. Architect, none. Owner, O. Wilson, Contractor, George M. Easton, Los Angeles Investment Bldg., L. A. Contract price \$24,250.

STEEL AND CONCRETE WATER TANK—\$9,000. Los Angeles, Cal. Engineer, County Engineer, L. A. Owners, Los Angeles County, Contractors, Security Contracting Co., Union Oil Bldg., L. A. Contract price, \$9,553.

SEWER SYSTEM—6 miles, \$550,000. Los Angeles, Cal. Engineer, City Dept. of Engineering, L. A. Owners, City of Los Angeles, Contractors, Holt & Jeffery, Hincley Block, Seattle. Contract price, \$528,844.34. Note: This sewer is known as the Arroyo de la Brea.

TILE AND MARBLE FOR 12 STORY OFFICE BUILDING—\$70,500. Los Angeles, Cal. Architects, Morgan, Walls & Morgan, Story Bldg., L. A. Owner, W. I. Hollingsworth, Contractor, B. V. Collins, 945 So. Los Angeles St., L. A. marble and tile work. Contract price, \$70,500.

PORTLAND AND OREGON.

APARTMENT HOUSE—1 story and base, reinforced concrete, \$30,000. Portland, Ore. Architects, Butterworth and Stephenson Co., Portland, Owners, Butterworth and Stephenson Co. According to the present plans the building will contain 22 apartments of which 18 will consist of three rooms with private bath, and the remainder will be two room suites. It is the intention of the owners to equip the building with disappearing beds,

built in refrigerators and an oil burning steam heating plant. Each suite will have private telephone connection, a gas range and complete plumbing fixtures. Provision is also made for installing a vacuum cleaning plant. The exterior will be plain with but little ornamentation, and the interior is arranged so that all rooms have outside light and ventilation. Separate bids are wanted for the heating, plumbing, tile work and wiring contracts only.

APARTMENT HOUSE—2 story and base, brick, \$25,000. Portland, Ore. Architect, C. A. Duke, Pailing Bldg., Portland. Owner, Edward Kleist. The building will cover an area of 100x100 feet. The first floor will be arranged for seven retail stores and the upper floor will contain six suites of four rooms each and a number of offices. There will be patent store fronts. Interior finish will be of pine. A central heating system will be installed. The exterior of the building will be faced with pressed brick. Plans for this work are being prepared.

STORES—1 story and base, brick and steel. Cost not stated. Portland, Ore. Architects, Emil Schacht & Son, Portland. Owner, Fred H. Brown. The building will cover an area of 90x100 feet. The space has been arranged for four stores and a moving picture house. There will be plate glass display windows with patent store fronts. Interior finish will be of pine and some hardwood. The exterior of the building will be faced with pressed brick. Plans are now being prepared.

HOTEL—3 story and base, brick and steel, \$40,000. Portland, Ore. Architects, Bennes & Hendricks, Henry Bldg., Portland. Owner, Otto W. Nelson. The building is to be 50x95 feet, and is arranged for five stories besides the hotel lobby on the first floor and a total of 44 guest rooms and 10 baths on the upper floors. There will be steam heat and running water in all rooms. The exterior of the building will be faced with pressed brick. Interior finish will be of pine throughout. Patent store fronts are specified. Plans for the work are now being completed.

UNION STATION—Class A construction, \$3,000,000. Portland, Ore. Architects, Emil Schacht & Son, Commonwealth Bldg., Portland. Owners, Hill and Harriman interests. A report from Portland states that the above mentioned architects have been commissioned to prepare plans for a union station. The report cannot be verified in this city and no details of the proposed structure are obtainable.

SEATTLE AND WASHINGTON.

STORES ALTERATIONS AND ADDITIONS—Concrete and brick construction, \$60,000. Seattle, Wash. Architect, Harlan Thomas, Ellers Bldg., Seattle. Owners, Arcade Bldg. The present front will be removed and an arcade effect will be constructed on both street frontages. Interior partitions will be removed. An automatic sprinkler system will be installed. New electric wiring, plumbing, painting and plastering are called for in the specifications. New store fixtures will also be constructed. Plans for this work are nearly complete and figures will be called for shortly.

APARTMENT HOUSE—3 story and base, reinforced concrete, \$175,000. Seattle, Wash. Architect, W. P. White,

Walker Bldg., Seattle. Owner's name withheld. This building will cover an area of 100x100 feet. The interior of the building is to be arranged for large apartments of from five to eight rooms each. There will be 25 suites. Interior finish will be of pine and hardwoods. All baths will be wainscoted with tile and will have composition flooring. Plans provide for steam heat, elevator service and a vacuum cleaning system. Construction will be fireproof throughout. The exterior of the building will be faced with white glazed terra cotta. Plans will be complete and ready for figures within the next thirty days.

CHURCH—2 story and base, brick and concrete, \$10,000. Seattle, Wash. Architect, B. Marcus Pretica, Empire Bldg., Seattle. Owners, Seattle Jewish Synagogue. Working drawings for this building are complete and specifications are being written. The building will be faced with white glazed brick. Interior finish will be of mahogany. Dome will be shingled with copper shingles. There will be a central heating system. Bids will be called for within a few days.

CAPITOL BUILDINGS—Class A construction, \$700,000. Boise, Idaho. Architect's name not given. Owners, State of Idaho. The legislature will shortly act on an appropriation of \$700,000 for completing the State Capitol buildings at Boise. It is understood that the measure is very favorably thought of and that no opposition will be raised.

COUNTY COURT HOUSE AND CITY HALL—7 story and base. Class A construction, \$1,000,000. Seattle, Wash. Architect, A. Warren Gould, American Bank Bldg., Seattle. Owners, City of Seattle and King County. Bonds to the amount of \$950,000 have been sold by the county and the architect reports that plans will be ready for figures by the middle of February. The structure is to cover an area of 240x240 feet and will have a complete steel frame, reinforced exterior walls and pressed brick facing. The Chamber of Commerce has had the plans experted and place an estimate of \$1,700,000 on the cost of the building.

LIBRARY—2 story and base, brick, \$35,000. Seattle, Wash. Architect, W. Marbury Somervell, White Bldg., Seattle. Owners, City of Seattle. The building, which has been mentioned here before, will contain an auditorium in the basement, two main reading rooms on the first and second floors and the stack rooms and librarian's office. There will be a central heating system. Interior finish will be of hardwoods and metal. Metal shelving will be used. The exterior of the building will be faced with pressed brick and terra cotta. Plans are complete and bids will be opened on February 3rd. Plans can be secured from the architect, J. T. Jennings is Secretary of the Seattle Public Library Committee.

Contracts Awarded.

BRIDGE—Steel and concrete, \$50,000. Port Angeles, Wash. Engineer's name not given. Owners, Clallam County Contractors, International Contracting Co., Central Bldg., Seattle. Contract price, \$50,000.

DOCK AND WAREHOUSE—Frame construction, wooden piles. Bellingham, Wash. Architects, Blackwell & Baker, Northern Bank Bldg., Seattle.

Owners, Inland Navigation Co. Contractor, A. J. Blisse, Bellingham. Contract price \$35,000.

Millionaires sometimes express their fancy in different ways, as often as otherwise in odd ostentation which is more or less common, according to the taste of the person who has acquired the money. Thus the mansion of Senator Clarke on Fifth Avenue, New York, has been the subject of many an architectural note and comment by people in all walks of life. So a recent report in the papers calls attention to the fact that the celebrated French Architect, Achille Duchene has prepared plans for a new drawing room to be constructed in Clarence Mackay's Roslyn, Long Island, home that will cost \$500,000. Achille Duchene is noted for his work upon the ancestral homes of Europe and the Royal villas that he has planned. This drawing room to cost half a million must be a princely addition to the home of the American multi-millionaire.

The advertising pages of a magazine, and particularly of a trade paper, are the most interesting part of the publication in many ways. If one should look over the files of such a paper for a period of twenty years back he would find a more complete record of progress in the advertisements than in the news columns themselves. No matter what particular line of work in which you may be engaged you will always find something to interest you as there you will find the work of an army of business men who are offering to the public some special product or the best work they can give at the present day.

Any intelligent man can find much of what is new, much of interest and much of what is valuable to him in perusing the advertisements in any trade paper.

The man who throws his trade paper aside without studying closely its advertising pages is not only missing a lot of interesting information but he is also failing to inform himself broadly on business opportunities, methods, and appliances that are well worthy of his intimate consideration. Take a look through the advertisements of the Daily Pacific Builder and convince yourself.

The offer of 40 millions or thereabouts of the Board of Supervisors and the Mayor for the property of Spring Valley Water Company is certainly liberal enough. That the company would accept it is hardly to be expected. As it is the offer allows the company a profit of millions even on their watered capital. It would seem that some legislative action will have to be taken to allow the city to acquire the property over the heads of the corporation officials and make adequate return therefor.

There seems to be no disposition to come to any agreement other than to hold up the city for an exorbitant price.

Sermons in stones, books in brooks, and precepts in rhyme are not only found in Shakespeare and the daily effusions of Walt Mason but even the women are bursting into this sphere which has hitherto been allotted to man. Here is one from a country newspaper, the West Plains Missouri

Searchlight, and the author is Mrs. Anna J. Richart:

"When the mighty locomotive gets to slippin' on the track, acts so aggravatin' halky, won't do nothin' but go back, then they pour the gritty and shower right down on them shinin' rails and with elephantine power, off the whoppin' monster sails. So it is in life, dear people, when your hopes and plans won't go and you hang your heads in sorrow and you think you stand no show, just dig up your sand and use it, spread it thick on life's sleek track and then, presto! you'll be findin' that your luck is comin' back. For you see if you set weepin' and a howlin' all the day, you obstruct the gladsome highway, sure to get in someone's way, and your mournin' gives 'em earache, headache, backache, heartache too; just get up and laugh and caper, see if they don't caper too!"

LAHONTAN DAM NEARS COMPLETION.

RENO (Nev.), January 21.—Uncle Sam's engineers and construction workers are now forcing away on the last unit of the construction of the big Lahontan Dam of the Truckee-Carson project, which, when completed, will transform a portion of the great Nevada desert into an immense lake, and store the waters of the Truckee and Carson Rivers for the irrigation of 200,000 acres of fertile desert land in Churchill County, and will reclaim the "Forty Mile Desert" and turn it into beautiful, fertile, productive farms upon which several thousand new Nevadans will live and add to their own wealth and the wealth of the State. When this dam is completed and the canals leading from it are carrying water into the desert, the United States will have spent more than \$5,000,000 in going so.

Once in the prehistoric days there was in a portion of what is now Churchill County, an immense lake, known to geologists and historians as Lahontan Lake. The Reclamation Service is again forming this basin into a lake to hold the waters of the Truckee and Carson Rivers and a part of the waters of the Walker River.

The Government in 1903 built the first unit by constructing the big dam at Derby, on the Carson River, which diverts a portion of the waters of the river into the canals which are now quenching the thirst of the Churchill County farms and which will later lead the flood waters of the river into the Lahontan Lake for the additional canals to be constructed. This dam and the canals for the irrigation of about 50,000 acres of land were completed in 1908.

The Reclamation Service in 1911 commenced the second unit, the construction of the Lahontan dam. This is being built across the Carson River, 15 miles from Fallon and will form a lake having a capacity of 350,000 acre feet and the waters so impounded will be used to irrigate the remaining 150,000 acres of the Forty Mile Desert. The dam will be 800 feet long, 110 feet high, 400 feet wide at the base and 20 feet wide at the top. It will be completed this year.

The latest engineering machinery is used in the construction of the dam. Trains carry out dirt from the crete dam is being built. A big power plant was constructed on the Carson

PATENTS

WILLSON & CO., Patent Attorneys** Box 239 Willson Bldg. WASHINGTON, D. C.

River. This also furnishes Fallon and nearby farms with power and light. The plant will be maintained for the operation of the various canal and dam gates, for the lighting of Fallon and furnishing power for the sugar factory and other industries there.

The Government only a few days ago completed the big cement basin which is on the side of the dam into which the aqueduct for the feeding of the canals will lead.

This work has furnished labor for hundreds of men and engineering problems for many efficient engineers. A large number of horses have been used in grading, but most of the work has been done with steam shovels, with electric cranes and with small trains.

BILLS FOR TWO STATE HIGHWAYS.

SACRAMENTO, January 23.—Two bills providing for important State highways have been introduced in the Senate, one for a road to be known as the Pioneer State road and the other as the Bakersfield-Ventura road.

The Pioneer road bill was introduced by Senator A. Caminetti of Amador and asks for an appropriation of \$50,000 to

improve the highway from Auburn to Mariposa. This road is one of the oldest in the State, and is over a route where much of the gold mined in the days of '49 was hauled to the outside. It is one of the most historic portions of the State, and with a proper road will be visited by thousands of persons every year, according to Caminetti.

Senator Lee C. Gates of Los Angeles presented a bill calling for the construction of a State highway from Bakersfield to Ventura, a distance of 129 miles. No appropriation is asked for this road.

RECORD OF THE PARCEL POST.

WASHINGTON, January 23.—The number of parcel post stamps printed and distributed up to this date is 339,500,000. Prior to January 1, when the new service was established, 153,292,455 stamps were issued. In the first three weeks of the system's operation, 186,207,545 stamps have been supplied to postoffices.

The Bureau of Engraving and Printing is being forced, in order to meet the demand, to print the stamps at the rate of 12,000,000 a day.

The total value of the parcel post stamps distributed up to this date is \$18,011,120. Chicago received 46,000,000 stamps, valued at \$2,673,000, thus leading all other cities in the country. St. Louis was second with 15,200,000 stamps, valued at \$930,000; New York City third, with 15,000,000 stamps, valued at \$770,000; Philadelphia fourth with 5,000,000 stamps with a value of \$397,000, and Boston fifth, with 3,000,000 stamps, valued at \$125,000. These five cities received \$5,200,000 stamps, with a total of \$4,895,000.

BUILDINGS AT DURHAM.

DURHAM (Butte Co.), January 23.—As soon as the weather settles, the extensive building operations already started will be resumed.

On the Stanford ranch, buildings which will cost in the neighborhood of \$15,000 have been started. Everything is in readiness for the erection of the new Southern Pacific Depot, and the material and foundation of the Pratt mansion is ready for the workmen.

OAKLAND ANTIOCH NEARLY COMPLETED.

The completion of the Oakland and Antioch tunnel, which was accomplished last week, proves an epoch in the construction of this new road. The bore, which is 3537 feet long, runs through the Oakland hills at a point two miles southeast of the old tunnel of the well-known tunnel road. It is interesting to note that it follows the line of Alameda and Contra Costa counties. While the entire system will be provided with automatic block signals, special equipment is being installed in the tunnel.

Practically all of the construction work from the west portal of the tunnel to Fortieth street and Shafter avenue is completed. From this point trains will run over the tracks of the Key Route to the ferry slips, which system will be employed in landing traffic in San Francisco. This route is over Shafter avenue to Tenescual creek, along this creek to Kohler creek canyon, and through Kohler creek canyon to the bore.

In a statement regarding the progress of the Oakland and Antioch Secretary H. A. Mitchell said: "Regular train service between Oakland and Bay Point will be installed March 1st. We could run trains on February 15th, but to assure the public of reliable service this extra time will be given in order to get the road bed in the best shape possible. Trains will be running to Sacramento not later than July 1st.

CONSULTING EXPERT

Heating, Ventilating, Electrical Wiring, Plumbing, Etc.

Expert Architects assistant for laying out work as above. Highest references. Formerly Mechanical Engineer for State Department of Engineering also Bureau of Architecture of San Francisco.

Editorial Comment.

Construction work during the month of January in San Francisco went on with considerable vigor considering the surrounding circumstances. Recorded contracts for private work showed for brick and concrete, concrete construction and fire proof buildings a total of \$1,038,834; frame construction, \$114,339; to this may be added the contract for the Machinery Hall at the Exposition Grounds for \$472,000; and for alterations and additions to existing buildings amounting to \$132,182. In addition to this there were contracts let by the City for construction amounting to \$54,477; street and sewer work amounting to \$154,824. The State Board of Harbor Commissioners also awarded the contract for the construction of Pier 37 to the Thompson Bridge Co. for \$475,000. And a further addition may be added the contracts of the Federal Government let during the month for construction within the city limits and which amounted to \$339,334. This included the contract for the sub-treasury building awarded to Grant Fee and which amounted to \$384,300. Taking all the work for the month the contracts let amounted to \$3,141,190 which is a very good showing and indicates that a considerable amount of money is to be spent in construction work during the coming year.

To make comparisons with former years with the amount of contracts let for private work outside of city contracts and government work the following may be noted:

January, 1913	\$2,047,335
January, 1912	1,692,810
January, 1911	1,242,806
January, 1910	2,273,044
January, 1909	3,116,298
January, 1908	1,994,242
January, 1907	5,225,264
January, 1906	1,589,815
January, 1905	2,267,694
January, 1904	1,078,541

It is thus seen that the month has been an average one even for private work. It stands better than January of last year by about \$350,000. And compared with last month, or December 1912, it stands an almost even figure, the total for that month being \$2,106,235. So the month has come along with its total of over 2 millions for private contracts and another million for City, State and Government work done within the city limits gives at least an encouraging outlook for the year 1913.

The death of Judge De Haven, of the United States District Court, calls attention to the fact that an able and honest jurist need never fear recall at the hands of the people no matter how much power were given them in the

premises. While federal judges are not now a subject of recall the reputation of the judge from Humboldt County was such that he had the confidence of the entire people whom he served. He commanded the respect of all reputable attorneys and the officers of his court. He had the confidence of the people. For not only did he show ability in his office and learning in the law but above that he was courageous and honest and decided the cases that came before him with an eye single to justice and not to the service of any interest or set of men.

When such a man is on the bench, if these characteristics be known, no scheme or cabal would ever work him any serious damage. The people are collectively all right at heart. It is only under misinformation that they go wrong and we are a whole lot more liable to have a crooked judge than to have a good judge recalled.

The Chronicle comments upon a bill introduced by Assemblyman Bohnett for the purpose of establishing a school for training people for government positions and the science of government. The Chronicle is pleased to call it a school for tax eaters and intimates that the assemblyman is crazy. That may or may not be as the merits of the bill is not discussed but there is no argument in the assertion that taxes are already too high. According to the Chronicle no person in the employ of the State or Government is to be viewed in the capacity of a workman but simply as the holder of sinecure or a remittance man. This may be the Chronicle's idea of the work that the state secures. It certainly is not the correct one. The government is a big employer of labor in all capacities. There is no reason why the employees should not pass the efficiency list just as they do in private employment. As an instance of this one can take the Government Post Office. There the employees certainly give as much of their time and they return as affective work as they do in private corporations. Whether or not the school for state employees is justified is an open question but to refer to a state employee as a tax eater with the inference that he gives nothing for his salary is a libel upon most of the people who do the work. The fault of the whole matter lies in the spoils system of party government where people are appointed to jobs for the simple reason that they rendered party services and not because of any fitness for the position. In Australia and New Zealand when an officer is to be chosen for a municipality a competitive examination is held and they endeavor to secure the best qualified man for the place. Efficiency in public service is just as essential as in private life and any steps looking to improvement are to be commended.

The Chronicle states that for years the United States has led the world in the manufacture of agricultural implements, but the exports for 1912, as compiled by the Department of Commerce and Labor, reached the unprecedented total value of \$10,000,000. And this, too, under the "Iniquitous" protective tariff.

But it did not mention the fact that one can buy the same farming implements in South America about one-third cheaper than he can buy them in America where they are manufactured. It used to be a stock argument that these implements were sold in foreign markets simply as an overstock. Forty millions is too much to ascribe to an overstock and it would be interesting to know what explanation the beneficiaries of the protective tariff have to make of the high cost to American farmers of machinery that is sold for far less in foreign lands.

A Frenchman in describing the genius of Napoleon said that he was a master of infinite detail; that he almost knew the men of his army individually; and that the plans of his battles were formulated in the most painstaking manner and nothing was left to chance except that which emergency demanded. In the great undertaking of the Panama canal the Assistant Editor of the American Machinist has described its success as due to attention to detail. In the first instance he cites the detail of sanitation, the destruction of the mosquito which was the first essential step to be taken. Then with modern machinery the excavation was made possible, and by the use of concrete the great dams and locks were capable of being constructed in record time.

The peculiarity and humility of the climate have made many attentions to machinery necessary. For instance, belting must be looked after and a waterproof article provided. Recreation centers for men, congenial places for men and women and whole cities constructed with the greatest regard for sanitation.

The Panama canal is the greatest teacher that the modern contractor could have. It is construction on a gigantic scale, and it is construction with the greatest regard for cost and efficiency systems that the world has ever seen. Any contractor could learn from the methods employed in the Panama canal. It is the greatest organization of construction forces that the world has ever seen. It has cost more, and will cost more, than any other undertaking of any time. The detail of cost, the detail of machinery, and the detail of organization are the great factors that have made the Panama canal possible and have made it a success.

An American banker is said to have offered one million dollars for the secret of Dr. Friedman's cure for tuberculosis. If the German investigator has really found a serum or cure for the great white plague it is nothing more than right that he should be paid for it. For the divine enthusiasm that leads men to devote the working part of their life to the amelioration of the race should be rewarded. For often the man who has spent his life in the hardest kind of work and investigation finds himself destitute in his old age and

among the public he has served there is no one to extend a helping hand when he needs it.

The Friedman cure for consumption has attracted much attention both in Europe and in this country. Objection has been made that Dr. Friedman seeks to keep the discovery secret and in that he is unprofessional and casts a doubt upon the merit of the discovery. But the reports of investigations into the matter seem to indicate that there is merit in the discovery and at least some progress has been made in combating the ravages of the dread disease.

Too little credit is given to those scientists who toil in the laboratory or field to advance the outposts of knowledge. These are the real men who advance the world. Kings live and have their day and the world goes on without change. Great statesmen and great generals may change the political map of the world. But the man who advances human knowledge, overcomes dread disease or prolongs and makes more efficient the life of men has advanced the race for all time. These are the real giants in the realm of intellect, the real names that will live when all others are forgotten. If Dr. Friedman has really found a remedy for consumption it is well worth a million dollars or any sum that might be paid for it. His demanding it is a different thing as he seems to look upon his discovery as his private property to be used for his own benefit and reward.

Western Canada has shown a remarkable progress. Some interesting features and comparisons can be obtained from the figures of building construction during the year 1912. The returns from the principal cities are as follows:

Calgary building permits for the year total \$20,394,220, or approximately \$1,000,000 increase over 1911.

At Victoria the total was \$8,040,000, compared with \$466,000 in 1911.

The permits issued at Vancouver in 1912 reach a total of \$19,400,000, as against \$17,659,460. The largest month in the year in this report was October, when the total was \$3,597,795. The municipalities of Point Grey and South Vancouver had totals for the year of \$3,400,000 and \$2,600,000, respectively.

At Winnipeg the total for 1912 was \$20,475,350, not including permits for the Agricultural College buildings and the building in the vicinity of Transcona and at outlying points.

The value of building permits issued at Edmonton during the year amounted to \$14,446,819, compared with \$3,672,260 in 1911.

At Medicine Hat permits to the value of \$2,826,239 were issued as compared with \$743,272 in 1911.

At Nelson (B. C.) the building permits issued totalled to \$273,865.

At Moose Jaw the total for the year was \$4,411,010, while the total for 1911 was \$2,431,736.

The total for the year at Prince Albert was \$2,006,925—the total for 1911 was \$921,595, and for 1910, \$542,475.

The returns for Saskatoon for the past five years are as follows: 1908, \$115,625; 1909, \$1,002,455; 1910, \$2,817,777; 1911, \$1,920,000; 1912, \$7,628,405.

The returns from Regina for the years from 1908 to 1912, inclusive, are as follows: 1908, \$516,656; 1909, \$744,-

479; 1910, \$2,416,288; 1911, \$5,088,110; 1912, \$6,132,700.

Lethbridge shows a total of \$1,426,445, as compared with \$1,033,980 in 1911.

Brandon's 1912 total was \$1,138,514. In 1911 permits to the value of \$1,-108,129 were issued.

A bill has been introduced into the legislature to make the territory in the vicinity of Mount Tamapais a game preserve. This is a needed measure for several reasons. The mountain itself is one of the great scenic places of the world. It is at the very door of San Francisco. It not only furnishes the most splendid panoramic view in the world, but is a place for an outing and week end journey for countless numbers of trappers and nature lovers who spend their holidays in the inspiring country north of the Bay.

Of the great assets of San Francisco and the bay cities is the surrounding country and scenic places at their very doors. In view of the city and an hour's walk from the railroad stations one can come upon the wild deer in their native haunts. These places should be preserved. Deer and quail and other game should be allowed to breed undisturbed in the wild canyons that skirt the mountain and furnish ample retreat for all kinds of game. Not only that, but, if hunting is allowed around the mountain the lives of trappers are endangered during the open season. Amateur sportsmen with high power rifles are blazing away indiscriminately on the hillsides and the chances are that some one walking on the trails are more likely to be shot than the deer.

If a game preserve is provided in the canyons adjacent to the mountain it will conserve the game and the natural overflow into the grounds where hunting is allowed will allow all a better chance to enjoy a sport that is now appropriated by a few.

In the current issue of the Scientific American an interesting experiment is described in the construction of a solar engine used in Egypt in a suburb of Cairo. The engine consists of five parabolic mirrors, each about 200 feet long, so arranged and mounted that they can be rotated to face the sun at all times. In the face of these mirrors are arranged troughs covered with glass through which water is passed in a thin film and by the focused heat of the sun's rays are converted into steam. The steam is used in generating power in an engine which is used to pump water from the Nile for irrigation purposes. The work of the engine is said to have demonstrated its practicability and efficiency. The principal trouble they have had has been with the troughs, which were made of zinc, not being able to stand the heat. Steel troughs are now being made and there seems to be every prospect of success.

Since steam has been used as a motive power it has been the dream of inventors to harness the rays of the sun. In this mechanism the possibility has at least been demonstrated. Over \$100,000 has already been expended and the inventor claims that the fact has been proven that water can be pumped by this means at one-third the cost if fuel were used.

SANITATION OF BUILDINGS.

Problems in Domestic Engineering and the Answer as
Viewed By An Expert.

By Erwin L. Weber,*

From The Architect, Builder and Engineer.

*Paper read before the Victoria Chapter, British Columbia Society of Architects.

It affords me extreme pleasure to have the opportunity of addressing you this evening on the subject of Sanitation of Modern Buildings. Although sanitation deals largely with water, it is nevertheless an extremely dry subject on which to lecture; so I deemed it advisable to have several lantern slides prepared to illustrate the principles involved.

As you all know the plumbing ordinances differ considerably in various localities so that designs of sanitary equipment for eastern buildings would hardly be adequate to illustrate the principles involved in western ordinances. The slides presented are all for local installations and will serve to illustrate the requirements of local conditions. They are slides of plans prepared by me.

As my work on these buildings involved the design of the entire equipment, you will find the plans somewhat complicated as they show not only the sanitary equipment, but also the electrical and mechanical equipment for these buildings. They will also serve to show the close relation which these different items bear to each other.

Domestic Engineering.

It may not be amiss to say a few words regarding that branch of engineering work known as domestic engineering. We have learned to regard engineers as being divided into three large groups, electrical, mechanical and civil. But with the rapid modern development it has become necessary to specialize in certain portions of these divisions and numerous numerous types of engineers have developed.

The electrical field has been divided into electric railway engineers, high tension engineers, telephone engineers, telegraph engineers, illuminating engineers, etc.

The mechanical field has been divided into steam engineers, gas engineers, railway engineers, shop economist, refrigerating engineers, heating and ventilating engineers, etc.

The civil field has been divided into bridge engineers, waterworks engineers, municipal roadbed engineers, structural engineers, sanitary engineers, etc. Of all these subdivisions, the engineers which are of the greatest service to architects are the illuminating, the heating and ventilating and the sanitary engineers. So it became the custom of architects to employ such engineers to design and supervise the installation of their particular branch of the work. This system gives excellent results but has one great disadvantage, best expressed by the old adage, "Too many cooks spoil the broth."

Equipment Plans.

By having three separate equipment plans—electrical, mechanical and sanitary—prepared by three different engineers it invariably follows that the architect in checking over the various plans finds a hot air duct, a soil pipe and several runs of conduit occupying the same space; and oftentimes a beam or girder is also found in this same locality. A consultation of the architect and the three engineers follows with the result that the heating engineer insists that the hot air duct must occupy that space, the sanitary engineer will tell him that the soil pipe cannot possibly be removed and the electrical engineer insists that this is the only logical place for his conduits. The result is that the architect is placed in a rather embarrassing position in deciding which piece of apparatus should occupy the space in question and much valuable time is wasted.

Then he comes to the inter-connection of the various systems. The heating apparatus requires switches, feeders and cutout appliances for fan motors, electric driven pump hoists, etc.; and the sanitary equipment requires similar provisions for sewage ejectors, vacuum cleaners, air compressors, house pumps, etc., which must be provided for in the electrical equipment.

The sanitary equipment requires steam or electrical heaters and connections for hot water generation, steam and exhaust connections for house pumps, fire pumps, etc., all of which must be provided under other contracts.

Again the heating equipment requires numerous drains for grease traps, drip pans, heating returns, blow-off basins, etc., as well as cold and hot water supplies which must be provided for under the plumbing contract. Thus we have a great complexity of what might be termed "missing links" for which definite provisions must be made in the various contracts, and it is necessary to state definitely where each contract begins and ends and which portion of the "missing link" shall be furnished by the heating, plumbing or electrical contractors to avoid "extras" of all varieties from making their appearance.

The Domestic Engineer.

Necessity is the mother of invention. The necessity of having one man at the stern to safely pilot all the various pipes, ducts, etc., through a building to secure the proper inter-connection of all equipment, and to save time which would otherwise be wasted in numerous conferences and settlement of disputes has ushered into the field another class of engineers, known as a domestic engineer. Kindly, gentlemen, do not conflict this with a domesticated engineer. They are two different kinds of creatures.

A domestic engineer should possess the following qualifications:
He should understand the principle

and practice of that portion of electrical engineering which pertains to the illumination and miscellaneous power requirements, and the wiring of buildings for light, power, telephone, clock and other low tension services; that portion of mechanical engineering which deals with the heating and ventilation of buildings, refrigeration, elevator equipment, isolated power plants, shafting, etc., and that branch of sanitary engineering bearing upon the water supply and drainage of buildings, the disposal of garbage and refuse, gas distribution and fire protection.

He should be proficient in the proper use of language and be able to write clear and concise specifications.

A knowledge of law especially that portion pertaining to contracts is very essential. He should understand architectural details and be able to interpret structural plans and know where and how to provide openings in floor slabs and locate hangers without weakening the structure. And above all he should not have any connections or relations with contractors and not be interested in the sale or manufacture of any articles which enter into the construction of a building.

Of the various items of domestic engineering my talk tonight will bear mainly upon the sanitation of buildings.

As the dry and air carriage system of wastes is used in this country only in the removal of garbage we will confine ourselves entirely to the water carriage system of removing waste matter.

Water and Sewage.

We will not discuss water supplies and the disposal of sewage but assume that a water supply system and a sewer are available for our purposes and confine ourselves to the sanitary system within the building. The sewerage system must provide for the removal of waste water from culinary sources and bodily ablation and urine; such pipes are known as waste pipes. The pipes conveying excreta are known as soil pipes. Pipes conveying rain water are known as leaders or conductors and those conveying miscellaneous wastes as drain pipes.

Wherever surface waters abound sub-surface drainage must be provided to keep the lowest floor of the building dry as well as to prevent the formation of an hydraulic head under the floor as such would result in breaking the floor from below and permit an inflow of surface waters. The disposal of such waters is best accomplished by laying field tiles with open joints in a gravel bed upon which the floor is laid and running these drain lines to a basin. The discharge pipe from this basin should dip down below the basin water level and be vented on the sewer side. The basin thus becomes a large pot trap.

Regarding the size of pipes: It has been the practice to make all sewer-

are placed entirely too large and the outlets from fixtures too small. In old cities we often find a lavatory with a slender outlet with the equivalent area of a 3/4-inch pipe discharge into a 2-inch waste pipe. Such an installation causes the water to run slowly or rather to dribble through the waste pipe. Advance practice is to provide fixtures with large waste outlets and connect them to comparatively small waste pipes.

This practice insures a strong flush of the waste pipe every time the fixture is discharged and prevents the collection of solid waste matter to the side of the pipes.

Many plumbing ordinances now permit 3-inch connections to water closets and it is not uncommon to find 100 or so and it is not uncommon to find 100 or pipe with a surprising decrease in the frequency of obstructions occurring in the system.

As all these various fixtures are connected to the sewer some provision must be made to prevent the sewer air from entering the building. Many devices known as traps have been designed for this purpose. The most effective are those which provide a water seal between the drain pipe and the fixture. The maintenance of this water seal has been the cause of the bewildering nightmare of complications which is required by most plumbing ordinances.

House Trap Is Costly.

The compulsory use of a house trap is one of the most illogical requirements of many ordinances. It is not only a very costly piece of apparatus, but it prevents the use of the most efficient system of sewer ventilation known, that of ventilating the sewer through the drain pipes of each building. The thorough sewer ventilation thus secured prevents putridative decomposition in the sewer and makes sewer air less objectionable.

Pathogenic germs cannot pass from the sewer through the house pipes as they adhere to the moist surfaces of the same and die before they have wandered many feet away from the sewer. Traps may lose their seals from various causes, principally syphonage, back pressure, evaporation and capillarity. A body of water flowing down a stack draws air after it and a partial vacuum in the piping system. This vacuum is sufficient to draw the water out of traps unless some provision is made to supply air between the stack and the trap. Hence the use of the back vent pipe. This same body of water flowing down the stack will force a volume of air before it, which in its endeavor to escape may blow the seal out of a trap. This phenomenon does not become dangerous unless the stack is very high and the body of water has a high velocity of flow.

Evaporation occurs in dry seasons, due to air passing over the seal of the trap, and under conditions favorable to evaporation, traps may lose their seal in four days or less. Threads, lint or hair lying in a trap will act like a wick and drain the trap of its seal by capillary action.

It is the endeavor of sanitation to devise a trap which will not lose its seal through these various causes, will not require a vent pipe, and at the same time be self-cleaning. Much progress has been made along these lines and many cities now permit the

use of anti-syphon traps without the use of vent pipes.

We will leave the subject of traps, as the discussion of same requires volumes.

The discussion of hot and cold water supply systems is best taken up in connection with the slides.

Fire Protection.

Regarding fire protection systems, when an army is in the field the supply train is always in the line of retreat. Stand pipes should be similarly located, that is on the fire escape. Interior stand pipes and hose are of little value in fighting a fire; but are of great value in checking a fire in its beginning, and are, therefore, best located in a central position where they are quickly reached from any part of the building. Vacuum cleaning outlets are advantageously located in the same position.

The question often arises whether to use cast iron pipe with calked joints or wrought iron pipe with recessed drainage fittings, known as the Durham system. This depends upon a large number of conditions. In general it may be said, that for fireproof buildings the Durham system is best applied as it does not need such frequent anchoring and is less liable to leak.

In frame construction and for small buildings cast iron pipe is somewhat preferable as the lead joints are more flexible and water closets are not liable to be raised above the floor level when the building shrinks.

Regarding cost: If the installation has many fittings and short pipe runs the cast iron is usually cheaper; but if the fittings are few and the runs are long the Durham system costs less.

This is due to the higher cost of screwed fittings on the one side and the higher cost of continuous runs of pipe with calked joints on the other side.

ORGANIZATION THE BASIS OF INDIVIDUAL SUCCESS.

By Herbert Scates, in The Construction Record.

Organization is the "Shibboleth" of our day. The master minds are placing themselves in the midst of forces that are moving the world onward, but they are supplementing themselves with the assistance of other men and minds. In short, they are organizers. Combination, association, federation, etc., are the magic words of our modern financial, political and industrial world. It requires power to do things that are worth doing. In unity there is power. The very texture of modern civilization is the story of associating forces for a common end. The old days of the individualist are gone. The socializing of forces is the characteristic feature of business today. Not only the large enterprises, but the small businesses depend for their success upon organization more today than ever before in the annals of time.

Of prehistoric man we know but little other than that furnished by scientists, but from the very dawn of history we perceive the value of organization in promoting civilization by protecting the accumulation and achievements of the thrifty and industrious. Organization is co-existent with progress. Without it no project

of any magnitude can succeed.

Trade organizations have for their private idea the betterment of man's condition materially, but they do not altogether divorce him from advancement in things connected with his intellectual evolution. Intelligent organization must have for its inspiration the establishment of that brotherhood of man which yearns for higher ideals and the recognition of man's dependence one upon the other, insuring his mutual protection and security. The world's history from the creation down to the present day is proof that organization is the basis of success; not alone in the individual, but for the home, the state, the church; in fact, every department of our governmental and business existence.

It has long since been accepted as beyond question, a recognized fact, that it does not conduce to good order to allow each man to do as may seem best to him in his own mind. Unity of action must exist. Our own National Government, of which we are so justly proud, is a lesson in organization. The individual can do but little; the state is mighty, but a confederation of the states is all powerful, and so in local organization the assembling and mutualizing of the individual interests by association and co-operation, the concentration of individual effort, the distribution of responsibilities and the furnishing to the units of organization the combined information of all, must be productive of practical benefits.

The efficiency of organization depends upon recognition and the acceptance of an individual responsibility by its members to prescribe rules and laws, a loyalty to certain objects, and an appreciation of the fact that a distribution of benefits cannot be accomplished through any rule of law based upon the selfish purposes of individuals.

There is no place in the councils of a live business organization for the narrow-minded man. The narrow man who becomes a factor in an organization will soon show evidences of expansion. The all wise man will soon realize his limitation, and all members, through a more just appreciation of their associates, will feel the momentum of tested ways and means. In proof that organization is the basis of individual success, in the last analysis we must agree that all members' interests are mutual in at least one thing, namely, the success of the organization itself. So, then, the interests of the wholesaler, the retailer, the general and sub-contractors are conserved, inasmuch as the success of one is dependent upon the success of the other. They are simply spokes in the wheels of progressive, effective organization, which means the pooling of the intelligence, the patriotism, the sentiment, the ideals, the energy and the influence of progressive people whose interests and environments are mutual.

The more progressive and broad-gauged an organization, the greater its usefulness. Organization itself needs to be improved and perfected, as experience discloses the futility of some old methods and the necessity of adopting new.

In closing, let me advise that you sow the seeds of confidence, co-operation, and reciprocity in the fertile soil of harmonious association, that your harvest may be rich in that human

interest which will distribute abundant benefits, producing an organization that will be the basis of individual success.

APPLICATION OF TILE TO CONCRETE.

By John Wynkoop.

The intensely practical advantages of concrete have so impressed themselves upon the public that there is no longer any question as to its use from that point of view. The beauty and treatment of concrete surfaces, because of this utilitarian development, have not received the important study warranted by the nature of the material. A few authorities advocate leaving concrete surfaces just as they are when the rough forms are removed. However, meritorious this may be, the majority of architects look upon concrete as a material which from its very nature gives a most extended opportunity in surface decoration and color. Architecture in stone is essentially dependent upon architectural lines—shade and shadow—whereas architecture in brick or concrete is dependent upon the actual treatment of their surfaces for their character and effect.

From this viewpoint, which is that of the majority of architects, any material enriching the surface of a concrete wall without interfering with its structural strength is possible and worthy of consideration. Of stone, brick pigments and tile, the latter is, undoubtedly, best adaptable because of its beauty and extreme simplicity in application. In France, Italy and America, the application of tile to concrete surfaces has been considerably exploited, so that many actual examples exist upon which to base an opinion as to the effect produced. From these and from the general principles of design involved, it may be seen that extreme accuracy of tile setting as we know the material in general use is harmful to fine effects and not to be desired. Concrete, especially for exterior use should be sufficiently rough and uneven to insure artistic surface modelling when seen from a considerable distance. This necessitates a free and varied treatment of any tile applied to it, both as to setting and as to coloring. The color of the concrete itself, in the main, determines the color scheme of such tiles as are applied to it. Rough and deeply colored tiles are found to blend most easily with the rough surface of the concrete, although it can easily be imagined how certain bands or spots in tile could be both highly colored and finished to bring out accents sought after by the designer.

Especially in country house work the application of tile must be concentrated largely because of the costliness of entirely covering the concrete. As a matter of effect, from an artist's point of view, what a concrete surface needs is contrast with some material which is more refined and decorative than itself. Panels, band courses or scattered designs in tiles so long as they do not become all-over patterns, seem particularly advisable in this kind of work. As much depends upon concentrating this decoration as does upon an intelligent se-

lection of colors and an artistic placing of the individual tiles. Without doubt there can be no limit to the way in which tile employed in this way may be treated. Practically any size and shape, any color, any surface are being manufactured continually, and along with this molding and special colors and combinations may be obtained, provided the manufacturer considers the amount to be ordered as warranting him to produce special ideas in this way.

In fact, a rather new and certainly delightful avenue of designs has been opened to the architect by the increasing prominence of concrete and its allied arts and materials. *Mantel Monthly*

MEXICAN BUSINESS NOTES.

New buoy.—Tests are to be made at Vera Cruz of a new boat buoy which carries a lamp at an elevation of 29 feet from the water's surface, giving it a range of 7 to 8 miles. The first of these boat buoys will be placed near the Pajaros Reef.

Water concession.—A company organized in Michoacan by Georges Pinzon, of French nationality, has received a concession from the Department of Fomento granting the right to use 20,000 liters of water per second from the Zitacuaro River.

Towns of Mexico.—The Bureau of Statistics in Mexico City is issuing free to applicants a list of the towns of the Republic with the number of inhabitants. The data for the States of Colima, Aguascalientes, and Morelos has been completed and the work on the other States is progressing rapidly.

Telegraph and Telephone lines.—The Department of Communications has issued a decree that projected private telegraph and telephone lines may be constructed only on approval of the department, and that in case of necessity the Government has the right to take possession of such private lines for its own uses without the payment of indemnity.

Customs returns.—Collections at the customhouses of the Republic during December amounted to \$2,617,500, the largest sum ever collected in a single month. For November the collections were \$2,268,000, and for October \$1,998,000. From July to December, 1912, the total collections were \$12,500,000, against \$10,700,000 for the same period in 1911.

Tropic productions.—Reports from the Territory of Tepic on the agricultural production during the past year state that the corn crop amounted to more than 48,000,000 kilos, worth \$900,000; sugar cane, 5,500,000 kilos, worth \$140,000; forage, 3,750,000 kilos, worth \$168,000. Other products including cotton, chili, and bananas for export were valued at \$2,350,000.

A GREAT CANAL RECORD.

Last year there passed through the "Soo" canal, connecting Lakes Superior and Huron, 72,500,000 tons of freight in 20,000 cargoes. This is not only the greatest record of the canal, but for any in the world. The Suez canal is by far the largest in length, cost and traffic of any of those concerned in ocean-going trade, but its traffic three years ago was less than 16,000,000 tons.

If it were possible to assure the Pan-

ama canal any such business as that at the Soo its cost would be repaid in a few years at the toll rates which have been promulgated. Of course, nothing of the sort is expected. The Soo canal derives its importance from the fact that it connects the great wheat fields of the Great Lakes, and the return cargoes of coal and merchandise are heavy. The growth of this traffic in recent years has been extraordinary, and for 1912 the increase was almost 40 per cent over 1911.

It is a humiliating fact that the shipping of our Great Lakes is alone of a size which conforms to the wealth and dignity of this Nation. Only about 8 per cent of our foreign commerce is borne in American bottoms, and it has been decreasing steadily for many years. No foreign ships may engage in the coastwise trade, but the latter is not nearly so large as might be supposed, owing to the cheapness of railway transportation. It was to give this branch of our shipping a chance to develop that Congress made in its favor the Panama canal toll exemption which Great Britain opposes and which we are asked to arbitrate.

That American energy, constructive ability and seamanship are advanced to the best rank is shown by the prosperity of the shipping industry on the Great Lakes. It could be advanced on all the seven seas if Congress would provide legislation by which it would be possible to meet the competition of ships built at low prices and navigated at a cost impossible by Americans.—*Philadelphia Inquirer*.

ABOUT AMERICAN PRESIDENTS.

There have been to date twenty-seven Presidents of the United States. Nineteen of them were lawyers when elected, one was a planter, one a farmer, two were statesmen, two were soldiers and one was a "public official."

In early life Washington was a surveyor; John Adams, Garfield, Arthur and Cleveland were teachers; Fillmore and Johnson were tailors; Lincoln was a farm hand and Roosevelt a publicist.

Seventeen of the Presidents were college bred or university men—the Adamses and Roosevelt at Harvard, Jefferson, Monroe and Tyler at Williams and Mary College, Madison at Princeton, William Henry Harrison at Hampden-Sidney, Polk at the University of North Carolina, Pierce at Bowdoin, Buchanan at Dickinson, Grant at West Point, Hayes at Kenyon, Garfield at Williams, Arthur at Union, Benjamin Harrison at Miami University and Taft at Yale. Washington, Jackson, Van Buren, Taylor, Fillmore, Lincoln, Johnson, Cleveland and McKinley had no college training.

Five of the Presidents were educated in Southern colleges. Nine of the Presidents were born in Virginia, two in North Carolina, one in South Carolina, two in Massachusetts, three in New York, one in New Hampshire, one in Pennsylvania, six in Ohio, one in Vermont and one in New Jersey.

Another score will have to be added now to the list for Virginia, and another also to the number of Presidents educated in Southern colleges.—*Philadelphia Evening Telegraph*.

Firms dealing news on special classes of buildings such as Banks, Churches, Schools, Hotels, etc., will find such items all classified and grouped under proper headings, commencing on this page. These same items are again repeated under "LOCALITIES" in the last part of our news department.

APARTMENT HOUSES—

SAN FRANCISCO—Apartment house, 5 story and base, Class C construction, \$175,000. Architect, Creighton Withers, SW Powell and California Sts., S. F. Owner, L. H. Sly. This building will be erected on a full Fifty Vara lot recently purchased by Mr. Sly at the southwest corner of Post and Leavenworth streets. Plans are complete and show a building covering the entire holding, with the exception of light court and yard space. Interior will be arranged for a total of 300 guest rooms, divided into two and three room suites with baths and private entrances. Interior will be finished in pine and redwood with some oak and ornamental plaster in the reception hall. There will be steam heat, elevator service and wall beds. A vacuum cleaning system will also be installed. The exterior of the building will be faced with cement plaster. Plans are complete and the work will be done by Day Labor.

SAN FRANCISCO—Apartment house, 3 story and base, frame, \$5,000. Architects, O'Brien Bros., Clunie Bldg., S. F. Owner's name withheld. The building will be erected south of Market street and will be arranged for two and three room suites. All interior finish will be of pine. The exterior of the building will be covered with rustic and shiplap. A central heating system will be installed, and all rooms will be supplied with hot water. Plans are now being prepared.

STOCKTON, SAN JOAQUIN CO., CAL.—Apartment house, 3 story and base, frame, \$10,000. Architect, Walter King, Elks' Bldg., Stockton. Owner, George Smith. The building will be arranged for a number of two and three room suites with bath and wall beds. Interior finish will be of pine and redwood. Furnace heat will be installed. Considerable marble and tile will be used. The exterior of the building will be covered with rustic. Plans are complete and figures are being taken.

WATSONVILLE, SANTA CRUZ CO., CAL.—Apartment house, 2 story and base, brick and concrete, \$15,000. Architect, W. H. Weeks, 75 Post St., S. F. Owner, J. H. Jensen. The building will be arranged for a store on the first floor and modern two and three room apartments on the upper floors. A central heating system will be installed. Interior will be finished in pine and redwood. Some oak floors will be used. There will be private baths and wall beds. Bath rooms will be finished in tile. The exterior of the building will be faced with cement plaster. Plans are being prepared.

LOS ANGELES, CAL.—Apartment house, 5 story and base, reinforced concrete. Cost not stated. Architects, King & Taylor, Consolidated Realty Bldg., L. A. Owner, T. J. Douglas. The building will cover an area of 55x144 feet and has been arranged for 133 guest rooms. Apartments will consist of two and three rooms each with wall beds and private baths. Interior will

be finished in pine and imitation of mahogany or birch with tile and marble in the entrance. There will be steam heat, elevator service and a vacuum cleaning system. Floors will be of concrete slabs. Bath rooms will have cement floors and the wainscot. The exterior of the building will be faced with cement plaster. Plans are now being prepared.

SAN FRANCISCO—Apartment house, 6 story and base, reinforced concrete, \$55,000. Architect, David Salfeld, Clunie Bldg., S. F. Owner, F. J. Klimm. This building has been mentioned here before. Revised plans have now been completed and figures are being taken by the architect. The structure will be erected in the north line of Ellis street near Leavenworth, and when completed will be one of the most modern apartment houses in the city. Suites will be arranged in two and three rooms each with private baths and wall beds. Interior finish will be of pine, redwood and hardwoods. Ornamental plaster will be used in the entrance and lobby. There will be steam heat, elevator service and a vacuum cleaning plant. The exterior of the building will be faced with pressed brick.

SAN FRANCISCO—Apartment house, 6 story and base, Class A construction, \$110,000. Architect, Frederick H. Meyer, Bankers' Investment Bldg., S. F. Owners, Trowbridge and Perkins. The apartment house will be erected in the south line of Sutter street west of Mason and will cover nearly a Fifty Vara lot. Construction will be Class A throughout with a steel frame and exterior walls faced with pressed brick. Interior will be arranged in two, three and four room suites with wall beds, private baths and all other modern conveniences. There will be steam heat, elevator service and a vacuum cleaning system. Interior partitions will be of hollow tile. Plans are being prepared.

SAN FRANCISCO—Apartment house, 6 story and base, Class C construction, \$150,000. Architect, Frederick H. Meyer, Bankers' Investment Bldg., S. F. Owners, Schmiedell Estate. The building will occupy a full Fifty Vara lot at the southeast corner of Post and Leavenworth streets. Only preliminary plans for the building have so far been prepared and details are not available. Suites will probably be arranged in two and three room apartments. All of the latest improvements will be provided for including wall beds and vacuum cleaning. There will be steam heat and elevator service. The exterior of the building will probably be faced with pressed brick. Working drawings are to be completed as rapidly as possible.

BERKELEY, ALAMEDA CO., CAL.—Apartment house, 3 story and base, frame, \$25,000 or more. Architect, C. O. Clausen, Phelan Bldg., S. F. Owner's name withheld. Preliminary plans for one of the most modern apartment house structures in Berkeley are being

615 Phelan Building, San Francisco

prepared and complete information will be published later. Suites will be of the two and three room type and there will probably be in the neighborhood of 14 to 20 contained in the building. Details of construction can not be given until the working drawings are started.

LOS ANGELES, CAL.—Apartment house, 4 story and base, brick. Cost not stated. Architect, Leonard L. Jones, 1 W. Hellman Bldg., L. A. Owner, W. Paden. The building will contain 110 rooms, which are to be arranged in two and three room suites. All suites will have wall beds and connecting baths. Plans also provide for steam heat, elevator service and a vacuum cleaning system. Interior finish will be of pine, redwood and some hardwood. Ornamental plaster will be used in the lobby and reception rooms. Bath rooms will be finished in tile and will have cement floors. The exterior of the apartment house will be faced with pressed brick. Plans are nearly complete and figures will be called for at once.

LOS ANGELES, CAL.—Apartment house, 3 story and base, frame. Cost not stated. Architect, Fielder Stingluff, Security Bldg., L. A. Owner, F. D. Turner. The building is to cover an area of 49x140 feet and has been arranged to contain 54 guest rooms, lobby and parlors. Suites will consist of two and three rooms each. All apartments will have wall beds and private baths. Interior finish will be of pine and hardwoods. Bath rooms will be finished in tile. Considerable marble and tile will be used in the entrance vestibule and lobby. There will be steam heat, elevator service and a vacuum cleaning system. The exterior of the building will be covered with cement plaster on metal lath. Plans are being prepared.

PORTLAND, ORE.—Apartment house, 4 story and base, brick and steel. Cost not stated. Architect, none. Owner, J. D. Wharton. A well known contractor, R. E. Waxeell, is handling the project and will erect the building. The building will be 50x100 feet and will be in the nature of an addition to the present four-story apartment house known as the Melchior. There will be a total of 50 apartments of the two and three room type. Plans provide for steam heat, elevator service and a vacuum cleaning system. Interior will be finished in pine and hardwoods. The exterior of the building will be faced with pressed brick. Sub-bids will be called for as soon as plans can be completed.

BANKS.**Contracts Awarded.**

OCEAN PARK, LOS ANGELES CO., CAL.—Bank, 2 story and base, brick, \$20,000. Architects, Ye Phany Building Co., Title Insurance Bldg., L. A. Owners, Merchants' Commercial and Savings Bank. Contractor, S. W. Bryant, 308 Hill St., Santa Monica. Contract price, \$19,982.

FACTORIES & WAREHOUSES.

SEATTLE, WASH.—Warehouse, 6 story and base, reinforced concrete, \$60,000. Architect, Robert Brown, 115 10th Ave., Seattle. Owner, George A. Smith. While plans have been prepared for a six-story structure only three stories will be erected at this time. This work has been estimated to cost \$45,000. Plans provide for an eight-ton elevator. No interior finish will be used. The exterior of the building will be faced with cement plaster. There will be metal window sash, frames and fireproof doors. An automatic sprinkler system will be installed. Plans are being prepared.

LOS ANGELES, CAL.—Warehouse, 6 story and base. Class A construction. Cost not stated. Architect, E. T. Flaherty, 1 W. Hellman Bldg., L. A. Owners, Bekin Van and Storage Co. The building will be 74x90 feet and of the reinforced concrete type, including the walls, floors and roof. Interior partitions will be of hollow tile. There will be metal window sash and frames and fireproof doors. An automatic sprinkler system will be installed. A heavy freight elevator is specified. The exterior of the building will be faced with cement plaster. Plans are being prepared and when complete the work will be done by Day Labor.

SEATTLE, WASH.—Factory, 5 story and base, reinforced concrete. Cost not stated. Architect, John Graham, Lyon Bldg., Seattle. Owners, Ford Motor Car Co. The company has sold the original site purchased last year and have bought on Roy and Valley streets. The new site has an area of 92,760 square feet, considerably more than the former location. Plans will be revised to meet the new requirements, and the building will be erected as soon as possible. Construction will be fireproof. The estimated cost of the building planned for the former site was placed at \$350,000 and this structure will be even more.

FLATS.

SAN FRANCISCO—Flats, 2 story and base, frame, \$4,000. Architect, none. Owner, James Elliott, 261 4th Ave., S. F. The building is to be erected on a lot 27½x56 feet, and has been arranged for two modern flats of five and six rooms each. All interior finish will be of pine or redwood. Some oak flooring will be used. There will be open fire places and tile mantels. Bath rooms will also be finished in tile. The exterior of the building will be covered with rustic and cement plaster on metal lath. Plans are complete and the work will be done by Day Labor.

SAN FRANCISCO—Flats, 3 story and base, frame, \$7,000 Architect, C. O. Clausen, Phelan Bldg., S. F. Owner, Paul de Bernardi. The building will be erected on Stockton near Greenwich

street and has been arranged to contain three flats of five and six rooms each. Interior finish will be of pine and redwood. There will be both open fire places and gas grates. Mantels will be of brick. The exterior of the building will be covered with brick veneer to the first floor line and with rustic above that point. Plans are complete and a contract will be let at once.

SAN FRANCISCO—Flats, 2 story and base, frame, \$3,000. Architect, none. Owner, Ferdinand Elvin, 1115 6th Ave., S. F. The building will cover an area of 25x46 feet and is arranged for two flats of five and six rooms each with bath. All interior finish will be of pine or redwood. Some oak floors will be used. There will be open fire places and brick or tile mantels. The exterior of the building will be covered with rustic and shiplap. Plans are complete and in the hands of the owner who will go the work by Day Labor.

SAN FRANCISCO—Flats, 3 story and base, frame. Cost not stated. Architect, John J. Foley, Menadnock Bldg., S. F. Owner's name withheld. The building will be erected on Laguna and Cedar streets and will be arranged to contain three flats of five rooms and bath each. Interiors will be finished in tile. There will be open fire places and brick or tile mantels. The exterior of the building will be covered with rustic and shiplap. Plans are complete and figures are being taken.

SAN FRANCISCO—Flats and store, 3 story and base, frame, \$6,500. Architect, C. O. Clausen, Phelan Bldg., S. F. Owner, Mrs. N. A. Gosliner. The building is to be erected at the corner of Francisco and Grant avenue, and will be arranged for one store on the first floor and four apartment flats of three rooms each on the upper two floors. Interior will be finished in pine throughout. Gas grates and tile mantels will be used. The exterior of the building will be covered with shiplap and rustic. Plans are complete and figures have been taken. A contract will be awarded within a day or two.

GARAGES.

OAKLAND, CAL.—Garage, 1 story and base, frame. Cost not stated. Architect, none. Owners, City of Oakland. Plans for an additional garage to be erected in the Corporation Yards are complete and figures have been advertised for. Bids will be opened on February 6th. Plans and specifications can be secured from the City Clerk. Work is to be done under the direction of the Superintendent of Streets. The official proposal appears in another column of this issue.

HEPPNER, ORE.—Garage, 1 story and base, reinforced concrete. Cost not stated. Architect, E. E. McClaran, Lumber Exchange Bldg., Portland. Owner, S. P. Garrigue. The building has been designed for a commercial garage and will cover an area of 43x100 feet. The floor will be of concrete. Special gasoline storage tanks are provided. Interior of the front portion of the building, which is to be used as a salesroom, will be finished in pine and hardwood. The exterior of the building will be faced with cement plaster. Plans are complete and figures are being taken.

LOS ANGELES, CAL.—Garage, 2 story and base, brick and steel. Cost not stated. Architects, Morgan, Wallis

& Morgan, Story Bldg., L. A. Owner, J. A. Graves. The building will cover a ground area of 85x150 feet, and has been designed for a commercial garage and salesroom. The first floor will be of cement except in the salesrooms where a tile floor is to be used. There will be copper window sash and frames, hardwood and pine trim and special gasoline storage tanks. The exterior of the building will be faced with pressed brick. Plans are being prepared for the work and contracts will be let within a few days.

Contracts Awarded.

LOS ANGELES, CAL.—Garage, 1 story and base, brick and concrete. Cost not stated. Architects, Architectural Designing Co., L. A. Owner, R. L. Kihbro. Contractor, J. E. Crough, 1211 West 39th St., L. A. Note: The contract has been taken on a percentage basis. The building will be 40x70 feet.

GOVERNMENT WORK AND SUPPLIES.**Roosevelt-Mesa Transmission Line.**

The Secretary of the Interior has awarded contract to the Chicago Steel Products Co., of Chicago, Ill., for furnishing steel tower tops and structural material for the reconstruction of the Roosevelt-Mesa transmission line, Salt River irrigation project, Ariz., at a total cost of \$225,569, f. o. b. cars Chicago. The change is made to give increased efficiency to the service, the new line to be constructed on the suspension plan. Contracts have also been awarded for the line material necessary to effect the change. Items 1, 2, 3 and 4 for insulators and suspension clamps have been awarded to Pierson, Roeding & Co., of San Francisco, Cal., at a total cost of \$10,160 and to John A. Roehling's Sons Co., of California, San Francisco, Cal., for items 5, 7, 10, 13, 14, and 16, covering guy clamps, thimbles, connectors, telephone wire, steel ground wire and guy wire at a total cost of \$7,200.

Salt River Indian School.

The Commissioner of Indian Affairs, Washington, D. C., has awarded to Borchers & Olin, of Phoenix, Ariz., the contract for constructing a brick school house at the Salt River Indian School, Ariz., at \$7,559.

Mare Island, Cal., Magazine.

The contract for the construction of a magazine at the U. S. navy yard, Mare Island, Cal., bids for which were opened January 11, has been awarded to Gutleben Bros., San Francisco, Cal., at \$8,450.

Likely Indian School, Cal.

J. A. Hunt, of Fort Bidwell, Cal., has been awarded the contract by the Commissioner of Indian Affairs, Washington, D. C., for the construction of a frame day school building at the Likely Indian Day School, Cal., bids for which were opened January 4 at \$1,875.

San Francisco, Cal., Stone Work.

Grant Pee, San Francisco, Cal., has been awarded the contract for making certain repairs to the stone work in connection with the U. S. Mint, San Francisco, Cal., at \$1,985.

Reclamation Work.

The following proposals were received at Malta, Mont., January 10 for earthwork on the Dodson North Canal, Mlla River project, Mont., specifications No. 222.

Bid 1. Maney Bros. & Co. by H. G. Wells, Boise, Idaho.

2. Carlson, Chindahl & Co., Spokane, Wash.

Schedule 2.

Class 1. 200,000 cubic yards excavation—Bid 1, 24c; 2, 29c.

Class 2. 5,000 cubic yards excavation—Bid 1, 50c; 2, 10c.

Class 3. 500 cubic yards excavation—Bid 1, 75c; 2, \$1.

10,000 cubic yards of overhaul—Bid 1, 2c; 2, 2c.

Total—Bid 1, \$51,075; 2, \$60,700.

Plumbing Fixtures, Presidio, San Francisco, Cal.

All bids received December 23 by the depot quartermaster, Presidio, San Francisco, Cal. for installing plumbing fixtures in building No. 37 have been rejected. The quartermaster has been directed to purchase the material in the open market and perform the work by day's labor.

West Canal Extension.

The Secretary of the Interior has awarded contract to John Palmgren and copartners for the construction of schedule 2, West Canal extension, Uncompahgre Valley irrigation project, Colo. The work involves the excavation of 7,600 cubic yards of material, 800 feet of tunnel, and 10,000 feet, B. M., of timbering. Contract price is \$11,390.

HALLS AND SOCIETY BUILDINGS.

ORLAND, GLENN CO., CAL.—Lodge hall, 3 story and base, reinforced concrete, \$25,000. Architect, C. L. Stiles Berkeley. Owners, Masonic Hall Association of Orland. The building will be 90x40 feet, and has been arranged for a bank on the first floor and lodge rooms, offices and a banquet hall on the two upper floors. A novel feature provided for in the plans is the heating of the entire building by electricity. The exterior of the building will be faced with cement plaster and cut stone trimming. Interior finish will be of pine, redwood and hardwood. Plans are complete and figures are being taken.

SANTA ROSA, SONOMA CO., CAL.—City hall and jail, 2 story and base, brick and steel. Cost not stated. Architect, L. M. Turton, Napa. Owners, City of Santa Rosa. This work has been mentioned here before when Architect Turton's plans were selected in competition with a number of other architects. Bids are now being called for on the work and will be opened on February 18th. The official proposal appears in this issue. Bids will be taken on the work as a whole, for the structural steel, cell work, return hot water heating system and vault work.

SANTA BARBARA, SANTA BARBARA CO., CAL.—Association building, 3 story and base, brick and steel, \$50,000. Architect, E. Russell Ray, associated with Winsor Soule, Santa Barbara. Owners, Young Men's Christian Association. The structure will be 120x91 feet, with concrete foundation and basement, plaster exterior over brick,

steel beams and columns, and composition roof. The first floor will contain a large lobby finished in marble and tile, offices, library and game room, with hardwood floors and oak finish. Thirty bedrooms, with baths, wash rooms and two class rooms will occupy the second floor. The basement will contain a gymnasium, 55x70 feet, with spectators' gallery, a training room 18x35 feet, plunge with glazed tile lining, shower baths, toilets, and a steam heating plant. The exterior of the building will be faced with pressed brick. Plans are complete and figures will be called for before the middle of February.

PASADENA, LOS ANGELES CO., CAL.—Lodge hall, 3 story and base, brick, \$35,000. Architects, Foss Designing and Building Co., 100 East Colorado St., Pasadena. Owners, Odd Fellows Temple Association. The proposed building is to cover an area of 50x98 feet and will contain banquet room and kitchen in the basement, stores on the main floor and lodge halls, library and offices on the second and third floors. A central heating system will be installed. The exterior of the building will be faced with pressed brick. Plans are being prepared and effort made to raise sufficient funds for the construction.

ST. HELENS, ORE.—Lodge hall, 3 story and base, brick and concrete, \$25,000. Architect, E. Kroner, Worcester Bldg., Portland. Owners, St. Helens Masonic Temple Association. The building will be arranged for stores on the first floor and lodge halls, offices and a large banquet room on the two upper floors. There will be steam heat. Interior finish will be of pine and hardwoods. Plans have been out for figures before but bids ran too high and revision was necessary. This work has been completed and new figures are to be taken at once.

—HOSPITALS—

STOCKTON, SAN JOAQUIN CO., CAL.—Hospital fire protection system. Cost not stated. Architect, State Department of Engineering, Sacramento. Owners, State of California. Plans for the installation of a complete fire protection system at the State Hospital at Stockton are complete and figures are being taken. Bids will be opened by the State Board of Control in Sacramento on February 24th. Plans and specifications can be secured from the State Department of Engineering.

FRESNO, FRESNO CO., CAL.—Hospital, 2 story and base, steel and concrete. Cost not stated. Architects, Starbuck & Clark, Fresno. Owner, Dr. Sample. The building will cover an area of 150x150 feet. Interior has been arranged for a number of private rooms, two wards, surgical and operating rooms and business office. Interior will be finished in pine and hardwoods with considerable tile and marble. There will be a central heating system and a number of special mechanical features. The exterior will be faced with cement plaster. Plans are complete and figures are being taken.

LOS ANGELES, CAL.—Hospital, 3 story and base, reinforced concrete. Cost not stated. Architect, Frank L. Stiff, Grosse Bldg., L. A. Owners, Westlake Hospital Association. Bids for this work have been received and

LIST ?
If not, write to

White Bros.

5th & Brannan Sts. San Francisco

taken under advisement. All figures were somewhat in excess of the amount available, but the owners will probably make arrangements to let contracts on the present plans. The lowest bid was presented by Charles G. Ross, Grosse Bldg., and he will probably be awarded the work.

HOTELS.

SAN FRANCISCO—Hotel, 3 story and base, brick and steel, \$30,000. Architect, Joseph Cahen, 45 Kearny St., S. P. Owner, Mr. Kemp. The building will be erected on 3rd street, near Polson, and will be arranged for stores on the first floor and lodgings above. A central heating system will be installed and hot and cold water will be supplied to all rooms. Interior finish will be of pine throughout. The exterior of the building will be faced with cement plaster. Plans are now being prepared for the work and figures will be called for shortly.

SAN FRANCISCO—Hotel, 14 story and base. Class A construction, \$550,000. Architect, G. A. Applegarth, Call Bldg., S. P. Owners, Clift Estate. This work has been mentioned here a number of times before when the plans were in the preliminary stage. The owners have recently acquired an additional piece of property, which now gives them a full Fifty Vara lot, and they have decided to increase the height of their building to 14 stories. Construction will be of steel and reinforced concrete, with a complete steel frame, concrete exterior walls, roof slabs, floors and interior partitions. The hotel will contain a total of 300 rooms and baths besides the main lobby, entrance and office. There will be a steam heating system with oil burning plant, elevators and a vacuum cleaning plant. Interior finish will be of hardwood, metal and tile. Bath rooms will be finished in tile and cement. Office and lobby will be handsomely finished in hardwoods and ornamental plaster. The exterior of the building will be faced with cement plaster. Steel plans are now complete and figures will be called for at once. The balance of the work will be out for figures within a few weeks.

SAN FRANCISCO—Hotel addition, 7 story and base. Class A construction. Cost not stated. Architects, Cunningham & Politeo, First National Bank Bldg., S. P. Owner, Charles and Margaret Stewart. The building will be erected on a lot adjoining the present Stewart Hotel, and will be similar in

architectural design and interior arrangement. The new addition will add a total of 150 rooms and baths to the present hotel. There will be a steel frame and exterior walls of artificial stone. Interior partitions will be of tile. There will be elevator service, steam heat from the present plant and a vacuum cleaning system. Interior finish will be of pine and hardwoods. Bath rooms will be finished in tile. Plans are complete and figures are being taken.

SAN FRANCISCO—Hotel, 3 story and base, brick, \$15,000. Architects, Smith & Stewart, 244 Kearny St., S. F. Owner, Gong L. Toy. This building will be similar to a number of other hotel and commercial buildings recently designed for San Francisco's Chinatown by the same architects. The new structure will contain about 25 rooms and several baths. Interior finish will be of pine throughout. The entire structure will be occupied by the hotel. The exterior of the building will be faced with pressed brick. Plans are now being prepared.

SAN FRANCISCO—Hotel, 5 story and base. Class C construction. Cost not stated. Architect, August Nordin, Mills Bldg., S. F. Owners, Thomas O'Day and James McLaughlin. The building will be erected in the south line of O'Farrell street and will have a frontage of 46 feet and a depth of 90 feet. The first floor will contain, besides the hotel lobby and offices, two modern stores. Upper floors will be divided into about 90 rooms and baths. Interior finish will be of pine and redwood with some oak and ornamental plaster in the lobby. There will be steam heat, elevator service and a vacuum cleaning system. The exterior of the building will be faced with pressed brick. Plans are now being prepared.

SAN FRANCISCO—Hotel, 4 story and base. Class C construction. \$90,000. Architect, August Nordin, Mills Bldg., S. F. Owners, Franklin Realty Co. This building is to be erected on O'Farrell street near Larkin, and will contain about 120 rooms and baths. The first floor will be arranged for a large and attractive hotel lobby, offices and reception rooms. The building will be heated by steam. There will be elevator service and a vacuum cleaning plant. Interior finish will be of pine, redwood and hardwoods. Bath rooms will be finished in tile. The exterior of the structure will be faced with pressed brick. Plans are being completed as rapidly as possible and figures will be called for within a few days.

LOS ANGELES, CAL. — Hotel, 12 story and base. Class A construction. \$400,000. Architects, Train & Williams, Exchange Bldg., L. A. Owners, Local Syndicate Hotel. This project is being promoted by R. T. McMillen, 233 Consolidated Realty Bldg., who has secured a long term lease on property on Spring street between 4th and 5th streets. The site has a frontage of 60 feet and a depth of 160 feet. Only preliminary plans have been prepared, but these show a building covering the entire area and containing a total of 250 guest rooms. No further details of the construction can be given at this time. Notice will be made in these columns from time to time as the work progresses.

OCEAN PARK, LOS ANGELES CO., CAL.—Hotel, 6 story and base, rein-

forced concrete, \$50,000. Architect's name not given. Owners, Stineman & Kramer, Ocean Park. All bids received for this work have been rejected and plans will be revised. Hugo Eckert was the lowest bidder on the general construction at \$11,010. New bids will be called for by the owners within a few days.

Contracts Awarded.

LOS ANGELES, CAL. — Hotel, 3 story and base, brick, \$30,000. Architect, none. Owner, Mrs. Hannah W. Baker. Contractors, Milwaukee Building Co., Wright and Callender Bldg., L. A. Contract price, \$30,000.

LOS ANGELES, CAL. — Hotel, 5 story and base. Class B construction. \$45,000. Architect, none. Owner, Adolph Schwartz. Contractors, Richards-Neustadt Construction Co., Wright and Callender Bldg., L. A. Contract price, \$45,000.

RAILROAD CONST., STATIONS STATIONS AND EQUIPMENT.

SEATTLE, WASH. — Freight and passenger stations, 1 and 2 story and base, brick and steel, \$60,000 and \$50,000. Architect's name not given. Owners, Northern Pacific Railroad Co., Seattle. The freight depot will be built on Terry avenue and will be two stories high and cover an area of 30x300 feet. The passenger station is to be erected on Fremont avenue and will be one story high and cover an area of 60x170 feet. The passenger station will have a pine and hardwood interior trim, a central heating system and other special features. The exterior of both buildings will be faced with brick. Plans are complete and figures are being taken.

RESIDENCES.

SAN FRANCISCO — Residence, 1½ story and base, frame, \$2,000. Architect, none. Owner, A. R. Larson, 282 Dolores St., S. F. The dwelling will contain 6 rooms and bath. All interior finish will be of pine or redwood. Oak floors will be used in the dining and living rooms. There will be open fire places and tile or brick mantels. Tile will be used in the bath room and kitchen. The exterior of the dwelling will be covered with rustic and shingles. Plans are complete and in the hands of the owner who will do the work by Day Labor.

SAN FRANCISCO—Residence, 2 story and base, frame, \$5,000. Architect, E. E. Young, 251 Kearny St., S. F. Owner, Thomas Scoble. This dwelling will be erected on 14th avenue, near California street, and will be similar to a number of other houses designed by the same architect for Mr. Scoble, who is a well known builder. Interior finish will be of pine, redwood and some hardwood veneer. There will be furnace heat and open fire places. Mantels will be of brick. Oak floors will be used in the principal rooms. Bath room will be finished in tile. Tile will also be used in the kitchen. An automatic water heater will be installed. The exterior of the dwelling will be covered with rustic and cement plaster on metal lath. Plans are complete and the work will be done by Day Labor.

SAN FRANCISCO—Residence, 2 story and base, frame, \$2,300. Architect,

none. Owner, William Olsen, 646 Fillmore St., S. F. The house has been designed for a six-room dwelling with bath. All interior finish will be of pine or redwood. Some oak floors will be used. There will be open fire places and tile or brick mantels. Tile will be used in the bath room and kitchen. The exterior of the house will be covered with rustic and shiplap. Plans are complete and the work will be done by Day Labor.

SAN FRANCISCO—Residence, 2 story and base, frame, \$5,000. Architect, Joseph Cahen, 45 Kearny St., S. F. Owner, Isidor Rosenberg. The house, which has been designed for an eight-room dwelling will be erected on Commonwealth avenue near Euclid. There will be pine and redwood trim. Open fire places will be a feature of the living and dining rooms. There will be brick mantels. An automatic water heater will be used. The exterior of the house will be covered with rustic and cement plaster on metal lath. Plans are complete and the work will be done by Day Labor.

SAN FRANCISCO—Residence, 2 story and base, frame, \$4,000. Architect, E. E. Young, 251 Kearny St., S. F. Owner, Thomas Scoble. This dwelling will be erected on 14th avenue, and will contain seven rooms and bath. Interior finish will be of pine and redwood with some elm veneer. Oak floors will be used throughout. There will be open fire places and brick mantels. An automatic water heater will be installed. The bath room will be finished in tile. The exterior of the dwelling will be covered with rustic and cement plaster. Plans are in the hands of the owner and the work will be done by Day Labor.

OAKLAND, CAL.—Residence, 2 story and base, frame, \$3,500. Architect, none. Owner, C. E. Carlson, 1512 Grove St., Berkeley. The house has been designed for a seven-room house with bath and sleeping porch. Interior finish will be of pine and redwood with hardwood floors in the principal rooms. There will be furnace heat and open fire places. Mantels will be of tile or brick. Tile will be used in the bath room and kitchen. The exterior of the house will be covered with cement plaster. Plans are complete and the work will be done by Day Labor.

OAKLAND, CAL.—Residence, 2 story and base, frame, \$3,500. Architect, none. Owner, C. E. Carlson, 1512 Grove St., Berkeley. The house has been designed for a seven-room dwelling with bath. Interior finish will be of pine, redwood and elm veneer. Hardwood floors will be used in the principal rooms. There will be open fire places and brick mantels. An automatic water heater will be installed. Tile will be used in the bath room and kitchen. The exterior will be covered with cement plaster. Plans are complete and the work will be done by Day Labor.

BERKELEY, ALAMEDA CO., CAL.—Bungalow, 1½ story and base, frame, \$2,500. Architect, none. Owner, J. A. Johnson, 224 Roosevelt Ave., Berkeley. The house will contain six rooms and bath. All interior finish will be of redwood. Oak floors will be used in the dining and living rooms. A large open fire place will be a feature of the house. Mantel will be of brick. Tile will be used in the bath room and kitchen. The exterior of the bungalow will be covered with rustic. Plans are

complete and in the hands of the owner who will do the work by Day Labor.

SAN FRANCISCO—Residence, 2 story and base frame, \$30,000. Architects, Willis Park & Co., Merchants' Exchange Bldg., S. F. Owner, N. S. Naphtaly. The dwelling will be erected in the north line of Broadway, 111 feet east of Lyon street, and has been designed to contain in the neighborhood of 11 rooms, several baths and a laundry. Interior finish will be of pine, redwood and hardwoods. Oak and tile floors will be used throughout. There will be a central heating system and open fire places. Mantels will be of brick and tile. Tile will be used in the bath rooms. An automatic water heater will be installed. Considerable ornamental iron, marble and tile will be used. A vacuum cleaning system is specified. The exterior of the dwelling will be covered with cement plaster on metal lath. Plans are complete and figures are being taken.

SAN FRANCISCO—Residence, 3 story and base, frame, \$10,000. Architect, William Ham Hall, Postal Telegraph Bldg., S. F. Owner, William Ham Hall. The dwelling will be erected in the south line of Jackson street near Arguello Boulevard, and is to contain ten rooms and three baths. Interior finish will be of pine and redwood with hardwood floors throughout except in the baths, which will have composition flooring. There will be furnace heat and open fire places. Mantels will be of tile and brick. A dumb waiter and automatic water heater will be installed. The exterior of the dwelling will be covered with cement plaster on metal lath. Plans are complete and figures are being taken.

OAKLAND, CAL.—Bungalow, 1½ story and base, frame, \$2,500. Architect, W. H. Judson, Albany Bldg., Oakland. Owner, S. S. Wright. The dwelling has been designed for a five-room house with bath. All interior finish will be of pine or redwood. Oak floors will be used in the living room and dining room. There will be open fire places and tile or brick mantels. The exterior of the house will be covered with cement plaster. Plans are complete and figures will be called for at once.

BERKELEY, ALAMEDA CO., CAL.—Bungalow, 1 story and base, frame, \$2,000. Architect, none. Owner, J. L. Brecheff, 2219 Woodsey St., Berkeley. The house is designed to contain five rooms and bath. Interior trim will be of pine and redwood. Oak floors will be used in the principal rooms. There will be a large open fire place and brick mantel in the living room. Bath will also be wainscoted with tile and tile will be used back of the kitchen sink. The exterior of the house will be covered with cement plaster. Plans are complete and the work will be done by Day Labor.

ALAMEDA, ALAMEDA CO., CAL.—Residence, 2 story and base, frame, \$6,000. Architect, National Architectural and Engineering Co., Foxcroft Bldg., S. F. Owner's name withheld. The dwelling has been designed for a nine-room house with bath and sleeping porch. Interior finish will be of pine and redwood with some hardwood. Oak floors will be used in the principal rooms. There will be furnace heat and open fire places. Mantels will be of brick. Bath room will be finished in tile. The exterior of the house will be

covered with cement plaster on metal lath. Plans are complete and figures are being taken.

BERKELEY, ALAMEDA CO., CAL.—Residence, 2 story and base, frame. Cost not stated. Architect, John Hudson Thomas, First National Bank Bldg., Berkeley. Owner, George H. Richardson. The dwelling will be erected in Daly Seaside Park and will contain eight rooms and bath. Interior finish will be of pine and redwood with hardwood floors in the principal rooms. There will be furnace heat and open fire places. Mantels will be of tile or brick. Tile will be used in the bath room and kitchen. An automatic water heater will be installed. The exterior of the dwelling is to be covered with cement plaster on metal lath. Plans are complete and figures are being taken.

MENLO PARK, SAN MATEO CO., CAL.—Residence, 2 story and base, frame, \$7,000. Architect, Edward G. Garden, Phelan Bldg., S. F. Owner, B. H. Pratt. The dwelling will contain eight or nine rooms, baths and sleeping porch. Interior trim will be largely of hardwood. Oak floors will be used throughout. Baths will be finished in tile. There will be a central heating system and a vacuum cleaning plant. Open fire places and brick or tile mantels will be used in the living and dining rooms. The exterior of the house will be covered with rustic. Plans are complete and figures are being taken.

SCHOOLS.

SANTA BARBARA, SANTA BARBARA CO., CAL.—Lunch and reception rooms, frame construction. Cost not stated. Architect, State Department of Engineering, Sacramento. Owners, State of California. Plans for the construction of a lunch and reception room at the State Normal School at Santa Barbara have been completed and are now out for figures. Bids will close on February 24th and bids will be opened in Sacramento by the State Board of Control. Plans and specifications can be secured from the Department of Engineering at Sacramento.

BRAWLEY, IMPERIAL CO., CAL.—School, 2 story and base, brick, \$50,000. Architect, Norman F. Marsh, Broadway Central Bldg., L. A. Owners, Brawley School District. This building, which is to be known as the Administration Building, will be the first of a group of four buildings which are to compose the High School. The other buildings of the group will be the domestic arts, science and manual training buildings. Plans for the administration building have just been approved and a detail description of the structure cannot be printed at this time. Additional information will be given as the plans progress.

PHOENIX, ARIZ.—School, 2 story and base, Class A construction, \$90,000 to \$100,000. Architect, Norman F. Marsh, Broadway Central Bldg., L. A. Owners, City of Phoenix. This building will contain 14 standard sized class rooms, auditorium, manual training, domestic science departments and teachers' and principal's rooms. There will be hollow tile interior partitions, a plenum heating system, vacuum cleaning and program clock system. Maple floors will be used throughout. Halls and stairways will be of con-

crete. The exterior of the building will be faced with pressed brick. Plans are now being prepared for the work and figures will be called for within a month.

SOUTH PASADENA, LOS ANGELES CO., CAL.—Schools, 2, 2 story and base, brick, \$70,000 each. Architect, Norman F. Marsh, Broadway Central Bldg., L. A. Owners, South Pasadena High School District. This work has been mentioned here before. Each building will cover an area of 65x100 feet. One of the structures will be devoted to the manual training department and the other to domestic science. Mechanical equipment will include steam heat and vacuum cleaning. The exteriors will be faced with pressed brick. Plans are complete and figures will be called for in about one week.

PORTLAND, ORE.—School dormitory, story and base, reinforced concrete, \$120,000. Architects, Doyle, Patterson & Beach, Worcester Bldg., Portland. Owners, Reed College. The building is to cover an area of 60x200 feet, and will be fire proof throughout. The main floor of the building will be arranged for a large dining hall with accommodations for 200 persons at a time. Upper floors will be divided into 100 dormitory rooms. Interior finish will be of pine. There will be steam heating system connected with the main power plant of the institution by a reinforced concrete tunnel. Exterior of the building will be faced with cement plaster. A clay tile roof is to be used. There will be metal window frames and sash. Plans are complete and figures are to be called for at once.

OWENSMOUTH, CAL.—School, 2 story and base, brick, \$50,000. Architect, none. Owners, Owensmouth School District. Owensmouth is a new town and the recent bond election carried unanimously. The building will contain eight class rooms and an auditorium. Design will be similar to the new building at Van Nuys, which was constructed by Ye Planny Building Co. Title Insurance Bldg., L. A., and the same firm will, in all probability, build the Owensmouth school.

LOS ANGELES, CAL.—Normal School buildings, brick construction. Cost not stated. Architects, Allison & Allison, Hibernian Bldg., L. A. Owners, State of California. The buildings planned include the Administration building, 260x292 feet, containing auditorium seating 1620; Library, 136x167 feet, with reading room to seat 250 and stack room for 50,000 books; Domestic Science, 170x170 feet; Fine Arts, 141x82 feet; Gymnasium, 140x82 feet, with 450 lockers, 31 dressing rooms and shower and needle baths for girls, lockers and showers for boys; Training School, 365x175 feet, with gymnasium for boys and girls attached; Kindergarten, 96x57; Cafeteria, 90x82, with dining hall to seat 300; Manual Arts, 226x83 feet. All the buildings will be two stories except the kindergarten, cafeteria and manual arts buildings, which will be one story. The construction will be of brick with fireproof stairways and corridor floors, wood floors in rooms, tapestry brick facing, clay tile roofs, and will include maple floors, central steam heating plant with underground ducts and fan room in each building, program clocks, vacuum cleaning, intercommunicating telephone system. There is available \$600,000 from the sale of the old nor-

mal school site. An additional appropriation will be asked of the legislature for other buildings for a teachers' college. Trainings have been completed and bids will be called for as soon as the drawings can be checked and specifications written, which will take about three weeks.

SEWERS, STREET WORK AND WATER SYSTEMS

SAN YSIDRO, SAN DIEGO CO., CAL.—Irrigation system. Cost not stated. Engineer's name not given. Owners, San Ysidro Irrigation District. Bids will be received up to 11 a. m. of February 13th for the construction of a water system comprising four electric induction motors, two centrifugal pumps, pump house, five drive wells, 12,210 lineal feet 6-inch steel pipe, 3,670 feet 8-inch pipe, 2,130 12-inch pipe, 2,400 feet O. D. casing, 2,500 feet 2-inch standard pipe, specials and fittings for above, and the construction of two cement-lined reservoirs of 186,000 and 204,000 gallons capacity. A check for 10% must accompany all bids. Josiah Poeton, San Ysidro, Cal., is secretary.

ALHAMBRA, LOS ANGELES CO., CAL.—Storm water sewers. Cost not stated. Engineer, City Engineer, Alhambra. Owners, City of Alhambra. Andrew Holloway of Pasadena submitted the lowest figure for the construction of this work and will probably be awarded the contract. Mr. Holloway's bid was \$23,000. No award has been made.

Contracts Awarded.

TEHACHAPI, KERN CO., CAL.—Water system. Cost not stated. Engineer, Frank A. Lathrop, Higgins Bldg., L. A. Owners, City of Tehachapi. Contractors, Municipal and Industrial Equipment Co., Merchants Trust Bldg., L. A. Contract price, \$13,797.01. Other bids received were as follows: Westlake Construction Co., L. A., \$14,263.74; Standard Electric Construction Co., S. F., \$14,970.74; and R. C. Lowell, L. A., \$15,976.24.

HANFORD, KINGS CO., CAL.—Sewers. Cost not stated. Engineers, Sloan & Robson, Nevada Bank Bldg., S. F. Owners, City of Hanford. Contractors, Chambers & Heafey, Oakland. Contract price, \$75,000.

STORES & OFFICE BUILDINGS.

SAN FRANCISCO—Stores and moving picture house, 1 and 2 story, brick and frame, \$26,000. Architects, Havens & Toepke, 46 Kearny St., S. F. Owner's name withheld. These improvements will be made to the southwest corner of Pacific avenue and Polk street. The two story structure will contain a number of single rooms on the upper floor. Interior finish will be of pine and redwood. Tile and marble will be used in the nickelodeon. There will be patent store fronts. The exterior of the buildings will be faced with cement plaster. Plans are being prepared.

SAN FRANCISCO—Stores and offices, 10 story and base. Class A construction, \$600,000. Architects not selected. Owner, Hobart Estate Co. This building, sketches for which are being prepared in two architects' offices, is to be erected on Market street east of Montgomery and adjoining the Nevada Bank Bldg. Other that the fact that

construction will be fireproof throughout, and that it will probably be faced with pressed brick no details can be given at this time.

SAN FRANCISCO—Stores, 1 story and base, reinforced concrete, \$20,000. Architect, Theo. Lenzen & Son, 110 South Second St., San Jose. Owners, Max Wolfen Co. The building will be erected at the corner of Front and Merchant streets, in the heart of the wholesale district, and will be designed for stores. There will be a waterproof basement. Metal window sash and frames are called for in the specifications. The exterior will be faced with cement plaster. Interior finish will be of pine throughout. Plans are complete and figures are being taken.

RICHMOND, CONTRA COSTA CO., CAL.—Stores, 1 story and base, brick, \$5,500. Architect, James T. Nabrett, Richmond. Owner, H. W. Hoyt. This work has been mentioned here before. Bids have been opened and show Peterson & Overea low at \$5,180. An award of contract will be made shortly.

SAN DIMAS, LOS ANGELES CO., CAL.—Telephone exchange, 1 story and base, reinforced concrete. Cost not stated. Architect, C. E. Wolfe, Pomona. Owners, Pomona Valley Tel. and Tel. Co. The building has been designed as a telephone exchange and for the offices of the company at San Dimas. Construction will be of reinforced concrete throughout, including the roof and floors. Electric work will be carried in conduit. Interior of the business offices will be handsomely finished. The exterior will be faced with cement plaster. Plans are complete and figures are being taken.

Contracts Awarded.

LOS ANGELES, CAL.—Stores, 2 story and base, brick, \$36,766. Architects, Train & Williams, Exchange Bldg., L. A. Owner, A. T. Wells. Contractor, J. A. Crook Chamber of Commerce Bldg., L. A. Contract price, \$36,766.

VANCOUVER, B. C.—Stores and offices, 10 story and base, reinforced concrete, \$500,000. Architects, Somerville & Putnam, Seattle. Owners, Yorkshre Guarantee Co. Contractors, Dominion Construction Co., Northwest Trust Bldg., Vancouver. Contract price, \$500,000.

SPOKANE, WASH.—Department store, 9 or 10 story and base. Class A construction, \$350,000. Architects, Sutton & Whitney, Lewis Bldg., Portland. Owner's name withheld. Two large establishments in Spokane are contemplating building but the architects refuse information as to the owners of the new structure. Construction details are lacking at this time as only preliminary plans have been made. The building will cover a ground area of approximately 100x150 feet and will be Class A throughout. Further mention will be made in these columns as the plans progress.

Contracts Awarded.

PORTLAND, ORE.—Stores and offices, 4 story and base, brick and steel. Cost not stated. Architect's name not given. Owner, T. B. Wilcox. Contractors, Brayton Engineering Co., Portland. Note: This contract has been taken on the percentage basis. The cost of the building is understood to be in the neighborhood of \$65,000.

LOS ANGELES, CAL.—Stores and offices, 2 story and base, brick. Cost not stated. Architect, A. L. Acker,

Story Bldg. L. A. Owner, Emma Oswald Contractor, A. E. Harshman, Story Bldg. Contract price not stated. Note: The building will be 50x100 feet.

LOS ANGELES, CAL.—Stores, 1 story and 1 1/2 story brick \$12,000. Architects, Morgan, Wallis & Morgan, Story Bldg. L. A. Owner, D. Bottler, Contractors, Barber-Bradley Construction Co., 1871 East 1500 St., L. A. Contract price \$12,000.

THEATRES.

SAN FRANCISCO Municipal opera house, 3 story and tower. Class A construction, \$1,000,000. Architects, Willis Polk & Co., Merchants' Exchange Bldg., S. F. Owners, City and County of San Francisco. Plans for this building, which is to be erected under the direction of the San Francisco Musical Association have been approved by the Board of Supervisors. The original plans provided for a building costing only \$750,000, but these have since been revised and 100 more seats added. John Martin is the head of the San Francisco Musical Association.

LOS ANGELES, CAL.—Moving picture theatre, 1 story and base, brick. Cost not stated. Architect, A. W. Riewe, California Bldg., L. A. Owners, D. S. and A. H. Kornblum. The building will be 45x127 feet and will contain an auditorium seating 700 people. The interior will be finished in brick and ornamental plaster. There will be a ventilating system. Considerable marble, tile and plate glass will be used. The exterior will be faced with cement plaster. Plans are complete and figures are being taken.

FRESNO, FRESNO CO., CAL.—Moving picture theatre, 1 story, reinforced concrete. Cost not stated. Architects, Starbuck & Clark, Fresno. Owner, James S. Bradley. The building will contain several stories besides the moving picture house. Construction will be of reinforced concrete throughout. Interior finish will be of pine and redwood with considerable ornamental plaster. The exterior will be faced with cement plaster. Plans are complete and figures are being taken.

PORTLAND, ORE.—Theatre, 4 story and base, reinforced concrete. Cost not stated. Architects, Camp & DuPuy, Portland. Owners, Rector Realty Co. The original intention of the owners was to erect a twelve-story Class A structure, but this plan has been abandoned and a four-story building will be erected. The house will be designed for a moving picture theatre, the largest on the coast, and will have a seating capacity of 1,000 people. The main auditorium will be bowl shape with a number of private boxes. A modern system of heating and ventilation will be installed. Interior decorations will be very elaborate. The exterior of the building will be faced with cement plaster. Construction will be fireproof throughout. Plans are nearly complete and figure will be taken within a few weeks.

SEALED PROPOSALS.

NOTICE TO CONTRACTORS.

Office Constructing Quartermaster, Fort Mason, Cal., January 21st, 1913.—SEALED PROPOSALS, in triplicate,

for constructing improvements to roads, etc., at Letterman General Hospital, Presidio of San Francisco, Cal., will be received here until 4 P. M. 4th February, 1913, and then opened. Plans, specifications, blank forms and necessary information can be obtained here. Deposit of \$10.00 required to insure return of plans, etc. Envelopes containing proposals to be endorsed "Proposals for Improvements to Roads, Letterman General Hospital," and addressed to J. L. Col. Geo. McK. Williamson, Q. M. Corps.

PROPOSAL FOR GARAGE.

PURSUANT to Chapter of the City of Oakland and Resolution No. 4602 N. S. passed January 24th, 1913, the Council of the City of Oakland will receive sealed bids on February 6th, 1913, between the hours of 11:00 o'clock a. m. and 12:00 o'clock, m. of said day for the construction of an additional garage building for the City of Oakland, in the Corporation Yard at 9th and Fallon streets. The successful bidder shall be required to enter into a contract to construct said garage building within ten days after the award thereof. The said garage building shall be constructed by the successful bidder therefor, in strict accordance with the plans and specifications therefor, adopted January 24th, 1913, and filed in the office of the City Clerk of the City of Oakland, to which reference is hereby made for full details and description of said work. The construction of said garage building shall be to the satisfaction of the Superintendent of Streets of the City of Oakland.

FRANK R. THOMPSON,

City Clerk.

By E. F. HOLLAND, Deputy.
Oakland, January 27, 1913.

PROPOSAL FOR BUILDING.

IN OBEDIENCE TO THE ORDER OF the Council of the City of Santa Rosa, Cal., made January 22, 1913, notice is hereby given that sealed bids will be received by the undersigned, City Clerk of said city, for the construction of a City Hall Building, on lot number 300, Block 14, according to the Brewster map of the City of Santa Rosa, Sonoma County, California, in accordance with plans and specifications adopted and on file. Bids to be of the City Clerk.

Bids will be received for the construction of the City Hall; on the Structural Steel Work; on the Vault and Cell Work; and on the return Hot Water Heating Plant, separately or as a whole under one general bid, in accordance with the plans and specifications adopted and on file. Bids to be filed on or before the hour of 5 o'clock P. M. of February 1st, 1913. Each bid to be accompanied by a certified check, payable to the Mayor of said city, for ten per cent of the amount of the bid. Notice is hereby given that the contract for being awarded the bid will be required to enter into a contract with the City of Santa Rosa within five days after the awarding of the bid.

It is also understood that local mechanics will be employed on the building as much as possible.

Plans and specifications may be seen at the office of Architect L. M. Turton in Napa City, California, at Leonard & Day, in the Riello Building, San Francisco, California, and at the City Clerk's office in Santa Rosa, California.

The right to reject any and all bids is reserved by the Council.

By order of the Council.

H. B. SNYDER,
City Clerk of the City of Santa Rosa, Cal.

S. engineer offices in the following cities: Seattle, Wash.; Los Angeles, Cal. F. C. BOGGS, major, corps of engineers, U. S. army, general purchasing officer.

NOTICE TO CONTRACTORS.

PANAMA-PACIFIC INTERNATIONAL EXPOSITION.

SEALED PROPOSALS will be received by the Buildings and Grounds Committee of the Panama-Pacific International Exposition Company at the office of the Director of Works, in the Exposition Building, Pine and Battery Streets, San Francisco, California, at 11 o'clock Tuesday February 11, 1913. For the construction of Sewers in Main Roadway Concessions District in accordance with the specifications on file in the office of the Director of Works.

Each proposal must be accompanied by a certified check payable to the order of the Panama-Pacific International Exposition Company or cash in the sum of ten (10) per cent of the amount bid, or the same will not be considered. When the award of contract is made all checks will be returned to the respective bidders, except that filed with the accepted proposal or bid, which check will be returned upon the successful bidder signing the contract and filing the required bond. A bond in the sum of fifty (50) per cent of the contract price will be required for the faithful performance of the contract; the sureties thereon must be satisfactory to the Buildings and Grounds Committee of the Panama-Pacific International Exposition Company.

Progressive payments will be made. The right is reserved to reject any and all bids and to waive technical defects if in the interest of the Exposition Company.

Plans and specifications for the work may be obtained from the Director of Works, at Room 617 Exposition Bldg., by depositing \$3.00, which will be refunded upon the return of the plans and specifications in good condition. By order of the Buildings and Grounds Committee.

WILLIAM H. CROCKER,
Chairman.

Firms desiring news from certain localities like San Francisco, Los Angeles, Portland, Seattle, etc., will find all such items, commencing on this page, all carefully classified as to location. These same items are repeated in the fore part of the news department, under distinct headings such as Banks, Churches, Hotels, etc.

SAN FRANCISCO.

APARTMENT HOUSE—5 story and base. Class C construction, \$175,000. San Francisco. Architect, Creighton Withers, SW Powell and California Sts. S. F. Owner, L. H. Sly. This building will be erected on a full Fifty Vara lot recently purchased by Mr. Sly at the southwest corner of Post and Leavenworth streets. Plans are complete and show a building covering the entire holding with the exception of light court and yard space. Interior will be arranged for a total of 300 guest rooms divided into two and three room suites with baths and private entrances. Interior will be finished in pine and redwood with some oak and ornamental plaster in the reception hall. There will be steam heat, elevator service and wall beds. A vacuum cleaning system will also be installed. The exterior of the building will be faced with cement plaster. Plans are complete and the work will be done by Day Labor.

APARTMENT HOUSE—3 story and base, frame, \$5,000. San Francisco. Architects, O'Brien Bros., Clinic Bldg., S. F. Owner's name withheld. The building will be erected south of Market street and will be arranged for two and three room suites. All interior finish will be of pine. The exterior of the building will be covered with rustic and shiplap. A central heating system will be installed and all rooms will be supplied with hot water. Plans are now being prepared.

HOTEL—3 story and base, brick and steel, \$30,000. San Francisco. Architect, Joseph Cahen, 45 Kearny St., S. F. Owner, Mr. Kemp. The building will be erected on 3rd street near Folsom, and will be arranged for stores on the first floor and lodgings above. A central heating system will be installed and hot and cold running water will be supplied to all rooms. Interior finish will be of pine throughout. The exterior of the building will be faced with cement plaster. Plans are now being prepared for the work and figures will be called for shortly.

HOTEL—14 story and base. Class A construction, \$550,000. San Francisco. Architect, G. A. Applegarth, Call Bldg., S. F. Owners, Cliff Estate. This work has been mentioned here a number of times before when the plans were in a preliminary stage. The owners have recently acquired an additional piece of property which now gives them a full Fifty Vara lot, and they have decided to increase the height of their building to 14 stories. Construction will be of steel and reinforced concrete, with a complete steel frame, concrete exterior walls, roof slabs, floors and interior partitions. The hotel will contain a total of 300 rooms and baths besides the main lobby, entrance and office. There will be a steam heating system with oil burning plant and a vacuum cleaning plant. Interior finish will be of hardwood, metal and tile. Bath rooms will be finished in tile and cement. Office and lobby will be handsomely finished in hardwoods and orna-

mental plaster. The exterior of the building will be faced with cement plaster. Steel plans are now complete and figures will be called for at once. The balance of the work will be out for figures within a few weeks.

HOTEL ADDITION—7 story and base. Class A construction. Cost not stated. San Francisco. Architects, Cunningham & Politeo, First National Bank Bldg., S. F. Owners, Charles A. and Margaret Stewart. The building will be erected on a lot adjoining the present Stewart hotel and will be similar in architectural design and interior arrangement. The new addition will add a total of 150 rooms and baths to the present hotel. There will be a steel frame and exterior walls of artificial stone. Interior partitions will be of tile. There will be elevator service, steam heat from the present plant and vacuum cleaning system. Interior finish will be of pine and hardwoods. Bath rooms will be finished in tile. Plans are complete and figures are being taken.

HOTEL—3 story and base, brick, \$15,000. San Francisco. Architects, Smith & Stewart, 244 Kearny St., S. F. Owner, Gong L. Toy. This building will be similar to a number of other hotel and commercial buildings recently designed for San Francisco's Chinatown by the same architects. The new structure will contain about 25 rooms and several baths. Interior finish will be of pine throughout. The entire structure will be occupied by the hotel. The exterior of the building will be faced with pressed brick. Plans are now being prepared.

HOTEL—5 story and base. Class C construction. Cost not stated. San Francisco. Architect, August Nordin, Mills Bldg., S. F. Owners, Thomas O'Day and James McLaughlin. The building will be erected in the south line of O'Farrell street and will have a frontage of 46 feet and a depth of 90 feet. The first floor will contain, besides the hotel lobby and offices, two modern stores. Upper floors will be divided into about 90 rooms and baths. Interior finish will be of pine and redwood with some oak and ornamental plaster in the lobby. There will be steam heat, elevator service and a vacuum cleaning system. The exterior of the building will be faced with pressed brick. Plans are now being prepared.

HOTEL—4 story and base. Class C construction, \$90,000. San Francisco. Architect, August Nordin, Mills Bldg., S. F. Owners, Franklin Realty Co. This building is to be erected on O'Farrell street near Larkin, and will contain about 120 rooms and baths. The first floor will be arranged for a large and attractive hotel lobby, offices and reception rooms. The building will be heated by steam. There will be elevator service and a vacuum cleaning plant. Interior finish will be of pine, redwood and hardwoods. Bath rooms will be finished in tile. The exterior of the structure will be faced with pressed brick. Plans are being completed as rapidly as possible and figures will be called for within a few days.

RESIDENCE—1½ story and base, frame, \$2,000. San Francisco. Architect, none. Owner, A. R. Larson, 282 Dolores St., S. F. The dwelling will contain six rooms and bath. All interior finish will be of pine or redwood. Oak floors will be used in the dining and living rooms. There will be open fire places and tile or brick mantels. Tile will be used in the bath room and kitchen. The exterior of the dwelling will be covered with rustic and shingles. Plans are complete and in the hands of the owner who will do the work by Day Labor.

RESIDENCE—2 story and base, frame, \$4,000. San Francisco. Architect, E. E. Young, 251 Kearny St., S. F. Owner, Thomas Scoble. This dwelling will be erected on 14th avenue, and will contain seven rooms and bath. Interior finish will be of pine and redwood with some elm veneer. Oak floors will be used throughout. There will be open fire places and brick mantels. An automatic water heater will be installed. The bath room will be finished in tile. The exterior of the dwelling will be covered with rustic and cement plaster. Plans are in the hands of the owner and the work will be done by Day Labor.

RESIDENCE—2 story and base, frame, \$5,000. San Francisco. Architect, E. E. Young, 251 Kearny St., S. F. Owner, Thomas Scoble. This dwelling will be erected on 14th avenue, near California street, and will be similar to a number of other houses designed by the same architect for Mr. Scoble, who is a well known builder. Interior finish will be of pine, redwood and some hardwood veneer. There will be furnace heat and open fire places. Mantels will be of brick. Oak floors will be used in the principal rooms. Bath room will be finished in tile. Tile will also be used in the kitchen. An automatic water heater will be installed. The exterior of the dwelling will be covered with rustic and cement plaster on metal lath. Plans are complete and the work will be done by Day Labor.

RESIDENCE—2 story and base, frame, \$2,300. San Francisco. Architect, none. Owner, William Olsen, 646 Fillmore St., S. F. The house has been designed for a six-room dwelling with bath. All interior finish will be of pine or redwood. Some oak floors will be used. There will be open fire places and tile or brick mantels. Tile will be used in the bath room and kitchen. The exterior of the house will be covered with rustic and shiplap. Plans are complete and the work will be done by Day Labor.

RESIDENCE—2 story and base, frame, \$5,000. San Francisco. Architect, Joseph Cahen, 45 Kearny St., S. F. Owner, Isidor Rosenberg. The house, which has been designed for an eight-room dwelling, will be erected on Commonwealth avenue near Euclid. There will be pine and redwood trim, hardwood floors and tile bath rooms. Furnace heat will be installed. Open fire places will be a feature of the living and dining rooms. There will be brick mantels. An automatic water heater will be used. The exterior of the house will be covered with rustic and cement plaster on metal lath. Plans are complete and the work will be done by Day Labor.

APARTMENT HOUSE—6 story and base, reinforced concrete, \$55,000. San Francisco. Architect, David Salfeld, Clinic Bldg., S. F. Owner, F. J. Klumm.

This building has been mentioned here before. Revised plans have now been completed and figures are being taken by the architect. The structure will be erected in the north line of Ellis street near Leavenworth, and when complete will be one of the most modern apartment houses in the city. Suites will be arranged in two and three rooms each with private baths and wall beds. Interior finish will be of pine, redwood and hardwoods. Ornamental plaster will be used in the entrance and lobby. There will be steam heat, elevator service and a vacuum cleaning plant. The exterior of the building will be faced with pressed brick.

APARTMENT HOUSE—6 story and base. Class A construction, \$110,000. San Francisco. Architect, Frederick H. Meyer, Bankers' Investment Bldg., S. F. Owners, Trawbridge and Perkins. The apartment house will be erected in the south line of Sutter street west of Mason, and will cover nearly a Fifty Vara lot. Construction will be Class A throughout with a steel frame and exterior walls faced with pressed brick. Interior will be arranged in two, three and four room suites with wall beds, private baths and all other modern conveniences. There will be steam heat, elevator service and a vacuum cleaning system. Interior partitions will be of hollow tile. Plans are being prepared.

APARTMENT HOUSE—6 story and base. Class C construction, \$150,000. San Francisco. Architect, Frederick H. Meyer, Bankers' Investment Bldg., S. F. Owners, Schmiedel Estate. The building will occupy a full Fifty Vara lot at the southeast corner of Post and Leavenworth streets. Only preliminary plans for the building have so far been prepared and details are not available. Suites will probably be arranged in two and three room apartments. All of the latest improvements will be provided for including wall beds and vacuum cleaning. There will be steam heat and elevator service. The exterior of the building will probably be faced with pressed brick. Working drawings are to be completed as rapidly as possible.

FLATS—2 story and base, frame, \$4,000. San Francisco. Architect, none. Owner, James Elliott, 261 4th Ave., S. F. The building is to be erected on a lot 27½x56 feet and has been arranged for two modern flats of five and six rooms each. All interior finish will be of pine or redwood. Some oak flooring will be used. There will be open fire places and tile mantels. Bath rooms will also be finished in tile. The exterior of the building will be covered with rustic and cement plaster on metal lath. Plans are complete and the work will be done by Day Labor.

FLATS—3 story and base, frame \$7,000. San Francisco. Architect, C. O. Clausen, Phelan Bldg., S. F. Owner, Paul de Bernardi. The building will be erected on Stockton near Greenwich street, and has been arranged to contain three flats of five and six rooms each. Interior finish will be of pine and redwood. There will be both open fire places and gas grates. Mantels will be of brick. The exterior of the building will be covered with brick veneer to the first floor line and with rustic above that point. Plans are complete and a contract will be let at once.

FLATS—2 story and base, frame,

\$3,000. San Francisco. Architect, none. Owner, Ferdinand Elvin, 1415 6th Ave., S. F. The building will cover an area of 25x16 feet and is arranged for two flats of five and six rooms each with bath. All interior finish will be of pine or redwood. Some oak floors will be used. There will be open fire places and brick or tile mantels. The exterior of the building will be covered with rustic and shiplap. Plans are complete and in the hands of the owner who will do the work by Day Labor.

FLATS—3 story and base, frame. Cost not stated. San Francisco. Architect, John J. Foley, Monadnock Bldg., S. F. Owner's name withheld. The building building will be erected on Laguna and Cedar streets and will be arranged to contain three flats of five rooms and bath each. Interiors will be finished in pine and redwood with some oak floors. Bath rooms will be finished in tile. There will be open fire places and brick or tile mantels. The exterior of the building will be covered with rustic and shiplap. Plans are complete and figures are being taken.

FLATS AND STORE—3 story and base, frame, \$6,500. San Francisco. Architect, C. O. Clausen, Phelan Bldg., S. F. Owner, Mrs. N. A. Gosliner. The building is to be erected at the corner of Francisco and Grant avenue, and will be arranged for one store on the first floor and four apartments flats of three rooms each on the upper two floors. Interior will be finished in pine throughout. Gas grates and tile mantels will be used. The exterior of the building will be covered with shiplap and rustic. Plans are complete and figures have been taken. A contract will be awarded with a day or two.

RESIDENCE—2 story and base, frame, \$30,000. San Francisco. Architects, Willis Polk & Co., Merchants' Exchange Bldg., S. F. Owner, S. N. Naphthal. The dwelling will be erected in the north line of Broadway, 114 feet east of Lyon street, and has been designed to contain in the neighborhood of fourteen rooms, several baths and a laundry. Interior finish will be of pine, redwood and hardwoods. Oak and tile floors will be used throughout. There will be a central heating system and open fire places. Mantels will be of brick and tile. Tile will be used in the bath rooms. An automatic water heater will be installed. Considerable ornamental iron, marble and tile will be used. A vacuum cleaning system is specified. The exterior of the dwelling will be covered with cement plaster on metal lath. Plans are complete and figures are being taken.

RESIDENCE—3 story and base, frame, \$10,000. San Francisco. Architect, William Ham Hall, Postal Telegraph Bldg., S. F. Owner, William Ham Hall. The dwelling will be erected in the south line of Jackson street near Arguello Boulevard, and is to contain ten rooms and three baths. Interior finish will be of pine and redwood with hardwood floors throughout except in the baths which will have composition flooring. There will be Prince Consort and open fire places. Mantels will be of tile and brick. A dumb waiter and automatic water heater will be installed. The exterior of the dwelling will be covered with cement plaster on metal lath. Plans are complete and figures are being taken.

MUNICIPAL OPERA HOUSE—3

story and tower. Class A construction, \$1,000,000. Architects, Willis Polk & Co., Merchants' Exchange Bldg., S. F. Owners, City and County of San Francisco. Plans for this building, which is to be erected under the direction of the San Francisco Musical Association, have been approved by the Board of Supervisors. The original plans provided for a building costing only \$750,000, but these have since been revised and 400 seats added. John Martin is the head of the San Francisco Musical Association.

STORES AND MOVING PICTURE HOUSE—1 and 2 story, brick and frame, \$20,000. San Francisco. Architects, Havens & Toepke, 46 Kearny St., S. F. Owner's name withheld. These improvements will be made to the southwest corner of Pacific avenue and Polk street. The two-story building will contain a number of single rooms on the upper floor. Interior finish will be of pine and redwood. Tile and marble will be used in the nickelodeon. There will be patent store fronts. The exterior of the buildings will be faced with cement plaster. Plans are being prepared.

STORES AND OFFICES—10 story and base. Class A construction, San Francisco. Architects not selected. Owners, Hobart Estate Co. This building, sketches for which are being prepared in two architects' offices, is to be erected on Market street east of Montgomery and adjoining the Nevada Bank Bldg. Other than the fact that construction will be fire proof throughout and that it will probably be faced with pressed brick no details can be given at this time.

STORES—1 story and base, reinforced concrete, \$20,000. San Francisco. Architect, Theo. Lenzen & Son, 110 South Second St., San Jose. Owners, Max Wolfen Co. The building will be erected at the corner of Front and Merchant streets, in the heart of the wholesale district, and will be designed for stores. There will be a waterproof basement. Metal window sash and frames are called for in the specifications. The exterior will be faced with cement plaster. Interior finish will be of pine throughout. Plans are complete and figures are being taken.

City Bids Opened.

Eight Bids Were Received by the Board of Public Works for the Construction of Studio.

Eight bids for constructing a photographic and blue print studio on the roof of the Temporary City Hall were received by the Board of Public Works at their Wednesday afternoon session. The lowest figure was received from McSheehy Bros., who will probably be awarded the work. The following is a list of all figures submitted:

Photographic Studio.

Carnahan & Mulford.....	\$3,035

OAKLAND AND ALAMEDA COUNTY.

RESIDENCE—2 story and base,
 frame, \$3,500. Oakland, Cal. Archi-
 tect, none. Owner, C. E. Carlson, 1512
 Grove St., Berkeley. The dwelling has
 been designed for a seven-room house
 with bath and sleeping porch. Interior
 finish will be of pine and redwood with
 hardwood floors in the principal rooms.
 There will be furnace heat and open
 fire places. Mantels will be of tile or
 brick. Tile will be used in the bath
 room and kitchen. The exterior of the
 house will be covered with cement
 plaster. Plans are complete and the
 work will be done by Day Labor.

RESIDENCE—2 story and base,
 frame, \$3,500. Oakland, Cal. Archi-
 tect, none. Owner, C. E. Carlson, 1512
 Grove St., Berkeley. The house has
 been designed for a seven-room dwell-
 ing with bath. Interior finish will be
 of pine, redwood and elm veneer.
 Hardwood floors will be used in the
 principal rooms. There will be open
 fire places and brick mantels. An au-
 tomatic water heater will be installed.
 Tile will be used in the bath room and
 kitchen. The exterior will be covered
 with cement plaster. Plans are com-
 plete and the work will be done by
 Day Labor.

BUNGALOW—1 1/2 story and base,
 frame, \$2,500. Berkeley, Alameda Co.,
 Cal. Architect, none. Owner, J. A.
 Johnson, 2234 Roosevelt avenue, Berke-
 ley. The house will contain six
 rooms and bath. All interior finish will
 be of redwood. Oak floors will be used
 in the dining and living rooms. A
 large open fire place will be a feature
 of the house. Mantel will be of brick.
 Tile will be used in the bath room and
 kitchen. The exterior of the bungalow
 will be covered with rustic. Plans are
 complete and in the hands of the own-

Pacific Mantel and Tile Co.

er who will do the work by Day Labor.
 APARTMENT HOUSE—3 story and
 base, frame, \$25,000 or more. Berkeley
 Alameda Co., Cal. Architect, C. O.
 Clausen, Phelan Bldg., S. F. Owner's
 name withheld. Preliminary plans for
 one of the most modern apartment
 house structures in Berkeley are be-
 ing prepared and complete information
 will be published later. Suites will be
 of the two and three room type and
 there will probably be in the neighbor-
 hood of 14 to 20 contained in the build-
 ing. Details of construction cannot be
 given until the working drawings are
 started

GARAGE—1 story and base. Cost
 not stated. Oakland, Cal. Architect,
 none. Owners, City of Oakland. Plans
 for an additional garage to be erected
 in the Corporation Yards are complete
 and figures have been advertised for.
 Bids will be opened on February 6th.
 Plans and specifications can be secured
 from the City Clerk. Work is to be
 done under the direction of the Super-
 intendent of Streets. The official
 proposal appears in another column of
 this issue.

BUNGALOW—1 1/2 story and base,
 frame, \$2,500. Oakland, Cal. Archi-
 tect, W. H. Judson, Albany Bldg., Oak-
 land. Owner, S. S. Wright. The dwell-
 ing has been designed for a five-room
 house with bath. All interior finish
 will be of pine or redwood. Oak floors
 will be used in the living room and
 dining room. There will be open fire
 places and tile or brick mantels. The
 exterior of the house will be covered
 with cement plaster. Plans are com-
 plete and figures will be called for at
 once.

BUNGALOW—1 story and base,
 frame, \$2,000. Berkeley, Alameda Co.,
 Cal. Architect, none. Owner, J. L.
 Bredehoft, 2219 Woolsey St., Berkeley.
 The house is designed to contain five
 rooms and bath. Interior trim will be
 of pine and redwood. Oak floors will
 be used in the principal rooms. There
 will be a large open fire place and
 brick mantel in the living room. Bath
 will be wainscoted with tile and tile
 will also be used back of the kitchen
 sink. The exterior of the house will

covered with cement plaster. Plans complete and the work will be done by Day Labor.

RESIDENCE — 2 story and base, same, \$6,000. Alameda, Alameda Co., Cal. Architect, National Architectural and Engineering Co., Foxcroft Bldg., P. Owner's name withheld. The dwelling has been designed for a nine-room house with bath and sleeping porch. Interior finish will be of pine and redwood with some hardwood. Oak floors will be used in the principal rooms. There will be furnace heat and open fire places. Mantels will be of brick. Bath rooms will be finished in tile. The exterior of the house will be covered with cement plaster on metal lath. Plans are complete and figures are being taken.

RESIDENCE — 2 story and base, same. Cost not stated. Berkeley, Alameda Co., Cal. Architect, John Hudson Thomas, First National Bank Bldg., Berkeley. Owner, George H. Richardson. The dwelling will be erected in only Scenic Park, and will contain eight rooms and bath. Interior finish will be of pine and redwood with hardwood floors in the principal rooms. There will be furnace heat and open fire places. Mantels will be of tile or brick. Tile will be used in the bathroom and kitchen. An automatic water heater will be installed. The exterior of the dwelling is to be covered with cement plaster on metal lath. Plans are complete and figures are being taken.

SAN JOSE AND THE SANTA CLARA VALLEY.

APARTMENT HOUSE—2 story and base, brick and concrete, \$15,000. Watsonville, Santa Cruz Co., Cal. Architect, W. H. Weeks, 75 Post St., S. F. Owner, J. H. Jensen. The building will be arranged for a store on the first floor and modern two and three room apartments on the upper floors. A central heating system will be installed. Interior will be finished in pine and redwood. Some oak floors will be used. There will be private baths and wall beds. Bath rooms will be finished in tile. The exterior of the building will be faced with cement plaster. Plans are being prepared.

RESIDENCE — 2 story and base, frame, \$7,000. Menlo Park, San Mateo Co., Cal. Architect, Edward G. Garden, Phelan Bldg., S. F. Owner, B. H. Pratt. The dwelling will contain eight or nine rooms, baths and sleeping porch. Interior trim will be largely of hardwood. Oak floors will be used throughout. Baths will be finished in tile. There will be a central heating system and a vacuum cleaning plant. Open fire places and brick or tile mantels will be used in the living and dining rooms. The exterior of the house will be covered with rustic. Plans are complete and figures are being taken.

Reject All Figures For Hester School.

Lowest Bid Received for the Construction is Far Above Amount Available and Contract Not Let.

At a meeting of the Board of School Trustees of the Hester School District, in San Jose, bids were opened for the construction of the new building and all were found to be in excess of the amount available. The lowest general bid received called for \$89,798, which is some \$10,000 more than is available. All bids have been rejected and checks have been returned. Whether or not a revision of the plans and specifications will be necessary has not been determined. Plans for the building were prepared by Architect Norman F. Marsh of Los Angeles.

Department of Engineering, Sacra-
mento. Owners, State of California.
Plans for the installation of a com-
plete fire protection system at State
Hospital at Stockton are complete and
figures are being taken. Bids will be
opened by the State Board of Control
in Sacramento on February 24th. Plans
and specifications can be secured from
the State Department of Engineering.

AWARD SCHOOL CONTRACT.

San Francisco Firm of Graham & Jen-
son Awarded the General Contract
at \$35,625.

Architect C. H. Russell has just re-
turned from Galt, Sacramento County,
where he was in attendance at a meet-
ing of the Board of School Trustees of
the Galt Joint Union High School Dis-
trict. At this meeting the four lowest
bids submitted for the construction of
the new building were considered and
the contract awarded to Graham &
Jenson, 185 Stevenson street, San Fran-
cisco. Their bid was \$35,625, which
does not include the heating, ventilat-
ing or time clock system.

LOS ANGELES AND SOUTHERN CALIFORNIA.

APARTMENT HOUSE—5 story and base, reinforced concrete. Cost no stated. Architects, King & Taylor Consolidated Realty Bldg., L. A. Owner, T. J. Douglas. The building will cover an area of 55x144 feet and has been arranged for 135 guest rooms. Apartments will consist of two and three rooms each with wall beds and private baths. Interior will be finished in pine and imitation of mahogany or birch with tile and marble in the entrance. There will be steam heat, elevator service and a vacuum cleaning system. Floors will be of concrete slabs. Bath rooms will have cement floors and tile wainscot. The exterior of the building will be faced with cement plaster. Plans are now being prepared.

APARTMENT HOUSE—4 story and base, brick. Cost not stated. Los Angeles, Cal. Architect, Leonard L. Jones I. W. Hellman Bldg., L. A. Owner, W. A. Loden. The building will contain 11 rooms, which are to be arranged in two and three room suites. All suite will have wall beds and connecting baths. Plans also provide for steam heat, elevator service and a vacuum cleaning system. Interior finish will be of pine, redwood and some hard wood. Ornamental plaster will be used in the lobby and reception rooms. Bath rooms will be finished in tile and will have cement floors. The exterior of the apartments will be faced with pressed brick. Plans are nearly complete and figures will be called for at once.

HOTEL—12 story and base. Class A construction, \$400,000. Los Angeles, Cal. Architects, Train & Williams Exchange Bldg., L. A. Owners, Local Syndicate Hotel. This project has been promoted by R. T. McMillen, 233 Consolidated Realty Bldg., who has secured a long term lease on property on Spring street between 4th and 5th streets. The site has a frontage of 60 feet and a depth of 160 feet. Only preliminary plans have been prepared but these show a building covering the entire ground area and containing a total of 250 guest rooms. No further details of the construction can be given at this time. Notice will be made in these columns from time to time as the work progresses.

LUNCH AND RECEPTION ROOMS—Frame construction. Cost not stated. Santa Barbara, Santa Barbara Co., Cal. Architect, State Department of Engineering, Sacramento. Owners, State of

California. Plans for the construction of a lunch and reception room at the site Normal School at Santa Barbara have been completed and are now out in figures. Bids will close on February 24th, and bids will be opened in Sacramento by the State Board of Control. Plans and specifications can be secured from the Department of Engineering at Sacramento.

SCHOOL—2 story and base, brick, \$60,000. Brawley, Imperial Co., Cal. Architect, Norman F. Marsh, Broadway Central Bldg., L. A. Owners, Brawley School District. This building which is to be known as the Administration Building, will be the first of a group of four buildings which is to comprise the High School. The other buildings of the group will be the domestic science and manual training buildings. Plans for the administration building have just been approved. A detail description of the structure cannot be printed at this time. Additional information will be given as plans progress.

SCHOOL—2 story and base. Class A construction, \$90,000 to \$100,000. Phoenix, Ariz. Architect, Norman F. Marsh, Broadway Central Bldg., L. A. Owners, City of Phoenix. This building will contain 16 standard sized class rooms, auditorium, manual training, domestic science departments and teachers' and principals' rooms. There will be hollow tile interior partitions, a plenum heating system, vacuum cleaning and program clock system. Maple floors will be used throughout. Halls and stairways will be of concrete. The exterior of the building will be faced with pressed brick. Plans are now being prepared for the work and figures will be called for within a month.

SCHOOLS—2, 2 story and base, brick, \$1,000 each. South Pasadena, Los Angeles Co., Cal. Architect, Norman F. Marsh, Broadway Central Bldg., L. A. Owners, South Pasadena High School District. This work has been mentioned here before. Each building will cover an area of 65x100 feet. One of the structures will be devoted to the manual training department and the other to domestic science. Mechanical equipment will include steam heat and vacuum cleaning. The exteriors will be faced with pressed brick. Plans are complete and figures will be called for about one week.

TELEPHONE EXCHANGE—1 story and base, reinforced concrete. Cost not stated. San Dimas, Los Angeles Co., Cal. Architect, C. E. Wolfe, Pomona, Calif. Owners, Pomona Valley Tel. and Tel. Co. The building has been designed as a telephone exchange and for the offices of the company at San Dimas. Construction will be of reinforced concrete throughout including the roof and floors. Electric work will be carried in conduit. Interior of the business offices will be handsomely finished. The exterior will be faced with cement plaster. Plans are complete and figures are being taken.

APARTMENT HOUSE—3 story and base, frame. Cost not stated. Los Angeles, Cal. Architect, Fielder Stinger, Security Bldg., L. A. Owner, F. J. Turner. The building is to cover an area of 10x140 feet, and has been planned to contain 54 guest rooms, day and parlors. Suites will consist of two and three rooms each. All apartments will have wall beds and private baths. Interior finish will be of pine and hardwoods. Bath rooms

will be finished in tile. Considerable marble and tile will be used in the entrance vestibule and lobby. There will be steam heat, elevator service and a vacuum cleaning system. The exterior of the building will be covered with cement plaster on metal lath. Plans are being prepared.

GARAGE—2 story and base, brick and steel. Cost not stated. Los Angeles, Cal. Architects, Morgan, Walls & Morgan, Story Bldg., L. A. Owner, J. A. Graves. The building will cover a ground area of 85x150 feet and has been designed for a commercial garage and salesrooms. The first floor will be of cement except in the salesrooms where a tile floor is to be used. There will be copper window sash and frames, hardwood and pine trim and special gasoline storage tanks. The exterior of the building will be faced with pressed brick. Plans are being prepared for the work and contracts will be let within a few days.

WAREHOUSE—6 story and base. Class A construction. Cost not stated. Los Angeles, Cal. Architect, E. T. Flaherty, I. W. Hellman Bldg., L. A. Owners, Bekin Van and Storage Co. The building will be 74x90 feet and of the reinforced concrete type, including the walls, floors and roof. Interior partitions will be of hollow tile. There will be metal window sash and frames and fireproof doors. An automatic sprinkler system will be installed. A heavy freight elevator is specified. The exterior of the building will be faced with cement plaster. Plans are being prepared and when complete the work will be done by Day Labor.

ASSOCIATION BUILDING—3 story and base, brick and steel, \$50,000. Santa Barbara, Santa Barbara Co., Cal. Architect, E. Russell Ray, associated with Winsor Soule, Santa Barbara. Owners, Young Men's Christian Association. The structure will be 120x91 feet, with concrete foundation and basement, plaster exterior over brick, steel beams and columns, and composition roof. The first floor will contain a large lobby finished in marble and tile offices, library and game room, with hardwood floors and oak finish. Thirty bedrooms, with baths, wash rooms and two class rooms will occupy the second floor. The basement will contain a gymnasium, 35x70 feet, with spectators' gallery, a training room 18x33 feet, plunge with glazed tile lining, shower baths, toilets and a steam heating plant. The exterior of the building will be faced with pressed brick. Plans are complete and figures will be called for before the middle of February.

LODGE HALL—3 story and base, brick, \$35,000. Pasadena, Los Angeles Co., Cal. Architects, Foss Designing and Building Co., 100 East Colorado St., Pasadena. Owners, Odd Fellows Temple Association. The proposed building is to cover an area of 50x95 feet, and will contain banquet room and kitchen in the basement, stores on the main floor and lodge halls, library and offices on the second and third floors. A central heating system will be installed. The exterior of the building will be faced with pressed brick. Plans are being prepared and effort made to raise sufficient funds for the construction.

HOSPITAL—3 story and base, reinforced concrete. Cost not stated. Los Angeles, Cal. Architect, Frank L. Stiff, Grosse Bldg., L. A. Owners,

Westlake Hospital Association. Bids for this work have been received and taken under advisement. All figures were somewhat in excess of the amount available, and the owners will probably make arrangements to let a contract on the present plans. The lowest bid was presented by Charles G. Ross, Grosse Bldg., and he will probably be awarded the work.

HOTEL—6 story and base, reinforced concrete, \$99,000. Ocean Park, Los Angeles Co., Cal. Architect's name not given. Owners, Stelman and Kramer, Ocean Park. All bids received for this work have been rejected and plans will be revised. Hugo Eckert was the lowest bidder on the general construction at \$11,010. New bids will be called for by the owners within a few days.

SCHOOL—2 story and base, brick, \$50,000. Owensmouth, Cal. Architect, none. Owners, Owensmouth School District. Owensmouth is a new town and the recent bond election carried unanimously. The building will contain six class rooms and an auditorium. Design will be similar to the new building at Van Nuys, which was constructed by Ye Planry Building Co., Title Insurance Bldg., L. A., and the same firm will, in all probability, build the Owensmouth school.

NORMAL SCHOOL BUILDINGS—Brick construction. Cost not stated. Los Angeles, Cal. Architects, Allison & Allison, Hibernian Bldg., L. A. Owners, State of California. The buildings planned include the Administration building, 260x292 feet, containing auditorium seating 1620; library, 136x107 feet, with reading room to seat 250 and stack room for 50,000 books; Domestic Science, 170x170 feet; Fine Arts, 141x82 feet; Gymnasium, 108x82 feet, with 450 lockers, 34 dressing rooms and shower and needle baths for girls, lockers and showers for boys; Training school, 305x175 feet, with gymnasium for boys and girls attached; Kindergarten, 96x37; Cafeteria, 90x82, with dining hall to seat 300; Manual Arts, 226x83 feet. All the buildings will be two stories except the kindergarten, cafeteria and manual arts buildings, which will be one story. The construction will be of brick with fireproof stairways and corridor floors, wood floors in rooms, tapestry brick facing, clay tile roofs, and will include maple floors, central steam heating plant with underground flues and fan room in each building, program clocks, vacuum cleaning, intercommunicating telephone system. There is available \$800,000 from the sale of the old normal school site. An additional appropriation will be asked of the legislature for other buildings for a teachers' college. Drawings have been completed and bids will be called for as soon as the drawings can be checked and specifications written which will take about three weeks.

IRRIGATION SYSTEM—Cost not stated. San Ysidro, San Diego Co., Cal. Engineer's name not given. Owners, San Ysidro Irrigation District. Bids will be received up to February 12th for the construction of a water system comprising four electric induction motors, five drive wells, 12,210 lineal feet 6-inch steel pipe, 3,670 feet 8-inch pipe, 2,130 feet 12-inch pipe, 2,100 feet 10-inch pipe, 2,500 feet standard pipe, specials and fittings for above, and the construction of two

reservoirs of 186,000 and 10,000 gallons capacity. A check for \$100 must accompany all bids. Joseph Patton, San Ysidro, Cal., is secretary.

STORM WATER SEWERS—Cost not stated. Alameda Los Angeles Co., Civil Engineer, City Engineer, Alhambra. Andrew Holloway of Pasadena submitted the lowest figure for the construction of this work and will probably be awarded the contract. Mr. Holloway's bid was \$23,000. No award has been made.

MOVING PICTURE THEATRE—1 story and base, brick. Cost not stated. Los Angeles, Cal. Architect, A. W. Kiewe, California Bldg., L. A. Owners, D. S. and A. H. Kornblum. The building will be 45x127 feet and will contain an auditorium seating 700 people. The interior will be finished in brick and ornamental plaster. There will be a ventilating system. Considerable marble, tile and plate glass will be used. The exterior will be faced with cement plaster. Plans are complete and figures are being taken.

Contracts Awarded.

HOTEL—3 story and base, brick, \$30,000. Los Angeles, Cal. Architect, none. Owner, Mrs. Hannah K. Baker. Contractors, Milwaukee Building Co., Wright and Callender Bldg., L. A. Contract price, \$30,000.

HOTEL—5 story and base, Class B construction, \$45,000. Los Angeles, Cal. Architect, none. Owner, Adolph Schwartz. Contractors, Richards-Neustadt Construction Co., Wright and Callender Bldg., L. A. Contract price, \$5,000.

STORES—2 story and base, brick, \$36,766. Los Angeles, Cal. Architects, Frain & Williams, Exchange Bldg., L. A. Owner, A. T. Wells. Contractor, J. A. Crook, Chamber of Commerce Bldg., L. A. Contract price, \$36,766.

BANK—2 story and base, brick, \$20,000. Ocean Park, Los Angeles Co., Cal. Architects, Ye Planny Building Co., Title Insurance Bldg., L. A. Owners, Merchants' Commercial and Savings Bank. Contractor, S. W. Bryant, 308 Hill St., Santa Monica. Contract price, \$19,982.

GARAGE—1 story and base, brick and concrete. Cost not stated. Los Angeles, Cal. Architects, Architectural Designing Co., L. A. Owner, R. L. Kinbro, Contractor, J. E. Crough, 1211 West 39th St., L. A. Note: The contract has been taken on a percentage basis. The building will be 40x70 feet.

STORES AND OFFICES—2 story and base, brick. Cost not stated. Los Angeles, Cal. Architect, A. L. Acker, Story Bldg., L. A. Owner, Emma Oswald. Contractor, A. E. Harshman, Story Bldg. Contract price not stated. Note: The building will be 50x110 feet.

STORES—1 story and base, brick, \$12,000. Architects, Morgan, Walls & Morgan, Story Bldg., L. A. Owner, D. Bittler. Contractors, Barber-Bradley Construction Co., 1824 East 15th St., L. A. Contract price, \$12,000.

PORTLAND AND OREGON.

SCHOOL, DORMITORY—3 story and base, reinforced concrete, \$120,000. Portland, Ore. Architects, Doyle, Patterson & Beall, Worcester Bldg., Portland. Owners, Reed College. The building is to cover an area of 60x200 feet and will be fireproof throughout. The main floor of the building will be

arranged for a large dining hall with accommodations for two hundred persons at a time. Upper floors will be divided into 100 dormitory rooms. Interior finish will be of pine. There will be a steam heating system connected with the main power plant of the institution by a reinforced concrete tunnel. Exterior of the building will be faced with cement plaster. A clay tile roof is to be used. There will be metal window frames and sash. Plans are complete and figures are to be called for at once.

APARTMENT HOUSE—4 story and base, brick and steel. Cost not stated. Portland, Ore. Architect, none. Owner, J. D. Wharton. A well known contractor, R. F. Wassell, is handling the project and will erect the building. The building will be 50x100 feet and will be in the nature of an addition to the present four-story apartment house known as the Melcliff. There will be a total of 50 apartments of the two and three room type. Plans provide for steam heat, elevator service and a vacuum cleaning system. Interior will be finished in pine and hardwoods. The exterior of the building will be faced with pressed brick. Sub-bids will be called for as soon as plans can be completed.

GARAGE—1 story and base, reinforced concrete. Cost not stated. Heppner, Ore. Architect, E. E. McClaran, Lumber Exchange Bldg., Portland. Owner, S. P. Garrigues. The building has been designed for a commercial garage and will cover an area of 48x100 feet. The floor will be of concrete. Special gasoline storage tanks are provided. Interior of the front portion of the building, which is to be used as a salesroom, will be finished in pine and hardwood. The exterior of the building will be faced with cement plaster. Plans are complete and figures are being taken.

LODGE HALL—3 story and base, brick and concrete, \$25,000. St. Helens, Ore. Architect, E. Kroner, Worcester Bldg., Portland. Owners, St. Helens Masonic Temple Association. The building will be arranged for stores on the first floor and lodge halls, offices and a large banquet room on the two upper floors. There will be steam heat. Interior finish will be of pine and hardwoods. Plans have been out for figures before, but bids ran too high and revision was necessary. This work has been completed and new figures are to be taken at once.

THEATRE—4 story and base, reinforced concrete. Cost not stated. Portland, Ore. Architects, Camp & DuPuy, Portland. Owners, Rector Realty Co. The original intention of the owners was to erect a 12 story Class A structure, but this plan has been abandoned and a four-story building will be erected. The house will be designed for a moving picture theatre, the largest on the coast, and will have a seating capacity of 1,000 people. The main auditorium will be bowl shape with a number of private boxes. A modern system of heating and ventilation will be installed. Interior decorations will be very elaborate. The exterior of the building will be faced with cement plaster. Construction will be fireproof throughout. Plans are nearly complete and figures will be taken within a few weeks.

Contracts Awarded.

STORES AND OFFICES—4 story and base, brick and steel. Cost not stated,

Portland, Ore. Architect's name not given. Owner, T. B. Wilcox. Contractors, Brayton Engineering Co., Portland. Note: This contract has been taken on the percentage basis. The cost of the building is understood to be in the neighborhood of \$65,000.

SEATTLE AND WASHINGTON.

WAREHOUSE—6 story and base, reinforced concrete, \$60,000. Seattle, Wash. Architect, Robert Brown, 115 10th Ave., Seattle. Owner, George A. Smith. While plans have been prepared for a six-story structure only three stories will be erected at this time. This work has been estimated to cost \$45,000. Plans provide for an eight-ton elevator. No interior finish will be used. The exterior of the building will be faced with cement plaster. There will be metal window sash, frames and fireproof doors. An automatic sprinkler system will be installed. Plans are being prepared.

FACTORY—5 story and base, reinforced concrete. Cost not stated. Seattle, Wash. Architect, John Graham, Lyon Bldg., Seattle. Owners, Ford Motor Car Co. The company has sold the original site purchased last year and have bought on Roy and Valley streets. The new site has an area of 92,160 square feet, considerably more than the former location. Plans will be revised to meet the new requirements and the building will be erected as soon as possible. Construction will be fireproof. The estimated cost of the building planned for the former site was placed at \$350,000 and this structure will be even more.

FREIGHT AND PASSENGER STATIONS—1 and 2 story and base, brick and steel, \$60,000 and \$50,000. Seattle, Wash. Architect's name not given. Owners, Northern Pacific Railway Co., Seattle. The freight depot will be built on Terry avenue, and will be two stories high and cover an area of 30x360 feet. The passenger station is to be erected on Fremont avenue and will be one story high and cover an area of 60x170 feet. The passenger station will have pine and hardwood trim, a central heating system and other special features. The exterior of both buildings will be faced with brick. Plans are complete and figures are being taken.

DEPARTMENT STORE—9 or 10 story and base, Class A construction, \$350,000. Spokane, Wash. Architects, Sutton & Whitney, Lewis Bldg., Portland. Owner's name withheld. Two large establishments in Spokane are contemplating building, but the architects refuse information as to the owners of the new structure. Construction details are lacking at this time as only preliminary plans have been made. The building will cover a ground area of approximately 100x150 feet, and will be Class A throughout. Further mention will be made in these columns as the plans progress.

Contracts Awarded.

STORES AND OFFICES—10 story and base, reinforced concrete, \$500,000. Vancouver, B. C. Architects, Somerville & Putman, Seattle. Owners, Yorkshire Guarantee Co. Contractors, Dominion Construction Co., Northwest Trust Bldg., Vancouver. Contract price, \$500,000.

CALIFORNIA METAL PRODUCTION IN 1912.

Increased Gold Production. California Retains First Rank.

California shows an increase in output of both gold and silver in 1912 compared with 1911, according to preliminary figures by Charles G. Yale, of the United States Geological Survey. The difference is not very marked but sufficient to show that the precious-metal output of the State is advancing somewhat. California retains first rank in gold output, reckoned from Colorado in 1911. The same figures of the Survey for 1911 gave gold valued at \$19,738,908 and 1,044,5 ounces of silver, while estimates for 1912 indicate an output of gold valued at \$19,950,000 and 1,270,000 ounces of silver. Moreover, it is highly probable that when complete detailed returns are available, the 1912 figures will be somewhat enhanced.

The latest available complete statistics show that there are 1,181 producing mines in California, of which 55 are deep mines and 555 placers, including dredge, hydraulic, drift, and surface claims. Dredge mining seems to be the only form of placer work which is showing any marked advance, the yield from the other placers being either at a standstill or showing decline. The reasons for these conditions are that the ordinary surface and shallow claims are gradually being exhausted; the laws are unfavorable to the prosecution of large hydraulic mining enterprises, except in a few counties; and abundant capital is necessary for opening drift mines, and this is not readily available where so long a time may elapse before a profitable channel is reached.

Dredge-mining operations require even larger initial investments than hydraulic or drift mining, but the profits are likely to be larger and thicker, while the advance borings in the shallow ground insure reasonable certainty in operations and results. The dredges of the State are now producing over 85 per cent of the placer gold and about 39 per cent of the total gold yield from all sources. A few dredges were added in 1912 in the larger dredging fields and these are of the heaviest type and largest capacity. Some of the smaller and older dredges ceased operations during the year, either through working out their round or being unprofitable. By far the largest proportion of the gold yield from this source continues to come from the extensive fields near Oroville, Marysville, and Folsom. Several new dredges have recently been in operation in Calaveras County and at other isolated points. Toward the end of the year drifting operations were commenced on some of the very large hydraulic mines near Relief Hill, Nevada County, which have been virtually abandoned for many years. It is now hoped to make the channels pay by the drifting methods where the laws will not permit hydraulic mining.

In deep mining operations between 2,700,000 and 2,800,000 tons of ore is annually produced in California. By far the larger proportion of this ore is derived from the deep gold mines, especially from the extensive operations in the Mother Lode region. The

output of siliceous ore in the State has increased to some extent and this usually averages in value from \$4.65 to \$5.25 a ton in gold and silver. So far as can be ascertained at this time, there were only 13 new stamp mills added in California in 1912, all small ones, having a combined capacity of 163 stamps. There were also a dozen or more new Huntington and Graupner mills and a half dozen cyanide plants. No new smelters were erected.

Capitalists interested in some of the large quartz-mining operations in the Mother Lode counties, encouraged by having found very profitable ore at 3,600 feet, have during 1912 commenced work on a few of the old properties which were abandoned 20 or 30 years ago, when mining conditions were very different and such depths as are now attained were considered impracticable. On at least two of these properties immediate extension of 1,000 feet in depth is being carried on, with the intention of doubling that if thought profitable. If these efforts meet with success still other old mines will be reopened.

A rather discouraging feature of the year in this connection, however, is the fact that injunction proceedings have been commenced by farmers in the Sacramento Valley against all the prominent quartz-mining companies in Amador County, to compel the quartz-mine owners to impound their tailings by any suitable means. In the same manner that the hydraulic miners must impound their debris or tailings. The object is to keep the mountain and foothill streams clear and prevent the tailings from eventually reaching streams and rivers lower down in the valley. The main complaint at present appears to be against the "slaty" material carried in suspension and the accumulation of slimes in the sluggish valley watercourses. This movement has been impending for some years and especially since the operation of very large mills on Mother Lode mines. Over 2,250,000 tons of ore is crushed in the mills of California annually. Of this quantity the Mother Lode counties contribute about 1,400,000 tons. Considerably over 600,000 tons of this is derived from Amador County, which is possibly the reason that this county is the first to be attacked. As the material is generally heavy most of it settles close to its source and can be readily impounded, but whatever system is adopted entails an expense which the present free disposal of tailings does not require. The movement referred to, therefore, has an important bearing on the profits of the quartz-mining industry of the State, and the injunction suits indicate that the miners must consider additional working costs.

Another important factor in connection with the gold mining industry of California, and one to be deplored, is the marked cessation of prospecting operations and the resultant decline in discoveries of new mines, mainly in the mountain and foot hill regions where extensive national forests have been established.

For several years there has been a gradual decline in the copper output of California owing to the closing down of large smelting plants by litigation over damages by smelter fumes.

In 1912, however, an increase in output in copper is apparent over the yield of 1911, notwithstanding the permanent cessation of operations in 1911 of one of the very large plants of the State. This increase is due to the materially enlarged output from mines of two of the large companies owning their own smelting plants, to larger shipments from other mines which were producers in 1911, and to the advent in the producing column of certain new or reopened mines which supplied high grade ore to the custom smelters. The agitation on the part of farming communities over alleged damage by smelter fumes has by no means ceased, and the operations of three of the most extensive smelting companies of the State are seriously menaced. Experiments continue to be made—notably at the Penn Mining Co.'s plant at Camp Seco—with a view to finding a remedy for present troubles and these, thus far, may be said to be reasonably successful.

Lead mining in California shows little change in 1912, although a lessened output as compared with 1911 is apparent. In 1911 the figures for mine production were 1,398,111 pounds, but the preliminary returns for 1912 indicate only a yield of 1,032,000 pounds. The lead continues to come mainly from Inyo, Mono, and San Bernardino counties.

It is only within the last few years that any zinc has been produced in California, but in 1911 two mines, one in Inyo County and the other in San Bernardino County, produced about 2,800,000 pounds. Shipments of about the same quantity have been continued in 1912. There are in California extensive deposits of ores carrying so large a percentage of zinc sulphide as to be rejected by custom smelters and they are therefore unutilized at present. Experiments are now being conducted with these ores, with a view of making them commercially profitable. If this could be accomplished the zinc output of the State would be materially increased and an addition be made also to the gold and silver yield.

COUNTIES MAY BUY STATE BONDS.

SACRAMENTO, Jan. 24.—The problem of raising money for the continuance of work on the \$18,000,000 system of State highways in California may be partially solved by the bankers and other moneyed men of counties who will buy bonds to cover the expenditure necessary for the completion of portions of the State highway within their counties.

Santa Clara and Stanislaus Counties have so far promised to buy bonds to cover work necessary within their borders, and it is believed that Orange, Los Angeles and Fresno Counties will shortly follow suit. State Treasurer Roberts is in communication with persons capable of buying bonds in the three counties mentioned.

If money can be raised in this fashion to allow the continuance of State highways pending the closing of the Balkan War, it may carry the Highway Commission over until the bond market improves. The issuance of a big block of 4½ per cent bonds by Austria has spoiled the market for any bearing a lower rate of interest.

late Thursday afternoon D. II.

PATENTS

promptly obtained OR NO FEE Trade Marks, Copyrights, Inventions, and Patents registered. **TWENTY YEARS PRACTICE** Highest references. Send model, sketch, or photo for free report on patentability. All business confidential. **HAND-BOOK FREE.** Explains everything. Tells how to obtain and sell patents. What Inventions Will Pay, How to Get a Partner, explains best mechanical movements, and contains 300 other subjects of importance to inventors. Address, **H. B. WILLSON & CO. Attorneys** Patent, Box 239 Willson Bldg. WASHINGTON, D. C.

Kewin, representing the Board of Trade of Stanislaus County, and B. D. Whitmore, representing the Board of Supervisors of the county, appeared before the Highway Commissioners and promised to raise money to buy \$75,000 worth of bonds, which will cover the work remaining to be commenced in their county. The only bit of highway in Stanislaus upon which work has not been commenced is a strip eleven miles long running from the south line of San Joaquin County to within a mile and a half of Ceres. They were assured the work would be done under such circumstances.

Santa Clara bankers have pledged \$100,000 to cover highway work yet to be done in their county.

RAILROADS LOSE BY PARCEL POST.

SACRAMENTO, Jan. 24.—That the railroads are receiving the full benefits of the Parcel Post as regards carrying mail matter without compensation is the opinion of James O'Gara, District Freight and Passenger Agent of the Southern Pacific.

The weighing of the mails is done once every four years and the railroads carry on that basis until that

time has elapsed. The advent of the Parcel Post as a freight producer is adding greatly to the mail carried and promises to increase it 100 per cent. all of which increase will be carried for nothing until the next weighing occurs in 1914.

NEW INVENTIONS.

Reported especially for this paper by H. B. Willson & Co., Patent Attorneys, 715 Elghth street, N. W., Washington, D. C.

A complete copy of any of these patents will be forwarded to any person by Messrs. Willson & Co. on receipt of 10 cents. Persons ordering copies must give number of patent.

1,050,733. Telescoping Pocket Rule. F. G. Greathead, Denver, Colorado.

1,050,776. Wall Safe. H. C. Lowrie, New York, N. Y., J. M. Lowrie, New York, N. Y., administrator of said H. C. Lowrie, deceased.

1,050,801. Means for Holding Sash in position. Andrew Brunton, Chicago, Illinois.

1,050,804. Mold for Building Blocks. Audley R. Canfield, St. Paul, Minn.

1,050,816. Column and Ceiling Mold. P. A. Deslauriers and L. P. Deslauriers, St. Paul, Minn., assignor to P. A. Deslauriers and L. P. Deslauriers, Co-partners doing business under name of Deslauriers Column Mold Co.

1,050,834. Concrete Reinforcing Member. Chas. T. Inman and Hy. A. Robinson, Akron, Ohio.

1,050,837. Expanded Metal. Julius Kahn, Detroit, Mich., assignor to Trussed Concrete Steel Co., Detroit, Michigan.

1,050,881. Concrete Block Machine. Geo. F. Walker and Walter S. Mathes, Bazine, Kansas.

1,050,899. Sash Fastener. Hy. C. Vaeger, Canadian, Texas.

1,050,919. Vise. Jno. M. Conley, Raum, Ill.

1,050,969. Framing Tool or Protector. Daniel C. McLeod, Cedar Rapids, Iowa.

APPROPRIATION FOR FISHWAY.

WASHINGTON (D. C.), January 28.—Secretary Fisher and Director Newell have informed the House Irrigation Committee that work will begin at once on the fishway at Derby Dam. The dam is to cost \$2000.

RAKER ASKS \$10,000.

WASHINGTON (D. C.), January 28.—Congressman Raker now has a bill before the House Committee on Irrigation seeking an appropriation of \$10,000 for the construction of an adequate fishway at Derby Dam, both the Nevada and California Fish Commissions contending that a \$2,000 improvement would be practically thrown away.

As a result of the conference, held at the Instance of Congressman Raker, September 1, 1912, at Reno, Nevada, between representatives of the Government and representatives of the Nevada and California State Game Associations, Architect H. Von Boyer of the United States Bureau of Fisheries recommended the building of a new concrete fishway. The estimated cost was \$10,000, and that seems to have been the sticker with Secretary of Interior Fisher, who authorized the expenditure of \$2,000 in enlarging and fixing up the old fishway.

EL DORADO TIMBER SOLD.

PLACERVILLE (El Dorado Co.), January 28.—A tract of 800 acres, including some of the best timber land in this county, has been purchased from the W. Barklage heirs by the Danaher Pine Company. The price paid is said to have been \$75 per acre.

Editorial Comment.

A HUMAN HOPPER.

At this distance the magnitude of the "garment workers' strike" in New York is difficult to realize—unless, perchance, one of its effects might be to compel some of us to wear last year's styles another year, which would probably be a good thing.

But the thing has really been enormous. Anywhere but in the hugeness of New York, it could not have hid away. There have been 200,000 wage workers in the strike—two hundred thousand, which is perhaps more than all the industrial wage workers in California. Two hundred thousand women, striking for wages enough to be decent on, and for unlocked doors, to let them out in case the building burns. And the millions of women who wear the clothes those women make not knowing, nor much caring, about the system under which they are made.

It is a great human hopper, into which the womanhood of New York is thrown, and they come out, almost literally, through a grading machine. There are so many of them that cheaply the right sort, in quality or in cheapness, can be selected for each particular work. They come in assorted lots. You see the great vomitoria of the factory lofts pouring them into the street at six o'clock, and the uniformity is horrifying. In the places where cheapness is the only requirement, absolutely every girl with any individuality which might increase her market value has been eliminated. Every big peasant woman has been segregated, for rougher and better-paid labor. Every girl of force or brains has gone somewhere where these qualities are paid. Every pretty girl has gone up—or down. Remaining is a vast mass of assorted mediocrity, herded into lofts originally built to store goods, not to work people in, fitted in a system where all the intelligence is supplied from above, and girls, cloth and machinery are measured by the same standard of ruthless economy. The very sentiment of individuality disappears. At work the girl is the mere member of an exploiting organization. On strike, she is wielded almost as passively by the strike organization. Finally by the brains of a few devoted organizers—some agitators, some philanthropists—conditions are improved just a little. After a while, they may be improved just a little more. But, just as a human phenomenon, it is all a running through a huge hopper of a million girls and pouring out through this garment workers' chute of two hundred thousand of the most helpless, the least efficient, the completely individualized, and the chronically underpaid.—Fresno Republican.

Enough of legend and romance is attached to the existing record of the reign of the first governor of California to furnish ample scope for the imagination in the promulgation of the Portola festival in San Francisco. Don Gaspar Portola himself is a sort of a myth in history and the accounts of his expedition of discovery are meager enough. But his time was an age of romance and the discovery of the Golden Gate and San Francisco Bay were important events for after history. Balboa discovered the Ocean from the shores of Central America four hundred years ago. The lapse of four centuries has meant much in the world's history. The American continents have been colonized and the United States has been born and developed to the foremost nation of the earth. The year will mark the completion of the canal, or the practical completion of the work, which is the greatest engineering feat in the world's history. So the celebration this year will not only celebrate the coming of Portola but also the discovery of the greatest ocean in the world and which had through all the countless years been unknown to man.

The determination to celebrate the Portola festival has been determined early. It has ample subjects and wonderful scope for pageantry. It will celebrate an event that gives unlimited room for the imagination. Balboa and de Portola as men have long ago faded into the shadows of history. But their names still live and will always be identified with the Pacific Ocean and San Francisco Bay. It is San Francisco's day to celebrate and belongs to particularly more than any other holiday of the year.

The Compulsory Insurance Act that is up for consideration at this session of the legislature merits the attention of all builders. Its aim and intention is to amend a law that now is a good law for the workman but which is in many respects a bad one for the employer. Under the present act the insurance is elective. The defenses have been removed so that there is always a judgment against the employer in case of accident but it does not compel him to insure. Hence the employer who has no assets or is judgment proof can figure work against the solvent and responsible man without the insurance premium. Under this condition the responsible and solvent man is subjected to a lot of unfair competition.

The present bill provides for compulsory insurance for all. State insurance is provided for also so that the rates can not be made exorbitant by the companies. The constitution has been so amended that compulsory insurance is now possible. It will remedy the inequality of the former

law and make the burden of insurance be borne by the trade itself.

The world has moved a good deal in the last two years. Then the proposal to abrogate the contributory negligence and the fellow servant rule of the courts in industrial accidents was looked upon as revolutionary. Now there is comparatively little difference of opinion as to its justice. It is a progressive measure and society generally has advanced to the point of appreciating the facts.

The Chronicle comments upon the initiative proposition to reduce telephone rates as evidently a get-rich-quick scheme of the promoters. What the motive of the Telephone Users Association may be is not known but a reduction in rates is certainly a reasonable request and there is nothing in the proposition to warrant any criticism of direct legislation.

If there is any blot on the present city administration it is the fact that the Pacific Telephone and Telegraph Company was allowed to take over the property of the Home Telephone Company in direct violation of its contract with the city and the written terms of its franchise. No protest was made by the Chronicle or any other of the big newspapers. On the contrary every effort was made to discourage any action by the people to retain their rights under the contracts. Today the Pacific States Telephone Company is in possession of the Home plant, its service has been practically dismantled and all the city has is a lawsuit which will probably never be adjudicated.

Under these conditions a criticism from the press on the movement of the people to reduce rates of a monopoly that has always dealt in devious ways in securing franchises and securing its ends by any means.

The Income Tax Amendment has been finally adopted by the requisite number of states to make it a part of the organic law of the land. It is now up to the Congress to pass a law for the purposes of enforcing its provisions. A century almost has gone by in securing the result. Under the old original draft of the constitution a compromise provision was inserted to the effect that representatives and direct taxes should be apportioned among the several states according to the population. This was a provision for counting the slaves in estimating population and the direct taxes were to be apportioned according to population. Under this provision the people of great income have successfully evaded any federal income tax. Now that the long obsolete provision of the constitution has been changed taxes will be allowed to be levied where they are right belong.

So too with the provision for the election of Senators by a direct vote of the people. Corrupt politics has long prevented the change of that section of the constitution which provides that Senators shall be chosen in the several states by the legislatures thereof. This provision has been the source of more political corruption than any other. It is only a question of a short time till the requisite number of states will have ratified this amendment so that the people will be able to elect United States Senators direct without the intervention of the state legislatures.

A number of amendments have been submitted affecting the lien law now in operation in the State and it behooves all persons interested in the building business to look to the preservation of the present statute. The most radical of these is that submitted by Senator Gates of Los Angeles which seeks to repeal the present law and substitute the old statute with all its artificial restrictions. During the recess of the legislature the "Builder" will publish these various amendments with comments thereon showing the intent and probable effect of each. The law as it stands has proven satisfactory. There is no need of change at this time. It might be amended profitably in some particulars but until it has been adjudicated by the courts it is well enough to let things alone.

In another column of today's issue the facts relative to Judge Graham's decision on the demurrer in the case of Nelson Mfg. Co. vs. Devenenzi are given in a letter from the Attorney to the Secretary of the California Building Law Association. A lot of newspaper notoriety was given to the case at the time of the decision which was misleading. The demurrer was in fact overruled and no mention was ever made of it in the Daily Press.

The Chronicle has a half-page discussion of plans for transportation to the exposition grounds. It also prints some statements of those interested to the effect that those who selected the site are to blame. Among others are the opinion of Matt. I. Sullivan who says: "No Constitutional nor Charter Amendments are necessary. All the city needs to do is order the United Railroads to put on 500 more cars." Which seems to be the only sensible statement in the bunch.

The city has paid and is paying Bion J. Arnold an enormous sum of money for practically nothing. The only thing he has done is to propose a charter amendment which was extremely ambiguous and which most of the voters rightly thought played into the hands of the United Railroads. Harbor View is not at all inaccessible. It is a site peculiarly fitted for the exposition. There is no reason why transportation cannot be provided and without the city being held up for franchises to a corporation that is already making the people pay interest on fifty millions of fictitious capital.

It is time to stop talk about the site. People who live in the Mission are sore because it didn't go to Lake Merced. Those who live in the vicinity of the Park think that it should have gone to the Park. It has gone to a Bay site, near the Golden Gate, where it properly belongs and of course there are a lot of hoags that wish to profit by any circumstance that may come their way. And the greatest of these is the United Railroads.

Don't as to the stability of the dam at Little Bear Valley in San Benito County has been expressed before the Railroad Commission and the State Engineer has likewise spoken of the dam at Big Meadows to be erected by the Great Western Power Company as being likely to be uncertain in its stability. These are vast projects involving millions of dollars in expenditure for construction. They will store millions of tons of water and be a

menace to inhabitants of the valleys below. There should be no question of the stability of construction and every safeguard should be placed to protect the lives and property of people below as well as the property of the people who own the dam and those that are dependent upon its water supply.

Some form of inspection of these dams should be provided. The State Engineer or some competent officer in the employ of the State should inspect these structure and make a detailed report upon them, which report should be a matter of record. The great disasters that have occurred in Pennsylvania where dams have broken loose emphasize the danger where great quantities of water are impounded at a level necessarily higher than the country which they serve. Some sort of permit ought to be required to construct a dam anywhere where the lives and property of people would be endangered by the collapse of the structure.

Dr. Galloway of the Plant Bureau has created something of a discussion by his assertion that there had never been any long continued successful irrigation in an arid region anywhere in the world. This is simply stating an historical fact which is true when we consider the term "long-continued" to mean a number of centuries. And then it has one exception for the valley of the Nile has been irrigated since the earliest dawn of recorded history. It is still as fertile and productive as when Pharaoh's daughter found little Moses in the bullrushes. The reason for this is that the flood waters of the upper Nile annually supply the sediment which restores the exhausted chemicals to the soil. This recurs every season and the plant-growing elements are continually renewed. In the case of the Nile nature renews the exhausted elements. These can be restored by man in the shape of fertilizers.

Irrigated countries have usually become desolated from other reasons. Bad government and bad forestry have removed the source of water supply. In a semi-arid country where a forest is once denuded it is likely never to be restored. So when war or poverty drove the people out of the countries that were formerly densely populated they remained permanently desert country.

The semi-arid valley land of California, for instance, formerly produced wheat in abundance. Now the soil is almost exhausted for dry farming. Water applied brings out the chemicals to restore unused and the land is productive. In time these elements will be flushed from the soil by irrigation and the land will have to be renewed. So that even if Dr. Galloway's contention is true irrigation is the only available means of rendering productive the vast arid fields which are now deserts. Should irrigation not prove to be permanent in the sense of rendering a country productive for thousands of years, the time that it is productive would be lost and thus saved to the world. With modern ideas of conservation and forestry advanced to a science there is no reason why irrigation could not be a permanent improvement to the world.

REINFORCED CONCRETE.

A Building Material Historically And Scientifically Considered.

By H. D. Shutt, C. E.*

*Mr. Shutt is a prominent Alberta civil engineer, and delivered this address in Calgary before the annual Convention of the Institute of Western Canada Civic Building Superintendents.

Historically, one of the first references to the use of reinforced concrete in buildings was in France, in 1850. Coming across to this side of the Atlantic, a form of reinforced concrete was used in 1872, in a house at Port Chester, N. Y. In 1885 Ransome invented his twisted steel bar for use as reinforcement, and demonstrated the principles involved in the successful incorporation of steel in concrete. From 1885 to 1890 Ransome used a system of reinforcement in many buildings in San Francisco and vicinity, and it is interesting to note that notwithstanding the crudeness of the design these buildings came through the recent earthquake at San Francisco practically unscathed, while neighboring buildings of brick and stone were entirely demolished.

The use of reinforced concrete as a building material received a great impetus in 1897-1898, when builders and engineers were faced by a great shortage of structural steel, and were obliged to turn to reinforced concrete to fulfil their designs. The result was that they began to study the reinforcing of concrete from a scientific standpoint, and by 1900 reinforced concrete was generally recognized as a building material.

Since then, its use in buildings has increased in about the same proportion as the production of Portland cement. In 1900 there were approximately 8,400,000 barrels of Portland cement manufactured; in 1905 about 36,000,000 barrels; and for the past year something over 60,000,000 barrels on this side of the Atlantic.

Concrete alone is capable of supporting great weights in direct compression, but it is weak in tension, being able to support only about one-tenth as much in tension as in compression. Therefore, if it is desired to use concrete as a beam or slab, it is necessary the portion of such beam or slab which is in tension be reinforced and that the reinforcement be placed in exactly the same position in which it will do the most good. The steel should be placed as close as possible to the bottom, only a layer of concrete or at least one and one-half inches being below the steel for fire protection. But if that beam enters a column or passes over one or more supports, it ceases to be a simple beam and becomes either a fixed or continuous beam. Then there is a tension stress in the top fibres of such a beam where it enters or passes over a support, and for economic design reinforcement must be placed there accordingly.

But there are other stresses in a beam that have to be provided for besides tension. There is the question

of web stress or internal shear. This is provided for by stirrups of mild strap steel or heavy steel wire bent into form either of a U or a rectangle, which theoretically should be inclined at an angle of 45 degrees toward the support. In practice they are usually placed vertically for convenience except in the case of patented systems, although a slight excess of steel is thereby made necessary. The spacing of these stirrups is usually a function of the depth of the beam. It is also common practice to bend a part of the reinforcing bars up at either the one-third or one-fourth points of the span at an angle of from 30 to 45 degrees, and bring the bar back along the top of the beam, thus aiding in the top reinforcement against negative bending moment, as well as taking care of a part of the internal shear of the beam.

The strength of concrete varies with the quality of materials, the quantity of cement per cubic yard of concrete, and the density of the mixture. Therefore the strongest as well as the most economical mixture consists of an aggregate containing a large variety of sizes graded so as to fit into each other and leave the smallest possible amount of voids, with enough cement to slightly more than fill the voids in the aggregate.

The steel used should be preferably a mild steel, having an ultimate strength of from 55,000 pounds to 65,000 pounds per square inch. A high carbon steel is sometimes more economical on account of its higher ultimate strength, which is from 90,000 pounds to 115,000 pounds per square inch, but on account of its brittleness it must be placed with great care, and should not be used by an inexperienced designer or contractor.

As to mixtures, no leaner mixture than 1:2:4 should be used for reinforced concrete, unless great care has been taken in the selection and testing of materials and testing of the cement.

The usual working values of stresses in concrete are as follows:

In compression, from 500 pounds to 700 pounds per square inch, depending upon the richness of the mixture.

In tension, from one-tenth to one-eighth as much as in compression.

In shear, about one-fourth as much as in tension.

These values give factors of safety of from 3 to 6.

Too much care cannot be taken in the selection of materials for reinforced concrete. Of course, the cement must be satisfactorily tested. The fact that the manufacturer "guarantees" his particular brand of cement should not suffice, but independent tests should be made as to fineness, time of initial and final set, density and tensile strength attained in one day and seven days. It is not usually possible to make a 28-day test, valuable as it is, on small jobs, but where the work is to be extended over a period of time,

a 28-day test should always be required. Samples for testing should be taken from at least every tenth barrel. Each car load should be piled separately to permit of taking samples, and the samples from each car should be tested separately. Cement should be stored in a waterproof building, with the floor raised from six inches to eight inches off the ground to permit a free circulation of air underneath.

The stone for the aggregate should be examined, and a soft or porous stone or one showing many cleavage planes or a stone of shaley formation should be rejected. The crushed rock must be piled on planes or platforms to keep it from the earth. Otherwise a wheelbarrow load of the scrapings of stone and earth might be thrown into a batch that was to be placed at just the point in your beam or column that will be subjected to the greatest stress.

The sand should be sharp and gritty, and practically free from loam or vegetable matter.

The general adaptability of reinforced concrete is beyond question. A reinforced concrete building is practically a monolith. There is less vibration in a concrete structure because the weight of the material and the monolithic nature of the structure tend to deaden and absorb vibration. This makes reinforced concrete especially suitable for buildings which are to contain heavy or high-speed machinery. The ability of reinforced concrete to withstand severe vibration was satisfactorily shown in the recent San Francisco earthquake.

If the reinforcing steel is properly protected, a reinforced concrete building is absolutely fireproof. Not an instance has been reported of the failure by fire of a reinforced concrete structure in which the steel was properly protected, although there were many such structures in both Baltimore's and San Francisco's fire-swept districts. One inch is the greatest depth to which the concrete was found to be damaged, although in some instances water from a two and a half-inch nozzle was turned in when the outside of the concrete was almost at a red heat. The only damage seen in such cases was a spalling or chipping off from one-half inch to one inch in thickness.

The matter of initial cost varies with the locality. Take the example of two recently erected buildings in Calgary: One an office block with a steel frame, a steel floor and laminated wooden floors; and the other a reinforced concrete apartment house of practically fireproof construction. The steel frame building cost about 27 cents per cubic foot of entire volume, and the concrete building cost approximately 22 cents per cubic foot of the total volume, showing a difference of about 19 per cent in favor of the reinforced concrete structure. The cost of the steel structure would have been con-

considerably increased if tile or fireproof floors had been used, and if the columns had been properly protected by concrete.

The General Electric Company, which is the largest electrical manufacturing company in the world, is erecting reinforced concrete structures wherever they are in need of new buildings. They spend hundreds of thousands of dollars yearly in constructing these buildings. A modification of the "Unit System" is the design usually used.

In the matter of finish, a little care in the mixing of and erecting forms, and any desired decoration can be cast with the wall or column. If so desired, panning in cement plaster or stucco may be applied, and any desired color effect be obtained by coloring the mortar. Cement plaster will adhere more firmly to concrete than to brickwork, for the rate of expansion is more nearly the same, and there is less danger of cracking.

After the reinforcement of the building has been designed by a competent engineer and the materials properly selected, comes the question of competent supervision and honest erection of the building. If the placing of the steel is left to unskilled laborers or is not properly supervised, it is more than probable that it will not be placed in its proper position in the beam or slab. Even though there is an excess of reinforcement in the beam, if this reinforcement is not in its proper position, the beam is likely to partially or entirely fail.

If the workmen are left to themselves or are not properly directed they are apt to remove the forms before the concrete has become sufficiently hard. They do not stop to consider whether the weather conditions have been such as to aid the setting up of the concrete or have hindered it. If the forms are removed too soon and material piled on the beam, a partial or total failure is the result. Concrete must be protected in hot weather as well as in cold. Excessive heat causes too rapid evaporation of the moisture in the concrete, and there is not sufficient moisture left for the chemical changes that are taking place in the mass.

Fort Mason for a one-story and basement reinforced concrete building, which is to be erected at the Letterman General Hospital in the Presidio. The structure will cover a ground area of 73 feet 4 inches by 119 feet 2 inches, and is designed for a sterilizing and disinfecting building. Specifications include large copper skylights, metal window frames and sash and modern plumbing. An estimated cost of \$18,000 is placed on the work.

A new piece of sea wall is to be constructed at Fort Mason, plans for which are now being prepared. Construction will be of reinforced concrete. The wall will be 100 feet long and 14 feet high and will be located near the boat houses.

LIEN LAW A SUCCESS

Has Never Been Declared Unconstitutional By Any Court.

Facts Of The N. O. Nelson Manufacturing Company Case Presented By The Attorney.

The following letter to the California Building Law Association by Mr. Ackerman, Attorney for the Nelson Mfg. Co., explains the case that was decided some time ago and which has been widely published as stating that the law is unconstitutional.

Lon. W. S. Scott,

Sec. Cal. Building Law Ass'n.,
San Francisco, Cal.

Dear Sir:

In accordance with your request that I advise you of the history and present status of the case of N. O. Nelson Mfg. Co. vs. Brown, et al, I beg to submit the following statement:

Action was instituted in the Superior Court of San Francisco County by N. O. Nelson Mfg. Co., dealers in plumbing supplies, against W. J. Brown and wife, owners, Devenzenci Bros. & Co., contractors, and Golden Gate Plumbing Co., sub-contractors.

Golden Gate Plumbing Co. was employed by Devenzenci Bros. & Co., the original contractors, to do and perform the plumbing work in the building to be constructed on the land owned by Brown and wife. The Golden Gate Plumbing Co. purchased from Nelson Company certain plumbing supplies which were delivered to the building and actually used in the erection and construction of the building.

The sub-contractors failed to fully perform their contract and there was no money in the hands of the original contractor due to the sub-contractor, and no money in the hands of the owner due to the original contractor. Under the circumstances Nelson Company liened and in due course instituted an action to foreclose the lien.

The defendants appeared by their attorneys and entered a demurrer to the complaint on the ground that the same failed to state a cause of action, the theory being that no cause of action could be stated by the materialman under the new lien law, the complaint having set forth that there was no

money in the hands of the owner due to the contractor.

Upon the argument of the Demurrer the defendants attacked the law on the ground of its unconstitutionality, and after argument Judge Graham of the Superior Court of this City and County sustained the demurrer thereby deciding that the present mechanics' lien law is unconstitutional. Subsequently I made application to Judge Graham to reconsider his ruling and suggested that the matter be submitted again and that the attorneys be permitted to present briefs on the question. This was done.

It was contended on behalf of the defense that the present mechanics' lien law is unconstitutional for the reason that it infringes the provisions of the constitution of the United States insuring to every person liberty of contract and due process of law; that a provision which seeks to deprive the owner of the restrictions upon his liability is void; that it is beyond the power of the legislature to declare a lien directly on the land irrespective of the state of accounts between the owner and the contractor; that it is beyond legislative power to provide a lien on behalf of a person with whom the owner has had no contractual relations; that a law which requires the owner to ascertain before settling with the contractor whether or not all materials supplied to the building have been paid for is an unlawful burden upon him.

Subsequently Judge Graham, after considering the briefs filed by counsel withdrew his former ruling, and overruled the Demurrer thereby requiring the defendants to answer to the merits of the case.

Thereafter an offer was made by the defendants to my client, the Nelson Mfg. Co., to pay them a certain amount in settlement of the lien and this offer was accepted thereby disposing of the case.

So far as I know, and I have watched the decisions carefully, there has been no ruling of any kind whatever in this State declaring the present Mechanics' Lien Law unconstitutional.

If you desire any further information I am at your command.

Yours very truly,
LLOYD S. ACKERMAN.

More New Work At Government Post.

Constructing Quartermaster's Office Busy on Plans for Addition to Hospital and Sea Wall.

A contract has been awarded by the Constructing Quartermaster's Department of the United States Army at Fort Mason for repairs to the new Army Transport Docks which include new cluster piles, Australian iron bark rub strips and fender piles. The Healy-Tibbitts Construction Company secured the work at \$6771.

A contract has also been awarded by the same department for wiring screening a room in Store House D to Francis Szake for \$265.

HOSPITAL ADDITION.

Plans are being prepared in the Constructing Quartermaster's Office at

Harbor Commission Extends Time On Bids.

Tender for Pier No. 39 Received From Thompson Bridge Co. Completes Work of Board.

Bids for the construction of Pier No. 39 were received by the State Board of Harbor Commissioners Thursday morning, but none of the bids were opened. Action was taken postponing the opening of figures until next Tuesday at 11 o'clock. This was done owing to the fact that a bid for the construction of Pier No. 39 has been received from the Thompson Bridge Co. and this firm now have an application before the State Board of Harbor Commissioners asking to be allowed to withdraw their bid submitted for the construction of Pier No. 37 on which work they were some \$19,000 below the State Engineer's estimate and \$30,000 below the next bidder. The Commis-

soners have the matter in the hands of their attorney for consideration and pleading an expression of opinion from him on the above complications it was not regarded as good policy to consider any of the bids for new work.

THE "HOME BUILDER."

Theory vs. Common Sense in the Construction of Homes for Comfort—A Few Suggestions

Home building is a subject that is near to the hearts of all, and is capable of many interpretations. There are many home builders and there are many types and varieties of homes built. The resultant "home" in a large manner depends upon the view point with which the home builder approaches his subject. If, as we fear is sometimes the case, he views it as a mere problem of successful finance, then the result is likely to be successful from his standpoint alone.

Again, it may be that the home builder is so far a judge of mankind, or rather womankind, for it is they who chiefly interest themselves in this subject, and rightly too, that he perceives that a certain style or "freak" is the vogue for the moment, so he covers up his successful finance with a veneer of the particular style that is "de rigueur" or the moment.

The much abused California bungalow is a case in point, of which the extreme unsuitability for our climate is obvious and rapidly becoming recognized. For, in California, actually, a flat roof and a large over-hang and plenty of verandah to sit out upon is correct and most acceptable. But for us in a more northerly climate, though a beautiful one, and in many ways superior to that of California, the same style is not suited. Our rainfall is an established fact and though when it rains the major portion of the water runs away, a certain amount stays behind and clings to the shingles. The latter the roof, the larger the residue.

In a climate where for a certain part of the year the rainfall is decided, the steeper the pitch of the roof the better. Shingles, even the best, after a number of years become rotted, and if laid to a flat pitch will hold the water far more than if laid to a steep one. The subject is so obvious that further remark is unnecessary to make clear the folly and ignorance of copying a style for that style's sake, regardless of the local conditions. The California bungalow in British Columbia is as ridiculous as would be the ice-hut of the Esquimaux.

Next our home builder may clothe his successful finance at the expense of the home-liver with a superfluous, gingerbread decoration of the type seen on wedding cakes. This is expensive, puerile, offensive and dishonest, for it is merely applied decoration to conceal imperfect construction.

This architectural decoration is not an applied ornament, but should express the internal construction and if the construction itself is a decoration then the highest achievement in architectural art has been obtained, i.e. it in the Cathedral or bungalow.

Leaving for a moment the various erroneous viewpoints of some home builders which are sterile and will become extinct, there remains for con-

sideration that of the true home builder. The finance should of course be the main basis of continual success, and not at the expense of the architectural design or building construction, and that architectural results can be obtained together with financial success. One small house, in particular, erected in Victoria gives evidence of the result satisfactory from all view points which can be obtained without the affectation of any particular style or the dishonesty of applied ornament, and this is nearing com-

pletion on Avelbury Avenue, Victoria. Here, proportion and a reason for every feature were the guides followed in designing by the architect. The construction is solid as the external appearance expresses. There will be found no freaks, no weird or grotesque gaping mouths cut out of the barge board ends—in fact no vulgarities—merely a refined house of a retelling but solid disposition—a well built home for a true home lover.—From pamphlet prepared by British Canadian Home Builders, Limited, Victoria.

Firms desiring news on special classes of buildings such as Banks, Churches, Schools, Hotels, etc., will find such items all classified and grouped under proper headings, commencing on this page. These same items are again repeated under "LOCALITIES" in the last part of our news department.

—APARTMENT HOUSES—

SAN FRANCISCO—Apartment house, 6 or 9 story and base. Class A construction, \$250,000 to \$300,000. Architect not selected. Owner, Tiley L. Ford and associates. Following the announcement of the sale of the southwest corner of California and Jones streets, 103½x137½ comes the statement that the new owners, Tiley L. Ford and associates, will build a six or nine story Class A apartment house costing in the neighborhood of \$250,000 to \$300,000 on the property. The sale was made through the real estate offices of Trevor & Co. The new owners are considering preliminary sketches submitted by two different architects, and a selection will not be made before the first of March.

SAN FRANCISCO—Apartment house, 3 story and base, frame, \$30,000. Architect, Henry C. Smith. Humboldt Bank Bldg., S. F. Owner, Frank Hunter. Plans are complete for a building containing in the neighborhood of 25 suites of two and three rooms each. There will be wall beds and private baths. Interior finish will be of pine and redwood with some oak veneer. Steam heat will be installed. The exterior of the building will be covered with brick veneer and cement plaster. Bath rooms will be finished in tile and will have cement floors. Bids are now being taken on this work.

SAN FRANCISCO—Apartment house, 3 story and base, frame, \$30,000. Architect, C. M. Cook. Rialto Bldg., S. F. Owner's name withheld. The building will be erected on Broderick street, and is designed to contain 24 suites of the two and three room type. All apartments will have wall beds and private bath rooms. Interior finish will be of pine and redwood with some oak veneer in the lobby. Plans include steam heat and hot and cold running water. Bath rooms will have cement floors. The exterior of the building will be covered with cement plaster on metal lath. Plans are complete and figures are being taken.

SAN FRANCISCO—Apartment house, 3 story and base, frame, \$10,000. Architect, Paul de Martini, 421 5th Ave., S. F. Owner, Paul de Martini. The building will cover an area of 40x60 feet, and is to contain 10 small suites, with bathtubs and wall beds. Interior trim will be of pine and redwood throughout. Hot water will be supplied to all rooms. The exterior of the building will be covered with shiplap and rustic. Plans are complete and

the work will be done by Day Labor.

SAN FRANCISCO—Apartment house, 5 story and base, brick and steel, \$150,000. Architect, Creighton Wilbers, S. W. California and Powell Sts., S. F. Owner, L. H. Sly. Mr. Sly, one of the largest operators in apartment house structures in the west, has recently purchased the southwest corner of Post and Leavenworth streets, and has instructed his architect to prepare plans for a modern apartment house structure covering the entire lot, which has a frontage of 137½ feet on Leavenworth street and 127 feet on Post. The building will contain in the neighborhood of 300 guest rooms, which will be arranged in two and three room suites with baths. Interior finish will be of pine, redwood and oak with ornamental plaster in the lobby, parlors and reception rooms. Plans provide for steam heat, elevator service and a hot water plant. Vacuum cleaning will also be installed. The exterior of the building will be faced with cement plaster on brick. Plans are complete and the work will be carried on under the personal direction of Mr. Sly, who is now purchasing all materials.

SAN FRANCISCO—Apartment house, 3 story and base, frame, \$30,000. Architects, Fabre & Bearwald, Western Metropolitan Bank Bldg., S. F. Owner's name withheld. The building is to be one of the first modern apartment houses erected south of Market street. The interior has been arranged to contain 24 suites of two and three rooms each with bath and wall beds. Interior finish will be of pine and hardwoods. There will be steam heat and a vacuum cleaning system. Bath rooms will be finished in tile. An attractive entrance and lobby will be one of the features of the building. The exterior will be covered with pressed brick veneer and shiplap. Plans are complete and figures are being taken.

SAN FRANCISCO—Apartment house, 2 story and base, frame, \$25,000. Architect, Milton Lichtenstein, 111 Ellis St., S. F. Owner's name withheld. The building will be erected at the corner of Jackson and Locust streets and is to contain 24 apartments of two and three rooms each with wall beds and private baths. Interior finish will be of pine, redwood and oak. The bath rooms will be wainscoted with tile. Steam heat and hot and cold running water will be installed. The exterior of the building will be covered with cement plaster and brick veneer. Plans are nearly complete and figures will be called for shortly.

OAKLAND, CAL.—Apartment house, 2 story and base, frame, \$12,000. Architect, Leonard H. Ford, 1701 Oxford St., Berkeley. Owner, John J. Fosen, 2809 Elbert St., Oakland. The building will be erected at the corner of 4th Ave. and East 16th St., Oakland, and will contain 12 apartments of two and 3 rooms each. All suites will have connecting baths and wall beds. Interior finish will be of pine and redwood with some oak in the entrance vestibule and lobby. There will be a central heating system and vacuum cleaning. The exterior of the building will be covered with cement plaster on metal lath. Plans are complete and in the hands of the owner who is taking figures on the work.

OAKLAND, CAL.—Apartment house, 2 story and base, frame. Cost not stated. Architect, M. L. Newsum, 812 Broadway, Oakland. Owner, Al Wood, 922 Broadway, Oakland. The building will be arranged for stores on the first floor and a number of two room suites on the second floor. All interior trim will be of pine or redwood. Hot and cold running water will be supplied to all apartments. There will be patent store fronts. The exterior of the building will be covered with cement plaster on metal lath. Plans include a furnace heating system. Plans are in the hands of the owner who is taking bids on the various parts of the work.

SAN JOSE, SANTA CLARA CO., CAL.—Apartment house, 2 story and base, frame. Cost not stated. Architect, F. D. Wolfe, Bank of San Jose Bldg., San Jose. Owner, F. Mayhew. The building will be erected at the corner of 10th and Santa Clara streets, and is to be arranged for several two and three room suites with baths. The interior will be finished in pine and redwood. Some oak flooring will be used. All apartments will be equipped with wall beds. There will be a central heating system. The exterior of the building will be covered with cement plaster on metal lath. Plans are complete and figures are being taken.

SEATTLE, WASH.—Apartment house, 5 story and base, reinforced concrete, \$175,000. Architect, W. P. White, Walker Bldg., Seattle. Owner, B. M. Fouts. This building will be erected at the northeast corner of 16th and Madison streets, and is to be arranged for 25 large suites of from five to eight rooms and bath each. All modern conveniences will be installed, including wall beds, elevator service, vacuum cleaning system and steam heat. Interiors will be specially finished for the owners and will include much hardwood and marble and tile. Besides the 25 suites there will be a large office, lobby, reception rooms and parlors. The roof will be arranged for a roof garden. The exterior of the building will be faced with white glazed terra cotta. Plans are complete, and figures will be called for within a day or two.

LOS ANGELES, CAL.—Apartment house, 4 story and base, brick. Cost not stated. Architects, George F. Costerisan and J. F. Cavanaugh, associated, California Bldg., L. A. Owners, Lawyer and Thomas. The building will be erected on a corner and will cover an area of 56x112 feet. Interior has been arranged for 67 rooms, which will be divided into two and three room suites with wall beds and private bath rooms. Interior finish will be of pine throughout. Plans provide

for steam heat, automatic electric elevator and a vacuum cleaning system. Bath rooms will have composition floors. The exterior of the building will be faced with pressed brick. Plans are being prepared.

LOS ANGELES, CAL.—Apartment house 3 story and base, brick. Cost not stated. Architect, Elmore R. Jeffery, Citizens' National Bank Bldg., L. A. Owner, Mrs. Ella Barker. The building will cover a ground area of 105x79 feet and has been arranged to contain 85 guest rooms which will be divided into two and three room suites. All apartments will have wall beds and private baths. Interior finish will be of pine. Bath rooms will have composition floors. There will be steam heat, elevator service and a vacuum cleaning system. Entrance will be finished in marble and tile. The exterior of the building will be faced with pressed brick. Plans are nearly complete and figures will be called for shortly.

VANCOUVER, B. C.—Apartment house, 5 story and base, brick and concrete, \$50,000. Architects, Stuart & White, Metropolitan Bldg., Vancouver. Owner, H. S. Rowling. The building will be 50x77 feet and has been arranged for a number of two and three room suites with wall beds and connecting baths. Plans include steam heat, elevator service and a vacuum cleaning system. Interior finish will be of pine and redwood. The exterior of the building will be faced with cement plaster and pressed brick. Plans have been filed for a permit and construction will be started at once.

VANCOUVER, B. C.—Apartment house, 6 story and base, concrete and brick, \$160,000. Architect, W. T. Whiteway, Molson's Bank Bldg., Vancouver. Owner, Harry Hume. The building is to be erected on a corner site. Details of the construction have not been obtained. Plans are still in a preliminary state, and it will be some months before construction can be started. Further announcement will be made in these columns.

WENATCHEE, WASH.—Apartment house, 3 story and base, brick and concrete, \$15,000. Architect's name withheld. Owner, T. E. Young, Haight Bldg., Seattle. Mr. Young is a well known Seattle contractor, and has had plans prepared for a building 80x145 feet. Interior will be arranged for 30 or 40 suites of two and three rooms each. There will be steam heat and a vacuum cleaning system. Interior will be finished in pine with some hardwoods. Bath rooms will be finished in tile and will have composition floors. Wall beds are to be used throughout. The exterior of the building will be faced with pressed brick. Work will be done by Day Labor. Plans are not as yet complete.

Contracts Awarded.

PORTLAND, ORE.—Apartment house, 2 story and base, brick, \$30,000. Architect none. Owner's name not given. Contractors, F. E. Bowman & Co., 22nd and Brazil Sts., Portland. Contract price, \$27,000. Note: The building will cover an area of 190x85 feet. Construction has not yet been started.

MERCED, MERCED CO., CAL.—Apartment house, 3 story and base, brick, \$20,000. Architect's name not

E. H. Williams

Chalmer Munday

Munday & Williams

given. Owner, H. J. Hinds. Contractor, A. Rahives, Merced. Contract price, \$20,000. Note: This building will contain 26 suites with private baths and wall beds. Plans include steam heat.

BANKS.

RIVERBANK, STANISLAUS CO., CAL.—Bank, 2 story and base, reinforced concrete, \$15,000. Architects, Starbuck & Clarke, Fresno. Owners, Riverbank Land and Water Co. The building is to cover an area of 50x90 feet. The entire first floor will be occupied by the banking offices, public room and work space. Second floor is to be arranged for a number of modern offices. Interior finish will be of pine and hardwoods. Considerable marble and tile will be used. Special bank fixtures and vaults will be installed. The exterior of the building will be faced with pressed brick. Plans are being prepared.

Contracts Awarded.

OWENSMOUTH, CAL.—Bank and offices, 2 story and base, brick and concrete, \$17,000. Architects, Ye Planry Building Co., Title Insurance Bldg., L. A. Owners, Los Angeles Suburban Homes Company, Trust and Savings Bank. Contractors, Ye Planry Building Co., Title Insurance Bldg., L. A. Contract price, \$17,000.

BRIDGES, DAMS AND HARBOR WORK.

SAN FRANCISCO.—Pier construction, reinforced concrete, \$500,000. Engineer, Assistant State Engineer, Ferry Bldg., S. F. Owners, State of California. At a meeting of the State Board of Harbor Commissioners held Thursday morning, the time for opening bids for the construction of Pier No. 39 was extended until next Tuesday at 11 o'clock. Such action was made necessary owing to the fact that a bid was received for this work from the Thomson Bridge Co., who are now asking to be released from their bid for the construction of Pier No. 37. Pending an expression of opinion from their attorney the State Board refused to consider bids for new work on which the Thomson Bridge Co. submitted a figure.

HUNTINGTON PARK, LOS ANGELES CO., CAL.—Pier, reinforced concrete construction, \$70,000. Engineer, Ernest Rothenberg, 1257 West 12th St., Room 11 D. L. A. Owners, City of Huntington Park. Plans and specifications as prepared by Engineer Rothenberg have been approved by the City

Council and bids will be called for shortly. The structure will be of reinforced concrete except the deck which is to be of wood. Bonds in the sum of \$70,000 have been sold.

YOSEMITE, CAL.—Bridges, 4, reinforced concrete, \$30,000. Engineer, Department of Interior, Washington, D. C. Owners, United States Government. Oscar Parlier, of Tulare, was low bidder at \$27,198 for the construction of four reinforced concrete bridges in Yosemite National Park. Other bidders were Gildersleeve Construction Co., Napa, \$33,775; M. P. Youker, San Francisco, \$35,964; W. N. Concato Co., San Francisco, \$37,700; Elmer J. Chute, Oakland, \$37,788; Munoz & Munoz, Los Angeles, \$38,333; Midland Bridge Co., Los Angeles, \$40,134; State Construction Co., San Francisco, \$41,361; Wm. Bruce, San Francisco, \$49,000; Southwestern Construction Co., Los Angeles, \$19,750; Fisher Engineering Co., Portland, \$51,313; T. K. Beard, Modesto, \$53,890; Westlake Construction Co., Los Angeles, \$61,600. The bids will be forwarded to the Secretary of the Interior at Washington, D. C., for segregation and approval.

—COURT HOUSES & JAILS—

CHINOOK, MONT.—Court house, 2 story and base, brick and concrete. Cost not stated. Architect, George Stanley, Great Falls, Mont. Owners, Blaine County. Plans for this building are complete and figures are being taken. Bids will be opened on February 20th. Plans and specifications can be secured from the architect or from Vernon Butler, County Clerk.

SEATTLE, WASH.—Court house addition, 3 story and base, Class A construction. Cost not stated. Architect, A. Warren Gould, American Bank Bldg., Seattle. Owners, King County. The commissioners have decided to proceed at once with the construction of a part of the proposed court house, and have instructed the architect to complete what revision of plans and specifications is necessary. The whole project involves \$950,000. Bids will be called for shortly.

CHURCHES.

SAN FRANCISCO—Chapel, frame construction, \$12,000. Architect, City Department of Architecture, Temporary City Hall, S. F. Owners, City and County of San Francisco. This building will be erected on the Relief Home Tract and will have a seating capacity of about 320 people. The interior will be finished in pine and redwood. Design is in the Mission style. The exterior will be covered with cement plaster on metal lath. Plans are nearly complete and bids will be called for shortly by the Board of Public Works.

MODESTO, STANISLAUS CO., CAL.—Church, 2 story, frame and concrete. Cost not stated. Architect, John J. Foley, Monadnock Bldg., S. F. Owners, Roman Catholic Church of Modesto. The building is to be designed in the Spanish Mission style with the exterior covered with cement plaster on metal lath. Interior will be finished in pine with some ornamental plaster work. There will be seats for about 500 people. A red tile roof is to be used. Plans have just been or-

dered and it will be some time before working drawings are complete. Further notice will then be given in these columns.

SANTA ANA, ORANGE CO., CAL.—Church, 2 story and base, frame, \$50,000. Architect not selected. Owners, First Baptist Church of Santa Ana. The church directors are considering plans for the construction of a new building. Rev. Otto S. Russell is the pastor. An architect has not yet been selected.

BAKERSFIELD, KERN CO., CAL.—Church, frame or brick construction, \$35,000 to \$50,000. Architect not selected. Owners, Congregational Church of Bakersfield. The Building Committee of the First Congregational Church are considering plans for the construction of a new edifice. C. A. Barlow is the chairman of the committee and will submit a report to the main body within a few days. Further notice of the work will be given in these columns.

SAN DIEGO, CAL.—Church, 2 story and base, Class A construction, \$190,000. Architect's name not given. Owners, First Presbyterian Church. A campaign has been started to raise the balance of the fund for construction and work will be started shortly. The new church is to be erected at the corner of 3rd and Date streets. Some part of the work has been completed, but to finish the church \$190,000 will be required.

REDONDO BEACH, LOS ANGELES CO., CAL.—Church, 1 story and base, frame. Cost not stated. Architect, L. B. Pemberton, Auditorium Bldg., L. A. Owners, First Church of Christ, Scientist. The building will contain a main auditorium seating 200 people, reader's room and Sunday school rooms. Interior will be finished in pine. The exterior of the building will be covered with cement plaster on metal lath. Plans are now being prepared.

SEATTLE, WASH.—Synagogue, 2 story and base, reinforced concrete, \$10,000. Architect, B. Marcus Pretica, Empire Bldg., Seattle. Owners, Yesler Avenue Synagogue. This building has been mentioned here a number of times before. Plans have been completed and turned over to the Building Committee, who are now taking figures on the work. Foundations are already in and the work now being figured for completing the construction.

FACTORIES & WAREHOUSES.

SAN FRANCISCO—Warehouse, 3 story and base, reinforced concrete. Cost not stated. Architects, Cunningham & Pollett, First National Bank Bldg., S. F. Owners, Warehouse and Investment Co. This building is to be erected on King street east of Third, and will cover an area of 120x120 feet. The entire building has been leased to a large importing firm. Construction will be fireproof throughout with concrete floors and roof slabs. There will be fireproof doors and metal window sash and frames. Freight elevators will be installed. The exterior of the building will be faced with cement plaster. Plans are now being prepared.

SAN FRANCISCO—Warehouse and factory, 4 story and base, reinforced

concrete. Cost not stated. Architect, George William Kelham, Crocker Bldg., S. F. Owners, Gantner & Matern Co. It has been stated on excellent authority that Lindgren & Co. will be given the contract for the construction of this building, which is to be erected on Mission street near 10th.

PORTLAND, ORE.—Warehouse, 2 story and base, reinforced concrete. Cost not stated. Architects, Whitehouse & Poulthou, Wilcox Bldg., Portland. Owners, Pacific Bridge Co. A site has been secured at the corner of Salmon and Water streets and a building 60x100 feet is to be erected as soon as plans can be completed. The plans will provide for foundations and walls of sufficient strength to carry several additional stories. Construction will be fireproof with concrete floors and roof slabs. Fireproof doors and metal window sash and frames are specified. The exterior of the building will be covered with cement plaster. Plans are being prepared.

SOUTH PORTLAND, ORE.—Factory, 5 story and base, brick. Cost not stated. Architect, C. H. Bristow, Portland. Owners, Carman Manufacturing Co. This is the second notice given to the Carman Company's project, which is to establish the largest furniture manufacturing plant on the coast. Plans have been completed for the first building to be erected, which will be a two-story mill constructed addition to the present factory, and will cover an area of 80x30 feet. This work will be done by Day Labor. Following this construction will come the five-story building which will probably be erected this year. A large reinforced concrete retaining wall and a large fill will be undertaken later.

PORTLAND, ORE.—Factory, 4 story and base, reinforced concrete, \$150,000. Architect, John Graham, Lyon Bldg., Seattle, associated with Architects, Doyle, Patterson & Beach, Portland. Owners, Ford Motor Car Co. It is stated that Alexander Pearson, New York Bldg., Seattle, is low man on this work, and he is now in Portland negotiating with the associate architects. The estimated cost of the building was placed at \$150,000.

SEATTLE, WASH.—Warehouse, 4 story and base, reinforced concrete, \$60,000. Engineers, Weld & Thomas, Hoge Bldg., Seattle. Owners, Sylvester Bros. The building will cover an area of 90x115 feet, and has been designed for a modern fireproof warehouse. There will be concrete floors, metal window frames and sash and fireproof doors. Freight elevators and an automatic sprinkler system will be installed. The exterior of the building will be faced with cement plaster. Plans are complete and figures are being taken.

VICTORIA, B. C.—Warehouse, 3 story and base, reinforced concrete, \$30,000. Architect, M. S. Farwell, Victoria. Owners, Scott and Peden. The building has been designed for a flour and feed warehouse. Construction will include metal window frames and sash. The exterior will be faced with cement plaster. Some special machinery will be required, which is not to be included in the general contract. Plans are complete and figures are being taken.

FLATS.

SAN FRANCISCO—Flats, 4, 2 story and base, frame, \$4,500 each. Architect, none. Owner, A. B. Hallett, 1259 12th Ave., S. F. These buildings will all be erected on the west side of 7th avenue near I street. Each building will contain two modern flats of five and six rooms each. Interior trim will be of pine and redwood with some hardwood floors. Gas grates and open fire places will be used. Tile will be used in the bath rooms and kitchens. The exteriors will be covered with rustic, shingles and cement plaster on metal latb. Plans are complete and the work will be done by Day Labor.

SAN FRANCISCO—Flats, 3 story and base, frame, \$5,000. Architect, Theo. Lenzen, Humboldt Bank Bldg., S. F. Owner, D. M. Shafer. The building will be erected on Filbert street, and is to have a frontage of 25 feet and a depth of 48 feet. The building will contain two modern flats of five and six rooms each with bath. Interior finish will be of pine and redwood with some oak floors. Elm panels will be used in the dining and living rooms. Open fire places and tile or brick mantels will be a feature of the house. Tile will be used in the baths and kitchens. The exterior will be covered with rustic. Plans are complete and the work will be done by Day Labor.

OAKLAND, CAL.—Flat and stores, 2 story and base, frame. Cost not stated. Architect, none. Owner, F. Armanino, 5100 Telegraph Ave., Oakland. The building will cover a considerable area and has been arranged for 12 stores on the first floor and two flats above. Interior finish will be of pine throughout. The exterior will be covered with rustic. Plans are in the hands of the owner and the work will be done by Day Labor.

LODI, SAN JOAQUIN CO., CAL.—Flats, 2 story and base, frame, \$6,000. Architect, Walter King, Elks' Bldg., Stockton. Owner, Miss Anna Brack. The building will be arranged for four small flats of four rooms each with bath. Interior finish will be of pine and redwood. Oak floors will be used in the principal rooms. Tile will be used in the bath rooms and kitchens. The exterior of the building will be covered with rustic. Plans are now being prepared.

GARAGES.

LOS ANGELES, CAL.—Garage, 1 story and base, brick. Cost not stated. Architect, A. C. Martin, Higgins Bldg., L. A. Owner, Mrs. Marie Hammel. The building will have a frontage of 50 feet and a depth of 133 feet. There will be a concrete floor, metal window sash and frames and special gasoline storage tanks. The front portion of the building will be used as a sales-room and will be finished in hardwoods and tile. A tile floor will be used and special fixtures. The exterior of the building will be faced with pressed brick. Plans are complete and figures will be called for at once.

LOS ANGELES, CAL.—Garage, 1 story and base, brick and concrete, \$30,000. Architect, none. Owner, F. O. Engstrum, 5th and Seaton streets, L. A. The building will cover an area of 50x237 feet, and has been designed for a commercial garage. The front

portion of the building will be arranged for salesrooms, and will be finished in mahogany and tile. Tile floor will be used. The rear portion of the building will be used as a repair shop, storage space and machine shop. Special storage tanks will be used. The exterior of the building will be faced with pressed brick. Plans are complete and the owner will do the work by Day Labor.

GOVERNMENT WORK AND SUPPLIES.

Canal Circular 557-A.

An advertisement appears elsewhere in this issue calling for bids to be opened January 31 by the general purchasing officer of the Isthmian Canal Commission, Washington, D. C., for furnishing the following:

- Class 1. Round and flat merchant bar iron or soft steel.
- Class 2. 393 sheets steel.
- Class 3. 300 tee angles and 74 steel I-beams.
- Class 4. 250,000 lbs track spikes.
- Class 5. 1,150 flat punches and 800 spiral punches.
- Class 6. 50,000 lbs ingot copper.
- Class 7. 30 reams bond paper.
- Class 8. 150 reams typewriting paper
- Class 9. 7,500 sheets ruled paper.
- Class 10. 15,500 sheets index bristol.
- Class 11. 10,000 scratch pads.
- Class 12. 250 record books.
- Class 13. 1,500 rolls pyramid pins.

Structural Steel for Pier No. 17.

The Isthmian Canal Commission will soon call for bids for furnishing structural steel for shed pier No. 17, Cristobal terminal docks, in accordance with drawings. The following is estimated weights of the steel in the shed and unloader masts and girders:

- Main trusses, 900,000 lbs.
- Jack rafters, 131,000 lbs.
- Purlins, 309,000 lbs.
- Two rows longitudinal trusses, side, 76,000 lbs row A-A, 69,690 lbs; row B-B, 69,690 lbs; row C-C, 73,800 lbs row D-D, 36,300 lbs; row E-E, 120,000 lbs.
- Steel door framing, sides and ends, 130,000 lbs.
- Lateral braces, 67,700 lbs.
- Unloader masts, girders, stays, etc., 322,600 lbs.
- Necessary rivets, 11,500 lbs.

Pearl Harbor, Storage Tanks.

The following bids were received by the chief of the bureau of yards and docks, Navy Department, Washington, D. C., on January 25 for furnishing steel fuel oil storage tanks at the naval station, Pearl Harbor, H. T.:

- W. N. Concanon Co., Monadnock Building, San Francisco, Cal., \$61,785.
- Ritter-Conley Mfg. Co., 53 Water street, Pittsburgh, Pa., \$60,900.
- Treadwell Construction Co., Midland, Pa., \$60,000.
- Chicago Bridge & Iron Works 10500 Throop street, Chicago, Ill., \$73,000.
- Petroleum Iron Works Co., Sharon, Pa., \$63,717.
- The Reeves Bros., Alliance, Ohio, \$67,920.

the power plant, storage unit, Yakima project, Wash. The electrical schedule includes one 150-K. W. alternator, complete; one 7½ K. W. direct current exciter, and one switchboard apparatus, complete. The schedule for hydraulic apparatus includes two 200 H. P. horizontal tangential impulse wheels, with gate valves and piping, complete; two 200 H. P. hydraulic turbines, with gate valves and piping complete; two oil-pressure governors for 200 H. P. impulse wheels, and two oil pressure governors for 200 H. P. hydraulic turbines.

FORT MASON, CAL.—Sea Wall construction, reinforced concrete. Cost not stated. Engineer, Constructing Quartermaster, Fort Mason. Owners, United States Government. Plans are nearly ready for figures for a piece of reinforced concrete sea wall which is to be erected at Fort Mason. The sea wall will be 100 feet long and 14 feet high. Bids will be taken through the Constructing Quartermaster's office at Fort Mason.

Contracts Awarded.

FORT MASON, CAL.—Repairs to transport docks, etc., \$6,000. Engineer, Constructing Quartermaster, Fort Mason. Owners, United States Government. Contractors, Healy-Tibbitts Construction Co., S. F. Contract price, \$6,771.

HALLS AND SOCIETY BUILDINGS.

OAKLAND, CAL.—Auditorium, 2 story and base. Class A construction, \$500,000. Architects, Palmer & Hornbostel, New York, associated with J. J. Donovan, Security Bank Bldg., Oakland. Owners, City of Oakland. Plans for the structural steel work for this building have been completed and are now out for figures. The building has been fully described here several times before. Bids will be opened for the furnishing and erecting of the structural steel on February 27th. The official proposal appears in another column of this issue. Complete information relative to the work can be secured from Architect Donovan.

Contracts Awarded.

STOCKTON, SAN JOAQUIN CO., CAL.—Lodge hall, alteration of 2 story brick building into three story structure. Architect, Walter King, Elks' Bldg., Stockton. Owners, San Joaquin Investment Co. Contractor, T. D. Lewis, South San Joaquin St., Stock-

ion. Contract price not stated. Note: This work has been taken on the percentage basis.

CAN AWARD
VANCOUVER, B. C.—Association building, 6 story and base, Class A construction, \$310,270. Architect's name not given. Owners, Young Men's Christian Association, Contractors, Booker, Campbell & Whipple, 413 Granville St., Vancouver; Contract price, \$310,270. Note: This building when complete will cost \$600,000.

—HOSPITALS—

PRESIDIO OF SAN FRANCISCO—Hospital addition, 1 story reinforced concrete, \$18,000. Architect, Constructing Quartermaster, Fort Mason. Owners, United States Government. Plans are nearly complete for a one-story reinforced concrete building 73x118 feet, which will be erected adjoining the Letterman General Hospital at the Presidio. The building is designed for a sterilizing department. Floor will be of concrete. Roof will be of tile. The exterior of the building will be faced with cement plaster. Interior finish will be of pine, tile and hardwood. A separate contract will be let for the special equipment. Plans will be out for figures in a few days.

LOS ANGELES, CAL.—Hospital, 2 story and base, reinforced concrete. Cost not stated. Architect, George Low, County Building, Los Angeles. Owners, Los Angeles County. The following bids were received at the last meeting of the Board of Supervisors for this work:

F. O. Engstrum Co., \$49,647; deduct \$1250 if composition roofing is substituted for slate; deduct \$1615 if 31 feet of west wing is omitted; deduct \$6361 if painting is omitted.

Willard-Slater Co., \$48,500; deduct \$2100 if composition roofing is used instead of slate; deduct \$3800 if painting is omitted.

J. F. Atkinson, \$50,500; deduct \$1100 if composition roofing is substituted for slate; deduct \$1500 if painting is omitted; deduct \$2200 if 31 feet of west wing is omitted.

The following bids were received for the plumbing: W. D. Newell, \$5861 complete; deduct \$2350 if fixtures are omitted; Howe Bros., \$7181 complete, \$2216 for roughing-in only; Thos. Haverly Co., \$7100, deduct \$4100 if fixtures are omitted; Lohman Bros., \$6998 complete, \$2416 for roughing-in only; F. M. Parker, \$8000 complete, deduct \$1500 if fixtures are omitted.

TAPT, KERN CO., CAL.—Lodge hall, 3 story and base, brick, \$20,000. Architect, J. M. Saffel, Fisk Bldg., Bakersfield. Owners, Odd Fellows Building Association. The building will cover an area of 50x125 feet. The first floor is to be arranged for stores and the upper two floors for lodge rooms, banquet hall and offices. Interior finish will be of pine and hardwood. There will be a central heating system. The exterior of the building will be faced with pressed brick trimmed with terra cotta. Plans are being prepared and figures will be called for within the next week or ten days.

HOTELS.

SAN FRANCISCO—Hotel, 3 story and base, brick, \$16,500. Architect Ber-

nard J. Joseph, First National Bank Bldg., S. F. Owner, Clara Hibberd. The building will be erected on Howard street west of 3rd street, and will cover an area of 10x7½ feet. There will be stores and the hotel entrance on the first floor. Upper floors will be divided into a number of modern hotel rooms with hot and cold running water. Steam heat will be installed. The exterior of the building will be faced with pressed brick. A contract has been let for the excavating and concrete work. Other parts of the work are out for figures.

SAN FRANCISCO—Hotel, 7 story and base, reinforced concrete. Cost not stated. Architect, M. Mattanovich, David Hewes Bldg., S. F. Owner's name withheld. The building will be erected in the downtown hotel district and will be designed for a modern commercial hotel. Preliminary sketches are all that have so far been prepared and details of construction cannot be given at this time. Full particulars will be published next week.

OAKLAND, CAL.—Hotel, 7 story and base, brick and steel. Cost not stated. Architect, A. W. Smith, 1010 Broadway, Oakland. Owners, Clancarlo Bros. The building is to be erected at the southeast corner of 16th and Jefferson streets, and will be designed for a high class commercial hotel. Construction will be of steel and brick with exterior walls faced with pressed brick. Plans include steam heat, elevators and a water heating system. Interior will be finished in pine, redwood and some hardwood. Lobby will be finished with marble, tile and ornamental plaster. Plans are being prepared.

VENICE, LOS ANGELES CO., CAL. Hotel, 4 story and base, brick and steel, \$50,000. Architect, W. S. Garrett, Currier Bldg., L. A. Owner, Albert H. Beach. The building will cover an area of 81x90 feet, and has been arranged to contain a total of 81 guest rooms and 15 baths. Interior finish will be of pine, redwood and some hardwood. Bath rooms will have composition floors. There will be steam heat, elevators and a vacuum cleaning system. The exterior of the building will be faced with pressed brick. Plans are being prepared.

LOS ANGELES, CAL.—Hotel, 8 story and base, Class A construction. Cost not stated. Architects, Parkinson & Bergstrom, Security Bldg., L. A. Owner, Clarence Brown. This building is to be erected at the southeast corner of Wilshire Boulevard and Carondelet street. Only the preliminary plans have been prepared and details of construction have not been settled. The sketches show 250 guest rooms, all of which will have private baths. Construction is to be practically fireproof. Full details will be given as the plans progress.

LOS ANGELES, CAL.—Hotel, 4 story and base, brick. Cost not stated. Architect, A. E. Featherstonhaugh, Ferguson Bldg., L. A. Owner, Joseph H. Call. The building will cover an area of 60x165 feet, and has been arranged for 90 guest rooms, 21 of which will have private baths. Besides the private baths there will be nine public baths. Interior trim will be of pine, redwood and elm. Composition floors will be used in the baths. Office and lobby will be finished in oak with ornamental plaster. There will be steam

heat and elevator service. The exterior of the building will be faced with pressed brick. Plans are complete and figures are being taken.

SPOKANE, WASH.—Hotel, 12 story and base, Class A construction, \$1,000,000. Architect's name not given. Owners, Davenport Hotel Co. A report originating in Portland states that the Brayton Engineering Co., Lumbermen's Bldg., Portland, has been awarded the contract for the construction of this building. The report cannot be verified at this time.

Contracts Awarded.

PORTLAND, ORE.—Hotel, 1 story and base, mill construction, \$80,000. Architects, Rennes & Hendricks, Portland. Owners, Matsehr Bros. Contractors, J. S. Winters & Co., Portland. Contract price, \$80,000.

—LIBRARIES—

ALHAMBRA, LOS ANGELES CO., CAL.—Library, 1 story and base, brick, \$45,000. Architect, Frederick L. Rohrig, American Bank Bldg., Alhambra. Owners, City of Alhambra. The building, which is to be classic in design, will cover a ground area of 90x100 feet. There will be, in addition to the usual library rooms, ladies' and gentlemen's club rooms, auditorium, open air reading rooms and children's departments. Interior will be finished in pine, redwood and hardwood. Metal shelving will be used. There will be a central heating system. The exterior of the building will be faced with cement plaster. Roof will be of metal tile. Plans are being prepared and figures will be called for shortly. Besides the library, a bond issue of \$172,000 provides for several other buildings which are to be erected in a civic center.

Contracts Awarded.

SEATTLE, WASH.—Branch Library, 1 story and base, brick and concrete, \$30,000. Architects, Thomas & Somervell, associated, Seattle. Owners, City of Seattle. Bids opened for the Queen Anna Branch Library show Woeck & Belins, Oriental Bldg., low on the general construction at \$23,850; Ernst Hardware Co. low on the plumbing at \$2545, and J. J. Agutter & Co. low on the electric work at \$322. The above mentioned firms will probably be awarded the contracts.

RAILROAD CONST., STATIONS AND EQUIPMENT.

SEATTLE, WASH.—Railroad construction, \$75,000. Engineer, Engineering Department, Puget Sound Traction, Light and Power Company. Owners, Puget Sound Traction, Light and Power Company. A permit has been granted to the above mentioned company to construct a second track on Meridian avenue from north 46th street to 58th street. The work has been estimated to cost \$75,000.

RESIDENCES.

SAN FRANCISCO—Residence, 2 story and base, frame, \$2500. Architect, none. Owners, Bay Cities Building Co., Merchants' Exchange Bldg., S. F. The dwelling has been designed for a five-room house with bath. Interior finish will be of pine and red-

work throughout. A large brick mantel and open fire places will be used in the living room. Tile will be used in the bath and kitchen. The exterior of the dwelling will be covered with rustic. Plans are complete and in the hands of the owners, who will do the work by Day Labor.

SAN FRANCISCO—Residences, 2, 2 story and base, frame, \$2,500 each. Architect none. Owner, Fernando Nelson, 30 Piedra Terrace, S. F. Mr. Nelson is probably the best known home builder in San Francisco. His operations are still confined to the Richmond District, and these two dwellings will be constructed on 16th avenue near C street. Each will contain six rooms and bath. Interior finish will be of pine and redwood. Some oak floors will be used. There will be brick and tile mantels and open fire places. Tile will be used in the bath rooms and kitchens. The exteriors of the houses will be covered with rustic and cement plaster. Plans are complete and the work will be done by Day Labor.

SAN FRANCISCO—Residences, 1, 2 story and base, frame, \$2,500 each. Architect, J. M. Geary, 52 Walter St., S. F. Owner, J. H. Krause, 23rd and Polson streets, S. F. These houses will be erected in what is known as College Terrace near Mission street, and each will be arranged for six rooms and bath. All interior finish will be of pine and redwood. There will be open fire places and tile mantels. Some oak flooring will be used. Tile will be used in the bath rooms and kitchens. The exteriors will be covered with rustic, shiplap, and cement plaster. Plans are complete and in the hands of the owner, who will do the work by Day Labor.

BERKELEY, ALAMEDA CO., CAL.—Residence, 2 story and base, frame. Cost not stated. Architect, Olin S. Grove, 2911 Telegraph Ave., Berkeley. Owner, D. L. Levy. This house has been designed for an eight-room dwelling with bath and sleeping porch. Interior finish will be of pine and redwood with hardwood floors in the principal rooms. There will be furnace heat and open fire places. Mantels will be of brick. Tile will be used in the bath room and kitchen. The exterior of the building will be covered with cement plaster on metal lath. Plans are complete and figures are being taken.

PIEDMONT, ALAMEDA CO., CAL.—Residence, 2 story and base, frame, \$3,000. Architect, C. C. Jones, Head of Santa Barbara Road, Berkeley. Owner, R. E. Jones. The dwelling will contain seven rooms, bath and sleeping porch. Interior finish will be of pine and redwood with some elm panels. Oak floors will be used in the principal rooms. There will be furnace heat and open fire places. Mantels will be of brick. Tile will be used in the bath room and kitchen. The exterior of the dwelling will be covered with cement plaster and shakes. Plans are complete and figures are being taken.

BERKELEY, ALAMEDA CO., CAL.—Residence, 2 story and base, frame, \$4,500. Architect, none. Owner, George R. Tryner, 2729 Prince St., Berkeley. The house has been designed for an eight room dwelling with bath and sleeping porch. Interior finish will be of pine, redwood and oak. Hardwood floors will be used in the principal

rooms. There will be furnace heat and open fire places. Mantels will be of brick and tile. Bath rooms will be finished in tile and will have a composition floor. The exterior of the dwelling will be covered with shingles. Plans are complete and in the hands of the owner, who will do the work by Day Labor.

BERKELEY, ALAMEDA CO., CAL.—Bungalow, 1 story and base, frame, \$2,500. Architect, Frank M. May, 2145 Center St., Berkeley. Owner, J. A. Pinkerton. The bungalow will contain six rooms, bath and sleeping porch. All interior finish will be of pine and redwood. Hardwood floors will be used in the principal rooms. There will be a large open fire place with brick or tile mantel in the living room. Tile will be used in the bath and kitchen. The exterior of the house will be covered with shingles. Plans are complete and the work will be done by Day Labor.

SAN FRANCISCO—Residences, 2, 2 story and base, frame, \$2,200 each. Architect, none. Owners, Bay Counties Home Bldg. Co., Merchants' Exchange Bldg., S. F. These houses will be erected on Diamond street near 21st. Each house will contain five or six rooms and bath. Interior finish will be of pine and redwood. Some hardwood floors will be used. There will be open fire places and brick or tile mantels. The exteriors will be covered with rustic, shingles and cement plaster on metal lath. Plans are complete and in the hands of the owners who will do the work by Day Labor.

PIEDMONT, ALAMEDA CO., CAL.—Residence, 2 story and base, concrete, \$4,500. Architect, none. Owner, James Rountree, 3417 Shafter Ave., Oakland. The house has been designed for an eight-room dwelling with bath and sleeping porch. Interior finish will be of pine and redwood with some oak used in the dining and living rooms. Hardwood floors will be used throughout. There will be open fire places and brick or tile mantels. Tile will be used in the bath room and kitchen. Furnace heat will be installed. The exterior of the house will be covered with a cement plaster. Plans are complete and the work will be done by Day Labor.

OAKLAND, CAL.—Bungalow, 1½ story and base, frame, \$2,000. Architect, none. Owners, Realty Syndicate, Syndicate Bldg., Oakland. Owner, Colin McInnis. The dwelling will contain five rooms and bath. Interior finish will be of pine throughout. Hardwood floors will be used in the living and dining rooms. There will be a large open fire place with brick mantel in the living room. Tile will be used in the bath and kitchen. The exterior of the house will be covered with shingles. Plans are complete and the work will be done by Day Labor.

BERKELEY, ALAMEDA CO., CAL.—Bungalows, 7, 1 story and base, frame, \$2,500 to \$3,000. Architect, none. Owners, Patrick-Nelson Co., 2025 Addison St., Berkeley. These houses will be erected in Fairmont Park and have been designed to contain from five to six rooms each. The interiors will be finished in pine, redwood and some hardwoods. Hardwood floors will be used throughout. Several of the houses will have central heating plants. All will have open fire places and tile or

brick mantels. Tile will also be used in the bath rooms and kitchens. Exteriors will be covered with cement plaster. Plans are complete and the work will be started at once under the Day Labor system.

OAKLAND, CAL.—Bungalow, 1½ story and base, frame, \$3,250. Architect, none. Owner, E. W. Woodward, 1510 Broadway, Oakland. The house has been designed for a six-room dwelling with bath and sleeping porch. Interior will be finished in pine and redwood with hardwood floors in the principal rooms. There will be furnace heat and open fire places. Mantels will be of brick and tile. Tile will be used in the bath room and kitchen. There will be an automatic water heater installed. The exterior of the house will be covered with cement plaster. Plans are complete and the work will be done by Day Labor.

SAN JOSE, SANTA CLARA CO., CAL.—Residence, 2 story and base, frame, \$6,000. Architect, F. D. Wolfe, Bank of San Jose Bldg., San Jose. Owner, Frank Fleming. The dwelling will contain eight rooms, baths and sleeping porch. There will be a central heating system and open fire places. Mantels will be of brick and tile. Interior finish will be of pine, redwood and some hardwood. Hardwood floors will be used in the principal rooms. An automatic water heater will be installed. Tile will be used in the bath rooms and kitchen. The exterior of the house will be covered with cement plaster on metal lath. Plans are complete and figures are being taken.

ST. HELENA, NAPA CO., CAL.—Residence, 2 story and base, frame, \$20,000. Architect, L. M. Turton, Napa. Owner, Fred S. Ewer. This house has been designed for a large country home and will include all of the latest improvements and conveniences. Besides the main living rooms there will be several baths and sleeping porches. Interior will be finished in pine, redwood and hardwoods. Hardwood floors will be used in the principal rooms. A central heating system will be installed. There will be a number of large open fire places with either brick or tile mantels. Tile will be used in the bath rooms and kitchen. An automatic water heater will be used. Composition floors will be used in the bath rooms. The exterior of the house will be covered with cement plaster and stone. Plans are complete and figures are being taken. Plans can be seen at the architect's office or will be sent to responsible contractors on application if accompanied by a deposit.

PORTLAND, ORE.—Residence, 2 story and base, frame. Cost not stated. Architects, Johnson & Mayer, Portland. Owner, Dr. A. E. Rockey. The dwelling has been designed for a sixteen-room house with every modern convenience. Interior finish will be of pine and hardwoods. There will be a hot water heating system, automatic water heater, open fire places and a vacuum cleaning system. Hardwood floors will be used throughout. There will be open fire places and brick mantels. Bath rooms will be finished in tile with composition floors. The exterior of the house will be covered with cement plaster on metal lath. Plans are complete and figures are being taken.

SCHOOLS.

SAN JOSE, SANTA CLARA CO., CAL.—School, 1 story and base, reinforced concrete, \$85,000. Architect, Norman F. Marsh, Broadway Central Bldg., L. A. Owners, Hester School District. All bids received for the general construction and other parts of the work in connection with the construction of this building have been rejected. The total of the lowest figures received for the various departments of the work was far in excess of the amount available. Plans will be revised and new bids called for shortly.

EL MODENA, ORANGE CO., CAL.—School, 1 story and base, brick, \$25,000. Architect, H. M. Patterson, O. T. Johnson Bldg., L. A. Owners, El Modena School District. The building will cover a ground area of 102x106 feet and will contain six class rooms besides an auditorium with a seating capacity of 350 people. Interior finish will be of pine and maple. Maple floors will be used throughout. There will be a central heating system. The exterior of the building will be faced with pressed brick. Plans are complete and figures are being taken.

PHOENIX, ARIZ.—School, 1 story and base, brick, \$35,000. Architect, Norman F. Marsh, Broadway Central Bldg., L. A. Owner, City of Phoenix. The building will contain six class rooms, principal's room, teachers' rooms and assembly hall seating 350 people. Interior finish will be of pine throughout. There will be a central heating system and a modern system of ventilation. Program clocks and a vacuum cleaning system are also called for in the specifications. The exterior of the building will be faced with pressed brick. Plans are complete and figures will be taken at once.

LACEY, WASH.—College building, 3 story and base, brick and steel, \$55,000. Architect, C. Frank Mahon, Savage-Seoffield Bldg., Tacoma. Owners, St. Martin's College. This building will be the first unit of a \$250,000 project which is to be erected at St. Martin's College. Interior finish will be of pine and hardwoods. A central heating system will be installed. The exterior of the building will be faced with pressed brick. Plans are complete and figures are being taken. Bids will be opened on February 23rd. Plans can be secured from the architect.

AURORA, ORE.—School, 1 story and base, brick. Cost not stated. Architect, N. C. Gannut, Chamber of Commerce Bldg., Aurora. Owners, Aurora School District. The building will contain four class rooms, assembly hall and principal's office. Interior finish will be of pine. Maple floors will be used throughout. A steam heating system will be installed. The exterior of the building will be faced with pressed brick. Plans are complete and figures are being taken. Bids will be opened on February 17th. Plans can be secured from either the architect or Louis Webert, Clerk of the Board of Education.

SEATTLE, WASH.—Schools, 2, 2 story and base, reinforced concrete, \$65,000 each. Architect, Edgar Blair, Seattle. Owners, City of Seattle. Each of the buildings will contain eight class rooms and an assembly hall. Interior finish will be of pine and hardwood. Plumbing and heating are to

be included in the general contract. One of the buildings will be erected on Concord street near 7th avenue, and the other at the corner of North 55th street and Latona avenue. Plans have been approved by the Board of Education and bids will be opened on February 20th. Plans can be secured from the architect or from Reuben W. Jones, Clerk of the Board of Education. Working drawings are being prepared for two similar buildings, which are to be erected in Seattle as soon as plans can be completed.

**SEWERS, STREET WORK AND
WATER SYSTEMS.**

MENDOCINO CO., CAL.—State highway work. Cost not stated. Engineer, State Department of Engineering, Sacramento. Owners, State of California. At the last meeting of the State Highway Commissioners held in Sacramento, it was voted to call for bids for the construction of two more strips of highway. These will be built in Mendocino County and Los Angeles, the first between Eucino and Calabasas in Los Angeles County a distance of 10.13 miles, and the other between Ukiah and Forsythe Creek in Mendocino County, a distance of 7.6 miles. All bids received for the construction of the highway between Linda and the county line in Butte County have been rejected. The Engineer's estimate for this stretch of road was \$32,632, and the lowest figure received was \$60,632. New bids will be called for shortly. A contract has been awarded to Franklin &

Beachtel for the road work between Willits and Ridgewood in Mendocino County for \$29,987.

MODESTO, STANISLAUS CO., CAL.—Irrigation work, pumping plants, etc., \$75,000. Engineer's name not given. Owner, R. F. Ball, Modesto. Mr. Ball will spend in the neighborhood of \$75,000 in the construction of pumping plants and irrigation ditches on the George Vivian Ranch. The ranch is a 1500-acre tract.

KINGSBURG, FRESNO CO., CAL.—Street paving, etc. Cost not stated. Engineer, City Engineer, Kingsburg. Owners, City of Kingsburg. The trustees have ordered the macadamizing and oiling of about three miles of streets. A contract for the work will be let in about three weeks. Full particulars can be secured from the City Clerk.

ELSINORE, RIVERSIDE CO., CAL.—Sewer system and septic tank. Cost not stated. Engineer, Frank A. Lathrop, Higgins Bldg., L. A. Owner, City of Elsinore. Plans have been approved for this work and bids will be opened by the City Trustees on February 24th. The work will comprise the following: 13,590 feet 6-inch pipe, 6,350 feet 8-inch pipe, 440 feet 10-inch pipe, 660 feet 12-inch, 880 feet 14-inch, 5,470 feet 8-inch pressure pipe, 30 flush tanks, 48 manholes, and septic tank. A check for 10% must accompany all bids. C. P. Carter is City Clerk.

SANTA MONICA, LOS ANGELES CO., CAL.—Sewer and street work. Cost not stated. Engineers, Knapp & Goodward, Consolidated Realty Bldg., L. A. Owner, King C. Gillette. This work will be done on San Vicente Bou-

ward. The following approximate quantities are to be used: 132,000 cubic yards of grading, 873,000 square feet of macadam paving, 56,600 feet of cement curbs, 297,800 square feet of concrete sidewalks, 425 feet concrete storm sewer, 1,705 lineal feet 30-inch corrugated iron sewer, 18,700 lineal feet 8-inch sewer, 19,700 feet 4-inch water mains, 19,700 feet 2-inch gas mains. Bids are to be taken at once.

ANACORTES, WASH.—Hydro-electric plant, \$6,000,000. Engineers, Stone & Webster Corp., Seattle. Owners, Stone & Webster Co. This company has recently secured the property of the Skagit Power Co., near Anacortes, and will shortly start construction work on what is to be the second largest hydro-electric generating plant in the United States.

ALBANY, ORE.—Municipal lighting plant. Cost not stated. Engineer, Lewis C. Kelsey, Portland. Owners, City of Albany. Mr. Kelsey has been working, and his preliminary sketches now retained to prepare plans for this, complete, show a steam plant supplying 600 cluster lights. A bond election will have to be held to secure funds for the construction. Mr. Kelsey has worked out the details of a plan for supplying a number of towns in the Willamette Valley with water from Clear Lake, and the plan is meeting with general approval.

PORTLAND, ORE.—Additional water mains, 2 mains, 30 inches each. Cost not stated. Engineer, City of Portland. Owners, City of Portland. Two new water mains have been ordered by the City Water Board. One will reinforce the East Side High Gravity system, and will extend from Mt. Tabor reservoirs to Fremont street, and the other will reinforce the Low Gravity system, and will extend from the reservoirs to East 25th and Clinton streets. Both mains will be 30 inches in diameter. Pipe will be ordered from the foundry at once.

STORES & OFFICE BUILDINGS.

SAN FRANCISCO.—Store and lofts, 3 story and base, brick. Cost not stated. Architects, O'Brien Bros., Clinie Bldg., S. F. Owners, Union Pacific Salt Co. This building will be erected on a lot adjoining a similar structure now about completed, designed by the same architects. The building will have a frontage of 25 feet and a depth of 87½ feet. The first floor will be fitted up for a store and the upper two floors for light lofts. The exterior will be faced with pressed brick. Interior finish will be of pine. Plans are complete and a contract for the foundation work and excavating has been let. The balance of the work is now out for figures.

OAKLAND, CAL.—Stores and offices, 12 story and base. Class A construction. Cost not stated. Architect, A. C. Martin, Higgins Bldg., L. A. Owners, Syndicate of Oakland capitalists. The names of the owners and exact location of the building cannot be given at this time. Mr. Martin states that the structure will be 60x80 feet, and that it will contain a total of 330 offices. Construction is to be fireproof throughout. Further details will be given as the plans progress.

LOS ANGELES, CAL.—Lofts, 3 story and base, brick and steel. Cost not stated. Architect, W. S. Garrett, Cur-

rier Bldg., L. A. Owner, H. O. Vogel. The building will be 61x111 feet. Interior will be finished in pine. There will be metal window frames and sash. Elevator service and steam heat will be installed. The exterior of the building will be faced with pressed brick. Plans are being prepared. The building has been leased for a long term to Sunborn, Vail & Co.

SAN DIEGO, CAL.—Stores and offices, 8 story and base. Class A construction, \$350,000. Architects, MacGibbon-Frery Co., Los Angeles. Investment Bldg., L. A. Owner, George E. Harl. The building is to be erected at the corner of 8th and D streets, and will cover an area of 50x150 feet. The first floor will be arranged for stores and the upper floors for 236 offices, especially equipped for physicians, dentists and other professional men. Construction will be of reinforced concrete throughout. Interior will be finished in metal trim and hardwoods. There will be steam heat, elevator service and all other modern improvements. The exterior of the building will be faced with white glazed terra cotta. Plans will be out for figures in a couple of weeks.

SEATTLE, WASH.—Stores and offices, 3 story and base, reinforced concrete, \$125,000. Architect, John Graham, Lyon Bldg., Seattle. Owners, Crawford & Conover. Plans have been filed with the Building Inspector and show a structure 60x108 feet. Bids have been taken and a contract will be awarded in a day or two.

SEATTLE, WASH.—Remodeling store fronts, \$60,000. Architect, Harlan Thomas, Eller Bldg., Seattle. Owners, Rhodes Co. This work has been mentioned here before. New steel ceilings will be installed and an automatic sprinkler system. Plans are complete and figures are being taken.

VANCOUVER, B. C.—Stores and offices, 15 story and base. Class A construction, \$550,000. Architects, Russell, Badcock & Rice, Metronomilton Bldg., Vancouver. Owner, Mr. Weart. Contracts for the construction of this building will not be awarded for at least another ten days. The owner is in the east and no bids will be opened until his return. Figures are all in.

VANCOUVER, WASH.—Stores, 2 buildings, 1 and 2 story, brick. Cost not stated. Architect, D. L. Williams, Portland. Owner, Eugene Blazier. One of the buildings will be 50x80 feet and two stories high, and the other one story 50x100 feet. Plans are being prepared, but figures will not be called for at least a month.

Contracts Awarded.

FRESNO, FRESNO CO., CAL.—Stores and offices, 10 story and base. Class A construction, \$200,000. Architect, George William Kelham, Crocker Bldg., S. F. Owners, Fresno Estate Co. Contractors, Lindgren & Co., Macdonald Bldg., S. F. Contract price, \$200,000. Note: This contract is for only the general construction and a number of special parts of the work will be contracted for separately.

PORTLAND, ORE.—Stores and offices, 1 story and base, brick and steel, \$90,000. Architects, Barnes & Benckers, Henry Bldg., Portland. Owners, Metronomilton Bldg., Portland. Architects, J. S. Whitely & Co., Portland. Contract price, \$90,000.

VANCOUVER, B. C.—Department store, 8 story and base. Class A con-

struction, \$2,500,000. Architects, Burke, Horwood & White, Toronto. Owners, Hudson's Bay Co. Contractors, Bourke, McDonald & Moncrieff, 142 Hastings St., Vancouver. B. C. Contract price, \$2,500,000. Note: Plans for the mechanical equipment are being prepared by P. R. Moses of New York, and Tausig & Fleisch of Chicago are designing the fixtures.

THEATRES.

POMEROY, WASH.—Theatre, 2 story and base, brick and concrete, \$20,000. Architect, E. W. Houghton, Collins Bldg., Seattle. Owner, C. H. Secley. The building will contain one balcony and a large main auditorium. Construction will be practically fireproof. Interior will be finished in pine and ornamental plaster. Complete stage equipment will be ordered. There will be steam heat and a modern system of ventilation. The exterior of the building will be faced with cement plaster. Plans are complete and the work will be done by Day Labor.

SEALED PROPOSALS.

S. engineer offices in the following cities: Seattle, Wash.; Los Angeles, Cal. F. C. BOGGS, major, corps of engineers, U. S. army, general purchasing officer.

PROPOSALS FOR LOCOMOTIVES.

LOCOMOTIVES—Sealed proposals indorsed "Proposals for Locomotives" will be received at the bureau of yards and docks, Navy Department, Washington, D. C., until **11 o'clock a. m., March 1, 1913**, and then and there publicly opened, for one narrow-gauge and two standard-gauge saddle-tank switching locomotives delivered at the naval station, Pearl Harbor, Hawaii. Specifications can be obtained on application to the bureau or to the commandant of the naval station named. H. R. STANFORD, chief of bureau.

NOTICE TO CONTRACTORS.

NOTICE is hereby given that the Board of Trustees of the City of Fresno, County of Fresno, State of California, on **Monday, the 17th day of February, 1913**, during the hour beginning at **7:30 o'clock p. m.** and ending at **8:30 o'clock p. m.** of said day will be in session at the Council Chamber in the City Hall of said city, for the purpose of receiving, and will receive proposals or bids for the supplying of all labor, materials, machinery and appliances, for the erection, construction and completion of the building known as the Convention Hall or the playground pavilion in said city, excepting the roof thereof, according to and as required by the plans and specifications therefor, prepared by C. K. Kirby, Jr., architect, and adopted by the Board of Trustees of the said city, on the 26th day of December, 1912, which said plans and specifications are now on file and open to inspection in the office of the City Clerk of said city. Proposals or bids shall be made for the supplying of all labor, material, machinery and appliances for the performance and completion of all of said work specified and required in said plans and said specifications, excepting the roof thereof.

Said bids will be opened at the hour of nine (9) o'clock p. m. on said 17th day of February, 1913. Said bids must be made on blanks which may be obtained from the City Clerk, and each bid must be accompanied by a check certified by a responsible bank, payable to the order of the Mayor and City Clerk of said city for an amount not less than ten per cent of the amount of the proposal or sum bid, which check shall be forfeited to said city should such bid be accepted and the bidder fail to enter into a contract and execute the bonds hereinafter mentioned within ten days after such bid has been accepted.

The successful bidder shall within ten days, after the contract has been awarded, execute said contract with said City of Fresno, and also execute a bond to said city in a sum equal to one-fourth of the amount bid, conditioned for the faithful performance of the contract, and also execute such bonds for the payment of labor and material men as are required by law. The contract and bonds shall be in form satisfactory to the Mayor and City Attorney of said city.

The Board of Trustees reserves the right to reject any or all bids made.

Dated this 24th day of January, 1913.

W. H. RYAN,
City Clerk of Fresno.

NOTICE TO CONTRACTORS.

SEALED proposals addressed to the Board of Trustees, and endorsed "Proposals for Sheet Asphalt Pavement, Oiled Macadam Pavement, Asphalt Concrete Pavement with Oil Wearing Surface on the Following Streets or Roads: Whittier Road, Chapman Avenue, Commonwealth Avenue and Spada Road," will be received by the Board of Trustees of the City of Fullerton, California, at the City Hall, until **8:00 p. m. on February 24, 1913**, and at that time and place will be publicly opened and read.

Plans, specifications and blank forms of proposal for said work may be obtained at the office of the City Clerk, in Fullerton, California, and of C. Flske, Jr., Engineer, 2601 Leeward avenue, Los Angeles, California. All proposals must be made on said blank forms, must give the prices proposed, both in writing and figures, and must be signed by the bidder with his address. The phraseology of the proposal must not be changed and any alteration made by the bidder will make the proposal informal and liable to rejection.

Each proposal must be accompanied by a certified or cashier's check, amounting to at least five (5) per cent of the aggregate amount of the bid; payable to the order of the City Treasurer of Fullerton; such check to be returned to the bidder unless forfeited under the conditions herein stipulated.

A bond will be required for the faithful performance of the contract in a sum equal to one-fourth (1/4) of the amount of the contract. The sureties on both bonds must be approved by the Board of Trustees.

The bidder to whom the contract may be awarded will be required to appear at the office of the said Board of Trustees with the sureties offered by him and execute a contract within ten (10) days after it is awarded to him. In case a failure or neglect to do so, he may be considered as having abandoned it, and the check accompanying the proposal may, at the option of the Board of Trustees, be forfeited to the City of Fullerton.

All bids will be compared on the basis of the estimated quantities of work to be done, as shown in the specifications.

The Board of Trustees reserve the right to let a contract for any of the streets or portions thereof under one class of specification, and the balance of the streets under any of the other classes of specification.

The Board of Trustees reserves the right to reject any or all proposals.

BOARD OF TRUSTEES OF CITY OF FULLERTON.

By C. A. GILES, City Clerk.

PROPOSALS FOR STRUCTURAL STEEL.

PURSUANT to Resolution No. 4701 N. S., passed February 3, 1913, the Council of the City of Oakland will receive bids for furnishing of all the materials, labor and workmanship required in connection with the fabrication, erection and completion of all structural cast iron and steel for the Auditorium, to be erected on the grounds of Peralta Park, located on the southerly side of Twelfth street, between Fallon street and Lake Shore avenue or the proposed extension of

said avenue, in the City of Oakland, California.

All proposals shall be made upon and conform to the requirements of the forms of proposals, prepared and furnished by the City, through the Supervising Architect, and shall be enclosed in sealed envelopes endorsed "Bids for the fabrication, erection and completion of all Structural Cast Iron and Steel for the Auditorium," addressed to the Council and deposited by the bidder, or his agent, with said Council while in session, between 11 o'clock a. m. and 12 o'clock noon, Pacific Time, on the 27th day of February, 1913, in the room of the Council in the City Hall, Fourteenth and Washington streets, Oakland, and at the expiration of the time named the bids will be opened, examined and publicly declared in open session of the Council.

Each bid shall bear the affidavit of the bidder as required by Section 126 of the Charter of the City of Oakland, and of the form which will be furnished by the City with the form of proposal.

No proposal or bid will be received or considered which is not accompanied by a check, certified by a responsible bank, payable to the order of Frank R. Thompson, City Clerk, in an amount not less than ten per centum (10%) of the aggregate amount of the proposal. Said check shall be forfeited to and be retained by the City if the successful bidder fails or refuses to execute the contract in the required form and furnish bonds of the forms to be provided by the City and as required by the Charter of the City of Oakland, within twenty (20) days after receiving notice of award.

After the award and upon the execution of the agreement, the contractor shall at the same time execute to the City of Oakland and deliver to the Auditor a bond guaranteeing to the City the faithful performance of the contract, and in an amount equal to twenty-five per centum (25%) of the amount named in the agreement. He shall likewise execute and deliver at the same time another and separate bond to protect any and all persons performing labor upon or furnishing materials to be used upon the said work, and in an amount equal to fifty per centum (50%) of the amount named in said agreement.

The contractor will be required to begin work within five (5) days from the execution of the contract—unless otherwise notified in writing by the owner or architect—and to fully complete the entire work in accordance with the requirements of the agreement, plans, drawings and specifications prepared therefor to the entire satisfaction of the Commissioner of Public Works and the Council on or before the thirty-first (31st) day of July, 1913.

A bound set of the Forms of Proposal, and of the required Affidavits, Agreement, Bonds, Acknowledgments and Specifications will be furnished to contractors on demand at the office of Supervising Architect of the City of Oakland, Security Bank Building, corner 11th and Broadway. The plans and drawings may be had at the said office of the Supervising Architect after February 6th, 1913, within a reasonable time after application, and

upon the deposit of Twenty-five Dollars (\$25.00), which deposit will be returned to the applicant when the said plans and drawings are returned to the Architect in good condition; one complete set of plans and drawings required for the work will be furnished each applicant complying with the above.

Each bidder shall submit a formal bid in strict accordance and without deviation from the plans and specifications, unless such deviation shall have been previously authorized by, and written permission therefor obtained from the Supervising Architect; in case any such deviation shall be allowed as aforesaid for the submission of the bid or award of contract notice thereof will be served upon all of the bidders by the Architect.

All information relative to the requirements for bidding, and all directions necessary to explain and make definite any of the provisions of the specifications or drawings will be given by the Supervising Architect upon application at his office.

The right is reserved to the Council in accordance with the provisions of the Charter of the City of Oakland, to reject any or all bids submitted.

By order of the Council of the City of Oakland.

FRANK R. THOMPSON, City Clerk.

By E. F. Holland, Deputy.

Oakland, February 5, 1913.

PROPOSALS FOR OPERA CHAIRS.

SEALED proposals will be received for furnishing and installing 1034, more or less, Opera Chairs for the Girls' High School building in open session of the Board of Education on Wednesday, February 19th, 1913, at 2 o'clock. Proposal blanks and specifications furnished by the undersigned.

M. R. NORRIS,

Acting Secretary Board of Education.

PROPOSALS FOR BUILDING.

NOTICE is hereby given that the Board of Trustees of the Orange Union High School District, Orange County, California, will receive bids for the erection and completion of two buildings, to comprise an addition to the present High School building, and to be erected on the same site. The work to be done in accordance with plans and specifications on file at the office of the Board at the High School. Copies of said plans and specifications may be obtained from the architect, Frederick H. Eley, Santa Ana.

Separate bids will be received for each building, or for the two together; also for the heating and ventilating of both buildings; and must be accompanied by a certified check for five per cent of the amount of the bid, made payable to the order of the Board of Trustees of the Orange Union High School. All bids must be sealed and filed with the secretary of the Board at the High School building on or before Friday, February 21, at 3 p. m., at which time and place the bids will be opened in public.

The Board reserves the right to reject any and all bids.

By order of the Board of Trustees of the Orange Union High School District,
GEORGE C. WOODS, Secretary.

PROPOSALS FOR MOTOR TRACTORS.

OFFICE OF THE BOARD OF FIRE Commissioners, San Francisco.

In accordance with a resolution of the Board of Fire Commissioners July passed January 21, 1913, sealed proposals will be received in open session of the Board on Friday, February 21, 1913, from 8:30 to 9 a. m., for the furnishing, testing and delivering one or more gasoline motor tractors for use in the San Francisco Fire Department, in strict accordance with the specifications contained in the proposal blanks prepared by the Board of Fire Commissioners, on file and copies of which may be obtained at the office of said Board, Temporary City Hall, Eighth and Market streets, San Francisco, Cal. FRANK T. KENNEDY, Secretary Board of Fire Commissioners.

PROPOSALS FOR MOTOR TRUCKS.

OFFICE OF THE BOARD OF FIRE Commissioners, San Francisco.

In accordance with a resolution of the Board of Fire Commissioners July passed January 3, 1913, sealed proposals will be received in open session of the Board on Friday, February 21, 1913, from 8:30 to 9 o'clock a. m., for furnishing one or more motor driven hook and ladder trucks for use in the San Francisco Fire Department, in strict accordance with the specifications and conditions contained in the proposal blanks prepared by the Board of Fire Commissioners on file at the office of the Board, copies of which may be obtained at the office of the Board in the New City Hall, Room No. 240. FRANK T. KENNEDY, Secretary Board of Fire Commissioners.

NOTICE TO CONTRACTORS.

PANAMA-PACIFIC INTERNATIONAL EXPOSITION.

SEALED PROPOSALS will be received by the Buildings and Grounds Committee of the Panama-Pacific International Exposition Company at the office of the Director of Works, in the Exposition Building, Pine and Battery Streets, San Francisco, California, at 11 A. M. Tuesday, February 18, 1913. For the construction of a Conduit System for Concessions, Stages and Foreign Sites in accordance with the specifications on file in the office of the Director of Works.

Each proposal must be accompanied by a certified check payable to the order of the Panama-Pacific International Exposition Company or cash in the sum of ten (10) per cent of the amount bid, or the same will not be considered. When the award of contract is made all checks will be returned to the respective bidders, except that filed with the accepted proposal or bid, which check will be returned upon the successful bidder signing the contract and filing the required bond. A bond in the sum of fifty (50) per cent of the contract price will be required for the faithful performance of the contract; the sureties thereon must be satisfactory to the Buildings and Grounds Committee of the Panama-Pacific International Exposition Company.

Progressive payments will be made. The right is reserved to reject any and all bids and to waive technical defects if in the interest of the Exposition Company.

Plans and specifications for the work may be obtained from the Director of Works, at Room 617 Exposition Bldg., by depositing \$10.00, which will be refunded upon the return of the plans and specifications in good condition.

By order of the Buildings and Grounds Committee.

WILLIAM H. CROOKER,
Chairman. (P)

Firms desiring news from certain localities like San Francisco, Los Angeles, Portland, Seattle, etc., will find all such items, commencing on this page, all carefully classified as to location. These same items are repeated in the fore part of the news department, under distinct headings such as Banks, Churches, Hotels, etc.

SAN FRANCISCO.

APARTMENT HOUSE—6 or 9 story and base. Class A construction, \$250,000 to \$300,000. San Francisco. Architect not selected. Owners, Tiley L. Ford and associates. Following the announcement of the sale of the southwest corner of California and Jones streets, 1034 1/2 x 137 1/2 feet, comes the statement that the new owners, Tiley L. Ford and associates, will build a six or nine story Class A apartment house costing in the neighborhood of \$250,000 or \$300,000 on the property. The sale was made through the real estate offices of Trevor & Co. The new owners are considering preliminary sketches by two different architects, and a selection will not be made before the first of March.

APARTMENT HOUSE—3 story and base, frame, \$20,000. San Francisco. Architect, Henry C. Smith, Humboldt Bank Bldg. S. F. Owner, Frank Hunter. Plans are complete for a building containing in the neighborhood of 25 suites of two and three rooms each. There will be wall beds and private baths. Interior finish will be of pine and redwood with some oak veneer. Steam heat will be installed. The exterior of the building will be covered with brick veneer and cement plaster. Bath rooms will be finished in tile and will have cement floors. Bids are now being taken on this work.

APARTMENT HOUSE—3 story and base, frame, \$30,000. San Francisco. Architect, C. M. Cook, Rialto Bldg. S. F. Owner's name withheld. The building will be erected on Broderick street, and is designed to contain 21 suites of the two and three room type. All apartments will have wall beds and private bath rooms. Interior finish will be of pine and redwood with some oak veneer in the lobby. Plans include steam heat and hot and cold running water. Bath rooms will have cement floors. The exterior of the building will be covered with cement plaster on metal lath. Plans are complete and figures are being taken.

APARTMENT HOUSE—3 story and base, frame, \$10,000. San Francisco. Architect, Paul de Martin, 421 8th Ave., S. F. Owner, Paul de Martin.

The building will cover an area of 40x60 feet, and is to contain ten small suites with baths and wall beds. Interior trim will be of pine and redwood throughout. Hot water will be supplied to all rooms. The exterior of the building will be covered with shiplap and rustic. Plans are complete and the work will be done by Day Labor.

APARTMENT HOUSE—5 story and base, brick and steel, \$150,000. San Francisco. Architect, Creighton Withers, S. W. California and Powell Sts., S. F. Owner, L. H. Sly, Mr. Sly, one of the largest operators in apartment house structures in the west, has recently purchased the southwest corner of Post and Leavenworth streets and has instructed his architect to prepare plans for a modern apartment house structure covering the entire lot, which has a frontage of 137 1/2 feet on Leavenworth street and 127 feet on Post. The building will contain in the neighborhood of 300 guest rooms, which will be arranged in two and three room suites with baths. Interior finish will be of pine, redwood and oak with ornamental plaster in the lobby, parlors and reception rooms. Plans provide for steam heat, elevator service and a hot water plant. Vacuum cleaning will also be installed. The exterior of the building will be faced with cement plaster on brick. Plans are complete and the work will be carried on under the personal direction of Mr. Sly who is now purchasing all materials.

APARTMENT HOUSE—3 story and base, frame, \$30,000. San Francisco. Architects, Fabre & Bearwald, Western Metropolis Bank Bldg., S. F. Owner's name withheld. The building is to be one of the first modern apartment houses erected south of Market street. The interior has been arranged to contain 24 suites of two and three rooms each with bath and wall beds. Interior finish will be of pine and hardwoods. There will be steam heat and a vacuum cleaning system. Bath rooms will be finished in tile. An attractive entrance and lobby will be one of the features of the building. The exterior will be covered with pressed brick veneer and shiplap. Plans

PLATE A

COUNTRY RESIDENCE FOR J. H. WHEELER
Near St. Helena, Napa Co., Cal.

L. M. Turton, Architect
Napa

complete and figures are being taken.

APARTMENT HOUSE—3 story and base, frame, \$25,000. San Francisco. Architect, Milton Lichtenstein, 111 Ellis St., S. F. Owner's name withheld. The building will be erected at the corner of Jackson and Locust streets, and is to contain 24 apartments of two and three rooms each with wall beds and private baths. Interior finish will be of pine, redwood and oak. The bath rooms will be unscoted with tile. Steam heat and hot and cold running water will be installed. The exterior of the building will be covered with cement plaster and brick veneer. Plans are nearly complete and figures will be called for shortly.

RESIDENCE—2 story and base, frame, \$2,500. San Francisco. Owners, Bay Cities Building Co., Merchants' Exchange Bldg., S. F. The dwelling has been designed for a five-room house with bath. Interior finish will be of pine and redwood throughout. A large brick mantel and open fire place will be used in the living room. Tile will be used in the bath and kitchen. The exterior of the dwelling will be covered with rustic. Plans are complete and in the hands of the owners who will do the work by Day Labor.

RESIDENCES—2, 2 story and base, frame, \$2,500 each. San Francisco. Architect, none. Owner, Fernando Melson, 30 Presidio Terrace, S. F. Mr. Melson is probably the best known home builder in San Francisco. His operations are still confined to the Richmond District, and these two dwellings will be constructed on 10th Avenue near C street. Each will contain six rooms and bath. Interior finish will be of pine and redwood. Some oak floors will be used. There will be brick and tile mantels and open fire places. Tile will be used in the bath rooms and kitchens. The exteriors of the houses will be covered with rustic and cement plaster. Plans are complete and the work will be done by Day Labor.

RESIDENCES—4, 2 story and base, frame, \$2,500 each. San Francisco. Architect, J. M. Geary, 52 Walter St., S. F. Owner, J. H. Krause, 23rd and Folsom Sts., S. F. These houses will be erected in what is known as College Terrace, near Mission street, and each will be arranged for six rooms and bath. All interior finish will be of pine and redwood. There will be open fire places and tile mantels. Some oak flooring will be used. Tile will be used in the bath rooms and kitchens. The exteriors will be covered with rustic, shiplap and cement plaster. Plans are complete and in the hands of the owner who will do the work by Day Labor.

PIER CONSTRUCTION—Reinforced concrete. \$500,000. San Francisco. Engineer, Assistant State Engineer, Ferry Bldg., S. F. Owners, State of California. At a meeting of the State Board of Harbor Commissioners held Thursday morning, the time for opening bids for the construction of Pier No. 39 was extended until next Tuesday at 11 o'clock. Such action was made necessary owing to the fact that a bid was received from the Thomson Bridge Co., who are now asking to be released from their bid for the construction of Pier No. 37. Pending an expression of opinion from their at-

torney, the State Board refused to consider bids for new work on which the Thomson Bridge Co. submitted a figure.

CHAPEL—Frame construction, \$12,000. San Francisco. Architect, City Department of Architecture, Temporary City Hall, S. F. Owners, City and County of San Francisco. This building will be erected on the Relief Home Tract and will have a seating capacity of about 320 people. The interior will be finished in pine and redwood. Design is in the Mission style. The exterior will be covered with cement plaster on metal lath. Plans are nearly complete and bids will be called for shortly by the Board of Public Works.

RESIDENCES—2, 2 story and base, frame, \$2,200 each. San Francisco. Architect, none. Owners, Bay Counties Home Bldg., Co., Merchants' Exchange Bldg., S. F. These houses will be erected on Diamond street near 21st. Each house will contain five or six rooms and bath. Interior finish will be of pine and redwood. Some hardwood floors will be used. There will be open fire places and brick or tile mantels. The exteriors will be covered with rustic, shingles and cement plaster on metal lath. Plans are complete and in the hands of the owners who will do the work by Day Labor.

WAREHOUSE—3 story and base, reinforced concrete. Cost not stated. San Francisco. Architects, Cunningham & Politeo, First National Bank Bldg., S. F. Owners, Warehouse and Investment Co. This building is to be erected on King street, east of Third, and will cover an area of 120x130 feet. The entire building has been leased to a large importing firm. Construction will be fireproof throughout with concrete floors and roof slabs. There will be fireproof doors and metal window sash and frames. Freight elevators will be installed. The exterior of the building will be faced with cement plaster. Plans are now being prepared.

WAREHOUSE AND FACTORY—4 story and base, reinforced concrete. Cost not stated. San Francisco. Architect, George William Kelham, Crocker Bldg., S. F. Owners, Gantner & Mattern Co. It has been stated on excellent authority that Lindgren & Co. will be given the contract for the construction of this building, which is to be erected on Mission street near 10th.

FLATS—4, 2 story and base, frame, \$1,500 each. San Francisco. Architect, none. Owner, A. B. Hallett, 1259 12th Ave., S. F. These buildings will all be erected on the west side of 7th Avenue, near I street. Each building will contain two modern flats of five and six rooms each. Interior trim will be of pine and redwood with some hardwood floors. Gas grates and open fire places will be used. Tile will be used in the bath rooms and kitchens. The exteriors will be covered with rustic, shingles and cement plaster on metal lath. Plans are complete and the work will be done by Day Labor.

FLATS—3 story and base, frame, \$5,000. San Francisco. Architect, Theo. Lenzen, Humboldt Bank Bldg., S. F. Owner, D. M. Shafer. The building will be erected on Filbert street and is to have a frontage of 25 feet and a depth of 48 feet. The building will contain two modern flats of five and

six rooms each with bath. Interior finish will be of pine and redwood with some oak floors. Elm panels will be used in the dining and living rooms. Open fire places and tile or brick mantels will be a feature of the house. Tile will be used in the baths and kitchens. The exterior will be covered with rustic. Plans are complete and the work will be done by Day Labor.

SEA WALL CONSTRUCTION—Reinforced concrete. Cost not stated. Fort Mason, Cal. Engineer, Constructing Quartermaster, Fort Mason. Owners, United States Government. Plans are nearly ready for figures for a piece of reinforced concrete sea wall which is to be erected at Fort Mason. The sea wall will be 100 feet long and 14 feet high. Bids will be taken through the Constructing Quartermaster's office at Fort Mason.

HOSPITAL ADDITION—1 story reinforced concrete, \$18,000. Presidio of San Francisco. Architect, Constructing Quartermaster, Fort Mason. Owner, United States Government. Plans are nearly complete for a one-story reinforced concrete building 73x118 feet, which will be erected adjoining the Letterman General Hospital at the Presidio. The building is to be designed for a sterilizing department. Floor will be of concrete. Roof will be of tile. The exterior of the building will be faced with cement plaster. Interior finish will be of pine, tile and hardwood. A separate contract will be let for the special equipment. Plans will be out for figures in a few days.

HOTEL—3 story and base, brick, \$16,500. San Francisco. Architect, Bernard J. Joseph, First National Bank Bldg., S. F. Owner, Clara Bibbero. The building will be erected on Howard street west of 3rd street, and will cover an area of 40x76½ feet. There will be stores and the hotel entrance on the first floor. Upper floors will be divided into a number of modern hotel rooms with hot and cold running water. Steam heat will be installed. The exterior of the building will be faced with pressed brick. A contract has been let for the excavating and concrete work. Other parts of the work are out for figures.

HOTEL—5 story and base, reinforced concrete. Cost not stated. San Francisco. Architect, M. Mattanovich, David Hewes Bldg., S. F. Owner's name withheld. The building will be erected in the down town hotel district and will be designed for a modern commercial hotel. Preliminary sketches are all that have so far been prepared and details of construction cannot be given at this time. Full particulars will be published next week.

STORE AND LOFTS—3 story and base, brick. Cost not stated. San Francisco. Architects, O'Brien Bros., Clunie Bldg., S. F. Owners, Union Pacific Salt Co. This building will be erected on a lot adjoining a similar structure now about completed, designed by the same architects. The building will have a frontage of 25 feet and a depth of 87½ feet. The first floor will be fitted up for a store and the upper two floors for light lots. The exterior will be faced with pressed brick. Interior finish will be of pine. Plans are complete and a contract for the foundation work and excavating has been let. The balance

of the work is now out for figures.
BRIDGES—A reinforced concrete, \$20,000 Yosemite, Cal. Engineer, Department of Interior, Washington, D. C. Owners, United States Government. Oscar Parthier, of Tulare, was low bidder at \$27,498 for the construction of four reinforced concrete bridges in Yosemite National Park. Other bidders were Gildersleeve Construction Co., Napa, \$33,775; M. P. Youker, San Francisco, \$35,964; W. N. Connenno Co., San Francisco, \$37,700; Elmer J. Chute, Oakland, \$37,788; Munoz & Munoz, Los Angeles, \$38,333; Midland Bridge Co., Los Angeles, \$40,124. State Construction Co., San Francisco, \$41,361; Wm. Bruce, San Francisco, \$49,000; Southwestern Construction Co., Los Angeles, \$49,750; Fisher Engineering Co., Portland, \$51,313; T. K. Beard, Modesto, \$53,890; Westlake Construction Co., Los Angeles, \$61,600. The bids will be forwarded to the Secretary of the Interior at Washington, D. C., for segregation and approval.

Contracts Awarded.

REPAIRS TO TRAPDOCK DOCKS.
 ETC.—\$6,000. Fort Mason, Cal. Engineer, Constructing Quartermaster, Fort Mason. Owners, United States Government. Contractors, Healy-Tibbits Construction Co., S. F. Contract price, \$6,771.

APARTMENT HOUSE—2 story and base, frame, \$12,000. Oakland, Cal. Architect, Leonard H. Ford, 1704 Oxford St., Berkeley. Owner, John J. Fosen, 2809 Filbert St., Oakland. The building will be erected at the corner of 3rd avenue and East 16th street, Oakland, and will contain 12 apartments of two and three rooms each. All suites will have connecting baths and wall beds. Interior finish will be of pine and redwood with some oak in the entrance vestibule and lobby. There will be a central heating system and vacuum cleaning. The exterior of the building will be covered with cement plaster on metal lath. Plans are complete and in the hands of the owner who is taking figures on the work.

APARTMENT HOUSE—2 story and base, frame. Cost not stated. Oakland, Cal. Architect, M. L. Newsum, 512 Broadway, Oakland. Owner, Al. Wood, 922 Broadway, Oakland. The building will be arranged for stores on the first floor and a number of two room suites on the second floor. All interior trim will be of pine or redwood. Hot and cold running water will be supplied to all apartments. There will be patent store fronts. The exterior of the building will be covered with cement plaster on metal lath. Plans include a furnace heating system. Plans are in the hands of the owner who is taking bids on the various parts of the work.

RESIDENCE — 2 story and base, frame. Cost not stated. Berkeley, Alameda Co, Cal. Architect, Olin S. Grove, 2911 Telegraph Ave., Berkeley. Owner, D. L. Levy. This house has been designed for an eight-room dwelling with bath and sleeping porch. Interior finish will be of pine and redwood with hardwood floors in the principal rooms. There will be furnace heat and open fire places. Mantels will be of brick. Tile will be used in the bath and kitchen. The exterior of the building will be covered with cement plaster on metal lath. Plans are complete and figures are being taken.

RESIDENCE — 2 story and base, frame, \$3,000. Piedmont, Alameda Co. Cal. Architect, C. C. Jones, Head of Santa Barbara Road, Berkeley. Owner, R. E. Jones. The dwelling will contain seven rooms, bath and sleeping porch. Interior finish will be of pine and redwood with some elm panels. Oak floors will be used in the principal rooms. There will be furnace heat and open fire places. Mantels will be of brick. Tile will be used in the bath room and kitchen. The exterior of the dwelling will be covered with cement plaster and shakes. Plans are complete and figures are being taken.

RESIDENCE — 2 story and base, frame, \$4,500. Berkeley, Alameda Co. Cal. Architect, none. Owner, George R. Tryner, 2729 Prince St., Berkeley. The house has been designed for an eight-room dwelling with bath and sleeping porch. Interior finish will be of pine, redwood and oak. Hardwood floors will be used in the principal rooms. There will be furnace heat and open fire places. Mantels will be of brick and tile. Bath room will be finished in tile and will have a composition floor. The exterior of the

dwelling will be covered with shingles. Plans are complete and in the hands of the owner who will do the work by Day Labor.

BUNGALOW — 1 story and base, frame, \$2,500. Berkeley, Alameda Co. Cal. Architect, Frank M. May, 2145 Center St., Berkeley. Owner, J. A. Pinkerton. The bungalow will contain six rooms, bath and sleeping porch. All interior finish will be of pine and redwood. Hardwood floors will be used in the principal rooms. There will be a large open fire places with brick or tile mantel in the living room. Tile will be used in the bath and kitchen. The exterior of the house will be covered with shingles. Plans are complete and the work will be done by Day Labor.

RESIDENCE — 2 story and base, concrete, \$1,500. Piedmont, Alameda Co., Cal. Architect, none. Owner, James Rountree, 5417 Shafter Ave., Oakland. The house has been designed for an eight-room dwelling with bath and sleeping porch. Interior finish will be of pine and redwood with some oak used in the dining and living rooms. Hardwood floors will be used throughout. There will be open fire places and brick or tile mantels. Tile will be used in the bath room and kitchen. Furnace heat will be installed. The exterior of the house will be covered with cement plaster. Plans are complete and the work will be done by Day Labor.

BUNGALOW—1 1/2 story and base, frame, \$2,000. Oakland, Cal. Architect, none. Owners, Realty Syndicate, Syndicate Bldg., Oakland. Owner, Colin McInnis. The dwelling will contain five rooms and bath. Interior finish will be of pine throughout. Hardwood floors will be used in the living and dining rooms. There will be a large open fire place with brick mantel in the living room. Tile will be used in the bath and kitchen. The exterior of the house will be covered with shingles. Plans are complete and the work will be done by Day Labor.

BUNGALOWS—7, 1 story and base, frame, \$2,500 to \$3,000. Berkeley, Alameda Co. Cal. Architect, none. Owners, Patrick-Nelson Co., 2025 Addison St., Berkeley. These houses will be erected in Fairmont Park, and have been designed to contain from five to six rooms each. The interiors will be finished in pine, redwood and some hardwoods. Hardwood floors will be used throughout. Several of the houses will have central heating plants. All will have open fire places and tile or brick mantels. Tile will also be used in the bath rooms and kitchens. Exteriors will be covered with cement plaster. Plans are complete and the work will be started at once under the Day Labor system.

BUNGALOW—1 1/2 story and base, frame, \$3,250. Oakland, Cal. Architect, none. Owner, E. W. Woodward, 1540 Broadway, Oakland. The house has been designed for a six-room dwelling with bath and sleeping porch. Interior will be finished in pine and redwood with hardwood floors in the principal rooms. There will be furnace heat and open fire places. Mantels will be of brick and tile. Tile will be used in the bath room and kitchen. There will be an automatic water heater installed. The exterior of the house will be covered with cement plaster. Plans are complete and the work will be done by Day Labor.

PLANT AND STORES—2 story and base frame. Cost not stated. Oakland, Cal. Architect, none. Owner, F. Valentino, 3100 Telegraph Ave., Oakland. The building will cover a considerable area and has been arranged on 12 columns on the first floor and two flats above. Interior finish will be of pine through out. The exterior will be covered with rustic. Plans are in the hands of the owner and the work will be done by Day Labor.

AUTHORITY—2 story and base, class A construction, \$500,000. Oakland, Cal. Architects, Palmer & Hornbostel, New York, associated with J. J. Donovan, Security Bank Bldg., Oakland. Owners, City of Oakland. Plans for the structural steel work for this building have been completed and are now out for figures. The building has been fully described here several times before. Bids will be opened for the furnishing and erecting of the structural steel on February 27th. The official proposal appears in another column of this issue. Complete information relative to the work can be secured from Architect Donovan.

HOTEL—7 story and base, brick and steel. Cost not stated. Oakland, Cal. Architect, A. W. Smith, 1010 Broadway, Oakland. Owners, Cinciarulo Bros. The building is to be erected at the southwest corner of 16th and Jefferson streets, and will be designed for a high class commercial hotel. Construction will be of steel and brick with exterior walls faced with pressed brick. Plans include steam heat, elevators and a water heating system. Interior will be finished in pine, redwood and some hardwood. Lobby will be finished with marble tile and ornamental plaster. Plans are being prepared.

STORES AND OFFICES—12 story and base. Class A construction. Cost not stated. Oakland, Cal. Architect, A. C. Martin, Higgins Bldg., L. A. Owners, Syndicate of Oakland capitalists. The names of the owners and exact location of the building cannot be given at this time. Mr. Martin states that the structure will be 60x50 feet, and that it will contain a total of 320 offices. Construction is to be fireproof throughout. Further details will be given as the plans progress.

SAN JOSE & SANTA CLARA VALLEY

APARTMENT HOUSE—2 story and base, frame. Cost not stated. San Jose, Santa Clara Co., Cal. Architect, F. D. Wolfe, Bank of San Jose Bldg., San Jose. Owner, F. Mayhew. The building will be erected at the corner of 10th and Santa Clara streets, and is to be arranged for several two and three room suites with baths. The interior will be finished in pine and redwood. Some oak flooring will be used. All apartments will be equipped with wall beds. There will be a central heating system. The exterior of the building will be covered with cement plaster on metal lath. Plans are complete and figures are being taken.

RESIDENCE—2 story and base, frame, \$6,000 San Jose, Santa Clara Co., Cal. Architect, F. D. Wolfe, Bank of San Jose Bldg., San Jose. Owner, Frank Fleming. The dwelling will contain eight rooms, baths and sleeping porch. There will be a central heating system and open fire places. Mantels will be of brick and tile. Interior finish will be of pine, redwood

and the hardwood. Hardwood floors will be used in the principal rooms. An automatic water heater will be installed. Tile will be used in the bath rooms and kitchen. The exterior of the house will be covered with cement plaster on metal lath. Plans are complete and figures are being taken.

SCHOOL—1 story and base, reinforced concrete, \$85,000. San Jose, Santa Clara Co., Cal. Architect, Norman E. Marsh, Broadway Central Bldg., 12 A. Owners, Hester School District. All bids received for the general construction and other parts of the work in connection with the construction of this building have been rejected. The total of the lowest figures received for the various parts of the work was far in excess of the amount available. Plans will be revised and new bids called for shortly.

SACRAMENTO, STOCKTON & NORTHERN CALIFORNIA.

FLATS—2 story and base, frame \$6,000. Lodi, San Joaquin Co. Cal. Architect, Walter King, Elks' Bldg. Stockton. Owner, Miss Anna Brack. The building will be arranged for four small flats of four rooms each with bath. Interior finish will be of pine and redwood. Oak floors will be used in the principal rooms. Tile will be used in the bath rooms and kitchen. The exterior of the building will be covered with rustic. Plans are now being prepared.

STATE HIGHWAY WORK—Cost no stated. Mendocino Co., Cal. Engineer, State Department of Engineering Sacramento. Owners, State of California. At the last meeting of the State Highway Commission held in Sacramento it was voted to call for bids for the construction of two more strips of highway. These will be built in Mendocino County and Los Angeles, th

between Encino and Calabasas in Los Angeles County, a distance of 163 miles, and the other between Utah and Forsythe Creek in Mendocino County, a distance of 7.6 miles. Bids received for the construction of the highway between Lindo and the county line in Butte County have been rejected. The engineer's estimate for a stretch of road was \$52,632, and the lowest figure received was \$60,632. Six bids will be called for shortly. A contract has been awarded to Franklin & Beuchtel for the road work between Willetts & Ridgewood in Mendocino County for \$29,987.

Contracts Awarded.

FRESNO, MODESTO, STANISLAUS AND CENTRAL CALIFORNIA.

CHURCH 2 story, frame 3:1 concrete. Cost not stated. Modesto, Stanislaus Co., Cal. Architect, Juan J. Foley, Monadnock Bldg., S. F. Owners, Roman Catholic Church of Modesto.

The building is to be designed in the Spanish Mission style with the exterior covered with cement plaster on

metal lath. Interior will be finished in pine with some ornamental plaster work. There will be seats for

about 500 people. A red tile roof is to be used. Plans have just been ordered, and it will be some time before

working drawings are complete. Further notice will then be given in these

columns.

CHURCH—Frame of steel construction, \$15,000 to \$20,000. Bakersfield, Kern Co. Cal. Architect not selected. Owners, Congregational Church of Bakersfield. The Building Committee of the First Congregational Church is considering plans for the construction of a new edifice. C. A. Barlow is the chairman of the committee, and will submit a report to the main body within a few days. Further notes of the work will be given in these columns.

BANK—2 story and base, reinforced concrete, \$15,000. Riverbank, Stanislaus Co. Cal. Architects, Starbuck & Clarke, Fresno. Owners, Riverbank Land and Water Co. The building is to cover an area of 50x90 feet. The entire first floor will be occupied by the banking offices, public room and work space. Second floor is to be arranged for a number of modern offices. Interior finish will be of pine and hardwoods. Considerable marble and tile will be used. Special bank fixtures and vaults will be installed. The exterior of the building will be faced with pressed brick. Plans are being prepared.

LODGE HALL—3 story and base, brick, \$20,000. Taft, Kern Co., Cal. Architect, J. M. Saffel, Plisk Bldg., Bakersfield. Owners, Odd Fellows Building Association. The building will cover an area of 50x125 feet. The first floor is to be arranged for stores and the upper two floors for lodge rooms, banquet hall and offices. Interior finish will be of pine and hardwood. There will be a central heating system. The exterior of the building will be faced with pressed brick trimmed with terra cotta. Plans are being prepared and figures will be called for within the next week or ten days.

IRRIGATION WORK, PUMPING PLANTS, ETC.—\$75,000. Modesto, Stanislaus Co., Cal. Engineer's name not given. Owner, R. F. Ball, Modesto. Mr. Ball will spend in the neighborhood of \$75,000 in the construction of pumping plants and irrigation ditches on the George Vivian Ranch. The ranch is a 1500 acre tract.

STREET PAVING, ETC.—Cost not stated. Kingsburg, Fresno Co., Cal. Engineer, City Engineer, Kingsburg. Owners, City of Kingsburg. The trustees have ordered the macadamizing and oiling of about three miles of streets. A contract for the work will be let in about three weeks. Full particulars can be secured from the City Clerk.

Contracts Awarded.

STORES AND OFFICES—10 story and base. Class A construction, \$300,000. Fresno, Fresno Co., Cal. Architect, George William Kellham, Crocker Bldg., S. F. Owners, Fresno Estate Co. Contractors, Lindgren & Co., Monadnock Bldg., S. F. Contract price, \$300,000. Note: This contract calls for only the general construction and a number of special parts of the work will be contracted for separately.

APARTMENT HOUSE—3 story and base, brick, \$20,000. Merced, Merced Co., Cal. Architect's name not given. Owner, H. J. Hinds, Contractor, A. Rabines, Merced. Contract price, \$20,000. Note: This building will contain 26 suites with private baths and wall beds. Plans include steam heat,

LOS ANGELES AND SOUTHERN CALIFORNIA.

CHURCH—2 story and base, frame, \$30,000. Santa Ana, Orange Co., Cal. Architect not selected. Owners, First Baptist Church of Santa Ana. The church directors are considering plans for the construction of a new building. Rev. Otto S. Russell is the pastor. An architect has not yet been selected.

CHURCH—2 story and base. Class A construction, \$190,000. San Diego, Cal. Architect's name not given. Owners, First Presbyterian Church. A campaign has been started to raise the balance of the fund for construction and work will be started shortly. The new church is to be erected at the corner of 3rd and Date streets. Some part of the work has been completed, but to finish the church \$190,000 will be required.

APARTMENT HOUSE—4 story and base, brick. Cost not stated. Los Angeles, Cal. Architects, George F. Costerlan and J. F. Cavanaugh, associated, California Bldg., L. A. Owners, Lawyer and Thomas. The building will be erected on a corner and will cover an area of 50x112 feet. Interior has been arranged for 67 rooms, which will be divided into two and three room suites with wall beds and private bath rooms. Interior finish will be of pine throughout. Plans provide for steam heat, automatic electric elevator and a vacuum cleaning system. Bath rooms will have composition floors. The exterior of the building will be faced with pressed brick. Plans are being prepared.

APARTMENT HOUSE—3 story and base, brick. Cost not stated. Los Angeles, Cal. Architect, Elmore R. Jeffery, Citizens' National Bank, L. A. Owner, Mrs. Ella Barker. The building will cover a ground area of 105x79 feet and has been arranged to contain 85 guest rooms which will be divided into two and three room suites. All apartments will have wall beds and private baths. Interior finish will be of pine. Bath rooms will have composition floors. There will be steam heat, elevator service and a vacuum cleaning system. Entrance will be finished in marble and tile. The exterior of the building will be faced with pressed brick. Plans are nearly complete and figures will be called for shortly.

PIER—Reinforced concrete construction, \$70,000. Huntington Park, Los Angeles Co., Cal. Engineer Ernest Rothenberg, 1257 West 12th St., Room 11 D. L. A. Owners, City of Huntington Park. Plans and specifications prepared by Engineer Rothenberg have been approved by the City Council and bids will be called for shortly. The structure will be of reinforced concrete except the deck which is to be of wood. Bonds in the sum of \$70,000 have been sold.

CHURCH—1 story and base, frame. Cost not stated. Redondo Beach, Los Angeles Co., Cal. Architect, L. B. Pemberton, Auditorium Bldg., L. A.

Owners, First Church of Christ, Scientist. The building will contain a main auditorium seating 200 people, rearer's room and Sunday school room. Interior will be finished in pine. The exterior of the building will be covered with cement plaster on metal lath. Plans are now being prepared.

GARAGE—1 story and base, brick. Cost not stated. Los Angeles, Cal. Architect, A. C. Martin, Higgins Bldg., L. A. Owner, Mrs. Marie Hammel. The building will have a frontage of 50 feet and a depth of 135 feet. There will be a concrete floor, metal window sash and frame and special gasoline storage tanks. The front portion of the building will be used as a salesroom and will be finished in hardwoods at tile. Tile floor will be used and special fixtures. The exterior of the building will be faced with pressed brick. Plans are complete and figures will be called for at once.

GARAGE—1 story and base, brick and concrete, \$30,000. Los Angeles, Cal. Architect, none. Owner, P. Engstrom, 5th and Seaton Sts., L. A. The building will cover an area of 50x237 feet, and has been designed for a commercial garage. The front portion of the building will be arranged for salesrooms and will be finished in mahogany and tile. Tile floor will be used. The rear portion of the building will be used as a repair shop, storage space and machine shop. Special storage tanks will be used. The exterior of the building will be faced with pressed brick. Plans are complete and the owner will do the work by Day Labor.

HOSPITAL—2 story and base, reinforced concrete. Cost not stated. Los Angeles, Cal. Architect, George Lov County Building, Los Angeles. Owners, Los Angeles County. The following bids were received at the last meeting of the Board of Supervisors for this work:

F. O. Engstrom Co., \$49,647; deduct \$1250 if composition roofing is substituted for slate; deduct \$1615 if 31 feet of west wing is omitted; deduct \$630 if painting is omitted.

Willard-Slater Co., \$48,500; deduct \$2400 if composition roofing is used instead of slate; deduct \$3800 if painting is omitted.

J. F. Atkinson, \$50,500; deduct \$1100 if composition roofing is substituted for slate; deduct \$4500 if painting is omitted; deduct \$3200 if 31 feet of west wing is omitted.

The following bids were received for the plumbing: W. D. Newell, \$586 complete; deduct \$2350 if fixtures are omitted; Howe Bros., \$7181 complete; deduct \$2346 for roughing-in only; Thos. Harty Co., \$7100, deduct \$4100 if fixtures are omitted; Lohman Bros., \$6998 complete, \$2416 for roughing-in only; L. M. Parker, \$8000 complete, deduct \$1500 if fixtures are omitted.

HOTEL—8 story and base. Class construction. Cost not stated. Los Angeles, Cal. Architects, Parkinson Bergstrom, Security Bldg., L. A. Owner, Clarence Brown. This building is to be erected at the southeast corner of Wilshire Boulevard and Carondelet street. Only preliminary plans have been prepared and details of construction have not been settled. The sketches show 250 guest rooms, all of which will have private baths. Construction is to be practically fireproof. Full details will be given as the plan progresses.

HOTEL—4 story and base, brick. Cost not stated. Los Angeles, Cal. Architect, L. E. Featherstonhaugh, Ferguson Bldg., L. A. Owner, Joseph C. Call. The building will cover an area of 60x165 feet, and has been arranged for 90 guest rooms, 21 of which will have private baths. Interior trim will be of pine, redwood and elm. Composition floors will be used in the kitchen. Office and lobby will be finished in oak and ornamental plaster. There will be steam heat and elevator service. The exterior of the building will be faced with pressed brick. Plans are complete and figures are being taken.

HOTEL—4 story and base, brick and steel, \$50,000. Venice, Los Angeles, Cal. Architect, W. S. Garrett, Carrier Bldg., L. A. Owner, Albert H. Each. The building will cover an area of 81x90 feet, and has been arranged to contain a total of 81 guest rooms and 15 baths. Interior finish will be of pine, redwood and some hardwood. Bath rooms will have composition floors. There will be steam heat, elevators and a vacuum cleaning system. The exterior of the building will be faced with pressed brick. Plans are being prepared.

LIBRARY—1 story and base, brick, \$5,000. Alhambra, Los Angeles, Cal. Architect, Frederick L. Roehrig, American Bank Bldg., Alhambra. Owners, City of Alhambra. The building, which is to be classic in design, will cover a ground area of 90x100 feet. There will be, in addition to the usual library rooms, ladies' and gentlemen's club rooms, auditorium, open air reading rooms and children's departments. Interior will be finished in pine, redwood and hardwood. Metal shelving will be used. There will be a central heating system. The exterior of the building will be faced with cement plaster. Roof will be of metal tile. Plans are being prepared and figures will be called for shortly. Besides the library a bond issue of \$172,000 provides for several other buildings which are to be erected in a civic center.

SCHOOL—1 story and base, brick, \$25,000. El Modena, Orange Co., Cal. Architect, H. M. Patterson, O. T. Johnson Bldg., L. A. Owners, El Modena School District. The building will cover a ground area of 102x106 feet, and will contain six class rooms besides an auditorium with a seating capacity of 350 people. Interior finish will be of pine and maple. Maple floors will be used throughout. There will be a central heating system. The exterior of the building will be faced with pressed brick. Plans are complete and figures are being taken.

SCHOOL—1 story and base, brick, \$35,000. Phoenix, Ariz. Architect, Norman F. Marsh, Broadway Central Bldg., L. A. Owner, City of Phoenix. The building will contain six class rooms, principal's room, teachers' rooms and assembly hall seating 350 people. Interior finish will be of pine throughout. There will be a central heating system and a modern system of ventilation. Program clocks and a vacuum cleaning system are also called for in the specifications. The exterior of the building will be faced with pressed brick. Plans are complete and figures will be taken at once.

SEWER SYSTEM AND SEPTIC TANK—Cost not stated. Elsinore, Riverside Co., Cal. Engineer, Frank A. Lathrop, Higgins Bldg., L. A. Own-

er, City of Elsinore. Plans have been approved for this work and bids will be opened by the City Trustees on February 24th. The work will comprise the following: 13,590 feet 6-inch pipe, 6,950 feet 8-inch pipe, 440 feet 10-inch pipe, 660 feet 12-inch, 880 feet 14-inch, 5,470 feet 8-inch pressure pipe, 30 flush tanks, 48 manholes, and septic tank. A check for 10% must accompany all bids. C. P. Carter is City Clerk.

SEWER AND STREET WORK—Cost not stated. Santa Monica, Los Angeles Co., Cal. Engineers, Knapp & Woodward, Consolidated Realty Bldg., L. A. Owner, King C. Gillette. This work will be done on San Vicente Boulevard. The following approximate quantities are to be used: 132,000 cubic yards of grading, 873,000 square feet old macadam paving, 56,600 feet cement curbs, 297,800 square feet cement sidewalks, 125 feet concrete storm sewer, 1705 lineal feet 30-inch corrugated iron sewer, 18,700 lineal feet 8-inch sewer, 19,700 feet 4-inch water mains, 19,700 feet 2-inch gas mains. Bids are to be taken at once.

LOFTS—3 story and base, brick and steel. Cost not stated. Los Angeles, Cal. Architect, W. S. Garrett, Carrier Bldg., L. A. Owner, H. O. Vogel. The building will be 61x144 feet. Interior will be finished in pine. There will be metal window frames and sash. Elevator service and steam heat will be installed. The exterior of the building will be faced with pressed brick. Plans are being prepared. The building has been leased for a long term to Sanborn, Vail & Co.

STORES AND OFFICES—8 story and base. Class A construction, \$350,000. San Diego, Cal. Architects, MacGibbon-Frery Co., Los Angeles Investment Bldg., L. A. Owner, George E. Hart. The building is to be erected at the corner of 8th and D streets, and will cover an area of 50x150 feet. The first floor will be arranged for stores and the upper floors for 296 offices especially equipped for physicians, dentists and other professional men. Construction will be of reinforced concrete throughout. Interior will be finished in metal trim and hardwoods. There will be steam heat, elevator service and all other modern improvements. The exterior of the building will be faced with white glazed terra cotta. Plans will be out for figures in a couple of weeks.

Contracts Awarded.

BANK AND OFFICES—2 story and base, brick and concrete, \$17,000. Owensmouth, Cal. Architects, Ye Planny Building Co., Title Insurance Bldg., L. A. Owners, Los Angeles Suburban Homes Company, Trust and Savings Bank, L. A. Contractors, Ye Planny Building Co., Title Insurance Bldg., L. A. Contract price, \$17,000.

PORTLAND AND OREGON.

WAREHOUSE—2 story and base, reinforced concrete. Cost not stated. Portland, Ore. Architects, Whitehouse & Ponilhouse, Wilcox Bldg., Portland. Owners, Pacific Bridge Co. A site has been secured at the corner of Salmon and Water streets, and a building 60x100 feet is to be erected as soon as plans can be completed. The plans will provide for foundations and walls of sufficient strength to carry several additional stories. Construction will

be fire proof with concrete floors and roof slabs. Fireproof doors and metal window sash and frames are specified. The exterior of the building will be covered with cement plaster. Plans are being prepared.

FACTORY—5 story and base, brick. Cost not stated. South Portland, Ore. Architect, C. H. Bristol, Portland. Owners, Carnan Manufacturing Co. This is the second notice given to the Carnan Company's project, which is to establish the largest furniture manufacturing plant on the coast. Plans have been completed for the first building to be erected, which will be a two-story mill constructed addition to the present factory, and will cover an area of 80x30 feet. This work will be done by Day Labor. Following this construction will come the five-story building, which will probably be erected this year. A large reinforced concrete retaining wall and a large fill will be undertaken later.

FACTORY—1 story and base, reinforced concrete, \$150,000. Portland, Ore. Architect, John Graham, Lyon Bldg., Seattle, associated with Architects Doyle, Patterson & Beach, Portland. Owners, Ford Motor Car Co. It is stated that Alexander Pearson, New York Bldg., Seattle, is low man on this work, and he is now in Portland negotiating with the associate architects. The estimated cost of the building was placed at \$150,000.

RESIDENCE—2 story and base, frame. Cost not stated. Portland, Ore. Architects, Johnson & Mayer, Portland. Owner, Dr. A. E. Rockey. The dwelling has been designed for a sixteen-room house with every modern convenience. Interior finish will be of pine and hardwoods. There will be a hot water heating system, automatic water heater, open fire places and a vacuum cleaning system. Hardwood floors will be used throughout. Mantels will be of brick. Bath room will be finished in tile with composition floors. The exterior of the house will be covered with cement plaster on metal lath. Plans are complete and figures are being taken.

SCHOOL—1 story and base, brick. Cost not stated. Aurora, Ore. Architect, N. C. Gannett, Chamber of Commerce Bldg., Aurora. Owners, Aurora School District. The building will contain four class rooms, assembly hall and principal's office. Interior finish will be of pine. Maple floors will be used throughout. A steam heating system will be installed. The exterior of the building will be faced with pressed brick. Plans are complete and figures are being taken. Bids will be opened on February 17th. Plans can be secured from either the architect or Louis Weibert, Clerk of the Board of Education.

MUNICIPAL LIGHTING PLANT—Cost not stated. Albany, Ore. Engineer, Lewis C. Kelsey, Portland. Owners, City of Albany. Mr. Kelsey has been retained to prepare plans for this work, and his preliminary sketches now complete, show a steam plant supplying gas cluster lights. A bond election will have to be held to secure funds for the construction. Mr. Kelsey has worked out the details of a plan for supplying a number of towns in the Willamette Valley with water from Clear Lake, and the plan is meeting with general approval.

ADDITIONAL WATER MAINS—Cost not stated. 30 inches each. Cost not stated.

ed. Potllood, *City Engineer*, *City Engineer*. To third Owners, *City of*. To third. Two new water mains have been ordered by the City Water Board, one will reinforce the East Side High Gravity system and will extend from Mt. Taft to reservoirs to Fremont street, and the other will reinforce the Low Gravity system, and will extend from the reservoirs to East 25th and Clinton streets. Both mains will be 30 inches in diameter. Pipe will be ordered from the foundry at once.

STORIES—2 buildings, 1 and 2 story brick. Cost not stated. Vancouver, Wash. Architect, D. L. Williams, Portland. Owner, Eugene Blazier. One of the buildings will be 50x80 feet and two stories high, and the other one story 50x100 feet. Plans are being prepared, but figures will not be called for at least a month.

Contracts Awarded.

APARTMENT HOUSE—2 story and base, brick, \$30,000. Portland, Ore. Architect, none. Owner's name not given. Contractors, P. E. Bowman & Co., 22nd and Brazil Sts., Portland. Contract price, \$27,000. Note: The building will cover an area of 190x65 feet. Construction has not yet been started.

STORES AND OFFICES—4 story and base, brick and steel, \$80,000. Architects, Bennes & Hendricks, Henry Bldg., Portland. Owners, Metschiner Building Co. Contractors, J. S. Winters & Co., Portland. Contract price, \$80,000.

SEATTLE AND WASHINGTON.

APARTMENT HOUSE—5 story and base, reinforced concrete, \$175,000. Seattle, Wash. Architect, W. P. White, Walker Bldg., Seattle. Owner, B. M. Fouts. This building will be erected at the northeast corner of 16th and Madison streets, and is to be arranged for 25 large suites of from five to eight rooms and bath each. All modern conveniences will be installed including wall beds, elevator service, vacuum cleaning system and steam heat. Interiors will be specially finished for the owners and will include much hardwood and marble and tile. Besides the 25 suites there will be a large office, lobby, reception rooms and parlors. The roof will be arranged for a roof garden. The exterior of the building will be faced with white glazed terra cotta. Plans are complete and figures will be called for within a day or two.

APARTMENT HOUSE—5 story and base, brick and concrete, \$50,000. Vancouver, B. C. Architects, Stuart & White, Metropolitan Bldg., Vancouver. Owner, H. S. Rowling. The building will be 50x77 feet and has been arranged for a number of two and three

room suites, all of which will be equipped with wall beds and connecting baths. Plans include steam heat, elevator service and a vacuum cleaning system. Interior finish will be of pine and redwood. The exterior of the building will be faced with cement plaster and pressed brick. Plans have been filed for a permit and construction will be started at once.

APARTMENT HOUSE—6 story and base, concrete and brick, \$160,000. Vancouver, B. C. Architect, W. T. Whiteway, Molson's Bank Bldg., Vancouver. Owner, Harry Ifume. The building is to be erected on a corner site. Details of the construction have not been obtained. Plans are still in a preliminary state, and it will be some months before construction can be started. Further announcement will be made in these columns.

APARTMENT HOUSE—3 story and base, brick and concrete, \$45,000. Wenatchee, Wash. Architect's name withheld. Owner, T. E. Young, Haight Bldg., Seattle. Mr. Young is a well known Seattle contractor, and has had plans prepared for a building 80x145 feet. Interior will be arranged for 30 or 40 suites of two and three rooms each. There will be steam heat and a vacuum cleaning system. Interior will be finished in pine with some hardwoods. Bath rooms will be finished in tile and will have composition floors. Wall beds are to be used throughout. The exterior of the building will be faced with pressed brick. Work will be done by Day Labor. Plans are not as yet complete.

SYNAGOGUE—2 story and base, reinforced concrete, \$40,000. Seattle, Wash. Architect, B. Marcus Pretica, Empire Bldg., Seattle. Owners, Yesler Avenue Synagogue. This building has been mentioned here a number of times before. Plans have been completed and turned over to the Building Committee, who are now taking figures on the work. Foundations are already in, and the work now being figured is for completing the construction.

COURT HOUSE—2 story and base, brick and concrete. Cost not stated. Chinook, Mont. Architect, George Stanley, Great Falls, Mont. Owners, Blaine County. Plans for this building are complete and figures are being taken. Bids will be opened on February 20th. Plans and specifications can be secured from the architect or from Vernon Butler, County Clerk.

COURT HOUSE ADDITION—3 story and base. Class A construction. Cost not stated. Seattle, Wash. Architect, A. Warren Gould, American Bank Bldg., Seattle. Owners, King County. The commissioners have decided to proceed at once with the construction

of a part of the proposed court house and have instructed the architect to complete what revision of plans and specifications is necessary. The whole project involves \$250,000. Bids will be called for shortly.

WAREHOUSE—4 story and base, reinforced concrete, \$60,000. Seattle, Wash. Engineers, Weld & Thomas, Hoge Bldg., Seattle. Owners, Sylvester Bros. The building will cover an area of 90x145 feet and has been designed for a modern fireproof warehouse. There will be concrete floors, metal window frames and sash and fireproof doors. Freight elevators and an automatic sprinkler system will be installed. The exterior of the building will be faced with cement plaster. Plans are complete and figures are being taken.

WAREHOUSE—3 story and base, reinforced concrete, \$30,000. Victoria, B. C. Architect, M. S. Farwell, Victoria. Owners, Scott and Peden. The building has been designed for a flour and feed warehouse. Construction will include metal window frames and sash. The exterior will be faced with cement plaster. Some special machinery will be required, which is not to be included in the general contract. Plans are complete and figures are being taken.

HOTEL—12 story and base. Class A construction, \$1,000,000. Spokane, Wash. Architect's name not given. Owners, Davenport Hotel Co. A report originating in Portland states that the Brayton Engineering Co., Lumbermen's Bldg., Portland, has been awarded the contract for the construction of this building. The report cannot be verified at this time.

COLLEGE BUILDING—3 story and base, brick and steel, \$55,000. Lacey, Wash. Architect, C. Frank Mahon, Savage-Scoffield Bldg., Tacoma. Owners, St. Martin's College. This building will be the first unit of a \$250,000 project which is to be erected at St. Martin's College. Interior finish will be of pine and hardwoods. A central heating system will be installed. The exterior of the building will be faced with pressed brick. Plans are complete and figures are being taken. Bids will be opened on February 23rd. Plans can be secured from the architect.

RAILROAD CONSTRUCTION—\$75,000. Seattle, Wash. Engineer, Engineering Dept. Puget Sound Traction, Light and Power Co., Seattle. Owners, Puget Sound Traction, Light and Power Co. A permit has been granted to the above mentioned company to construct a second track on Meridian avenue from North 16th street to 58th street. The work has been estimated to cost \$75,000.

Editorial Comment.

Building operations for the past month seem to show a normal increase in business over the same month last year that naturally goes with a growing population. Reports from some fifty different cities representing building centers throughout the country made to the American Contractor show an aggregate gain of 12 per cent for January 1913 over the same month in 1912. Thirty-six of the cities listed show a gain while fourteen registered a decline for the first month of the year. Among those that showed a loss were New York City with a decrease of about three million. This however, was more than offset by Chicago which registered a gain of about five million. Totals are shown in the following table:

	January 1913	January 1912
City	Cost	Cost
Akron	\$ 208,230	\$ 121,450
Atlanta	395,005	294,295
Baltimore	635,670	460,166
Birmingham	362,626	243,277
Buffalo	478,000	427,000

Total

It will be noticed that San Francisco, Portland and Oakland show a gain. The record of Los Angeles is practically the same as last year, while Seattle, Salt Lake City and Spokane show a loss for the month. On the whole the building business seems to be about normal throughout the country no great change being effected anywhere but a healthy growth indicated by the general average.

The Pacific Telephone and Tele-
graph Company is addressing a cir-
cular letter to all subscribers calling
attention to a contract that is being
circulated by the Telephone Users As-
sociation relative to a reduction in
rates and calling attention to the
clause relative to the impounding of
money in case of reduced rates.

Among other things the Telephone
Company states that it asks no favors;
that it does expect fair play, and that
this attempt to deprive it of legiti-
mate earnings without an opportunity
to be heard, must appeal to the citi-
zen's sense of justice as un-American,
vicious in practice and unworthy of
consideration.

It might be asked how the Tele-
phone Company explains the transfer
of the Home Company's property in
absolute and open violation of the will
of the people expressed in two elec-
tions and in the written terms of its
contract and its franchise. Was this
a "favor," is it "fair dealing," and is
it "American?" Did civic pride and a
sense of justice prompt the Telephone
Company to come to the rescue of the
people and aid in the prosecution of
graffers or was the company an active
bribe giver?

The clause in the contract relative
to the assignment of one-half the
reduced rates of the money impounded
may be all that the Telephone Com-
pany says it is. So far as assigning
one-half the reduction of rates for a
year everyone would be glad to do it.
And many would be glad even to give
one-half the reduction for a period of
time rather than to get no reduction
at all. They would just as soon pay
the money to one grafter as another,
maybe more so by way of a change.

It is in axiom of equity that he who
seeks justice must come into court
with clean hands. The Telephone Com-
pany puts over the kind of a deal that
can be imagined and then it comes to
the people asking justice when the
initiative is invoked. Had there been
more aggressive action by the Board
of Supervisors to prevent the merger,
or if their action had indicated a de-
sire to champion the people in the
matter there would be no call for an
initiative proceeding. As it is the

Telephone Users Association has all the best of the argument when they go to the people and if they can make out a good case they will undoubtedly get a large number of contracts.

Senator Bourne, of the Federal Highway Commission, has addressed a letter to people interested in the subject of roadways to get an expression of opinion how best federal aid can be extended to road building throughout the country. The committee is seeking light on the "Builder" have any ideas on this important subject we would be pleased to get their expression of opinion. The committee is seeking light on the subject and any suggestion will no doubt receive serious consideration. Road building is one of the most important affairs. Too often money is squandered to little practical benefit.

Here is a state of things where federal aid is to be extended and the Committee want to find out the best possible way to secure results.

Congress has evidently failed to pass the appropriation for a government exhibit at the Panama Exhibition. The bill providing for the appropriation of two million dollars for the purpose provided for seven commissioners, each to receive a salary of \$7500 a year, each to be paid for out of the exposition treasury. It was this feature of the bill that many congressmen opposed and it was this provision that Congressman Kent wished to eliminate.

The Chronicle in Wednesday's issue stated in large headlines that Kent's opposition was the cause of the defeat of the measure and then gave no account of the reasons of the opposition. The principal objectors to the bill would have favored it had this lame duck provision been eliminated. As an instance of the views expressed by the opponents of the measure the reported speech of Congressman Lenroot is a good example:

"This Commission scheme," said Congressman Lenroot of Wisconsin, who favors the \$2,000,000 appropriation otherwise, "comes nearer to being a piece of graft than anything I have ever seen and if the Exposition Company has agreed to it, it was because it was held up. I want to say that if the bill is finally defeated this afternoon it will be because of this provision."

"So friend of San Francisco can vote for this proposition. Three Commissioners, or even one, is enough. I have no more right to join in robbing the people of California than in robbing the Government, and will not stand for useless Commission, whether it is to be paid for either by the Exposition or the Government."

The bill has therefore been defeated in the House and the only chance of Congress passing it this session will be to have the Senate insert it in the Sundry appropriation bill. It looks like the United States will be in the anomalous situation of inviting the nations of the world to make exhibits at the exposition and will have no exhibition itself.

Treatment of disease by prevention has become one of the requirements of modern times. Statistical reports show that typhoid fever has been practically eliminated from the army and navy. As this disease is communicated

principally through grinking water the only way to prevent the disease is through vaccination. This is now done not only in smallpox prevention, but for prevention of bubonic plague, typhoid fever and other diseases. The destruction of the mosquito in the malaria districts has effectually prevented the spread of that disease. What with the discovery of new serums and new methods of sanitation disease has lost many of its terrors and epidemics are becoming a thing of the past.

During the interval between the two sessions of the legislature there are some measures that should receive public attention. Among them is the proposed game legislation. Wild game naturally belongs to the whole people. And the question of private game preserves has become one that the people generally have become to believe an unwarranted privilege. It is time for the public generally to inform the legislature what kind of legislation they want on the subject. Ducks, for instance, are a migratory bird and it is a question whether they shall be allowed to be killed only by the hunters themselves or allowed to be sold on the market. Deer and other local game are an object of conservation. What laws are best to protect the game is a question local interest in different parts of the state and of the public generally.

The Mexican dogs of war seem to be having a terrible time down in the federal capitol. Revolution is the long suit of the South and Central American Governments and Mexico seems to be revolting with a will. That a modern republic will be established there seems to be doubtful as the people are unfit for self rule. Nothing short of a military despotism can maintain order among the motley and shiftless population that constitute the majority in the Mexican Republic. Under present conditions Americans and American capital invested in that country are extremely unsafe. How far the present revolution will extend is hard to tell. Nor is there any immediate prospect of any party maintaining a stable form of government in that district in the very near future. It would perhaps be a good thing if a new people altogether would assume control of the country and establish some stable form of government that would permit of some progress.

In this regard Mr. Forbes Lindsay, a member of the Pan American bureau at Washington, who recently returned from the canal zone, says he can not understand why immigration from this country to the isthmus is not greater. He made an extended investigation there and says that there are great numbers of fertile valleys there where the population is meager but the possibilities of the land are great. He says that there is no need of work there to gain a livelihood. The soil is fertile and nature is prodigal in her supplies. Little or no clothing is required and he says that Americans would be given a great opportunity for a peaceful and prosperous existence there.

The contrast with conditions in the popular states strikes him and he writes:

"The pathetic mystery of it is that

tens of thousands are slaving in city sweatshops and factories, or painfully wringing a living from reluctant soil, when land unlimited lies waiting to richly reward any man who will cast a handful of seed upon it."

This condition has always existed. Generation of toil in the sweatshops have taken the ambition and initiative out of the toilers. It would take many of them a lifetime to save enough to go there. But no doubt the possibilities are there in that country and the fellow who has the initiative and the hardihood to pioneer in the country will no doubt find ample reward.

Achille Duchene, the French architect who has lately been to this country to look over the architectural possibilities for the construction of a residence for Mrs. Carolan in connection with Mr. Willis Polk, is quoted as praising American architecture in many respects.

The New York newspapers quote him as praising American architecture for its dimension, scale and harmony. With respect to the Grand Central Terminal, the great depot covering thirty blocks in the heart of New York, he said:

"It is a tremendous thing for your art when you accomplish such great efforts as I saw in that building with nothing but simple lines." He praised extravagantly the view of New York as one comes up the Bay. The foreigner approaching New York, he said, "experiences a sensation more wonderful, more peculiar, more impressive to an inexpressible degree than he gains entering any other port in the world. Naples, Salonica, the Golden Gate of your California, are truly wonderful. There are many ports where the mountains, the valleys, the sky and the sea all appeal with their beauty. But it is the beauty created by God. Coming into New York—ah, there is New York, indeed beautiful. It is so vast, so Herculean. Whatever of line is in error is lost. One is aware only of its vastness, of its entirety and its grandeur. And this is a grandeur built by men. I cannot hope to describe the sensation when one approaches New York from the sea for the first time. What must be the impression of the immigrant as he lands in New York. How must he feel as he stands gazing down on your vast avenues teeming with the life of a nation greater than he has ever known! He does not know such streets where he came from. And he gazes aloft at the lighted windows of your vast buildings, wherein men are working like bees in a hive, each window representing a unit of energy which might occupy a whole building in his native land, then must he wonder if he can ever become a part of this, a success in its midst. London in no manner represents this aspect."

This is an interesting expression of the impression of a man, learned in his profession, one who has grown up amid the architectural masterpieces of the world and an artist of the first rank. Whatever of architectural merit there has resulted in the building of great cities has been the result of natural growth and not the effect of any concerted plan. The general effect produced by the masses and outlines of a great city such as New York is the result of commercial activity and business that centers in the great ports of the Atlantic.

The Relation Of Sculpture To Parks And Buildings.

Report Of Committee Read Before the Forty-sixth Annual Convention of the American Institute of Architects, Washington, D. C., December, 1912.

By Herbert Adams.

I am conscious that it is an honor to have been asked to speak before this body on the subject of the "Relation of Sculpture to Parks and Buildings;" but I should be dull, indeed, if I did not recognize that many of you are more competent to do so than I am. I should therefore feel less embarrassed if my audience were composed of committee men and commissioners interested in erecting statues and monuments, rather than of architects.

First, I will speak of the relation of sculpture to our parks. As a sculptor, possibly I am expected to believe that parks should be bountifully supplied with examples of our art; but, as a matter of fact, I feel that the naturalistic park can get along very well with little from our hands—can be spared to advantage even the bronze panther crouching on the cliff, half concealed in the foliage.

In this country, I believe we are far too prone to place the statue of our hero or our honored citizen on the sloping bank hard by the popular drive or walk in the naturalistic park, to surround the pedestal with a mound of bedded plants, and then to rest secure in the satisfaction of having at once honored the dead and beautified nature. Perhaps we have dragged a rugged boulder to the lawn, mounted our hero on that, and then congratulated ourselves that we have been very artistic, while as a matter of fact we have only been avoiding the architect—or rather the cost of executing his design for a setting.

The boulder idea, in general, I believe, is one to be persistently discouraged; it is very contagious; it is one which has troubled the Art Commission of New York not a little. Had there been no restraining hand in this direction, I fear that the important drives in Central Park and Riverside Drive would have been lined ere this with boulders bearing bronze tablets; or perhaps there would have been only the boulders left, for there are individuals in that city who seem to have the idea that bronze, as a metal, has high value, and they frequently attempt to remove accessible tablets without consulting the authorities. It is, indeed, surprising that care must be used in fastening a tablet so that it cannot be removed by an ingenious vandal, even in the heart of a great city.

Certainly I believe that sculpture may be successfully used in connection with the naturalistic park; but this will be accomplished not by dropping it down here and there with reference solely to its conspicuous placing, but rather by treating some spot or portion in the park in a reasonably formal manner and using sculpture in connection with such treatment. In fact, it seems to me that the approach or entrance to the naturalistic park offers especially good opportunity for sculpture; indeed, if properly designed, it affords ideal possibilities for the sculptor's art. I believe the approach could be designed so that it would pre-

sent a satisfactory ensemble before all or perhaps any of the sculpture was in place, thus providing suitable sites for the sculpture of the future. Of course the general character of the sculpture which was to be added would have to be worked out with the general scheme, and safeguards taken that this scheme should be adhered to.

Think what it would have meant to New York City if Hunt's scheme of twenty monumental gates for Central Park had been realized: These gates were to have been known as the Merchant's Gate, the Scholar's Gate, the Artist's Gate, the Woman's Gate, the Children's Gate, etc. From sketches Hunt left for some of these gates, I believe it was his intention that they should serve not only as memorials to these various groups of people, but statues of individuals could be added from time to time, as occasion might arise.

that the scheme was so conceived that

It would be impossible for one who has never attempted to find a suitable place for a statue in a city like New York to imagine what a blessing such a scheme, intelligently carried out, would have been. With our congested streets running at right angles to each other, with our small-parks laid out in winding paths and in irregular beds, with our big parks sacred to the landscape idea, the problems of locating monuments in our city is a most difficult one.

We sculptors, therefore, beseech you, as designers of American cities, to give a little thought to the sculptural monuments of the future when you are planning parks, avenues and civic centers. You probably realize, quite as well as I, the importance of the setting and surrounding of works in sculpture—that a work of no extraordinary intrinsic merit is sometimes made impressive and important by its setting, while a work of high artistic quality may utterly fail to give its message, purely because it lacks the advantages of suitable setting and location.

It would be presumptuous, indeed, on my part, to attempt to explain to you what constitutes a good setting or a good location for sculpture, or how a city square or park should be treated to provide for sculpture. You, the architects, understand even better than the sculptor the significance of scale, the value of vistas and axes, the necessity of keeping each part of a plan in proper relation to the whole scheme.

There is one essential point, however, which, in general, has been more fully appreciated by the sculptor than by the architect. This is the rather universal importance of having the sun back of a spectator when he is looking at a statue. If a statue which stands in the open is between the sun and the spectator, of course all modeling is wiped out and silhouette alone is seen. The sculptor, therefore, likes to face his work south whenever possible, and is particularly unhappy

whenever it has to be faced north. This is by no means to underrate the value of silhouette, which will always remain an important factor in any achievement in the round.

In locating a public park in sculpture, especially whenever it takes the form of a memorial there is one element which often prevents the best result, in the broadest sense of the word. This difficulty is the desire, on the part of the promoters, and often, I regret to say, on the part of the authors, to have the work given a position where it will be seen by the largest number of people—a desire which sometimes warps the judgment. This is one of those elements in human nature that make no end of trouble for the Art Commission of New York. The promoters of nearly every monument or statue ask, first, for one of these four sites—City Hall Park, Union Square, Madison Square, the Plaza. The policy which has been pursued for so many years has pretty well discouraged people from trying to get their monuments into Central Park; but there is a constant demand for the other places—every one seems to feel that his monument has some special fitness for one of these sites.

I feel still more embarrassed, if possible in speaking to architects of the relation of sculpture to their buildings. Of course we all know the importance of having the sculpture suitable to the style of the architecture and the purposes of the building; of having it in proper scale; and of placing it so that it shall not be seen in too violent perspective.

It seems to be a rather difficult problem to determine the right size for a statue or group which is to be placed upon or in relation to a building, without trying a model on the complete structure, and of course this is often—in fact, usually—impossible. In case of a relief, where there is no great projection, the architect's drawing is very helpful in determining the proper size, but for a figure in the round, especially when placed at some height, I know that often, when the work is executed of a size that appears right in the drawing, either elevation or perspective, the result is a surprise. When a model is made of the entire building, the scale is usually so small that, the suggestions for the sculpture are too crude to be really of much value. On the other hand, the sculptor is inclined to make his studies for his part of the work at a scale so large that only the immediate surroundings of the architecture can be shown in the model and of course these by themselves are of little value in considering general proportion. From my own experience I think that the most practical way of determining the scale is to make a model of a considerable portion of the building and sculpture at such a scale that the figures will be, say, six inches to eight inches tall. Then, with the eye in the same relative position in

which it will view the completed work, care being taken to cut out of vision everything except the model. I believe a fairly true idea of the effect may be obtained.

In planning for sculpture in the interior of buildings, the question of lighting is often too little considered. Every one knows that a painting must have a good light to be properly seen, but few seem to perceive that it is even more important, if possible, that sculpture should be properly lighted. Without its light and shade sculpture has nothing left but its silhouette; and in the case of a relief or of a figure against a background of the same color even the silhouette is lost.

Usually the light most favorable for sculpture is from above, but we are thankful if we can get it from any one direction, so long as it does not hit us bang in the face from low down, as is the case when sculpture is placed opposite an entrance, with a confused light coming through the doorway.

The sculptor often feels that the architect is too indifferent to the quality of the sculpture with which the building is to be decorated. I am aware, on the other hand, that the sculptor is liable to forget that his work is only a small part of the whole design, and that it is more important that it should strike the proper note in the entire composition, than that it should be exquisitely modeled, or that it should in any way exploit his personality, with intent to dominate.

Personally I believe that there is a great field in decorative sculpture; and in this I include both figure and ornament. I think that neither the sculptor nor the architect is doing his full duty in this matter. I think we both feel that much of the so-called decorative work is sadly lacking in artistic merit. How could it be otherwise under the conditions in which it is usually made? The architect replies, "Yes, but you figure sculptors don't understand decorative sculpture, particularly ornament; you consider it beneath you." I admit that most of us are not facile in decorative work; but for myself I believe that there may be just as much art in designing an exquisite border or panel from a wild grapevine as there is in designing the portrait of a great man or a beautiful woman. But it requires not only skill and feeling, but study; it cannot be turned out by the yard.

I feel that one difficulty here is that the artist-architect and the artist-sculptor have not been in close enough touch with each other. The Society of Beaux Arts Architects and the National Sculpture Society have recognized this, and have seen the need of having our decorative sculpture executed by better trained men. They have joined hands and formed an atelier, where students and men employed in modeling shops may study, not simply under the instruction of the decorative modeler, but under the criticism of the architect and the sculptor. It is an interesting experiment and should do good.

The importance of bringing architect, painter and sculptor into closer sympathy with each other, and giving them a clearer conception of each other's work, was recognized by McKim when he conceived the plan of the American Academy in Rome. The value which this institution will eventually be to this country is at

present not fully appreciated. The influence which it is destined to have on the art of America I believe to be of the greatest importance.

Of course, the Academy will never be great in point of numbers of students there at any one time; this is neither intended nor desired. But they are picked men, men who have learned their trade, so to speak, but still are not beyond the receptive age. They not only see each other's work, but they live under the same roof; they eat together, they discuss together, they visit masterpieces of antiquity together. This is but incidental, but it is no less valuable than is their working out together problems which involve the three arts. In the great work of bringing together into harmonious relationship the work of architect, painter and sculptor, I know of no institution, of no influence, destined to do as much for us as will the American Academy at Rome.

TRAFFIC BETWEEN THE ATLANTIC AND PACIFIC COASTS VIA THE ISTHUSES OF PANAMA AND TEHUAUTEPEC.

Commerce between the Atlantic and Pacific Coasts of the United States via the Isthmuses of Panama and Tehuantepec aggregated approximately \$125,000,000 in 1912. The rapid growth of the traffic between the eastern and western coasts of the United States via the Isthmuses which developed chiefly within very recent years and seems likely to further increase with the opening of the Panama Canal, led the Statistical Division of the Bureau of Foreign and Domestic Commerce to establish at the beginning of the present fiscal year a monthly record of the movements of the principal articles forming this traffic. Its record for the five months ending with November has just been published and shows \$24,500,000 worth of merchandise passing from the Atlantic Coast to the Pacific Coast via the Tehuantepec Railroad, and \$5,000,000 worth via the Panama Railroad; while the value of that passing from the Pacific Coast to the Atlantic was, via the Tehuantepec line, \$14,320,000, and via the Panama line, \$2,750,000. This suggests that the total value of the traffic for the half year ended December was approximately \$30,000,000 west-bound across the Tehuantepec route and \$6,000,000 via the Panama line; and of east-bound coming from the Pacific Coast ports and Hawaii, \$16,990,000 via Tehuantepec and \$4,500,000 via Panama; and that the total value of this traffic for the full year approximates \$125,000,000.

The principal articles forming this interchange between the Atlantic and Pacific coasts are, in the westward movement, iron and steel manufactures, about \$8,000,000 for the half year ended with December; cotton cloths, about \$2,000,000; paper and manufactures thereof, nearly \$3,000,000; manufactures of wool, \$1,250,000; chemicals, approximately \$2,000,000; smoking tobacco, about \$750,000; vegetables, nearly \$1,000,000; manufactures of India rubber, approximately \$50,000; manufactures of copper, between \$1,600,000 and \$2,000,000; boots and shoes, about \$320,000; cotton wearing apparel, \$1,500,000, and mineral oil, \$50,000 in value. The principal articles forming the \$8,000,000 worth of iron and steel

manufactures are machinery, practically \$1,000,000; builders' hardware, more than \$500,000; nails and spokes, about \$330,000; sheets and plates, about \$500,000; and tools about \$50,000.

The merchandise shipped from the Pacific Coast to the Atlantic seaboard included about \$1,500,000 worth of canned salmon; nearly \$500,000 worth of raisins; more than \$250,000 worth of prunes; more than \$1,500,000 worth of preserved fruits; \$2,000,000 worth of wines; and nearly \$2,000,000 worth of wool; while sugar shipments from the Hawaiian Islands amounted to over \$7,000,000 in value for the five months in question.

Considerable quantities of merchandise bound for foreign countries also utilize now the trans-isthmian routes. Shipments from the Atlantic Coast to foreign countries via the isthmus go chiefly via the Panama route and include, for the six months ended with December, approximately \$1,500,000 worth to Peru, nearly \$1,000,000 to Ecuador, about \$333,000 to Chile, and about \$2,000,000 worth to the Central American States. The east-bound traffic from the Pacific Coast, to foreign countries amounted to about \$4,000,000 value for the six months in question, the largest single movement being from San Francisco to Germany, \$1,668,000 value; while that to France was about \$660,000 and to England about \$333,000 value.

ROADS, YESTERDAY, TODAY AND TOMORROW.

History Is Repenting Itself, and the Imperative Demands of Modern Traffic Are Creating a Necessity That Concrete Will Do Much to Meet.

The country road which was good enough for yesterday for the horse, laden with the farmer and his grain bag with the grist in one end and a stone in the other, has gone with yesterday; and yesterday's farmers and yesterday's ways—highways and low ways—are gone forever.

Yesterday the road past his farm belonged to the farmer; but today it belongs to the county or state, and tomorrow it will belong to the United States, with an invitation to the world to use it.

Yesterday's road was poor because yesterday's people were poor. They had a wilderness to penetrate, the stumps and roots to obliterate, the turf of a million years to plow and cultivate. So how could they make good roads? There was no time to build good roads; there was no commerce requiring good roads; so no good roads were built.

The built as good roads as they needed; and it would be foolish for any generation to build better roads than are required at the time of building, for no man knows what tomorrow has in store for us. Perhaps railroads and highways will pass out of use, the rights of way be filled, and the produce of the future be carried to markets in combination air and water craft. However, this will not happen in our day; so it is up to us to do as well for this generation as yesterday's people did for themselves.

Today we have enormous cities to feed, villages everywhere growing into cities; and today's demand is for roads that will permit a four-ton load to be hauled twenty miles to town before

breakfast. Milk must be brought 50 to 100 miles. Railroads cannot be built past every farm; but good roads can be built where traffic is not sufficient to demand railroads, and yet is enough to warrant good roads.

Every citizen traveling in an automobile or hauling with a motor truck has as good a right to be served with a road for his machine today as had the man on horseback three hundred years ago; and yesterday's road will not answer the purpose.

Today demands more miles of well-graded and properly drained earth roads than of any other kind. Today demands thousands of miles of well-built gravel roads. Today demands more miles of common water-bound macadam road than have ever yet been built. Today the half million automobiles and motor trucks demand that near all cities the surface of the road shall be so hard, so smooth, and so welded together with cement, bitumen, or something as good or better, that the wheels shall not pull the road to pieces or suck out the binder which holds it together.—H. S. Earle in "Southern Good Roads."

NOVEMBER RAILWAY BUSINESS.

The high tide of business in the United States continues to be reflected in the railway statistics compiled by the Bureau of Railway Economics from the reports of the railways to the Interstate Commerce Commission.

The returns for last November show an increase over November of the previous year, but do not maintain the ratio of increase displayed by the month of October; while operating revenues increased \$122 per mile of line for the month, operating expenses increased \$74, and net revenue only \$48.33. Taxes were greater than for the previous November, amounting to \$46 per mile of line. Operating income averaged \$12.13 per mile of line for each day in November, an amount greater by \$1.63 than for November, 1911. This is the entire amount available to the railways for rentals, interest on bonds, appropriations, and dividends.

For the five months of the fiscal year the net operating revenue per mile of line of the eastern railways, compared with the corresponding months of the previous year, increased 9.3 per cent; that of the western railways increased 15.8 per cent, while that of the railways of the south increased less than one-tenth of 1 per cent.

For the eleven months of the calendar year the net operating revenue per mile of line of the eastern railways, compared with the corresponding months of the previous year, increased 4.3 per cent; that of the western railways increased 7.4 per cent, while that of the railways of the south shows a decrease of 4.5 per cent.

CITY ATTORNEY TO RULE ON THE TENEMENT LAW.

The Board of Public Works of San Francisco has decided to ask the City Attorney for an opinion on whether a three-story flat building on Baker street, near the park, could legally be changed to a tenement building with eleven separate apartments. The structure is forty-eight feet high, or eight feet more than is allowed to a frame building under the existing or-

dinance, but the latter was enacted after the structure was erected, and is not retroactive. Now that it is proposed to change the character of the structure, however, the suggestion has been made that the ordinance may apply, in which case the extra eight feet in height would have to be done away with.

The board referred to the City Engineer two pending ordinances, one requiring that hereafter when street

sewers are put down connecting side sewers leading into abutting lots shall also be installed; the other providing that hereafter all public sewer underground work shall be placed beneath the sidewalks.

The board overruled the pending protests against the sewerage of Kansas street between Twentieth and Twenty-second streets and directed that bids be invited for the work.

Firms desiring news on special classes of buildings such as Banks, Churches, Schools, Hotels, etc., will find such items all classified and grouped under proper headings, commencing on this page. These same items are again repeated under "LOCALITIES" in the last part of our news department.

—APARTMENT HOUSES—

SAN FRANCISCO—Apartment house, 3 story and base, frame, \$10,000. Architects, C. M. and A. P. Rousseau, Monadnock Bldg., S. F. Owners, Rousseau Realty Co. The building will be erected in the east line of Larkin street, near Pacific, and will be arranged for a number of two and three room suites, all of which will have connecting baths and private entrances. Interior finish will be of pine and hardwood. Oak floors will be used in the principal rooms. A central heating system will be installed. Wall beds are specified. The exterior of the building will be covered with cement plaster on metal lath. Plans are complete and the work will be done by Day Labor.

SAN FRANCISCO—Apartment house, 4 story and base, brick and steel, \$50,000. Architect, Norman Coulter, 46 Kearny St., S. F. Owner, Thomas Q. Swortfeger. This building will be erected in the north line of Sacramento street, between Pierce and Scott streets. While outside of the fire limits, the structure will be a Class C building. Interior has been arranged for two, three and four room apartments, and will cover an area of 65x127½ feet. Interior finish will be of pine, redwood and some hardwoods. A vacuum cleaning system will be installed. The exterior will be faced with pressed brick. Plans are now being prepared.

SAN FRANCISCO—Apartment house, 3 story and base, frame. Cost not stated. Architects, C. M. and A. P. Rousseau, Monadnock Bldg., S. F. Owner, M. S. Shaw. The building is to be arranged for six apartments of four rooms and bath each. There will be a central heating system. Wall beds will be used in all suites. Interior finish will be of pine and redwood with some hardwood floors. The exterior of the building will be covered with cement plaster on metal lath. Plans are complete and in the hands of the owner who will do the work by Day Labor.

SAN FRANCISCO—Apartment house, 3 story and base, frame, \$10,000. Architect, none. Owner, C. F. Wyman, 1959 Hayes St., S. F. The building is to cover an area of 25x75 feet. Interior will be arranged for six apartments of three and four rooms and bath. Wall beds will be used throughout. A central heating system will be installed. Interior finish will be of pine and redwood with some oak floors. Bath rooms will be finished in tile. The exterior of the building will be covered with rustic and cement

plaster on metal lath. Plans are in the hands of the owner who will do the work by Day Labor.

OAKLAND, CAL.—Apartment house, 3 story and base, frame. Cost not stated. Architects, Mitchell & Hodges, Bankers' Investment Bldg., S. F. Owner, Marshall Davonett. The building will be erected at 756 8th street, and is to be arranged for a number of two and three room suites. All apartments will be equipped with wall beds and will have connecting bath rooms. The interior of the building will be finished in pine and redwood. The exterior will be covered with brick veneer and cement plaster. A central heating system will be installed. Plans are complete and figures are being taken.

SAN FRANCISCO—Apartment house, 4 story and base, brick and steel, \$50,000. Architect, August Nordin, Mills Bldg., S. F. Owners, Franklin Realty Co. The building will be erected on the north line of O'Farrell street east of Larkin, and will contain a large number of two and three room apartments. Interior will be finished in pine and redwood with hardwood and ornamental plaster in the lobby and amusement rooms. There will be steam heat and elevator service. All suites will have wall beds and private baths. A vacuum cleaning system will be installed. Bath rooms will have cement floors. The exterior of the building will be faced with pressed brick. Plans are complete and in the hands of the owners who will take figures on the work.

SAN FRANCISCO—Apartment house, 3 story and base, frame, \$10,000. Architect, none. Owner, E. A. Knoop, 1375 Stevenson St., S. F. The building will be 28x66 feet and has been arranged to contain six apartments. Interior finish will be of pine and redwood. There will be a bath with each apartment. A hot water heater will be installed. The exterior of the building will be covered with rustic and shiplap. Plans are complete and in the hands of the owner who will do the work by Day Labor.

SAN FRANCISCO—Apartment houses, 4, 3 story and base, frame, \$10,000 to \$14,000 each. Architects, H. Gelfuss & Son, 46 Kearny St., S. F. Owners' names withheld. Architects Gelfuss & Son have completed plans and specifications for two of these buildings and have taken figures on the same. Contracts will be awarded for the work in a short time. Plans are being prepared for two other similar buildings and bids will be taken within a few weeks. All four of the apartment houses will be erected in the Western Addition.

LOS ANGELES, CAL.—Apartment house, 5 story and base. Class B construction, \$125,000. Architect, J. W. Chambers Mason Bldg. L. A. Owner, A. L. Hill. This building has been mentioned here before when plans were being prepared. The structure will be erected at the northwest corner of 6th and Lake streets, and will cover an area of 96x148 feet. There will be a total of 183 rooms, which will be arranged in suites of two, three and four rooms each with private bath and wall beds. Interior finish will be of pine and mahogany. Baths will be finished in tile. There will be automatic elevators, steam heat and a vacuum cleaning system. The exterior of the building will be faced with cement plaster and artificial stone trim. Plans are complete and figures are being taken.

LOS ANGELES, CAL.—Apartment house, 4 story and base, brick and steel. Cost not stated. Architect, Scott Quintin, Douglass Bldg. L. A. Owners, Los Angeles Securities Co. The building will cover an area of 72x100 feet. The first floor has been arranged for two stores and the upper floors for 100 rooms, which will be divided into two and three room suites with baths and wall beds. Interior will be finished in pine, redwood and some hardwood. There will be steam heat, elevator service and a vacuum cleaning system. The exterior of the building will be faced with pressed brick. Plans are being prepared.

LOS ANGELES, CAL.—Apartment house, 5 story and base. Class R construction. Cost not stated. Architects, Dennis & Farwell, Fay Bldg. L. A. Owner, Louis C. Lohman. The building is to contain 85 rooms, which will be arranged in suites of two and three rooms each with wall beds and private baths. Interior will be finished in birch and white enamel. There will be steam heat, elevator service and a vacuum cleaning plant. Bath rooms will have composition floors. The exterior of the building will be faced with pressed brick and artificial stone trim. Plans are being prepared.

LOS ANGELES, CAL.—Apartment house, 4 story and base, brick and steel, \$65,000. Architects, Pacific States Investment Co., 107 So. Broadway, L. A. Owner, Dr. J. T. Rush. The building will cover an area of 50x130 feet and will contain a large number of two and three room suites with baths and wall beds. Interior finish will be of pine and redwood. Bath rooms will have composition floors. There will be steam heat elevator service and a vacuum cleaning system. The exterior of the building will be faced with cement plaster. Plans are being prepared and when complete the building will be erected by the Pacific States Investment Co. on a percentage basis.

BAKERSFIELD, KERN CO., CAL.—Apartment house, 2 story and base, reinforced concrete. Cost not stated. Architect, Thomas B. Wiseman, Bakersfield. Owners, A. E. Wishon and Claude Thompson Estate. The building will cover a considerable ground area, and is to contain eight apartments arranged in two and three room suites. All apartments will have connecting baths and wall beds. Plans provide for steam heat and hot and cold running water. Interior finish will be of pine and hardwoods. The exterior of the building will be faced with cement plaster. Plans are being prepared.

Contracts Awarded.

LOS ANGELES, CAL.—Apartment house, 5 story and base. Class B construction, \$50,000. Architect, E. J. Borgmeyer, Stinson Bldg. L. A. Owner, Julius R. Smith. Contractor, C. S. Blodgett, 335 North Burlington Ave. L. A. Contract price \$50,000.

LOS ANGELES, CAL.—Apartment house, 4 story and base, brick, \$15,000. Architect, none. Owner, Mrs. Lydia Monteith. Contractors, Pacific States Investment Co., 107 So. Broadway, L. A. Contract price, \$45,000.

BRIDGES, DAMS AND HARBOR WORK.

TACOMA, WASH.—Bridge, steel and concrete, \$10,000. Engineer, County Surveyor M. Roy Thompson, Tacoma. Owners, Pierce County. Plans for a 1,000-foot steel bridge over the Nisqually River at La Grande are nearly complete and bids will be called for shortly. Complete information can be secured by addressing County Surveyor Thompson, Tacoma.

Contracts Awarded.

SAN FRANCISCO—Pier, reinforced concrete, \$436,000. Engineer, Assistant State Engineer, Ferry Bldg., S. F. Owners, State of California. Contractors, Healy-Tibbitts Construction Co., S. F. Contract price, \$436,000. Five sets of figures were received for this work and the lowest, that of Healy-Tibbitts Co., was accepted. For a complete list of the bids see under San Francisco in this issue.

CHURCHES.

BAKERSFIELD, KERN CO., CAL.—Church, 2 story and base, brick, \$30,000. Architect, Thomas B. Wiseman, Bakersfield. Owners, Presbyterian Church of Bakersfield. The building will contain a main auditorium with a seating capacity of 400, Sunday school department, gymnasium, social rooms and parlors. Interior finish will be of pine throughout. There will be a central heating system. Plate and art glass windows will be installed. The exterior of the building will be faced with tapestry brick. Plans are being prepared and figures will be called for shortly.

EXETER, TULARE CO., CAL.—Church, 1 story and base, concrete and frame. Cost not stated. Architect, A. Merrill Bowser, Oakland. Owners, Baptist Church of Exeter. The building will be designed in the Mission style with a cement plastered exterior and tile roof. The main auditorium will have a seating capacity of 500 people. Besides the auditorium there will be Sunday school rooms, parlors and pastor's study. Interior finish will be of pine and redwood. There will be a central heating system. Plans are being prepared and figures will be called for shortly.

ORANGE, ORANGE CO., CAL.—Church, 1 story and base, brick and frame. Cost not stated. Architect, E. E. Meinardus, Higgins Bldg. L. A. Owners, German Lutheran Congregation of Orange. The building will be one story in height with two towers. The main auditorium will have a seating capacity of 1,000 people. Besides the main auditorium there will be Sunday school rooms and parlors. Interior will be finished in pine and redwood.

E. H. Williams

Chalmer Munday

Munday & Williams

Attorneys-at-Law

Special Attention Given to Building
Law and Bankruptcy Cases

Telephone Kearny 2622

615 Phelan Building,

San Francisco

The exterior of the edifice will be faced with cement plaster. A furnace heating system will be installed. There will be art glass windows. Plans are nearly complete and the work will probably be done by Day Labor.

IRVINGTON, ORE.—Church, 2 story and base, stone, \$100,000. Architect, Ellis F. Lawrence, Portland. Owners, Westminster Presbyterian Church. The stone work on the building is already completed, and the architect is now taking figures for the carpentry, plumbing, heating, plastering, electric work and sheet metal work. Art glass and interior decoration will be let later.

FACTORIES & WAREHOUSES.

DAVIS, YOLO CO., CAL.—Hog house, 1 story, frame and concrete. Cost not stated. Architects, Cunningham & Politeo, First National Bank Bldg., S. F. Owners, Regents of the University of California. All figures received for this work have been rejected and plans will be revised. New bids will be called for shortly. The official proposal will appear in these columns at that time.

TORRENCE, LOS ANGELES CO., CAL.—Factory group, 6, 1 story and base, reinforced concrete. Cost not stated. Architect, Irving J. Gill, 625 South Hill St., L. A. Owners, W. O. Hendrie Rubber Co., Denver Colo. The complete plan includes the construction of six buildings, but only two will be erected at this time. The first of these will cover a ground area of 640x60 feet. Other buildings will be identical in size, covering an area of 50x100 feet. The first two buildings will be the general offices, and factory and a power plant. Construction will be of reinforced concrete throughout. There will be metal window frames and sash. Plans are being prepared.

SEATTLE, WASH.—Warehouse, 4 story and base, reinforced concrete, \$75,000. Architects, Weld & Thomas, Hogg Bldg., Seattle. Owners, Northern Pacific Railroad Co. This building will be erected on 4th avenue and will contain one store room and a large warehouse. There will be steam heat, elevators and automatic sprinkler system and metal window frames and sash. Interior finish will be of pine throughout. The exterior of the building will be faced with cement plaster. Plans are complete and figures are being taken.

Contracts Awarded.

LONG BEACH, LOS ANGELES CO., CAL.—Warehouse, 4 story and base, reinforced concrete, \$27,000. Architect, George W. Harding, Citizens' National Bank Bldg., L. A. Owners, City

Transfer, Van and Storage Co. Contractor, A. L. Dutro, 617 Orange Ave., Long Beach. Contract price, \$27,000.

LOS ANGELES, CAL.—Factory and warehouse, 1 and 2 story and base, reinforced concrete. Cost not stated. Architect's name not given. Owners, Fraters Art Glass Co. Contractors, O. F. Engstrum Co., 5th and Seaton Sts., L. A. Contract price not given.

FAIR WORK.

SAN FRANCISCO—Educational building, 2 story, concrete and frame. Cost not stated. Architects, Bliss & Faville, Balboa Bldg., S. F. Owners, Panama-Pacific International Exposition Co. Plans for this building, which will be the second largest of the Exposition buildings, have been completed and approved by the Buildings and Grounds Committee. Bids are now being taken and will be opened on March 11th. Separate figures are asked for on the construction of the building and the installation of sewers, plumbing and water piping. Plans and specifications can be obtained from the Director of Works, Service Bldg., San Francisco. The official proposal appears in another column of this issue.

SAN FRANCISCO—Furnishing loam for gardens. Cost not stated. Engineer, Director of Works, Service Bldg., S. F. Owners, Panama-Pacific International Exposition Co. Bids will be opened on February 25th for furnishing loam for the Exposition gardens. Specifications can be secured from the Director of Works, Service Bldg., San Francisco. The official proposal appears in another column of this issue.

SAN FRANCISCO—Conduit system. Cost not stated. Engineer, Director of Works, Service Bldg., S. F. Owners, Panama-Pacific International Exposition Co. Plans for the construction of an electric conduit system throughout the grounds of the Exposition have been completed and figures are now being called for. The official proposal appears in another column of this issue. Bids will be opened on February 15th. Plans may be secured from the Director of Works at the Service Bldg., S. F.

FLATS.

SAN FRANCISCO—Flats, 2 story and base, frame, \$3,000. Architects, Falch & Knoll, Hearst Bldg., S. F. Owner, George Piper. The building has been arranged to contain two small flats of four, and five rooms each with baths. Interior will be finished in pine and redwood. Modern plumbing and electric work are specified. There will be either open fire places or gas grates used. The exterior of the building will be covered with cement plaster on metal lath. Plans are complete and the work will be done by Day Labor.

OAKLAND, CAL.—Flats, 2 story and base, frame, \$2,000. Architect, Robert Morgenier, 1644 Telegraph Ave., Oakland. Owner, Joseph Berlock. The building will contain two small flats. Interiors will be finished in pine and redwood with some oak floors. There will be gas grates. Mantels will be of tile. The exterior of the building will be covered with rustic. Plans are complete and the architect is taking figures on the work.

OAKLAND, CAL.—Flat addition, 2 story, frame, \$2,000. Architect, none. Owner, Mrs. F. H. Benery, 1103 Campbell St., Oakland. This work will consist of the construction of a two-story

addition to the present building and the alteration of the interior of the old portion of the house. There will be new plastering, plumbing and electric work. The exterior will be covered with rustic. Plans are in the hands of the owner, who is taking figures on the work.

GARAGES.

OAKLAND, CAL.—Garage, 1 story and base, brick, \$4,000. Architect, J. Henry Boehler, Delger Bldg., Oakland. Owners, A. W. and J. H. Gatchens. This building has been designed for a commercial garage and will be erected on Piedmont avenue near 19th street. Interior will be finished in pine. There will be a large galvanized iron skylight. The exterior of the building will be faced with stock brick. Plans are complete and figures are being taken.

SAN FRANCISCO—Garage, 2 story and base, reinforced concrete, \$125,000. Architect, A. Leo Ellis, Shreve Bldg., S. F. Owner's name withheld. This building will be erected on Van Ness avenue, and is designed for a commercial garage with offices and sales rooms occupying the front portion of the structure. Interior of the offices and sales rooms will be finished in tile, marble and hardwoods. A tile floor will be used. Construction will be practically fireproof. Metal window sash and frames will be used. The exterior of the building will be faced with cement plaster. Plans are nearly complete and figures will be called for at once.

FRESNO, FRESNO CO., CAL.—Garage, 1 story and base, brick and steel. Cost not stated. Architect, none. Owners, Haynes Automobile Co. This company has recently secured a site at the corner of Stanislaus and I streets, and have had plans prepared for a commercial garage and sales rooms. The interior of the front portion of the building will be handsomely finished in tile, pine and hardwood. Floor will be of tile. The rear of the building will contain the repair shop and storage space. There will be a cement floor and metal window sash and frames. The exterior of the building will be faced with cement plaster.

PASADENA, LOS ANGELES CO., CAL.—Garage, 1 story and base, brick. Cost not stated. Architect, none. Owners, Claude M. Jones and J. H. Franklin, 688 San Fernando St., L. A. The site is 70x120 feet. The building will have a cement floor, composition roof and special gasoline storage tanks. Interior finish will be of pine. The exterior of the building will be faced with pressed brick. Plans are complete and the excavating has been started. Work will probably be done by Day Labor.

Contracts Awarded.

LOS ANGELES, CAL.—Garage, 1 story and base, reinforced concrete, \$16,000. Architects, Train & Williams. Exchange Bldg., L. A. Owner, E. S. Butterfield. Contractor, Earl F. Low, Byrne Bldg., L. A. Contract price, \$16,000.

GOVERNMENT WORK AND SUPPLIES.

The following is a list of the bidders who have asked for plans and specifications for work under the in-

terior Department of the United States Government:

Grand Junction Colo., Construction, March 5.

M. Yeager & Son, Danville, Ill.
W. H. Maxwell, Phoenix, Ariz.
W. D. Lovell, Minneapolis, Minn.
Campbell Building Co., Salt Lake City, Utah.

King Lumber Co., Charlottesville, Va.

J. E. & A. L. Pennock, Land Title Building Philadelphia, Pa.

Grant Fee, 2449 16th street, San Francisco, Cal.

Wise Granite Co., Richmond, Va.

Hiram Lloyd Building & Construction Co., Odd Fellows' Building, St. Louis, Mo.

George W. Stiles Construction Co., Rookery Building, Chicago, Ill.

J. H. Wiese, Omaha, Neb.

Connors Bros Co., Lowell, Mass.

Dieter & Wenzel Construction Co., Wichita, Kans.

W. C. Boyer, P. O. Box 373, Grand Junction, Colo.

Inter-State Construction Co., Saginaw, Mich.

Pocatello, Idaho, Construction, February 20.

King Lumber Co., Charlottesville, Va.

J. H. Wiese, Omaha, Neb.

Hiram Lloyd Building & Construction Co., St. Louis, Mo.

Northern Construction Co., Milwaukee, Wis.

Arthur Elliott, Pocatello, Idaho.

Wm. H. Maxwell, Phoenix, Ariz.

Campbell Building Co., Salt Lake City, Utah.

General Concrete Construction Co., Louisville, Ky.

Whiteaway-Lee Construction Co., Boise, Idaho.

Bailey-Marsh Co., Minneapolis, Minn.

W. D. Lovell, Minneapolis, Minn.

Grant Fee, 2449 16th street, San Francisco, Cal.

J. E. & A. L. Pennock, Land Title Building, Philadelphia, Pa.

Palmberg & Mattson, Astoria, Ore.

Tenino Stone Co., Tenino, Wash.

Wm. O'Neill & Co. Co., Fairbault, Minn.

Sound Construction & Engineering Co., Low-nan Building, Seattle, Wash.

George Curley, Salt Lake City, Utah.

Dieter & Wenzel Construction Co., Wichita, Kans.

Howard & Wood, 2712 Thomas street, Cheyenne, Wyo.

Naval Supplies.

The paymaster general of the navy will open bids on dates indicated below for furnishing the following material: Schedule 5146—Yards and Docks. To be opened March 5.

Class 11. Pearl Harbor — 3 railway flat cars.

Class 12. Pearl Harbor—2 platform push cars.

Class 21. Puget Sound — 2 fuel-oil pumps.

Rawlins, Wyo., Shelving.

The following is an abstract of the bids received January 23 at the office of the supervising architect, Treasury Department, Washington, D. C., for installing metal vault shelving in the U. S. postoffice at Rawlins, Wyo.:

Art Metal Construction Co., Jamestown, N. Y., \$210.

Watson Mfg. Co., Jamestown, N. Y., \$217.

H. H. Smith Co., Gowanda, N. Y., \$21.
 Berger Mfg. Co., Canton, Ohio, \$285.
 Canton Art Metal Co., Canton, Ohio, \$797.
 Steel Plate Mfg. Co., Topeka, Kans., \$350.
 Van Dorn Iron Works Co., Cleveland, Ohio, \$375.

Reclamation Service, Canal Work.

All bids received January 10 for the construction of two miles Dodson north canal, Milk River project, Mont., have been rejected.

Panama Coaling Plant.

The purchasing officer of the Isthmian Canal Commission will call for bids within a week or ten days for delivering and erecting coal handling machinery and accessories necessary for two coaling plants, one at each terminus of the Isthmian Canal, to be furnished and erected, complete, ready for operation.

Army Motor Truck Test.

Unusual interest is manifested among the manufacturers of motor trucks in the forthcoming test which is contemplated by the chief of the quartermaster corps. As has been stated in these columns, invitations have been issued to builders of such vehicles for any suggestions they may have to make of possible value in the development of a truck suitable for military use. It is intended to go into the subject thoroughly, as is indicated by the preliminary specifications which have been furnished to those who are interested and the text of which is published elsewhere in this issue. It will be several months before a design is completed and the department is ready to proceed with the test under practical conditions. It is believed by the military authorities that there can be developed a vehicle which will meet the conditions involving army transportation in a more complete way than anything which is now available for use.

Cheyenne and Arapaho Indian School.

The contract for the erection of a brick dining hall at the Cheyenne and Arapaho Indian School, Okla., has been awarded to S. J. Wick, of El Reno, Okla. A complete abstract of the bids appears in another column of this issue.

HALLS AND SOCIETY BUILDINGS.

LARKSPUR, MARIN CO., CAL.—City hall, 2 story and base, frame, \$8,500. Architect, C. O. Clausen, Phelan Bldg., S. F. Owners, City of Larkspur. The building will contain the city departments, jail and fire house. Interior will be finished in pine and redwood. Exterior will be covered with cement plaster. Plans have been revised and new bids are now being called. Bids will be opened on February 26th. Plans can be secured from the architect in this city.

OAKLAND, CAL.—Association addition, 2 story, Class A construction, \$45,000. Architect, William C. Hays, Foxcroft Bldg., S. F. Owners, Young Men's Christian Association. Plans are complete for a two-story addition to the five-story Y. M. C. A. building located at 21st and Telegraph avenue.

Construction and design of the new stories will be similar to that of the old building. Interior will be finished in pine and hardwood. The heating system and plumbing will be extended from the old portion. The exterior of the building will be faced with pressed brick. Plans are complete and figures are being taken.

LOS ANGELES, CAL.—Lodge hall and stores, 3 story and base, reinforced concrete. Cost not stated. Architects, Morgan, Walls & Morgan, Story Bldg., L. A. Owners, Independent Order of Odd Fellows. The property at the northwest corner of 12th and Flower streets is to be improved with a three-story building covering an area of 100x150 feet. Only preliminary plans have been prepared and details of the construction are not available at this time. The plans so far prepared show a building with the first floor arranged for stores and upper floors for lodge halls. Fred E. Peterson, 332 South Broadway is the chairman of the Building Committee. Complete information will be furnished as the plans progress.

MODESTO, STANISLAUS CO., CAL.—Lodge hall, 3 story and base, brick. Cost not stated. Architect, Ralph P. Morrell, Yosemite Theatre Bldg., Stockton. Owner, John Tully. This building, which has been leased to the Modesto Elks, has been fully described in these columns before. A contract for the construction will be let this week.

PORTLAND, ORE.—Club house, 3 story and base, brick, \$50,000. Architects, W. B. Bell and J. Terry Wilding, Portland. Property owners in the Laurelhurst district have decided to give the district a suitable meeting place, and have secured a large site. Plans are as yet in a preliminary state and details of the building cannot be given. Fuller mention will be made in these columns as the plans progress.

HOTELS.

SAN FRANCISCO—Hotel, 7 story and base, reinforced concrete, \$75,000. Architects, Hladik & Thayer, Monadnock Bldg., S. F. Owner's name withheld. The building will be erected in the Fifty Vara District and will be arranged for a total of 120 guest rooms, all of which will have connecting baths. There will be steam heat, elevator service and a vacuum cleaning system. Interior finish will be of pine, redwood and hardwood. Ornamental plaster will be used in the lobby and office. The exterior of the building will be faced with pressed brick. Plans are complete and bids will be called shortly.

SAN FRANCISCO—Hotel, 2 story and base, reinforced concrete, \$35,000. Architect, Clay N. Burrell, Albany Bldg., Oakland. Owner's name withheld. The building is to be erected on Mason street and will contain in the neighborhood of sixty rooms and baths. Interior finish will be of redwood and hardwood. There will be steam heat. All rooms will be supplied with hot and cold running water. The exterior of the building will be faced with cement plaster. Plans are now being prepared.

SAN FRANCISCO—Hotel, 6 story and base, steel and brick, \$100,000. Architect, Creighton Withers, 125 Sutter St., S. F.; Engineers, Leonard & Day, Rialto Bldg., S. F. Owner, Florence A. Browne. Contracts for parts of this

San Francisco

work have been awarded as follows: Steel work to the Halston Iron Works, concrete work to Foster-Vogt Co., and terra cotta to Steiger Terra Cotta Works. All other parts of the building will be handled by Day Labor except the plumbing, plastering and electric work, contracts for which have not been let.

OCEAN PARK, LOS ANGELES CO., CAL.—Hotel, 4 story and base, brick. Cost not stated. Architect, W. S. Garrett, Currier Bldg., L. A. Owners, Messrs. Edward and John Newell. The building will have a frontage of 47 feet and a depth of 114 feet. There will be stores and the general office and lobby on the first floor and in the neighborhood of 120 rooms on the upper floors. Plans provide for steam heat, elevator service and hot and cold running water in all rooms. Interior finish will be of pine. Tile, marble and hardwood will be used in the lobby. The exterior of the building will be faced with pressed brick. Plans are being prepared.

LOS ANGELES, CAL.—Hotel, 10 story and base, Class A construction. Cost not stated. Architect not selected. Owner, N. W. Stowell, 667 I. W. Hellman Bldg., L. A. This building will be erected in the east line of Spring street north of 5th. Several architects are now preparing sketches and a decision will be made shortly. Plans submitted show 27 rooms to the floor, 12 of which will have private baths. Construction will be Class A throughout with a complete steel frame and exterior walls of brick, faced with pressed brick and terra cotta. The building has been leased to J. P. Stocksdale, Delta Bldg. Complete details will be given as soon as an architect is selected.

LOS ANGELES, CAL.—Hotel and stores, 4 story and base, brick and steel. Cost not stated. Architect, Robert M. Taylor, Douglass Bldg., L. A. Owner, Jacob Joseph. The building will cover an area of 100x120 feet with a rear wing 30x40 feet. There will be several stories besides the lobby and offices on the first floor. Upper floors will be divided into 100 guest rooms, many of which will have private baths. Interior finish will be of pine and hardwood. There will be steam heat, freight and passenger elevators, a vacuum cleaning system and hot and cold running water. Baths will have composition floors. The exterior of the building will be faced with pressed brick trimmed with artificial stone. Plans are being prepared.

SEATTLE, WASH.—Hotel addition, 10 story and base, reinforced concrete, \$250,000. Architects, Black Construc-

tion Co., St. Louis, Mo. Owners, New Washington Hotel Co. This work was mentioned here over a year ago. The amalgamation of the interests of the New Washington Hotel Co. of Seattle and the St. Francisco Hotel Co. of San Francisco makes the construction of the annex an assured fact. The Black Construction Co. will probably carry out the work as well as prepare the plans.

Contracts Awarded.

SAN FRANCISCO—Hotel, 3 story and base, brick, \$21,000. Architects, Hladik & Thayer, Monadnock Bldg., S. F. Owner, Charles S. Howard. Contractor, Howard S. Williams, Hearst Bldg., S. F. Contract price, \$21,000.

PASADENA LOS ANGELES CO., CAL.—Hotel completion and addition, 2 story and base, reinforced concrete, \$90,000. Architect, Myron Hunt, Hibernian Bldg., L. A. Owner, Henry E. Huntington. Contractors, Richards-Neustadt Construction Co., Wright and Callender Bldg., L. A. Contract price, \$90,000.

BUTTE, MONT.—Hotel, 5 story and base, reinforced concrete, \$63,077. Architect, Floyd Hammill, Butte. Owners, Alex Leggat and M. E. Couze, Contractor, George Nelson, Madison Block, Seattle. Contract price, \$63,077.

LIBRARIES

WATTS, LOS ANGELES CO., CAL.—Library, 1 story and base, brick, \$10,000. Architect, Elmore R. Jeffery, Citizens' National Bank Bldg., L. A. Owner, Town of Watts. The building will be 10x70 feet, and is to be designed in the classic style. There will be one large reading room and the stack room and librarians' office. Interior will be finished in pine and hardwood. Oak floors will be used. A central heating system will be installed. The exterior of the building will be faced with pressed brick. Plans are being prepared.

SPOKANE, WASH.—Libraries, 2, 1 story and base, reinforced concrete and brick. Cost not stated. Architects as follows. Owners, City of Spokane. Architect Julius Zittel, Spokane, has been commissioned to design the North Side Branch Library, and Architect Albert Held will design the Union Branch Library. These commissions have just been made and details of the buildings are not available at this time.

ALBANY, ORE.—Library, 1 story and base, brick and concrete, \$17,000. Architect, W. F. Tobey, Sherlock Bldg., Portland. Owners, City of Albany. Plans have been approved for this work and the Trustees have now decided to go ahead with the construction. The building will cover an area of 74x52 feet, and is classical in design. The exterior will be faced with pressed brick. There will be a central heating system. Interior finish will be of pine and hardwood. Bids are now being taken.

Contracts Awarded.

SEATTLE, WASH.—Library, 1 story and base, reinforced concrete, \$25,000. Architects, Harlan Thomas and W. Marbury Somervell, Seattle. Owners, City of Seattle. The Board of Trustees of the Seattle Public Library has awarded contracts as follows on the Queen Anne branch library building, as follows:

Weeks & Behrens, Oriental Bldg., general contract, at \$23,850.

Ernst Hardware and Plumbing Co., for the plumbing, at \$885.

The Lavan Plumbing and Heating Co., for the heating at \$2,100; and J. J. Agutter & Co. for the wiring at \$322.

RAILROAD CONST., STATIONS AND EQUIPMENT.

BERKELEY, ALAMEDA CO., CAL.—Depot, 1 story, concrete and frame. Cost not stated. Architect, Engineering Department of the Southern Pacific Co., Flood Bldg., S. F. Owners, Southern Pacific Co. Plans for this work have been completed and bids will be called for shortly. The work will be handled through the department of Maintenance of Way. A general contract will be let.

SAN FRANCISCO—Car barns, 2 story and base, brick addition, \$10,000. Architect, G. A. Dodge, 101 Post St., S. F. Owners, California Street Railway Co. This building is in the nature of a two-story addition to the present structure on California street near Hyde. Plans for this work have been completed and placed in the hands of the owners who will do the work by Day Labor.

SAN FRANCISCO—Railroad construction. Cost not stated. Engineer, City Department of Engineering, Temporary City Hall, S. F. Owners, City and County of San Francisco. Plans for the completion of the Geary Street Municipal Railroad down Market street from the west line of Kearny to Market and Sutter streets have been completed and bids are now being called for. Bids will be opened by the Board of Public Works on February 26th. Plans and specifications can be secured from the Board of Public Works.

SEATTLE TO SUMAS, WASH.—Railroad construction. Engineers, Engineering Dept. Northern Pacific R. R. Co. Owners, Northern Pacific R. R. Co. This road has issued a statement to the effect that they will relay with 95-pound rails for a distance of 120 miles on their right of way between Seattle and Sumas. The estimated cost is \$1,000,000, and includes the construction of several reinforced concrete bridges.

RESIDENCES.

SAN FRANCISCO—2 story and base, frame, \$3,500. Architect, David C. Coleman, Western Metropolitan Bank Bldg., S. F. Owner, M. Fisher. The house has been designed to contain seven rooms and bath. All interior trim will be of pine or redwood. Hardwood floors will be used in the principal rooms. A central heating system will be installed. Mantel will be of brick. Tile will be used in the bath room and kitchen. The exterior of the house will be covered with cement plaster on metal lath. Plans are complete and in the hands of the owner who will do the work by Day Labor.

SAN FRANCISCO—Residences, 2, 2 story and base, frame, \$2,250 each. Architect, none. Owner, Oscar Heyman & Bro., 712 Market St., S. F. These houses will each contain six rooms and bath. All interior finish will be of pine or redwood. Some hardwood floors will be used. There will be open fire places and tile or brick mantels. Tile will be used in the bath room and kitchens. The exteriors will be covered with cement plaster on

metal lath. Plans are complete and the work will be done by Day Labor.

SAN FRANCISCO—Residence, 2 story and base, frame, \$5,000. Architect, Joseph T. Carter, Balboa Bldg., S. F. Owner, John T. Murphy. The house will be erected at the corner of 32nd avenue and Lake street, and will contain seven rooms and bath. Interior finish will be of pine and oak. Hardwood floors will be used throughout. A hot water heating system is to be installed. There will be a large open fire place with a specially designed hardwood mantel. Tile will be used in the bath room and kitchen. Considerable ornamental plaster is specified. The exterior of the dwelling will be covered with cement plaster on metal lath. Roof will be of red clay tile. Plans are being prepared.

SAN FRANCISCO—Bungalows, 3, 1 story and base, frame, \$1,000 each. Architect, O. E. Evans, 2367 Mission St., S. F. Owner, C. Cavaglioli. These dwellings will each contain six rooms and bath. All interior finish will be either of pine or redwood. Some oak floors will be used. There will be open fire places and tile or brick mantels. The exteriors will be covered with rustic and cement plaster. Plans are complete and the work will be done by Day Labor.

SAN FRANCISCO—Residence, 2 story and base, frame, \$2,800. Architect, none. Owner, Lillie Brown, 1434 6th Ave., S. F. The dwelling has been designed to contain six rooms and bath. Interior finish will be of pine and redwood. Some oak flooring will be used. There will be an open fire place with brick mantel in the living room. Tile will be used in the bath and kitchen. The exterior of the dwelling will be covered with cement plaster on metal lath. Plans are complete and in the hands of the owner who will do the work by Day Labor.

OAKLAND, CAL.—Bungalow, 1 story and base, frame, \$2,000. Architect, W. H. Judson, Albany Bldg., Oakland. Owner, S. S. Wright. The house will contain six rooms and bath. Interior will be finished in pine throughout. Oak floors will be used in the living and dining rooms. There will be a large open fire place and tile or brick mantel. Tile will be used in the bath room and kitchen. The exterior of the bungalow will be covered with cement plaster. Plans are complete and the work will be done by Day Labor.

ALAMEDA, ALAMEDA CO., CAL.—Residence, 2 story and base, frame, \$7,000. Architect, Julia Morgan, Merchants' Exchange Bldg., S. F. Owner, Mrs. Alfred A. Durney. This dwelling has been designed for an eight-room house with bath and sleeping porch. Interior will be finished in pine, redwood and some hardwood. Oak floors will be used throughout, except in the baths which will have composition floors. There will be furnace heat and open fire places. Mantels will be of brick. Tile will be used in the bath rooms and kitchen. An automatic water heater will be installed. The exterior of the dwelling will be covered with cement plaster on metal lath. Plans are complete and figures are being taken.

OAKLAND, CAL.—Residence, 2 story and base, frame, \$5,000. Architect, none. Owners, Oakland Building Co., Security Bank Bldg., Oakland. The house will contain eight rooms and bath. Interior finish will be of pine

and redwood with some oak. Hardwood floors will be used throughout. There will be furnace heat and open fire places. Mantels will be of brick. Tile will be used in the bath room and kitchen. An automatic water heater will be installed. The exterior of the house will be covered with cement plaster. Plans are complete and the work will be done by Day Labor.

BERKELEY, ALAMEDA CO., CAL.—Residence, 2 story and base, frame, \$3,000. Architect, Albert H. Larsen, 533 1/2 Shafter Ave., Berkeley. Owner, E. A. Mahon. The house has been designed for a six-room dwelling with bath and sleeping porch. Interior will be finished in pine and redwood. There will be some hardwood floors. Open fire places and brick mantels will be used. The bath room will have a tile floor. Tile will also be used in the kitchen. The exterior of the dwelling will be covered with cement plaster. Plans are complete and the work will be done by Day Labor.

BERKELEY, ALAMEDA CO., CAL.—Residence, 2 story and base, frame, \$3,000. Architect, John Hudson Thomas, First National Bank Bldg., Berkeley. Owner, Sam D. Beasley. The house will contain seven rooms, bath and sleeping porch. Interior will be finished in pine and redwood with some hardwood floors. There will be furnace heat and open fire places. Mantels will be of tile or brick. Tile will be used in the bath room and kitchen. The exterior of the dwelling will be covered with shingles and shakes. Plans are being prepared.

BERKELEY, ALAMEDA CO., CAL.—Residence, 2 story and base, frame, \$10,000. Architect, John Hudson Thomas, First National Bank Bldg., Owner, Charles McCreary. The house will be erected in Thousand Oaks, and has been designed to contain eight or nine rooms, baths and sleeping porches. All interior finish will be of pine or hardwoods. Oak floors will be used in the principal rooms. There will be a central heating system and open fire places. Mantels will be of tile or brick. An automatic water heater will be installed. The exterior of the dwelling will be covered with cement plaster on metal lath. Bath rooms will be finished in tile. Plans are being prepared.

BERKELEY, ALAMEDA CO., CAL.—Residence, 2 story and base, frame, Cost not stated. Architect, John Hudson Thomas, First National Bank Bldg., Berkeley. Owner, J. W. Hupp. This house will contain seven rooms and bath. Interior finish will be of pine and redwood with some hardwood floors. There will be furnace heat and open fire places. Mantels will be of brick. Tile will be used in the bath room and kitchen. The exterior of the dwelling will be covered with cement plaster on metal lath. Plans are complete and figures are being taken by the architect.

MADERA, MADERA CO., CAL.—Residence, 2 story and base, frame, \$5,000. Architect, Carl Thayer, Fresno. Owner, Richard Roberts. The house will contain about seven rooms and bath. Interior finish will be of pine and redwood throughout. Oak floors will be used in the principal rooms. There will be a large open fire place in the living room with a brick mantel. The bath room will be finished in tile. The exterior of the house will be covered with cement

plaster on metal lath. Plans are complete and figures are being taken.

MILL VALLEY, MARIN CO., CAL.—Bungalow, 1 1/2 story and base, frame, \$1,500. Architects, Falch & Knoll, Hearst Bldg., S. F. Owner, John Laker. The bungalow has been designed to contain seven rooms, bath and sleeping porch. Interior finish will be of pine and redwood with some hardwood floors. There will be furnace heat and open fire places. Mantels will be of brick. Bath room and kitchen will have tile wainscot. The exterior of the house will be covered with cement plaster. Plans are nearly complete and figures will be called for next week.

SAN FRANCISCO—Residences, 2, 1 story and base, frame, \$1,200 each. Architect, none. Owner, K. Anderson, 234 Church street, S. F. These two houses will be erected on Anderson street near Ogden, and each will contain five rooms and bath. Interior finish will be of pine and redwood throughout. Oak floors will be used in the living and dining rooms. There will be open fire places and tile or brick mantels. The exteriors of the houses will be covered with rustic. Plans are in the hands of the owner and the work will be done by Day Labor.

SAN FRANCISCO—Residence, 2 story and base, frame, \$12,000. Architects, H. Geiffuss & Son, 16 Kearny St., S. F. Owner's name withheld. This will be the first dwelling to be erected in the handsome new residence tract known as St. Francis Wood. The house will contain in the neighborhood of ten rooms, three baths and sleeping porch. A garage will be erected on the same lot. The design is in the Italian Renaissance style. Interior finish will be of pine and hardwoods throughout. Oak floors will be used in all of the principal rooms. A hot water system of heating is to be installed. There will be open fire places and tile or brick mantels. Bath rooms will be finished in tile. The exterior of the dwelling will be covered with cement plaster on metal lath. Roof will probably be of red clay tile. Plans are being prepared.

SAN FRANCISCO—Residence, 3 story and base, frame, \$10,000. Architect, C. A. Meussdorffer, Humboldt Bank Bldg., S. F. Owner's name withheld. The house will be erected in the south line of Jackson street near Walnut and will contain about eight rooms, several baths and laundry. A garage will also be built on a part of the lot. Interior will be finished in hardwoods, pine and redwood. There will be furnace heat and open fire places. Mantels will be of brick and tile. Floors throughout will be of hardwood except in the baths which will have tile floors. An automatic water heater will be installed. The exterior of the dwelling will be covered with cement plaster on metal lath. Plans are complete and figures are being taken.

OAKLAND, CAL.—Residences, 2, 2 story and base, frame, \$12,000 and \$1,500. Architects, Milwain Bros., Delger Bldg., Oakland. Owner, P. E. Holt. These two houses will be erected in the Crocker Highlands Tract and will contain from seven to ten rooms. There will be three bath rooms in the larger house. A garage will be erected on the rear of both lots. Interior finish will be of pine redwood and hardwoods. Furnace heat and open fire

places will be used. Mantels will be of brick and tile. Bath rooms will be finished in tile and will have composition floors. Automatic water heaters will be installed. The exteriors will be covered with cement plaster on metal lath. Plans are now being prepared.

PIEDMONT, ALAMEDA CO., CAL.—Residences, 2, 2 story and base, frame, \$3,500 each. Architect, none. Owners, United Home Builders, 1762 Broadway, Oakland. These houses will be erected on Greenback avenue, and will each contain seven rooms, bath and sleeping porch. Interior finish will be of pine and redwood with oak floors in the principal rooms. There will be furnace heat and open fire places. Mantels will be of brick. Bath rooms will have composition floors. Tile will be used in the kitchens. The exteriors of the dwellings will be covered with cement plaster on metal lath. Plans are complete and in the hands of the owners who will do the work by Day Labor.

Contracts Awarded.

HOLLYWOOD, LOS ANGELES CO., CAL.—Residence, 2 story and base, reinforced concrete. Cost not stated. Architect, I. J. Gill, 623 South Hill St., L. A. Owner, Mrs. Sarah B. Clark. Contractors, Concrete Building and Investment Co., Citizens' Bank Bldg., L. A. Contract price not stated.

SEATTLE, WASH.—Residence, 2 story and base, brick, \$40,000. Architects, Bebb & Mendel, Denny Bldg., Seattle. Owner, S. S. Loeb. Contractor, J. N. Johnson, 2543 21st Ave., Seattle. Contract price, \$40,000.

SCHOOLS.

SAN FRANCISCO—College, 3 story and base, reinforced concrete, \$100,000. Architect, Sylvain Schnaltcher, First National Bank Bldg., S. F. Owners, Hetch Investment Co. The Hetch Investment Co. has leased the northwest corner of Van Ness avenue and Post street to Heald's Business College, and will erect thereon a modern fireproof building. This property has a frontage of 120 feet on Van Ness avenue and 160 feet on Post street. The building is to cover practically the entire area. Construction will be fireproof. Plans are being prepared, and while definite information of the arrangement, etc., is not available, the lessees state that all of the various departments of this college will be provided with suitable space and that the new building will be the most modern structure devoted exclusively to a business college of any on the coast. Actual construction will be started as soon as plans and specifications can be completed.

OAKLAND, CAL.—School, 1 story and base, reinforced concrete, \$48,000. Architect, J. J. Donovan, Security Bank Bldg., Oakland. Owners, City of Oakland. Bids opened at the last meeting of the Board of Education show Boyd, Kerr & McLean low men at \$48,800. For a complete list of all figures submitted for this work see under Oakland and Alameda County in this issue.

MIDWAY SCHOOL, DISTRICT, KERN CO., CAL.—School, 1 story and base, reinforced concrete, \$20,000. Architect, Thomas B. Wiseman, Bakersfield. Owners, Midway School District. The building will be in the nature of an addition to the present building and will be arranged to contain four class rooms.

There will be a central heating system. Interior finish will be of pine. Some maple floors will be used. There will be composition blackboards. The exterior of the building will be faced with cement plaster. Plans are being prepared.

EL MODENA, ORANGE CO., CAL.—School, 1 story and base, brick, \$25,000. Architect, H. M. Patterson, O. T. Johnson Bldg., L. A. Owners, El Modena School District. This work has been mentioned here before. Plans are complete and figures are being taken. Bids will be opened in El Modena on March 1st. Bids are being taken as a whole. Plans and specifications can be obtained from the architect.

PASADENA, LOS ANGELES CO., CAL.—Academy buildings, 2, 1 story and base, reinforced concrete. Cost not stated. Architect, Elmer Grey, Wright and Callender Bldg., L. A. Owners, Throop Polytechnic Institute of Pasadena. One of the buildings is to be designed for an Art Museum and the other for a library. The style of architecture will conform to the present buildings. Construction will be of reinforced concrete throughout. Interiors will be finished in pine and hardwoods. There will be a central heating system. The exteriors will be faced with cement plaster. Plans are being prepared.

LOS ANGELES, CAL.—School work, concrete walls, plumbing, etc. Cost not stated. Architect not stated. Owners, City of Los Angeles. Bids will be received by the Board of Education, 730 Security Bldg., upto 11 o'clock a. m. of Thursday, February 27, 1913, for the following construction work: For the erection of a frame sloyd building at the West Vernon Avenue School site, West Vernon avenue between Olive street and Grand avenue; for remodeling the basement of the Custer Avenue Intermediate School at Temple street and Custer avenue; for constructing a cement retaining wall at the Sherman School; for constructing a cement retaining wall at the Colegrove School; for installing electric fixtures in seven school buildings; for installing plumbing in the cookery room at the Santa Fe Avenue School Santa Fe avenue and Sixteenth street; and for the sale and removal of a building on the Wilmington School site. Plans and specifications for the above work may be obtained at the office of the secretary, Wm. A. Sheldon, 730 Security building.

SEWERS, STREET WORK AND WATER SYSTEMS.

FULLERTON, ORANGE CO., CAL.—Paving roads, etc., asphalt and macadam. Cost not stated. Engineer, C. Elske, Jr., 3001 Leeward Ave., Los Angeles. Owners, City of Fullerton. Plans for paving a number of the principal streets and roads in Fullerton have been completed and are now out for figures. The work was mentioned in the last issue of the News and was described in detail then. The official proposal appears in another column of this issue.

BAKERSFIELD, KERN CO., CAL.—Pumping plant. Cost not stated. Engineer's name not given. Owner, H. J. Saeker, Bakersfield. Mr. Saeker is to install a large pumping plant for irrigation purposes on his ranch south of Bakersfield. Mr. C. M. Stoll, also of Bakersfield, is now taking figures for

the installation of a pumping plant at Rio Bravo. He may be addressed at Bakersfield.

MONTEREY, MONTEREY CO., CAL.—Garbage incinerator. Cost not stated. Engineers, Constructing Q. M. officer, Presidio of Monterey. Plans for the construction of a garbage incinerator at the Presidio of Monterey have been completed and figures are now being taken by Major F. A. Grant, Constructing Quartermaster, Presidio of Monterey. Bids will be opened on March 5th. Plans and specifications may be obtained by addressing Major F. A. Grant.

SAN JACINTO, RIVERSIDE CO., CAL.—Irrigation system, ditches and concrete pipe. Cost not stated. Engineer's name not given. Owner S. S. Langley, Van Nuys Bldg., L. A. Mr. Langley will shortly let a contract for the construction of about 20,000 feet of irrigation ditches and also for a large amount of reinforced concrete pipe.

Contracts Awarded.

SAN FRANCISCO—Sewers, \$4,870. Engineer, Director of Works of the P. P. I. E. Co., Service Bldg., S. F. Owners, Panama Pacific International Exposition Co. Contractor, Philip Schuyler, First National Bank Bldg., Oakland. Contract price \$4,870. Nine bids were submitted for this work, all of which are printed in this issue under San Francisco.

SAN FRANCISCO—High pressure and service water supply system. Cost not stated. Engineer, Director of Works P. P. I. E. Co., Service Bldg., S. F. Owners, Panama-Pacific International Exposition Co. Contractors, The Turner Co., 278 Natoma St., S. F.

awarded contract for the high pressure system at \$152,225, and Phillip Schuyler, First National Bank Bldg., Oakland, awarded contract for the service supply system at \$35,205.

SOLDIERS' HOME, CAL.—Sewerage disposal plant, \$20,000. Engineer's name not given. Owners, California's Soldiers Home. Contractors, J. D. Kneen Co., Santa Monica. Contract price, \$19,800.

STORES & OFFICE BUILDINGS.

SAN FRANCISCO—Stores and offices, 4 story and base, brick and steel. Cost not stated. Architect, Nathaniel Blaisdell, 255 California St., S. F. Owners, C. C. Moore Engineering Co. The owners have just announced their selection of an architect to prepare plans for the improvement of the property recently purchased at the northeast corner of Mission and First streets. The new structure will have a frontage of 129 feet on First street and 113 feet on Mission street. There will be a steel frame and exterior walls of brick, faced with pressed brick. The first floor will be occupied by the owners and upper floors will be arranged for offices designed to meet the requirements of engineers, assayers and other specialists. There will be steam heat, elevator service, a vacuum cleaning plant, mail chutes and other modern improvements. Metal window frames and sash are to be used. Plans are being prepared.

OAKLAND, CAL.—Stores and offices, 10 story and base. Class A construction, \$150,000. Architects, Reed & Meyer, Oakland Bank of Savings Bldg., Oakland. Owner, Miss Lucy F. Thomp-

son. This building will be erected at the corner of Broadway and 17th street and has been designed for a modern commercial structure. The first floor will be occupied by a number of retail stores and the upper floors will be arranged for offices, both en suite and single. There will be steam heat, elevator service, vacuum cleaning system and mail chutes. Interior finish will be of pine, hardwood and metal. Metal window sash and frames will be used throughout. Halls and corridors will be finished in tile and marble. The exterior of the building will be faced with pressed brick and terra cotta. A complete steel frame will be used. Plans are complete and figures on the work are now being taken. Bids will be closed on certain parts of the work on February 19th.

FOWLER, FRESNO CO., CAL.—Telephone exchange, 2 story and base, brick, \$12,000. Architect, C. K. Kirby, Jr., Fresno. Owner, H. Harris. This building has been leased to the Fowler Telephone Co. and will be occupied entirely by the company. The first floor will contain the general offices, apparatus room and public office. Upper floor will be arranged for the exchange. There will be a central heating system. Interior finish will be of pine and hardwood. The exterior of the building will be faced with pressed brick. Plans are nearly complete and figures will be called for shortly.

LOS ANGELES CAL.—Stores and lofts, 8 story and base. Class A construction. Cost not stated. Architects, Richards-Neustadt Construction Co., Wright and Callender Bldg., L. A. Owners, Isaacs Bros. Co. The building will be erected on Broadway between 7th and 8th streets, and will be Class A in all points of construction. There will be reinforced concrete floors and walls with pressed brick and terra cotta facing. Metal window frames and sash will be used. There will be steam heat, elevator service and a vacuum cleaning plant. Interior trim will be of metal. The building will have two entrances, both of which will be finished in marble. Plans are being prepared and the work will be done by the Richards-Neustadt Co.

LOS ANGELES, CAL.—Lofts, 5 story and base, reinforced concrete. Cost not stated. Architects, Richards-Neustadt Construction Co., Wright and Callender Bldg., L. A. Owner, J. J. Fay. The building will cover an area of 116x144 feet, and has been arranged for a number of light lofts. There will be concrete walls and floors. The exterior will be faced with cement plaster. There will be copper window frames and sash, fireproof doors and modern elevator service. Interior finish will be of pine throughout. An automatic sprinkler system will be installed. Vacuum cleaning will be installed. Plans are being prepared and when complete the work will be done by the Richards-Neustadt Construction Co.

CAL.—Stores and offices, 8 story and base, reinforced concrete. Cost not stated. Architect's name not given. Owner, Matthew Slavin, Slavin Bldg., Pasadena. This project is, as yet, in the tentative stage and only sketches have been prepared. Mr. Slavin is also considering a proposition for the construction of a three-story theatre building on the site. Plans will be completed and a contract let as soon as a decision is reached by the owner.

LOS ANGELES CAL.—Stores and moving picture house, 1 story and base, brick, \$15,000. Architect, Frank L. Stiff, Grosse Bldg., L. A. Owners, Niles Pease Investment Co. The building will cover a ground area of 57x110 feet. There will be two stores besides the picture show house. The theatre will have a seating capacity of 850 people. Interior will be finished in pine. There will be a cement floor and concrete exits. The exterior of the building will be faced with pressed brick. Plans are being prepared.

Contracts Awarded.

LOS ANGELES, CAL.—Stores and theatre, brick and steel. Cost not stated. Architect, Scott Quintin, Douglass Bldg., L. A. Owners, Stoff and Schiller. Contractors, Chatzianoff & Son, 2409 Central Ave., L. A. Contract price not stated.

SEATTLE, WASH.—Stores and offices, 3 story and base, reinforced concrete, \$150,000. Architect, John Graham, Lyon Bldg., Seattle. Owners, Crawford and Conover. Contractors, Butler Construction Co., Central Bldg., Seattle. Contract price, \$150,000. Note: This building will cover an area of 60x108 feet.

MADERA, MADERA CO., CAL.—Store, 1 story and base, brick. Cost not stated. Architect's name not given. Owner, Madera Daily Tribune. Contractor, George Zoerb, Madera. Contract price not stated. Note: This building will be in the nature of an addition to the Tribune plant and will cover an area of 30x90 feet.

FRESNO, FRESNO CO., CAL.—Stores and rooms, 2 story and base, brick. Cost not stated. Architect's name not given. Owner, Thomas H. Lynch. Contractor, H. A. Hansen, Fresno. Contract price not given. Note: This building will be erected on a corner site and will cover an area of 100x150 feet.

THEATRES.

OCEAN PARK, LOS ANGELES CO., CAL.—Amusement pier. Cost not stated. Architect's name not given. Owners, State Investment Co., Severance Bldg., L. A. This company has taken over the interests of the Fraser Pier Co. and have announced that plans are being prepared for several new buildings which are to replace those recently destroyed by fire. The new structures will include a large theatre, roller skating rink, cafe, dance pavilion and roller coaster. Construction will be started as soon as plans can be completed.

EL CENTRO, IMPERIAL CO., CAL.—Theatre, 1 story and base, brick and concrete. Cost not stated. Architect, E. J. Borgmeyer, Stinson Bldg., L. A. Owner, C. M. Applehill. The building will be 50x140 feet. The auditorium will have a seating capacity of 700 people. Interior will be finished in pine. There will be a cement floor and a modern system of ventilation. Exterior of the building will be faced with pressed brick. Plans are complete and bids will be taken by the owner.

SEALED PROPOSALS.

PROPOSALS FOR CANAL SUPPLIES.
CANAL CIRCULAR 759.—Proposals for Structural Steel.—Sealed proposals will be received at the office of the general purchasing officer, Isthmian Canal Commission, Washington, D. C.

until 10 a. m. February 25, 1913, at which time they will be opened in public, for furnishing the above mentioned articles. Blanks and general information relating to this circular (No. 759) may be obtained from this office or the office of the assistant purchasing agent, 1086 North Point street, San Francisco, Cal.; also from the U. S. engineer offices in the following cities: Seattle, Wash.; Los Angeles, Cal. F. C. BOGGS, major, corps of engineers, U. S. army, general purchasing officer.

PROPOSALS FOR GARBAGE CREMATORY.

CREMATORY.—Office of Quartermaster, Presidio of Monterey, Cal.—Sealed proposals, in triplicate, will be received in this office until 11 a. m. March 5, 1913, and then opened, for construction of garbage crematory, complete, at this post. Further information may be obtained by applying at this office. F. A. GRANT, major, quartermaster corps, quartermaster.

PROPOSALS FOR CANAL SUPPLIES.

CANAL CIRCULAR 761.—Proposals for Dynamite, Steel Pipe, Valves, Hack saw Blades, Solder, Stable Brooms, Chinaware, Glassware, Mess-knives, Oilcloths, Canvas, Candles, Fire Clay, Long-leaf Yellow Pine and White Oak Lumber and Cross-ties.—Sealed proposals will be received at the office of the general purchasing officer, Isthmian Canal Commission, Washington, D. C., until 10:30 a. m. February 26, 1913, at which time they will be opened in public, for furnishing the above mentioned articles. Intending bidders must make special measurements. Information furnished on application.

PROPOSALS FOR TRACK WORK.

OFFICE OF THE BOARD OF PUBLIC WORKS of the City and County of San Francisco.

Sealed proposals will be received at this office between the hours of 2 o'clock p. m. and 3 o'clock p. m. on Wednesday, the 26th day of February, 1913, for doing the following work, to wit:

Railway track construction on Geary street and Market street, from the westerly line of Kearny street at Geary street to the junction of Sutter street and Market street.

Progressive payments will be made. Said work must be done in accordance with the plans and specifications therefor on file in the office of the Board of Public Works, to which reference is hereby made, and must be commenced within fifteen (15) calendar days and completed within forty-five (45) calendar days from the date of the contract to be made and entered into therefor.

The amount of bond for faithful performance has been fixed at \$10,000.00.

All proposals offered shall be accompanied by a check certified by a responsible bank, payable to the order of the Clerk of the Supervisors of said City and County, for an amount not less than ten per centum of the aggregate of the proposal.

Printed proposal forms will be furnished gratuitously upon application at the office of the City Engineer, and all proposals must be made upon such forms.

The Board of Public Works reserves the right to reject any and all bids.

By order of the Board of Public Works. F. J. CHURCHILL, Secretary.

PROPOSALS FOR STREET WORK.

OFFICE OF THE BOARD OF PUBLIC WORKS of the City and County of San Francisco.

Sealed proposals will be received at this office between the hours of 2 o'clock p. m. and 3 o'clock p. m. on Wednesday, the 26th day of February, 1913, for doing the following street

work, including the furnishing of the necessary labor and materials therefor, to wit:

The improvement of the northerly one-half of Lincoln Way from the westerly line of Thirty-sixth avenue to the westerly line of Forty-first avenue, except on the railroad company's right of way, by the construction of granite curbs, brick catchbasins with culvert connections and an asphalt pavement.

Progressive payments will be made. Said work must be done in accordance with the plans and specifications therefor on file in the office of the Board of Public Works, to which reference is hereby made, and must be commenced within fifteen (15) calendar days and completed within ninety (90) calendar days from the date of the contract to be made and entered into therefor.

The amount of bond for faithful performance has been fixed at \$2,000.00.

All proposals offered shall be accompanied by a check certified by a responsible bank, payable to the order of the Clerk of the Supervisors of said City and County, for an amount not

less than ten per centum of the aggregate of the proposal.

Printed proposal forms will be furnished gratuitously upon application at the office of the City Engineer, and all proposals must be made upon such forms.

The Board of Public Works reserves the right to reject any and all bids.

By order of the Board of Public Works. F. J. CHURCHILL, Secretary.

NOTICE TO BIDDERS.

NOTICE is hereby given by the undersigned that the Board of Trustees of Larkspur will receive up to Wednesday, February 26th, 1913, at 8 o'clock p. m. sealed bids for the construction of a Town Hall as per plans and specifications on file at the office of the Architect, C. O. Clausen, Phelan Bldg., San Francisco. All bids to be accompanied by a certified check for 5% of the bid. The Board reserves the right to reject any and all bids.

E. J. KOCKE, City Clerk of the City of Larkspur, County of Marin.

Firms desiring news from certain localities like San Francisco, Los Angeles, Portland, Seattle, etc., will find all such items, commencing on this page, all carefully classified as to location. These same items are repeated in the fore part of the news department, under distinct headings such as Banks, Churches, Hotels, etc.

SAN FRANCISCO.

APARTMENT HOUSE—3 story and base, frame, \$10,000. San Francisco. Architect, none. Owner, C. F. Wyman. 1959 Hayes St., S. E. The building is to cover an area of 25x75 feet. Interior will be arranged for six apartments of three and four rooms and bath. Wall beds will be used throughout. A central heating system will be installed. Interior finish will be of pine and redwood with some oak floors. Bath rooms will be finished in tile. The exterior of the building will be covered with rustic and cement plaster on metal lath. Plans are in the hands of the owner who will do the work by Day Labor.

RESIDENCE—2 story and base, frame, \$3,000. San Francisco. Architect, David C. Coleman, Western Metropolis Bank Bldg., S. F. Owner, M. Fisher. The house has been designed to contain seven rooms and bath. All interior trim will be of pine or redwood. Hardwood floors will be used in the principal rooms. A central heating system will be installed. Mantel will be of brick. Tile will be used in the bath room and kitchen. The exterior of the house will be covered with cement plaster on metal lath. Plans are complete and in the hands of the owner who will do the work by Day Labor.

APARTMENT HOUSE—4 story and base, brick and steel, \$50,000. San Francisco. Architect, Norman Coulter, 46 Kearny St., S. F. Owner, Thomas G. Swarthgauer. This building will be erected in the north line of Sacramento street between Pierce and Scott streets. While outside of the fire limits the structure will be a Class C building. Interior has been arranged for two, three and four room apartments and will cover an area of 68x127½ feet. Interior finish will be of pine, redwood and some hardwoods. There will be steam heat, elevator service, wall beds and private baths.

A vacuum cleaning system will be installed. The exterior will be faced with pressed brick. Plans are now being prepared.

RESIDENCES—2, 2 story and base, frame, \$2,250 each. San Francisco. Architect, none. Owners, Oscar Heyman & Bro., 742 Market St., S. F. These houses will each contain six rooms and bath. All interior finish will be of pine or redwood. Some hardwood floors will be used. There will be open fire places and tile or brick mantels. Tile will be used in the bath rooms and kitchens. The exteriors will be covered with rustic and cement plaster on metal lath. Plans are complete and the work will be done by Day Labor.

RESIDENCE—2 story and base, frame, \$3,500. San Francisco. Architect, Joseph T. Carter, Balboa Bldg., S. F. Owner, John T. Murphy. The house will be erected at the corner of 32nd avenue and Lake street, and will contain seven rooms and bath. Interior finish will be of pine and oak. Hardwood floors will be used throughout. A hot water heating system is to be installed. There will be a large open fire place with a specially designed hardwood mantel. Tile will be used in the bath room and kitchen. Considerable ornamental plaster work is specified. The exterior of the dwelling will be covered with cement plaster on metal lath. Roof will be of red clay tile. Plans are being prepared.

BUNGALOWS—2, 1 story and base, frame, \$1,000 each. San Francisco. Architect, O. E. Evans, 2367 Mission street, S. F. Owner, C. Cavaglieri. These dwellings will each contain six rooms and bath. All interior finish will be either of pine or redwood. Some oak floors will be used. There will be open fire places and tile or brick mantels. The exteriors will be covered with rustic and cement plaster. Plans are complete and the work will be done by Day Labor.

APARTMENT HOUSE—3 story and base frame. Cost not stated. San Francisco. Architects, C. M. and A. F. Rousseau, Monadnock Bldg., S. F. Owner, M. S. Shaw. The building is to be arranged for six apartments of four rooms and bath each. There will be a central heating system. Wall beds will be used in all suites. Interior finish will be of pine and redwood with some hardwood floors. The exterior of the building will be covered with cement plaster on metal lath. Plans are complete and in the hands of the owner who will do the work by Day Labor.

RESIDENCE—2 story and base, frame, \$2,800. San Francisco. Architect, none. Owner, Lillie Brown, 1434 6th Ave., S. F. The dwelling has been designed to contain six rooms and bath. Interior finish will be of pine and redwood. Some oak flooring will be used. There will be an open fire place with brick mantel in the living room. Tile will be used in the bath and kitchen. The exterior of the dwelling will be covered with cement plaster on metal lath. Plans are complete and in the hands of the owner who will do the work by Day Labor.

APARTMENT HOUSE—3 story and base, frame, \$10,000. San Francisco. Architects, C. M. and A. F. Rousseau, Monadnock Bldg., S. F. Owners, Rousseau Realty Co. The building will be erected in the east line of Larkin street, near Pacific, and will be arranged for a number of two and three room suites, all of which will have connecting baths and private entrances. Interior finish will be of pine and hardwood. Oak floors will be used in the principal rooms. A central heating system will be installed. Wall beds are specified. The exterior of the building will be covered with cement plaster on metal lath. Plans are complete and the work will be done by Day Labor.

RESIDENCES—2, 1 story and base, frame, \$1,200. San Francisco. Architect, none. Owner, K. Anderson, 294 Church St., S. F. These two houses will be erected on Anderson street near Ogden, and each will contain five rooms and bath. Interior finish will be of pine and redwood throughout. Oak floors will be used in the living and dining rooms. There will be open fire places and tile or brick mantels. The exteriors of the houses will be covered with rustic. Plans are in the hands of the owner and the work will be done by Day Labor.

RESIDENCE—2 story and base, frame, \$12,000. San Francisco. Architect, H. Geiffuss, 46 Kearny St., S. F. Owner's name withheld. This will be the first dwelling to be erected in the handsome new residence tract known as St. Francis Wood. The house will contain in the neighborhood of ten rooms, three baths and a sleeping porch. A garage will be erected on the same lot. The design is in the Italian Renaissance style. Interior finish will be of pine and hardwoods throughout. Oak floors will be used in all of the principal rooms. A hot water system of heating is to be installed. There will be open fire places and tile or brick mantels. Bath rooms will be finished in tile. The exterior of the dwelling will be covered with cement plaster on metal lath. Roof will probably be of red clay tile. Plans are being prepared.

APARTMENT HOUSE—4 story and base, brick and steel, \$30,000. San

Francisco. Architect, August Nordin, Mills Bldg., S. F. Owners, Franklin Realty Co. The building will be erected on the north line of O'Farrell street east of Larkin, and will contain a large number of two and three room apartments. Interior will be finished in pine and redwood with hardwood and ornamental plaster in the lobby and amusement rooms. There will be steam heat and elevator service. All suites will have wall beds and private baths. A vacuum cleaning system will be installed. Bath rooms will have cement floors. The exterior of the building will be faced with pressed brick. Plans are complete and in the hands of the owners who will take figures on the work.

RESIDENCE—3 story and base, frame, \$10,000. San Francisco. Architect, C. A. Meussdorffer, Humboldt Bank Bldg., S. F. Owner's name withheld. The house will be erected in the south line of Jackson street near Walnut, and will contain about eight rooms, several baths and laundry. A garage will also be built on a part of the lot. Interior will be finished in hardwoods, pine and redwood. There will be furnace heat and open fire places. Mantels will be of brick and tile. Floors throughout will be of hardwood except in the baths which will have tile floors. An automatic water heater will be installed. The exterior of the dwelling will be covered with cement plaster on metal lath. Plans are complete and figures are being taken.

APARTMENT HOUSE—3 story and base, frame, \$10,000. San Francisco. Architect, none. Owner, E. A. Knoop, 1375-A Stevenson St., S. F. The building will be 28x66 feet, and has been arranged to contain six apartment flats. Interior finish will be of pine and redwood. There will be a bath with each apartment. A hot water heater will be installed. The exterior of the building will be covered with rustic and shiplap. Plans are complete and in the hands of the owner who will do the work by Day Labor.

FLATS—2 story and base, frame, \$3,000. San Francisco. Architects, Falch & Knoll, Hearst Bldg., S. F. Owner, George Piper. The building has been arranged to contain two small flats of four and five rooms each with baths. Interior will be finished in pine and redwood. Modern plumbing and electric work are specified. There will be either open fire places or gas grates used. The exterior of the building will be covered with cement plaster on metal lath. Plans are complete and the work will be done by Day Labor.

APARTMENT HOUSES—4, 3 story and base, frame, \$10,000 to \$14,000 each. San Francisco. Architects, H. Geiffuss & Son, 46 Kearny St., S. F. Owners' names withheld. Architects Geiffuss & Son have completed plans and specifications for two of these buildings and have taken figures on the same. Contracts will be awarded for the work in a short time. Plans are being prepared for two other similar buildings and bids will be taken within a few weeks. All four of the apartment houses will be erected in the Western addition.

GARAGE—2 story and base, reinforced concrete, \$25,000. San Francisco. Architect, A. Leo Ellis, Shreve Bldg., S. F. Owner's name withheld. This building will be erected on Van

Ness avenue, and is designed for a commercial garage with offices and sales rooms occupying the front portion of the structure. Interior of the offices and sales rooms will be finished in tile, marble and hardwoods. A tile floor will be used. Construction will be practically fire proof. Metal window sash and frames will be used. The exterior of the building will be faced with cement plaster. Plans are nearly complete and figures will be called for at once.

HOTEL—7 story and base, reinforced concrete, \$75,000. San Francisco. Architects, Hladik & Thayer, Monadnock Bldg., S. F. Owner's name withheld. The building will be erected in the Fifty Vara District and will be arranged for a total of 120 rooms, all of which will have connecting baths. There will be steam heat, elevator service and a vacuum cleaning system. Interior finish will be of pine, redwood and hardwood. Ornamental plaster will be used in the lobby and office. The exterior of the building will be faced with pressed brick. Plans are complete and bids will be called shortly.

HOTEL—2 story and base, reinforced concrete, \$35,000. San Francisco. Architect, Clay N. Burrell, Albany Bldg., Oakland. Owner's name withheld. The building is to be erected on Mason street and will contain in the neighborhood of 60 rooms and baths. Interior finish will be of redwood and hardwood. There will be steam heat. All rooms will be supplied with hot and cold running water. The exterior of the building will be faced with cement plaster. Plans are now being prepared.

HOTEL—6 story and base steel and brick, \$100,000. San Francisco. Architect, Creighton Withers, 125 Sutter St.; engineers, Leonard & Day, Rialto Bldg., S. F. Owner, Florence A. Browne. Contracts for parts of this work have been awarded as follows: Steel work to the Ralston Iron Works, concrete work to Foster-Vogt Co., and terra cotta to Steiger Terra Cotta Works. All other parts of the building will be handled by Day Labor except the plumbing, plastering and electric work, contracts for which have not been let.

COLLEGE—3 story and base, reinforced concrete, \$100,000. San Francisco. Architect, Sylvain Schnalttacher, First National Bank Bldg., S. F. Owners, Hetch Investment Co. The Hetch Investment Co. has leased the northwest corner of Van Ness avenue and Post street to Heald's Business College and will erect thereon a modern fireproof building. This property has a frontage of 120 feet on Van Ness and 160 feet on Post street. The building is to cover practically the entire area. Construction will be fireproof. Plans are being prepared, and while definite information of the arrangement etc. is not available the lessees state that all the various departments of this college will be provided with suitable space, and that the new building will be the most modern structure devoted exclusively to a business college of any on the coast. Actual construction will be started as soon as plans and specifications can be completed.

CAR BARN—2 story and base, brick addition, \$10,000. San Francisco. Architect, G. A. Dodge, 101 Post St., S. F. Owners, California Street Rail-

way Co. This building is in the nature of a two-story addition to the present structure on California street near Hyde. Plans for this work have been completed and placed in the hands of the owners who will do the work by Day Labor.

CONDUIT SYSTEM—Cost not stated. San Francisco. Engineer, Director of Works, Service Bldg., S. F. Owners, Panama-Pacific International Exposition Co. Plans for the construction of an electric conduit system throughout the grounds of the exposition have been completed and figures are now being called for. The official proposal appears in another column of this issue. Bids will be opened on February 18th. Plans may be secured from the Director of Works at the Service Bldg., San Francisco.

STORES AND OFFICES—4 story and base, brick and steel. Cost not stated. San Francisco. Architect, Nathaniel Blaisdell, 255 California St., S. F. Owners, C. C. Moore Engineering Co. The owners have just announced their selection of an architect to prepare plans for the improvement of the property recently purchased at the northeast corner of Mission and First streets. The new structure will have a frontage of 129 feet on First and 113 feet on Mission street. There will be a steel frame and exterior walls of brick, faced with pressed brick. The first floor will be occupied by the owners and upper floors will be arranged for offices designed to meet the requirements of engineers, assayers and other specialists. There will be steam heat, elevator service, a vacuum cleaning plant, mail chutes and other modern improvements. Metal window frames and sash are to be used. Plans are being prepared.

EDUCATIONAL BUILDING—2 story concrete and frame. Cost not stated. San Francisco. Architects, Bliss & Faville, Balboa Bldg., S. F. Owners, Panama-Pacific International Exposition Co. Plans for this building, which will be the second largest of the Exposition buildings, have been completed and approved by the Buildings and Grounds Committee. Bids are now being taken and will be opened on March 11th. Separate figures are asked for on the construction of the building and the installation of sewers, plumbing and water piping. Plans and specifications can be obtained from the Director of Works, Service Bldg., San Francisco. The official proposal appears in another column of this issue.

RAILROAD CONSTRUCTION—Cost not stated. San Francisco. Engineer, City Department of Engineering, Temporary City Hall, S. F. Owners, City and County of San Francisco. Plans for the completion of the Geary Street Municipal Railroad down Market street from the west line of Kearny to Market and Sutter streets have been completed and bids are now being called for. Bids will be opened by the Board of Public Works on February 26th. Plans and specifications can be secured from the Board of Public Works.

FURNISHING LOAM FOR GARDENS—Cost not stated. San Francisco. Engineer, Director of Works, Service Bldg., S. F. Owners, Panama-Pacific International Exposition Co. Bids will be opened on February 25th for the furnishing of loam for the Exposition

gardens. Specifications can be secured from the Director of Works, Service Bldg., San Francisco. The official proposal appears in another column of this issue.

Contracts were also awarded at the same meeting for the construction of the High Pressure Fire Protection System and for the Service Supply Water System. The High Pressure System went to The Turner Co., 278 Natoma Street, for \$152,225 and the Service Supply System was awarded to Phillip Schuyler of Oakland for \$55,305.

State Harbor Board Open Figures.

Bids for Construction of Pier No. 39 Show Healy-Tibbitts Co. Low And Award Made.

Five sets of bids were opened by the State Board of Harbor Commissioners at their meeting held Tuesday afternoon for the construction of Pier No. 39. Healy-Tibbitts Construction Company presented the lowest figures and were awarded the contract.

No action was taken by the State Board in regard to the bid of the Thompson Bridge Company on Pier No. 37, but that firm has secured a court injunction against the Harbor Commissioners cashing their check for 5% of the amount of their bid for that work. The Thompson Bridge Co. withdrew their bid on the construction of Pier No. 39 before the time of opening figures.

OAKLAND AND ALAMEDA COUNTY.

APARTMENT HOUSE—3 story and
 base, frame. Cost not stated. Oak-
 land, Cal. Architects, Mitchell &
 Hodges, Bankers' Investment Bldg., S.
 F. Owner, Marshall Davoutet. The
 building will be erected at 766 8th
 street, and is to be arranged for a
 number of two and three room suites.
 All apartments will be equipped with
 wall beds and have connecting bath
 rooms. The interior of the building
 will be finished in pine and redwood.
 The exterior will be covered with
 brick veneer and cement plaster. A
 central heating system will be in-
 stalled. Plans are complete and fig-
 ures are being taken.

BUNGALOW—1 story and base,
 frame, \$2,000. Oakland, Cal. Architect,
 W. H. Judson, Albany Bldg., Oakland.
 Owner, S. S. Wright. The house will
 contain six rooms and bath. Interior
 will be finished in pine throughout.
 Oak floors will be used in the living
 and dining rooms. There will be a
 large open fire place and tile or brick
 mantel. Tile will be used in the bath
 room and kitchen. The exterior of the
 bungalow will be covered with cement
 plaster. Plans are complete and the
 work will be done by Day Labor.

RESIDENCE—2 story and base,
 frame, \$7,000. Alameda, Alameda Co.,
 Cal. Architect, Julia Morgan, Mer-
 chants' Exchange Bldg., S. F. Owner,
 Mrs. Alfred A. Durney. This dwelling
 has been designed for an eight room
 house with bath and sleeping porch.
 Interior will be finished in pine, red-
 wood and some hardwood. Oak floors
 will be used throughout, except in the
 baths which will have composition
 floors. There will be furnace heat and
 open fire places. Mantels will be of
 brick. Tile will be used in the bath
 rooms and kitchen. An automatic
 water heater will be installed. The
 exterior of the dwelling will be covered

with cement plaster on metal lath.
 Plans are complete and figures are
 being taken.

RESIDENCE—2 story and base,
 frame, \$5,000. Oakland, Cal. Archi-
 tect, none. Owners, Oakland Building
 Co., Security Bank Bldg., Oakland. The
 house will contain eight rooms and
 bath. Interior finish will be of pine
 and redwood with some oak. Hard-
 wood floors will be used throughout.
 There will be furnace heat and open
 fire places. Mantels will be of brick.
 Tile will be used in the bath room and
 kitchen. An automatic water heater
 will be installed. The exterior of the
 house will be covered with cement
 plaster. Plans are complete and the
 work will be done by Day Labor.

RESIDENCE—2 story and base,
 frame, \$3,000. Berkeley, Alameda Co.,
 Cal. Architect, Albert H. Larsen, 5337
 Shafter Ave., Berkeley. Owner, E. A.
 Mahon. The house has been designed
 for a six-room dwelling with bath and
 sleeping porch. Interior will be finished
 in pine and redwood. There will be
 some hardwood floors. Open fire places
 and brick mantels will be used. The
 bath room will have a tile floor. Tile
 will also be used in the kitchen. The
 exterior of the dwelling will be covered
 with cement plaster. Plans are
 complete and the work will be done
 by Day Labor.

RESIDENCE—2 story and base,
 frame, \$3,000. Berkeley, Alameda Co.,
 Cal. Architect, John Hudson Thomas,
 First National Bank Bldg., Berkeley.
 Owner, Sam D. Beasley. The house
 will contain seven rooms, bath and
 sleeping porch. Interior will be fin-
 ished in pine and redwood with some
 hardwood floors. There will be fur-
 nace heat and open fire places. Man-
 tels will be of tile or brick. Tile will
 be used in the bath room and kitchen.
 The exterior of the dwelling will be
 covered with shingles and shakes.
 Plans are being prepared.

RESIDENCE—2 story and base,
 frame, 10,000. Berkeley, Alameda Co.,
 Cal. Architect, John Hudson Thomas,
 First National Bank Bldg., Berkeley.
 Owner, Charles McCreary. The house
 will be erected in Thousand Oaks, and
 has been designed to contain eight or
 nine rooms, baths and sleeping porches.
 All interior finish will be of pine or
 hardwoods. Oak floors will be used in
 the principal rooms. There will be a
 central heating system and open fire
 places. Mantels will be of tile or brick.
 An automatic water heater will be in-
 stalled. The exterior of the dwelling
 will be covered with cement plaster on
 metal lath. Bath rooms will be finished
 in tile. Plans are being prepared.

RESIDENCE—2 story and base,
 frame. Cost not stated. Berkeley, Ala-
 meda Co., Cal. Architect, John Hudson
 Thomas, First National Bank Bldg.,
 Berkeley. Owner, J. W. Hupp. This
 house will contain seven rooms and
 bath. Interior finish will be of pine
 and redwood with some hardwood
 floors. There will be furnace heat and
 open fire places. Mantels will be of
 brick. Tile will be used in the bath
 room and kitchen. The exterior of
 the dwelling will be covered with ce-
 ment plaster on metal lath. Plans are
 complete and figures are being taken
 by the architect.

RESIDENCES—2, 2 story and base,
 frame, \$12,000 and \$15,000. Oakland,
 Cal. Architects, Milwain Bros., Delger
 Bldg., Oakland. Owner, P. E. Holt.

These two houses will be erected in
 the Crocker Highlands Tract, and will
 contain from seven to ten rooms.
 There will be three bath rooms in the
 larger house. A garage will be erected
 on the rear of both lots. Interior fin-
 ish will be of pine, redwood and hard-
 woods. Furnace heat and open fire
 places will be used. Mantels will be
 of brick and tile. Bath rooms will be
 finished in tile and will have composi-
 tion floors. Automatic water heaters
 will be installed. The exteriors will
 be covered with cement plaster on
 metal lath. Plans are now being pre-
 pared.

RESIDENCES—2, 2 story and base,
 frame, \$3,500 each. Piedmont, Alameda
 Co., Cal. Architect, none. Owners,
 United Home Builders, 1762 Broadway,
 Oakland. These houses will be erected
 on Greenbank avenue, and will each
 contain seven rooms, bath and sleeping
 porch. Interior finish will be of pine
 and redwood with oak floors in the
 principal rooms. There will be fur-
 nace heat and open fire places. Man-
 tels will be of brick. Bath rooms will
 have composition floors. Tile will be
 used in the kitchens. The exteriors
 of the dwellings will be covered with
 cement plaster on metal lath. Plans
 are complete and in the hands of the
 owners who will do the work by Day
 Labor.

FLATS—2 story and base, frame,
 \$2,000. Oakland, Cal. Architect, Robert
 Morckenier, 1614 Telegraph Ave.,
 Oakland. Owner, Joseph Berlock. The
 building will contain two small flats.
 Interiors will be finished in pine and
 red wood with some oak floors. There
 will be gas grates. Mantels will be of
 tile. The exterior of the building will
 be covered with rustic. Plans are com-
 plete and the architect is taking fig-
 ures on the work.

FLAT ADDITION—2 story, frame,
 \$2,000. Oakland, Cal. Architect, none.
 Owner, Mrs. F. H. Benery, 1103 Camp-
 bell St., Oakland. This work will con-
 sist of the construction of a two-story
 addition to the present building and
 the alteration of the interior of the
 old portion of the house. There will
 be new plastering, plumbing and elec-
 tric work. The exterior will be covered
 with rustic. Plans are in the
 hands of the owner who is taking fig-
 ures on the work.

GARAGE—1 story and base, brick,
 \$1,000. Oakland, Cal. Architect, Henry
 Bocher, Delger Bldg., Oakland. Own-
 ers, A. W. and J. H. Gatchens. This
 building has been designed for a com-
 mercial garage, and will be erected on
 Piedmont avenue near 10th street. In-
 terior will be finished in pine. There
 will be a large galvanized iron sky-
 light. The exterior of the building
 will be faced with stock brick. Plans
 are complete and figures are being
 taken.

ASSOCIATION ADDITION—2 story,
 Class A construction, \$15,000. Oakland,
 Cal. Architect, William C. Hays, Fox-
 croft Bldg., S. F. Owners, Young Men's
 Christian Association. Plans are com-
 plete for a two-story addition to the
 five-story Y. M. C. A. building located
 at 21st and Telegraph avenue. Con-
 struction and design of the new stories
 will be similar to that of the old
 building. Interior will be finished in
 pine and hardwood. The heating sys-
 tem and plumbing will be extended
 from the old portion. The exterior of

the building will be faced with pressed brick. Plans are complete and figures are being taken.

SCHOOL—1 story and base, reinforced concrete, \$18,800, Oakland, Cal. Architect, J. J. Donovan. Security Bank Bldg., Oakland. Owners, City of Oakland. Bids opened at the last meeting of the Oakland Board of Education show Boyd, Kerr & McLean low men at \$18,800. For a complete list of all figures submitted for this work see under Oakland and Alameda County in this issue.

DEPOT—1 story, concrete and frame, cost not stated, Berkeley, Alameda Co., Cal. Architect, Engineering Department of the Southern Pacific Co., Flood Bldg., S. F. Owners, Southern Pacific Co. Plans for this work have been completed and bids will be called for shortly. The work will be handled through the department of Maintenance of Way. A general contract will be let.

STORES AND OFFICES—10 story and base, Class A construction, \$50,000, Oakland, Cal. Architects, Reed & Meyer, Oakland Bank of Savings Bldg., Oakland. Owner, Miss Lucy F. Thompson. This building will be erected at the corner of Broadway and 17th street, and has been designed for a modern commercial structure. The first floor will be occupied by a number of retail stores and the upper floors will be arranged for offices, both en suite and single. There will be steam heat, elevator service, vacuum cleaning system and mail chutes. Interior finish will be of pine, hardwood and metal. Metal window sash and frames will be used throughout. Halls and corridors will be finished in tile and marble. The exterior of the building will be faced with pressed brick and terra cotta. A complete steel frame will be used. Plans are complete and figures on the work are now being taken. Bids will be closed on certain parts of the work on February 19th.

Oakland School Bids Opened.

Bids for Market and 54th Street School Opened and Show Boyd-Kerr and McLean Low Men.

Fifteen bids were opened by the Oakland Board of Education on Monday evening, February 10th, for the construction of the 54th and Market street school. The building will be a one-story reinforced concrete building, plans for which were prepared by Architect J. J. Donovan. The lowest figure was received from Boyd, Kerr and McLean for \$48,800. The following is a complete list of the bids received:

FRESNO, MODESTO, STANIS LAUS AND CENTRAL CALIFORNIA.

RESIDENCE—2 story and base
 frame, \$5,000. Madera, Madera Co.
 Cal. Architect, Carl Thayer, Fresno.
 Owner, Richard Roberts. The house
 will contain about seven rooms and
 bath. Interior finish will be of pine
 and redwood throughout. Oak floors
 will be used in the principal rooms.
 There will be a large open fire place
 in the living room with a brick man-
 tel. The bath room will be finished in
 tile. The exterior of the house will
 be covered with cement plaster on
 metal lath. Plans are complete and
 figures are being taken.

TELEPHONE EXCHANGE—2 story
 and base, brick, \$12,000. Fowler, Pres-
 no Co., Cal. Architect, C. K. Kirby, Jr.
 Fresno. Owner, H. Harris. This build-
 ing has been leased to the Fowler
 Telephone Co. and will be occupied
 entirely by the company. The first
 floor will contain the general offices
 apparatus room and public office.
 Upper floor will be arranged for the
 exchange. There will be a central
 heating system. Interior finish will be
 of pine and hardwood. The exterior of
 the building will be faced with pressed
 brick. Plans are nearly complete and
 figures will be called for shortly.

APARTMENT HOUSE—2 story and
 base, reinforced concrete. Cost not
 stated. Bakersfield, Kern Co., Cal. Ar-
 chitect, Thomas B. Wiseman, Bakers-
 field. Owners, A. E. Wishon and Claude
 Thompson Estate. The building will
 cover a considerable ground area and
 is to contain eight apartments ar-
 ranged in two and three room suites.
 All apartments will have connecting
 baths and wall beds. Plans provide for
 steam heat and hot and cold running
 water. Interior finish will be of pine

and hardwoods. The exterior of the building will be faced with cement plaster. Plans are being prepared.

CHURCH—1 story and base, concrete and frame. Cost not stated. Ketter, Tulare Co., Cal. Architect, A. Merrill Bowser, Oakland. Owners, Baptist Church of Exeter. The building will be designed in the Mission style with a cement plastered exterior and a roof. The main auditorium will have a seating capacity of 500 people besides the auditorium there will be Sunday school rooms, parlors and pastor's study. Interior finish will be of pine and redwood. There will be a central heating system. Plans are being prepared and figures will be called for shortly.

CHURCH—2 story and base, brick, \$30,000. Bakersfield, Kern Co., Cal. Architect, Thomas B. Wiseman, Bakersfield. Owners, Presbyterian Church of Bakersfield. The building will contain a main auditorium with a seating capacity of 400, Sunday school department, gymnasium, social rooms and parlors. Interior finish will be of pine throughout. There will be a central heating system. Plate and art glass windows will be installed. The exterior of the building will be faced with pebble brick. Plans are being prepared and figures will be called for shortly.

GARAGE—1 story and base brick and steel. Cost not stated. Fresno, Fresno Co., Cal. Architect, none. Owners, Haynes Automobile Co. This company has recently secured a site at the corner of Stanislaus and I streets, and have had plans prepared for a commercial garage and sales rooms. The interior of the front portion of the building will be handsomely finished in tile, pine and hardwood. Floor will be of tile. The rear of the building will contain the repair shop and storage space. There will be a cement floor and metal window sash and frames. The exterior of the building will be faced with cement plaster.

LODGE HALL—3 story and base, brick. Cost not stated. Modesto, Stanislaus Co., Cal. Architect, Ralph P. Morrell, Yosemite Theatre Bldg., Stockton. Owner, John Tully. This building which has been leased to the Modesto Elks, has been fully described in these columns before. A contract for the construction will be let this week.

SCHOOL—1 story and base, reinforced concrete, \$20,000. Midway School District, Kern Co., Cal. Architect, Thomas B. Wiseman, Bakersfield. Owners Midway School District. The building will be in the nature of an addition to the present building and will be arranged to contain four class rooms. There will be a central heating system. Interior finish will be of pine. Some maple floors will be used. There will be composition blackboards. The exterior of the building will be faced with cement plaster. Plans are being prepared.

PUMPING PLANT—Cost not stated. Bakersfield, Kern Co., Cal. Engineer's name not given. Owner, H. J. Saecker, Bakersfield. Mr. Saecker is to install a large pumping plant for irrigation purposes on his ranch south of Bakersfield. Mr. C. M. Stoll, also of Bakersfield, is now taking figures for the installation of a pumping plant at Rio Bravo. He may be addressed at Bakersfield.

Contracts Awarded.

STORE—1 story and base, brick. Cost not stated. Madera, Madera Co., Cal. Architect's name not given. Owner, Madera Daily Tribune. Contractor, George Zoerb, Madera. Contract price not stated. Note: This building will be in the nature of an addition to the Tribune plant and will cover an area of 30x90 feet.

STORES AND ROOMS—2 story and base, brick. Cost not stated. Fresno, Fresno Co., Cal. Architect's name not given. Owner Thomas H. Lynch. Contractor, H. A. Hansen, Fresno. Contract price not given. Note: This building will be erected on a corner site and will cover an area of 100x150 feet.

LOS ANGELES AND SOUTHERN CALIFORNIA.

APARTMENT HOUSE—5 story and base, Class B construction, \$125,000. Los Angeles, Cal. Architect, J. W. Chalmers, Mason Bldg., L. A. Owner, A. L. Hill. This building has been mentioned here before when plans were being prepared. The structure will be erected at the northwest corner of 6th and Lake streets, and will cover an area of 96x148 feet. There will be a total of 183 rooms, which will be arranged in suites of two, three and four rooms each with private bath and wall beds. Interior finish will be of pine and mahogany. Baths will be finished in tile. There will be automatic elevators, steam heat and a vacuum cleaning system. The exterior of the building

will be faced with cement plaster and artificial stone. Plans are complete and figures are being taken.

APARTMENT HOUSE—4 story and base, brick and steel. Cost not stated. Los Angeles, Cal. Architect, Scott Quintin, Douglas's Bldg., L. A. Owners, Los Angeles Securities Co. The building will cover an area of 72x100 feet. The first floor has been arranged for two stores and the upper floors for 100 rooms, which will be divided into two and three room suites with baths and wall beds. Interior will be finished in pine, redwood and some hardwood. There will be steam heat, elevator service and a vacuum cleaning system. The exterior of the building will be faced with pressed brick. Plans are being prepared.

APARTMENT HOUSE—5 story and base, Class B construction. Cost not stated. Los Angeles, Cal. Architects, Dennis & Farwell, Fay Bldg., L. A. Owner, Louis C. Lohman. The building is to contain 85 rooms, which will be arranged in suites of two and three rooms each with wall beds and private baths. Interior will be finished in birch and white enamel. There will be steam heat, elevator service and a vacuum cleaning plant. Bath rooms will have composition floors. The exterior of the building will be faced with pressed brick and artificial stone trim. Plans are being prepared.

APARTMENT HOUSE—4 story and base, brick and steel, \$65,000. Los Angeles, Cal. Architects, Pacific States Investment Co., 107 So. Broadway, L. A. Owner, Dr. T. J. Rush. The building will cover an area of 50x130 feet, and will contain a large number of two and three room suites with baths and wall beds. Interior finish will be of pine and redwood. Bath rooms will have composition floors. There will be steam heat, elevator service and a vacuum cleaning system. The exterior of the building will be faced with cement plaster. Plans are being prepared and when complete the building will be erected by the Pacific States Investment Co. on a percentage basis.

PAVING ROADS, ETC.—Asphalt and macadam. Cost not stated. Fullerton, Orange Co., Cal. Engineer, C. Flske, Jr., 2601 Leeward Ave., Los Angeles. Owners, City of Fullerton. Plans for paving a number of the principal streets and roads in Fullerton have been completed and are now out for figures. The work was mentioned in the last number of the News and was described in detail then. The official proposal appears in another column of this issue.

STORES AND LOFTS—8 story and base, Class A construction. Cost not stated. Los Angeles, Cal. Architects, Richards-Neustadt Construction Co., Wright and Callender Bldg., L. A. Owners, Isaacs Bros. Co. The building will be erected on Broadway between 7th and 8th streets and will be Class A in all points of construction. There will be reinforced concrete floors and walls will be pressed brick and terra cotta facing. Metal window frames and sash will be used. There will be steam heat, elevator service and a vacuum cleaning plant. Interior trim will be of metal. The building will have two entrances, both of which will be finished in marble. Plans are being prepared and the work will be done by Richards-Neustadt Co.

LOFTS 5 story and base, reinforced concrete. Cost not stated. Los Angeles, Cal. Architect, J. W. Chalmers, Mason Bldg., L. A. Owner, A. L. Hill. This building has been mentioned here before when plans were being prepared. The structure will be erected at the northwest corner of 6th and Lake streets, and will cover an area of 96x148 feet. There will be a total of 183 rooms, which will be arranged in suites of two, three and four rooms each with private bath and wall beds. Interior finish will be of pine and mahogany. Baths will be finished in tile. There will be automatic elevators, steam heat and a vacuum cleaning system. The exterior of the building

LES CAL. ARCHITECTS. Richards Neustadt Construction Co., Wright and Callender Bldg. L. A. Owner, J. J. Fay. The building will cover an area of 116x114 feet and has been arranged for a number of hotel flats. There will be concrete walls and floors. The exterior will be faced with cement plaster. There will be copper window frames and sash, fireproof doors and modern elevator service. Interior finish will be of pine throughout. An automatic sprinkler system will be installed. Vacuum cleaning will be installed. Plans are being prepared and when complete the work will be done by the Richards-Neustadt Construction Co.

CHURCH—1 story and base, brick and frame. Cost not stated. Orange, Orange Co., Cal. Architect, E. E. Meinardus, Higgins Bldg., L. A. Owners, German Lutheran Congregation of Orange. The building will be one story in height with two towers. The main auditorium will have a seating capacity of 1,000 people. Besides the main auditorium there will be Sunday school rooms and parlors. Interior will be finished in pine and redwood. The exterior of the edifice will be faced with cement plaster. Plans are nearly complete and the work will probably be done by Day Labor.

FACTORY GROUP—6, 1 story and base, reinforced concrete. Cost not stated. Torrance, Los Angeles Co., Cal. Architect, Irving J. Gill, 625 South Hill St., L. A. Owners, W. O. Hendrie Rubber Co., Denver, Colo. The complete plan includes the construction of six buildings, but only two will be erected at this time. The first of these two will cover an area of 640x660 feet. Other buildings will be identical in size covering an area of 50x100 feet. The first two buildings will be the general offices and factory and a power plant. Construction will be of reinforced concrete throughout. There will be metal window frames and sash. Plans are being prepared.

LODGE HALL AND STORES—3 story and base, reinforced concrete. Cost not stated. Los Angeles, Cal. Architects, Morgan, Walls & Morgan, Story Bldg., L. A. Owners, Independent Order of Odd Fellows. The property at the northwest corner of 12th and Flower streets is to be improved with a three-story building covering an area of 100x150 feet. Only preliminary plans have been prepared and details of the construction are not available at this time. The plans so far prepared show a building with the first floor arranged for stores and upper floors for lodge halls. Fred E. Peterson 332 South Broadway, is the chairman of the building committee. Complete information will be furnished as the plans progress.

HOTEL—4 story and base, brick, cost not stated. Ocean Park, Los Angeles Co., Cal. Architect, W. S. Garrett, Currier Bldg., L. A. Owners, Messrs. Edward and John Newell. The building will have a frontage of 47 feet and a depth of 114 feet. There will be stores and the general office and lobby on the first floor and in the neighborhood of 120 rooms on the upper floors. Plans provide for steam heat, elevator service and hot and cold running water in all rooms. Interior finish will be of pine. Tile, marble and hardwood will be used in the lobby. The exterior of the building will be faced with pressed brick. Plans are being prepared.

GARAGE—1 story and base, brick, cost not stated. Pasadena, Los Angeles Co., Cal. Architect, none. Owners, Claude M. Jones and J. H. Franklin, 688 Fernando St., L. A. The site is 70x120 feet. The building will have a cement floor, composition roof and special gasoline storage tanks. Interior finish will be of pine. The exterior of the building will be faced with pressed brick. Plans are complete and the excavating has been started. Work will probably be done by Day Labor.

HOTEL—10 story and base. Class A construction. Cost not stated. Los Angeles, Cal. Architect not selected. Owner, N. W. Stowell, 667 E. W. Hellman Bldg., L. A. This building will be erected in the east line of Spring street north of 5th. Several architects are now preparing sketches and a decision will be made shortly. Plans submitted show 27 rooms to the floor, 12 of which will have private baths. Construction will be Class A throughout with a complete steel frame and exterior walls of brick, faced with pressed brick and terra cotta. The building has been leased to J. P. Stockdale, Delta Bldg. Complete details will be given as soon as an architect is selected.

HOTEL AND STORES—4 story and base, brick and steel. Cost not stated. Los Angeles, Cal. Architect, Robert M. Taylor, Douglass Bldg., L. A. Owner, Jacob Joseph. The building will cover an area of 100x120 feet. There will be several stores besides the lobby and offices on the first floor. Upper floors will be divided into 100 guest rooms, many of which will have private baths. Interior finish will be of pine and hardwood. There will be steam heat, freight and passenger elevators, a vacuum cleaning system and hot and cold running water. Baths will have composition floors. The exterior of the building will be faced with pressed brick trimmed with artificial stone. Plans are being prepared.

ACADEMY BUILDINGS—2, 1 story and base, reinforced concrete. Cost not stated. Pasadena, Los Angeles Co., Cal. Architect, Elmer Grey, Wright and Callender Bldg., L. A. Owners, Throop Polytechnic Institute of Pasadena. One of the buildings is to be designed for an Art Museum and the other for a library. The style of architecture will conform to the present buildings. Construction will be of reinforced concrete throughout. Interiors will be finished in pine and hardwoods. There will be a central heating system. The exteriors will be faced with cement plaster. Plans are being prepared.

SCHOOL WORK—Concrete walls, plumbing, etc. Cost not stated. Architect not stated. Owners, City of Los Angeles. Bids will be received by the Board of Education, 730 Security building, up to 11 o'clock a. m. of Thursday, February 27, 1913, for the following construction work: (For the erection of a frame sloyd building at the West Vernon Avenue School site, West Vernon Avenue between Olive street and Grand avenue; for remodeling the basement of the Custer Avenue Intermediate School at Temple street and Custer avenue; for constructing a cement retaining wall at the Sherman School; for constructing a cement retaining wall at the Colegrove School; for installing electric fixtures in seven school buildings; for installing plumbing in the cookery room at the Santa Fe Ave-

nue School, Santa Fe avenue and S. 14th street; and for the sale and removal of a building on the Wilmington school site. Plans and specifications for the above work may be obtained at the office of the secretary, Wm. Sheldon, 730 Security building.

LIBRARY—1 story and base, brick, \$10,000. Watts, Los Angeles Co., Cal. Architect, Elmore R. Jeffery, Citiz. National Bank Bldg., L. A. Own. Town of Watts. The building will be 40x70 feet, and is to be designed in a classic style. There will be one large reading room and the stack room a librarians' office. Interior will be finished in pine and hardwood. Concrete floors will be used. A central heating system is to be installed. The exterior of the building will be faced with pressed brick. Plans are being prepared.

SCHOOL—1 story and base, brick, \$25,000. El Modena, Orange Co., Cal. Architect, H. M. Patterson, O. T. Johnson Bldg., L. A. Owners, El Modena School District. This work has been mentioned here before. Plans are complete and figures are being taken. Bids will be opened in El Modena on March 1st. Bids are being taken as the plans and specifications can be obtained from the architect.

IRRIGATION SYSTEM—Ditches and concrete pipe. Cost not stated. San Jacinto, Riverside Co., Cal. Engineered name not given. Owner, S. S. Lathley, Van Nuys Bldg., L. A. Mr. Lathley will shortly let a contract for construction of about 20,000 feet of irrigation ditches and also for a large amount of reinforced concrete pipe.

STORES AND OFFICES—8 story and base, reinforced concrete. Cost not stated. Pasadena, Los Angeles Co., Cal. Architect's name not given. Owner, Matthew Slavin, Slavin Bldg., Pasadena. This project is, as yet, in the tentative stage and only sketches have been prepared. Mr. Slavin is also considering a proposition for the construction of a three-story theatre building on the site. Plans will be complete and a contract let as soon as a decision is reached by the owner.

STORES AND MOVING PICTURE HOUSE—1 story and base, brick, \$900. Los Angeles, Cal. Architect, Fred L. Stiff, Grosse Bldg., L. A. Owner, Niles Pease Investment Co. The building will cover a ground area of 57x75 feet. There will be two stores besides the picture show house. The theatre will have a seating capacity of 100 people. Interior will be finished in pine. There will be a cement floor and concrete exits. The exterior of the building will be faced with pressed brick. Plans are being prepared.

AMUSEMENT PIER—Cost not stated. Ocean Park, Los Angeles Co., Cal. Architect's name not given. Owner, State Investment Co., Severance Bldg., L. A. This company has taken an interest in the Fraser Pier Co. and have announced that plans are being prepared for several new buildings which are to replace those recently destroyed by fire. The new structure will include a large theatre, roller skating rink, cafe, dance pavilion and roller coaster. Construction will be started as soon as plans can be completed.

THEATRE—1 story and base, brick and concrete. Cost not stated. El Centro, Imperial Co., Cal. Architect, E. H. Borgmeyer, Stimson Bldg., L. A. Owner,

C. M. Applestill. The building will be 50x140 feet. The auditorium will have a seating capacity of 700 people. Interior will be finished in pine. There will be a cement floor and a modern system of ventilation. Exterior of the building will be faced with pressed brick. Plans are complete and bids will be taken by the owner.

Contracts Awarded.

RESIDENCE—2 story and base, reinforced concrete. Cost not stated. Hollywood, Los Angeles Co., Cal. Architect, I. J. Gill, 623 South Hill St. A. Owner, Mrs. Sarah B. Clark. Contractors, Concrete Building and Investment Co., Citizens' Bank Bldg., L. A. Contract price not stated.

APARTMENT HOUSE—5 story and base. Class B construction, \$50,000. Los Angeles, Cal. Architect, E. J. Borgumeyer, Stinson Bldg., L. A. Owner, Julius R. Smith. Contractor, C. S. Blodgett, 336 North Burlington Ave., L. A. Contract price, \$50,000.

STORES AND THEATRE—Brick and steel. Cost not stated. Los Angeles, Cal. Architect, Scott Quintin, Douglass Bldg., L. A. Owners, Stoff and Schiller. Contractors, J. Chatzlanoff & Son, 2409 Central Ave., L. A. Contract price not stated.

APARTMENT HOUSE—4 story and base, brick, \$45,000. Los Angeles, Cal. Architect, none. Owner, Mrs. Lydia Montelth. Contractors, Pacific States Investment Co., 107 South Broadway, L. A. Contract price, \$45,000.

WAREHOUSE—4 story and base, reinforced concrete, \$27,000. Long Beach, Los Angeles Co., Cal. Architect, George W. Harding, Citizens' National Bank Bldg., L. A. Owners, City Transfer, Van and Storage Co., Contractor, A. L. Dutro, 617 Orange Ave., Long Beach. Contract price, \$27,000.

FACTORY AND WAREHOUSE—1 and 2 story and base, reinforced concrete. Cost not stated. Los Angeles, Cal. Architect's name not given. Owners, Fraters Art Glass Co., Contractors, O. F. Engstrum Co., 5th and Seaton Sts., L. A. Contract price not given.

GARAGE—1 story and base, reinforced concrete, \$16,000. Los Angeles, Cal. Architects, Train & Williams, Exchange Bldg., L. A. Owner, E. S. Butterfield. Contractor Earl F. Low, Byrne Bldg., L. A. Contract price, \$16,000.

HOTEL COMPLETION AND ADDITION—2 story and base, reinforced concrete, \$90,000. Pasadena, Los Angeles Co., Cal. Architect, Myron Hunt, Hibernian Bldg., L. A. Owner, Henry E. Huntington. Contractors, Richards-Neustadt Construction Co., Wright and Callender Bldg., L. A. Contract price, \$90,000.

SEWERAGE DISPOSAL PLANT—\$20,000. Soldiers' Home. Cal. Engineer's name not given. Owners, California's Soldiers Home. Contractors, J. D. Kneen Co., Santa Monica. Contract price, \$19,800.

SEATTLE AND WASHINGTON.

SCHOOLS—2, 2 story and base, reinforced concrete, \$65,000 each. Seattle, Wash. Architect, Edgar Blair, Seattle. Owners, City of Seattle. Each of the buildings will contain eight class rooms and an assembly hall. Interior finish will be of pine and hardwood. Plumbing and heating are to be included in the general contract. One of the buildings will be erected on Con-

cord street near 7th avenue, and the other on the corner of North 55th street and Latona avenue. Plans have been approved by the Board of Education and bids will be opened on February 20th. Plans can be secured from the architect or from Reuben W. Jones, Clerk of the Board of Education. Working drawings are being prepared for two similar buildings, which are to be erected in Seattle as soon as plans can be completed.

HYDRO-ELECTRIC PLANT—\$6,000,000. Anacortes, Wash. Engineers, Stone & Webster Corp., Seattle. Owners, Stone & Webster Co. This company has recently secured the property of the Skagit Power Co., near Anacortes, and will shortly start construction work on what is to be the second largest hydro-electric generating plant in the United States.

REMODELING STORE FRONTS—\$60,000. Seattle, Wash. Architect, Harlan Thomas, Eiler Bldg., Seattle. Owners, Rhodes Co. This work has been mentioned here before. New steel ceilings will be installed and an automatic sprinkler system. Plans are complete and figures are being taken.

STORES AND OFFICES—15 story and base. Class A construction, \$550,000. Vancouver, B. C. Architects, Russell, Babcock & Rice, Metropolitan Bldg., Vancouver. Owner, Mr. Weart. Contracts for the construction of this building will not be awarded for at least another ten days. The owner is in the east and no bids will be opened until his return. Figures are all in.

THEATRE—2 story and base, brick and concrete, \$20,000. Pomeroy, Wash. Architect, E. W. Houghton, Collins Bldg., Seattle. Owner, C. H. Seeley. The building will contain one balcony and a large main auditorium. Construction will be practically fireproof. Interior will be finished in pine and ornamental plaster. Complete stage equipment will be ordered. There will be steam heat and a modern system of ventilation. The exterior of the building will be faced with cement plaster. Plans are complete and the work will be done by Day Labor.

WAREHOUSE—4 story and base, reinforced concrete, \$75,000. Seattle, Wash. Architects, Weld & Thomas, Hogg Bldg., Seattle. Owners, Northern Pacific Railroad Co. This building will be erected on 4th avenue and will contain one store room and a large warehouse. There will be steam heat, elevators and automatic sprinkler system and metal window frames and sash. Interior finish will be of pine throughout. The exterior of the building will be faced with cement plaster. Plans are complete and figures are being taken.

BRIDGE—Steel and concrete, \$10,000. Tacoma, Wash. Engineer, County Surveyor M. Roy Thompson, Tacoma. Owners, Pierce County. Plans for a 1,000-foot steel bridge over the Nisqually River at La Grande are nearly complete and bids will be called for shortly. Complete information can be secured by addressing County Surveyor Thompson, Tacoma.

HOTEL ADDITION—10 story and base, reinforced concrete, \$250,000. Seattle, Wash. Architects, Black Construction Co., St. Louis, Mo. Owners, New Washington Hotel Co. This work was mentioned here over a year ago. The amalgamation of the interests of the New Washington Hotel Co. of Se-

attle and the St. Francis Hotel Co. of San Francisco makes the construction of the annex an assured fact. The Black Construction Co. will probably carry out the work as well as prepare the plans.

LIBRARIES—2, 1 story and base, reinforced concrete and brick. Cost not stated. Spokane, Wash. Architects as follows. Owners, City of Spokane. Architect Julius Zittel, Spokane, has been commissioned to design the North Side Branch Library, and Architect Albert Hild will design the Union Branch Library. These commissions have just been made and details of the buildings are not available at this time.

RAILROAD CONSTRUCTION—Seattle to Sumas, Wash. Engineers, Engineering Dept. Northern Pacific R. R. Co. Owners, Northern Pacific R. R. Co. This road has just issued a statement to the effect that they will relay with 95-pound rails for a distance of 120 miles on their right of way between Seattle and Sumas. The estimated cost is \$1,000,000, and includes the construction of several reinforced concrete bridges.

Contracts Awarded.

ASSOCIATION BUILDING—6 story and base. Class A construction, \$340,270. Vancouver, B. C. Architect's name not given. Owners, Young Men's Christian Association. Contractors, Booker, Campbell & Whipple, 413 Granville St., Vancouver. Contract price, \$340,270. Note: This building when completed will cost \$600,000.

LIBRARY—1 story and base, brick and concrete, \$30,000. Seattle, Wash. Architects, Thomas and Somervell, associated, Seattle. Owners, City of Seattle. Bids opened for the Queen Anne Branch Library show Weock & Behrens, Oriental Bldg., low on the general construction at \$23,850; Ernst Hardware Co., low on the plumbing at \$2,545, and J. J. Agutter & Co., low on the electric work at \$323. The above mentioned firms will probably be awarded the contracts.

DEPARTMENT STORE—8 story and base. Class A construction, \$2,500,000. Vancouver, B. C. Architects, Burke, Horwood & White, Toronto. Owners, Hudson's Bay Co., Contractor's Bourke, McDonald & Moncrieff, 142 Hastings St., Vancouver, B. C. Contract price, \$2,500,000. Note: Plans for the mechanical equipment are being prepared by P. R. Mosses of New York, and Taussig & Fleisch of Chicago are designing the fixtures.

STORES AND OFFICES—3 story and base, reinforced concrete, \$150,000. Seattle, Wash. Architect, John Graham, Lyon Bldg., Seattle. Owners, Crawford and Conover. Contractors, Butler Construction Co., Central Bldg., Seattle. Contract price, \$150,000. Note: This building will cover an area of 60x108 feet.

HOTEL—5 story and base reinforced concrete, \$62,977. Butte, Mont. Architect, Floyd Hammill, Butte. Owners, Alex. Leggat and M. R. Couse. Contractor, George Nelson, Madison Block, Seattle. Contract price, \$62,977.

LIBRARY—1 story and base, reinforced concrete, 25,000. Seattle, Wash. Architects, Harlan Thomas and W. Marbury Somervell, Seattle. Owners, City of Seattle. The Board of Trustees of the Seattle Public Library has awarded contracts as follows on the Queen Anne branch library building as follows:

Weock & Behrens, Oriental Bldg.,

general contract, at \$23,850.

Ernst Hardware and Plumbing Co. for the plumbing, at \$880.

The Lavan Plumbing and Heating Co. for the heating, at \$2,100 and J. J. Aquilino & Co. for the wiring at \$325.

RESIDENCE—2 story and base, brick 10,000. Seattle, Wash. Architects, Webb & Mendell, Denny Bldg., Seattle. Owner, S. S. Loeb, Contractor, J. N. Johnson, 2813 21st Ave., Seattle. Contract price, \$10,000.

PORTLAND AND OREGON.

CHURCH—2 story and base, stone, \$100,000. Irvington, Ore. Architect, Ellis F. Lawrence, Portland. Owners, Westminster Presbyterian Church. The stone work on the building is already completed, and the architect is now taking figures for the carpentry, plumbing, heating, plastering, electric work and sheet metal work. Art glass and interior decoration will be let later.

CLUB HOUSE—3 story and base, brick, \$50,000. Portland, Ore. Architects, W. B. Bell and J. Terry Wilding, Portland. Property owners in the Laurelhurst district have decided to give the district a suitable meeting place and have secured a large site. Plans are as yet in a preliminary state and details of the building cannot be given. Fuller mention will be made in these columns as the plans progress.

LIBRARY—1 story and base, brick and concrete, \$17,000. Albany, Ore. Architect, W. F. Tobey, Sherlock Bldg., Portland. Owners, City of Albany. Plans have been approved for this work and the Trustees have now decided to go ahead with the construction. The building will cover an area of 74x52 feet and is classical in design. The exterior will be faced with pressed brick. There will be a central heating system. Interior finish will be of pine and hardwood. Bids are now being taken.

TIMBER SALES FOR 1912.

The United States Forest Service reports that, during the last fiscal year there was sold from National Forest land in California 109,211,000 board feet of timber valued at \$232,697.81. These sales were distributed among the various National Forests of the State as follows:

Forest.	Feet B. M.	Value
Angeles	3,155,000	\$ 5,433.16
California	747,000	1,642.89
Cleveland	258,000	759.50
El Dorado	59,000	154.70
Inyo	756,000	1,821.45
Kern	458,000	895.97
Klamath	1,638,000	1,944.84
Lassen	112,000	311.63
Modoc	3,788,000	4,872.25
Mono	207,000	751.77

Monterey	674,000	2,630.00
Plumas	4,749,000	7,573.17
Santa Barbara	58,000	48.10
Sequoia	1,286,000	2,082.06
Shasta	358,000	620.00
Sierra	2,262,000	3,752.11
Stanislaus	10,799,000	23,735.20
Tahoe	77,531,000	172,061.95
Trinity	319,000	607.01

Totals109,214,000 \$232,697.81

Of this amount 12,356,000 feet were sold to small operators and local residents in sales varying from a few dollars to \$500 each and consisted largely of cordwood, posts, poles, mining timbers, etc. The majority of these small sales were made during the Fall and Winter when mining operations are in full force, fuel is in demand and ranchers are making their annual repairs and improvements.

Among the larger sales were two on the Tahoe Forest, one of 1,270,000 feet to the Davis Box and Lumber Company and one of 76,000,000 feet to the Verdi Lumber Company. The latter covers a cutting period of eleven years. On the Stanislaus Forest two large sales were made to the Standard Lumber Company, covering a total of 8,536,000 feet. Other large sales included one on the Plumas Forest of 2,920,000 feet to the Grizzly Creek Ice Company and one on the Angeles Forest of 5,260 cords of juniper fuel wood.

INVESTIGATION OF WATER RATES. Cost of Water For Ships and Cost to

Contractors Shown.

The investigation by the water rate committee of the supervisors Tuesday night of the rates charged steamship companies at this port brought out some surprising figures of the amount paid the Spring Valley Water Company by the steamship firms.

T. Cary Friedlander, appearing for the Chamber of Commerce, stated that the Pacific Mail Steamship Company paid the water company \$25,000 per year for water for its ships. He asserted that the high rate charged for water in San Francisco had driven the Alaska Packers' association to develop water in Oakland and transport it in barges to the company's ships anchored off the local wharfs.

It developed that the city pays a rate of \$1.50 per 1000 gallons of water, while transient steamship companies are charged much more.

The rates in Seattle and Tacoma are \$15 for a ship, no matter what amount of water is used. In San Pedro the rate is \$1 for the first 1,000 gallons and 25 cents for each additional 1,000 gallons. Oakland charges 50 cents per 1,000 gallons.

There rates were quoted by Attorney Daniel Ryan for the board of harbor commission. He said the high rate discouraged shippers from landing at this port, and urged that the rate committee fix the price for all ships at \$1.50 per 1,000 gallons.

For contractors along the waterfront he asked that the rate be reduced from 14 cents for enough water to mix a barrel of cement to seven eighths of a cent.

J. J. Dwyer, chairman of the harbor commission, said the state had to pay between \$6000 and \$7000 each for enough water to mix cement for projects Nos. 30 and 32.

He referred to the charge of \$1.00 made against the steamer Cleveland last week.

Contractors testified to the rate charged them for water to mix concrete.

The investigation was continued at a further date to be announced by chairman, Andrew Gallagher.

Mayor Rolph was present, but to no part in the examination.

PARCEL POST GROWING.

WASHINGTON, February 7.—Approximately 40,000,000 parcel post packages were handled in January. At the five largest postoffices, 19,265,433 parcels were handled in the first three operations of the new system, and the business of the last two weeks exceeded that of the first two weeks more than 5,000,000 packages.

Chicago exceeded all other cities in the number of parcels handled, its total being 4,163,153. Other cities reported as follows:

New York, 3,519,788; Boston, 1,151,400; Philadelphia, 1,035,000; St. Louis, 918,000; Cleveland, 879,768; Brooklyn, 830,000; Detroit, 510,072; Cincinnati, 413,811; Kansas City, 357,102; Baltimore, 328,500; Minneapolis, 300,000; San Francisco, 290,000; Buffalo, 264,006; Washington, D. C., 222,953; Milwaukee, 219,940; Pittsburgh, 207,076; Atlanta, 183,000; St. Paul, 181,056; New Orleans, 166,300; Seattle, 155,692; Indianapolis, 152,900; Dallas, 130,200; Louisville, 114,000; Denver, 110,396; Richmond, 100,000; Nashville, 62,270; Jacksonville, 42,960.

62,045 SURPLUS CARS.

CHICAGO, February 11.—A statement recently issued by the American Railroad Association shows that there were 62,045 surplus cars throughout the country on February 1st, as compared with a surplus of 53,250 cars on January 15th last. There was a total shortage of 24,7 cars on February 1st, as compared with a shortage of 24,791 cars on January 15th.

CONSULTING EXPERT

Heating, Ventilating, Electrical Wiring, Plumbing, Etc.

Expert Architects assistant for laying out work as above. Highest references.
Formerly Mechanical Engineer for State Department of Engineering also Bureau of Architecture of San Francisco.

Moving pictures of the Balkan war
convey interesting impressions of life
and customs of the far East. And to
judge from the pictures that are shown
there can be but one result of the war
and that is the defeat of Turkey. To
begin with every peasant and person
of all the allied countries that have so
long felt the tyranny of Turkey seem
imbued with the idea of freeing them-
selves from the yoke and are eager to
sacrifice everything for the cause. An
intense and fervid patriotism pre-
vades them. And they are equipped
with modern implements of war and
are manned and officered with com-
petent authority.

On the other hand the Turkish
soldiery seems to represent the ideas
and customs of 500 years ago. They
appeal to the same religious fanaticism,
they use the same methods of convey-
ing supplies. They dress in the same
fashion. While they are armed with
modern implements of warfare the old
creeds are outworn and the govern-
ment and the army seem to be in a
state of decrepitude and decay.

And it is only the hand of destiny.
For the Turkish nation has long been
a barrier in the path of progress. It
has been a blot on civilization. The
time has come for it to be relegated to
the place where it has long belonged
and the allies have seized the oppor-
tunity.

The plan for the control of the Sacra-
mento river flood waters are elaborate
and embrace a gigantic undertaking.
According to the explanation
given by Major Cheney of the United
States Army the cost is estimated to
be 33 million dollars. And the levees
to be constructed and the excavations
to be made will reclaim 400,000 acres of
land. And this land will be river sedi-
ment as rich as the valley of the Nile
and of unknown depth. It is said that
this scheme involves the handling of

more dirt and more excavation than
has been required in the Panama canal.
This statement alone conveys some
idea of the magnitude of the scheme
that is to be taken up by the state and
nation in conjunction.

Smoke and soot are becoming objects
of attention not only as a matter of
sanitation and nuisance but also as a
matter of industrial waste. Chemists
and experts who have made analyses
and estimates as to the amount of ma-
terial that goes up in the form of
smoke in the great chimneys of the
United States alone state that at least
600 million dollars worth of property
is wasted by this process every year.
And this is a general estimate of
damage and loss caused by soot and
gases that destroys vegetation, deface
buildings and smudge and corrode
things generally. It is estimated that
there is an annual coal loss of 300
million tons.

The United States Bureau of Mines
has just established in San Francisco
a special laboratory for the purpose of
studying the smoke given off by copper
smelting plants. The great chimney
constructed at Coram in Siskiyou
County for the purpose of carrying off
the fumes that come from the copper
smelters has had to be abandoned and
is now crumbling into dust. The
smoke that came from the smelter de-
vastated the vegetation for miles around
so that the whole copper smelting busi-
ness in that district had to be abandon-
ed.

The smoke inspector of Chicago es-
timates that the annual damage caused
by the soot and other ingredients of
smoke in that city alone amounts to
50 million dollars.

Methods for control of smoke and the
precipitation of matter contained
therein have been invented at various
times and some of them have stood the
tests of practical operation. The
throwing off of visible smoke may be
stopped by burning the coal in a
proper way; or by converting it into
gas and then burning this gas; or by
precipitating out the soot by electricity,
according to the process invented by
Doctor Cottrell of the Bureau of Mines.

The most injurious constituents of
the invisible smoke are sulphur dioxide
and sulphuric acid. These substances
have an injurious effect on trees. The
loss to the forests in the vicinity of the
smelters of the West amounts to many
millions of dollars. No method has as
yet been devised that would precipitate
these gases or even the compounds of
copper that go up the chimneys. The
construction of great chimneys from
the mountain tops have done much to
mitigate the evil but no remedy has
yet been found to do away with the
deleterious gases.

There is an editorial on Wilson's "New Freedom," which takes as a means of settling business policies without any business experience.

Certainly the methods of modern business as modern investigations have shown them to be are not commendatory and it requires no vast experience in anything to see that they are radically wrong. There is a certain class of people who conduct modern business that imagines all wisdom is lodged in that particular class. When it comes to a showdown the great sum of their wisdom is in engineering the steam roller. And when it comes to an equal footing and open competition they are ordinary plugs like the rest of us. If Wilson's heart is in the right place the people will trust that he has brains enough to run the business.

Battles and Holidays seem to occupy the attention of the Mexican people most of the time. It is said that there are more than 500,000 people in the City of Mexico or that that is its population at the present time. With battles raging in the streets the non-combatants and the innocent bystanders have certainly stood a good show of getting shot. Certainly it is a great travesty on the peace conferences and modern civilization to see fighting in the streets of a modern capital with attendant loss of life and property. It is to be hoped that the resignation of Madero may be followed by comparative peace, or that some dictator may arise who is able and powerful enough to hold the irresponsible and shiftless population in subjection.

A recent consular report has an interesting account of a new rubber plant that is said to produce a rubber that compares favorably with the products of the rubber tree and in explanation of the process has this to say:

"Plans are pending for an extensive cultivation in the Bahama islands of the rubber vine known as *cryptostegia grandiflora*. A \$500,000 syndicate having this object in view was organized several months ago in Boston, and about 1100 acres of land have been purchased near the city of Nassau, in the island of New Providence. A large number of shoots to be planted over this land will shortly arrive from Mexico, and special machinery for extracting the rubber and fibrous by-products by a secret process has been ordered from the United States.

It is understood that approximately 5000 rubber vines will be planted to the acre. After six months' growth the rubber vine is said to be twelve to thirty feet long. The vines will be cut in about twelve months, when there will be presumably two pounds of shrub to the plant as a minimum, yielding about 2 per cent of rubber, or 200 pounds of rubber to an acre.

The rubber juice is contained chiefly in the lactiferous ducts of the bark, but to some extent also in the wood of the stem; in fact, the entire plant contains a certain amount of rubber. While the process of extraction is secret, yet in the main it appears that it is analogous to the production of sugar from sugar cane. The rubber vine being ground up and the juice extracted as from sugar cane. Samples of rubber thus obtained from the rubber vine are

estimated as worth in the London market within 8 cents a pound of the price of the best Para rubber."

Rubber has become such an important factor in the commerce of today that a new supply is in much demand. If this new process serves to increase the supply it will contribute materially to a product that has become a modern necessity.

For once in its life the Chronicle is coming out in double leaded editorials denouncing the action of the Railroad officials in unmerging the Union Pacific and the Southern Pacific and insisting that it is the duty of the Railroad Commission to prevent its consummation. What is the cause of this change of attitude and championing of the people's cause is hard to determine unless it is that the proprietor's personal interest is concerned in the matter.

The indictment of the heads of the Western Fuel Company and the sentencing of the heads of the National Cash Register Company to terms in prison is bringing public attention to the fact that practices have been employed for a long time by corporations that merited such punishment if the courts and public prosecutors had sought to do justice under the law. No better evidence could be given for the justice of the public agitation in favor of the recall of the judges and the general demand that has been promulgated by all progressive leaders that all men be equal before the law.

The dynamite cases and the conviction of many of the labor leaders for the conspiracy has brought to light one phase of the industrial situation. The conviction of conspiracy in restraint of trade in the prosecution of the National Cash Register people bring to light another phase. And if the history of Standard Oil and other corporations have been read aright the heads of that corporation have not only been guilty of violation of the antitrust laws, but have used every method known to crush competitors, not even stopping at crimes even of which the dynamiters stand accused.

But on account of political control and the control of courts the heads of these corporations have gone unpunished and have grown to be multimillionaires. So also with the Meat Trust. When that greedy concern sold to the United States government, through grafting officials, the tainted meat that caused the loss of so many lives during the Spanish war the trials of the guilty parties run through a long series of years and were finally dismissed. The crimes of which they stood accused was even worse than that of the men who blew up the buildings with dynamite and killed innocent persons. For the dynamiters at least had the excuse that they were furthering a cause that they believed to be just while the meat barons had the one need to add to their already enormous wealth. Yet the people who applaud the conviction of the dynamiters in many cases approve the acquittal of the Meat Barons.

The action of the Idaho Supreme Court, the sentencing of Editor Nelson of the Kansas City Star and other acts of the courts is crystallizing public opinion upon this subject for which the Progressives have fought.

John L. McNab, the present U. S.

District Attorney, is proving faithful to his trust. He has resurrected many suits that have lain dormant for years. His prosecutions of the grafters has been straight-forward and clean. The Western Fuel Company will no doubt find that it is up against a real prosecution and the public will have a chance to determine of what kind of material the judges of the federal court in San Francisco are composed.

The Railroad Commission has become famous throughout the length and breadth of the land as an effective commission to whom all persons whether they be corporations or aggrieved parties could go and get substantial justice. Even the corporations who have been deposed and robbed of their special privileges can utter no valid objections against the proceedings of that body. The only objection that has been urged against these reforms is that they are extravagant and expensive. In regard to what people generally think of this the following from the Fresno Republican is in point:

Reform government is denounced as "extravagant" and "expensive" because some of its departments cost more for doing work than their predecessors did for loafing on the job. The present railroad commission, for instance, costs a lot more than its predecessors. Also, a motor truck costs more to run than a wheelbarrow. But it is also a much more economical method of transporting goods.

These remarks are suggested by the fact that among the hearings by the railroad commission, in the immediate future, are ten San Joaquin valley cases. That is more cases, affecting this immediate district, in the next two or three weeks, than were heard by all the previous commissions combined, for thirty years. Is it worth the price?

Speaking of freak bills that have been introduced into the legislatures from time to time the Scientific American has this to say of a recent measure that has been introduced into the national congress and has been the subject of extended mention in the magazine sections of the Sunday papers:

"It is simply amazing to learn that a bill has been introduced into the House of representatives seeking for Government aid in the preliminary work of building a dam or jetty, from 250 to 500 feet in depth and 200 miles long, reaching out into the broad Atlantic from the coast of Newfoundland. Of all the foolish bills that have found their way into the halls of Congress, surely this is the most conspicuous. It is the modest purpose of the promoter of this most modest proposal to divert the Gulf Stream, and thereby bring about sweeping climatic changes in the United States, in Greenland, and over various widely scattered areas of the habitable and uninhabitable globe.

We have been asked to comment on this bill, and we do so.

The Scientific American expresses the hope that, in the consideration of the scheme, the gift of imagination will be so mercifully tempered by the saving grace of humor, that the measure will be given an early burial, with such obsequies as, in the opinion of the House, are becoming to its dignity and importance."

History of the General Contractors' Association and Amalgamated Bodies as Told by the Present Secretary.

By W. E. Hague, Secretary.

The General Contractors' Association, while operating under that corporate name since April 6th, 1911, is really an amalgamated body, composed of the old Builders' Association and the Associated General Building Contractors.

In order that its history may be logically brought down to date we propose to give you first of all a history of the Builders' Association, which was the oldest organization of the two bodies forming the present association.

Early in the year 1885 a number of the more prominent San Francisco contractors commenced agitating the project of a Builders' Association, modeled on lines similar to those of the Eastern cities, modified to meet existing California conditions.

After a number of informal meetings a temporary organization was effected on the evening of May 6, 1885, at St. Andrew's Hall, 218 Post street, eleven gentlemen, C. C. Terrill, Wm. Plums, T. H. Day, J. G. Day, A. Jackson, C. Chisholm, R. Smilie, J. Mahony, R. McCann, T. C. Riddell and J. R. Wilcox, being present and paying the assessment levied.

At the following meeting on May 13th permanent organization was effected, a general discussion relative to the objects of the Association ensued, and officers were elected as follows: Robert Smilie, President; J. R. Wilcox, Vice-President; J. G. Day, Recording Secretary; E. Owens, Financial Secretary; J. Mahony, Treasurer, and the following committee on Constitution and By-Laws was appointed: Messrs. Mahony, Terrill, Riddell, McCann, Farrell, Moffitt and Moore. A committee was also appointed to invite the co-operation of Oakland contractors.

On June 3rd, after a number of reports from the committee and a number of alterations and amendments, the Constitution and By-Laws were adopted as a whole, and the Builders' Association of California commenced its career of usefulness. At this meeting the Committee on Hall reported that it had secured two rooms in the Academy Building, at 330 Pine street, which report was adopted. After a ballot, Messrs. Fletcher, McKillohan, Knight, Thompson, Day, Gray and Terrill were declared the Executive Committee elect, and were on motion instructed to fit up the rooms with the necessary furniture, stationery and boxes for members.

On motion of Mr. Terrill, at the meeting of July 22nd, nominations for officers were opened, and the following were elected: Robert Smilie, President; J. R. Wilcox, Vice-President; H. S. Gray, Recording Secretary; E. Owens, Financial Secretary; J. Mahony, Treasurer, and Messrs. Fletcher, Terrill, Moore, Jackson, Moffitt, Riddell and Lang to the Executive Committee.

At the meeting on September 9th, officers were nominated for the ensuing year, who were elected on January 27, 1886. After that time the annual elections were held in December. According to the report of the Treasurer, C. P. Moore, bearing date of August 1, 1886, the Association was in a prosperous condition, and had the respectable sum of \$303.16 cash balance. During the little over a year of its existence it had accomplished much good work, had been instrumental in correcting many disagreements between owners, architects and contractors, had devised a form of contract, to a great extent regulated the proportion of bond to the cost of structure, employed counsel's advice and laid a fine foundation for the future.

In 1887, in a circular letter issued by the Builders' Association, was an excerpt from Section 2 of its Constitution: "Its objects shall be to encourage a more intimate acquaintance and cultivate a feeling of friendship among its members, to make them better acquainted with the wants and necessities of the building business; to arbitrate and settle disputes, if any may arise among the members, and generally to advance and protect their business interests as contracting builders."

The issuance of this circular had its good results as shown by an increased membership and the promotion of a feeling between contractors and material men that the best interests of both would be conserved by the success of a strong central organization that would carefully and responsibly guard the rights of owners, building contractors and supply houses.

In July, 1887, the cash on hand and no bills due was \$1,147.46. In the same month the following resolution was carried by a rising vote: "Moved and seconded that when a member withdraws or is expelled for non-payment of dues, every material and millman who signs the agreement of this Association shall be notified of that fact by the Financial Secretary." At the same meeting the Executive Committee was ordered to have building contracts printed, and by a vote of the Association in September of the same year, it was decided that these were the only contracts that its members could sign.

In June, 1892, the Association moved to larger quarters at 17 City Hall avenue, which were handsomely fitted up.

Between 1887 and 1893 this Association grew and prospered, but as the exchanges of other building trades had consolidated and had made overtures to the Association to join with them, early in the year 1893 the question of amalgamation was discussed. January 30th a committee to consider and report on the subject of amalgamation was appointed.

On July 24, 1893, a motion was made to donate \$1.00 to the Midwinter Fair. President Jackson decided that the motion need not lay over for one week. He was sustained and the resolution passed unanimously. At the meeting held July 31, 1893, a report was received from the Joint Committee on Consolidation, which was satisfactory to the Association, and was acted on favorably by a unanimous vote, and on September 1st the Association removed to 16 Post street, the Exchange headquarters, and the union was completed, the Association having its regular weekly meeting, however, on Monday at 1:30 p. m. and preserving its own identity in every respect.

In the fall of 1896 agitation towards securing separate headquarters for the Association commenced and was actively discussed during the winter, and in July, 1897, a committee was appointed to procure new quarters, which recommended the old Standard Theatre Building, 315 Bush street, as the most advantageous of those offered. The report of the committee was concurred in and on October 1st the Association moved to the quarters, which it occupied up to the fire of 1906.

The feeling of the members that as the Builders' Association was a body of complete contractors, the amalgamation with the Exchange was a mistake and injurious to contractors and owners alike, and endless disputes

is to whose responsibility began and ended were constantly ensuing. The weeding out of all persons who proved either by mishap or want of ability that they were unable to transact an honorable business increased the Association's prestige and the reputation of the individual members.

The entrance fee, which was at first only ten dollars, was gradually increased until it stood at one hundred and forty dollars, and in addition was the pro rata of the new member towards the bond fund for the exclusive use of the Association's members.

The Association was located over nine years on Bush street—busy years, too, for its members, for as San Francisco grew so did the building trades, and for the last few years before the fire especially there was a large and ever-increasing number of residences, hotels, apartments, stores, factories, etc., built, offering employment to an army of men.

Consequent to this growth of the city there was great activity among the Association's members and a large increase in its membership roll, not only of active, but of associate members, the later increasing at the rate of ten a month during the summer and fall of 1905. This was not only due to the natural business increase, but in a large proportion to the efficient management of the Association by its officers and Executive Committee, who were men of experience and probity. The Association commanded the confidence and respect of every one.

After the fire of 1906 the Association secured temporary quarters on the northeast corner of Grove and Fulton streets, where they were located for about two years. As the city grew up once more it was decided that it was necessary to move to a suitable location down town, and on May 15th, 1908, quarters were secured and occupied at 402 Kearny street. In the meantime, however, the Builders' Exchange, having moved down town sometime previous, a considerable percentage of the membership had resigned and withdrawn. From then on to 1911 the old Association was unable to get back its former members and associate members, and the quarters at 402 Kearny street being rather small and somewhat out of the way, were probably the chief reasons that the organization could not continue to progress.

In the meantime a large number of the general contractors who were members of the Builders' Exchange, a few who were members of the Builders' Association and some who were members of neither body, decided to form an individual association of general contractors only the need of such an organization being apparent to all. After several preliminary meetings, on April 6, 1910, the Associated General Building Contractors was therefore organized and a constitution and by-laws adopted, the original membership being composed of 21 of the largest and most responsible general contractors in the city. This organization elected Mr. F. H. Masow as its first President, Mr. Robert Dewar, Vice-President; Mr. C. J. Lindgren, Treasurer, and Mr. Wm. E. Hague, Secretary, and secured an office in room 240, Pacific Building, with the use of a handsome meeting hall on the same floor. Bi-monthly meetings were held on the second and fourth Thursdays of each month, and the Board of Directors met almost every week.

The men who formed the Associated General Building Contractors were determined that a progressive organization should be built up on legitimate lines, which would eventually become a controlling factor in the building industry of San Francisco.

Owing to the excellent business management and to the progressive policy of the prominent men identified with it the association increased its membership in the

course of a year to 71, who were all men carefully selected for their experience as general contractors and their financial standing in the community. At the time of the formation of the association an admission fee of \$50 was fixed, and paid by all, and every member making application thereafter paid the fee.

Mr. F. H. Masow, as President, was an indefatigable worker, and the entire membership of the Board of Directors gave him its hearty support.

During the short time of its existence the Associated General Building Contractors did much to improve conditions for the general contractors and to protect their interests. The strike of the Hodcarriers' Union, which bid fair to tie up the entire building business of San Francisco, was handled in a manner never before dreamed of by the contractors. The Masons' and Builders' Association and the Contracting Plasterers' Association cooperated with the Associated General Building Contractors, and a strike committee of nine was appointed, being composed of three members from each association, with Mr. C. A. Day as Chairman. After the men had been out ten days and every plastering and bricklaying job but three in the whole city had been tied up, the Building Trades Council requested a meeting with the committee and receded from their demand for a reduction in working time, and ordered the men back to work.

During the successful year of its operation the Associated General Building Contractors adopted many resolutions of great importance to builders, took a leading part in the successful campaign for the new lien law, which was finally adopted by the State Legislature in Sacramento at its winter session of 1910-1911, and accomplished many other things worthy of note.

Frequent efforts were made during the year to draw in many of the members of the Builders' Association but these men, while appreciating the merit and progressiveness of the new association, decided that they could not equitably belong to both organizations, and therefore refused to join. However, there was a distinct desire on the part of both associations to get together, and in the spring of 1911 definite plans began to shape for the amalgamation of the two bodies. It was finally decided after many conferences between the committees from the two associations that the old Builders' Association should disincorporate and return its funds to its members, turning over its several thousand dollars worth of furniture and fixtures to the Associated General Building Contractors in lieu of the admission fee to be paid by the members. It was also understood at the time of this amalgamation that the amalgamated bodies should incorporate under some new name to be adopted later.

Under the terms of an agreement signed by the officers of both organizations the Associated General Building Contractors took over the headquarters of the Builders' Association on March 1, 1911, and on April 6, 1911, incorporated as a stock corporation under the name of "General Contractors Association," with an authorized capital of \$125,000, divided into 250 shares of stock of the par value of \$500 per share. A new Board of Directors was elected, with Mr. C. A. Day as President; Mr. Charles W. Gompertz, Vice-President; Mr. C. J. Lindgren, Treasurer, and Mr. Wm. E. Hague, Secretary. At the stockholders' meeting of April 6, 1911, it was decided to assess each stockholder \$50 as an original stock subscription and to assess them on all work done an amount of one-tenth of 1 per cent on the contract price of a job.

During the last eighteen months from the percentage tax receipts a fund dividend of \$25.00 has been declared by the Board of Directors in February and August. These dividends are not paid out in cash but are credited on the stock certificate, making the value of the certificate at this time \$125.00.

As part of the amalgamation plan it was intended that new headquarters commensurate with the size and importance of the new organization should be located as soon as possible, and for this purpose a New Headquarters' Committee was appointed without delay. Numerous locations were considered in various portions of the downtown district, and after this important question was considered at a number of stockholders' meetings it was decided to accept a proposition of the Sharon Estate Company to erect a nine-story, class "A" building on the northeast corner of New Montgomery and Jessie streets, and to lease to the Association the ground floor, the mezzanine floor and the basement of said building. On October 26, 1911, a lease for these new headquarters was finally signed, and shortly thereafter the plans were out for figures. Only stockholders were allowed to figure the work, and Messrs. Lange & Bergstrom having submitted the lowest estimate were awarded the general contract for the entire building at a price of \$258,504. Work on the new building was started at once, and as it progressed to completion the entire building business has been surprised at the magnificence of the headquarters secured. They are probably second to none in the United States, and are a monument to the progressive management of the organization which is to occupy them. There can be little doubt in the minds of observers that the General Contractors' Association after occupying its new headquarters will shortly have the largest membership ever attained by any builders' organization or builders' exchange in this city.

The annual report of the Secretary showed that on April 6, 1912, there were 108 stockholders and 310 associate members. This membership has now increased on March 1, 1913, to 124 stockholders and 420 associate members.

Since the incorporation of the General Contractors' Association the standing of the organization has steadily improved, and its progressive management has done much to open the eyes of the stockholders and the associate members to the possibilities of co-operation through a good organization managed on strictly business lines.

All difficulties with any Union are now at once referred to the Secretary's office, and in no case has a strike or boycott been declared on a job of any stockholder of the Association. Such matters are taken up by the Secretary and equitably adjusted with the Building Trades Council, which latter body has shown a sincere desire to co-operate with the builders and avoid trouble. It is an unwritten law of the Association that no job of any stockholder shall be allowed to be struck. The advantage of dealing with the Unions through an effective organization has been much appreciated, and while the peace has been kept the dignity of the employer at all times has been maintained. Numerous demands of various Unions have been refused and withdrawn by the Unions.

The support and recognition which the architects of this city have been increasingly giving to the Association and its work are matters worthy of note, and as time progresses this support and co-operation should be increased, and would undoubtedly be of benefit not only to the builders but to the architects themselves, who have suffered from the bad practices which have been allowed to creep into the business in times past.

A feature of the present plan of operation, and one worthy of note, is the co-operation between the general contractor, specialty contractor and material man, now firmly established through the medium of the Building Trades Employers' Association. That organization was formed by Secretary Hague, acting under instructions of the Board of Directors of the Associated General Building

Contractors, and is composed of eleven associations, representing all crafts of the building business, each represented by three delegates. This central body, with offices at 533 Pacific Building, Secretary George S. McCallum, and a meeting hall in the same building, has done much to protect the building industry from the encroachments of the Unions and the predatory interests of owners, etc. Such important matters as the new compensation laws, and other bills affecting employers, are handled by this central body in co-operation with other civic and public bodies of this city, and it is doing much to bring the builders to the front. This organization, it is firmly believed, will in the course of time become a leading factor in the building industry of this city. It establishes a proper medium between all branches of the building business, and while the associate membership of the General Contractors' Association has no vote in electing the Directors of the body, they are nevertheless represented and affiliated with the general contractor through this Building Trades Employers' Association. Experience in the past has proven that an organization where every man representing all lines of the building industry has a vote, and which only holds an annual and semi-annual meeting, can accomplish little beyond the management of a general headquarters; and the Builders' Exchange has, therefore, proven somewhat of a failure in properly representing the building industry of this city.

With the present excellent business management of the General Contractors' Association, the strong lines on which it is organized and the magnificent new headquarters which it occupies, there is no reason why every builder, specialty contractor and material man should not belong, and we may reasonably look forward to a period of prosperity unexcelled by any association or organization of builders in the United States. The fact that the assets of the Association have grown from \$3,500 on April 6, 1911, to the substantial sum of over \$93,000 on March 1, 1913, is in itself a guarantee to the public that this is a responsible body, properly financed, and one which can do much to place the great building industry of San Francisco on a footing with other organizations of merchants, etc.

The building industry is today the greatest industry in San Francisco, gives employment to more men than any other industry, is the most important factor in the rebuilding of the city, and yet, in the past, the commercial bodies of this city have never given it the consideration to which these engaged in it are entitled. It is the object of this Association to elevate the building business and place it on a higher moral and financial plane than heretofore to establish the builder as a responsible man of business and to further his interests at any and all times.

THE ATTORNEYS FOR THE ASSOCIATION.

A few words about Messrs. Aitkin & Aitkin, the attorneys for the Association, are not amiss at this time.

When it was proposed to incorporate the General Contractors' Association, Messrs. Aitken & Aitken, being the attorneys for several other large organizations in this city and having a very extensive experience on the building laws of the State, were selected as the firm best qualified to act as attorneys for the Association. The careful manner in which the by-laws of the organization were drawn up by them has been one of the reasons of its enjoying so great a success. Their legal advice on the various important legal questions which have come before the Association since its incorporation has proven of the best, and has kept the Association from becoming involved in any legal difficulties.

San Francisco's Building Activities, To-day, Tomorrow and Yesterday --- A Brief Review With Illustrations.

That the building business, together with its kindred lines, is an important factor in San Francisco's industrial life has long been a recognized fact by all well informed people, but just how important a part this line of industry has played in the city's prosperity during the past ten years can best be shown by the following table of building totals as compiled from the files of the Daily Pacific

all kinds in the City and County of San Francisco by the above mentioned sources can be but roughly approximated. From such records of the period as are available at this time, and which are confined to the records of the Federal Government, the City and County and the State, however, it is safe to say, that at least two hundred million dollars more found its way into the various channels of commerce

INFANTRY TERRACE AT THE PRESIDIO

Builder:

1903	\$14,984,514
1904	16,916,118
1905	20,111,861
1906	39,254,467
1907	50,496,499
1908	35,128,651
1909	30,411,196
1910	22,873,942
1911	24,431,268
1912	26,179,116
Total for ten years.....	\$280,787,632

and labor through this source.

No kindred line of industry so affects the commercial life and general prosperity of San Francisco as does the building business; a like amount of money sent through any other of the commercial channels during the same period of time would have contributed far less to the general prosperity of the community. This is due to the fact that an exceptionally large per cent of the total of each construction enterprise is paid for labor and almost at once finds its way into the hands of the city's merchants. During the years of reconstruction following the great fire and dating from 1906 to 1909, years when San Fran-

NEW ARMY TRANSPORT DOCKS

A grand total of \$28,787,632 spent in actual construction by private capita' alone in the city and county of San Francisco during a period of ten years. These figures do not include any of the enormous construction projects carried out during this period by the United States Government, the State of California, the Municipality or the many private corporations which do not file their building contracts with the County Recorder. No authentic records of such work have been kept during this period, and the total amount of money expended on construction of

cisco's building totals ran from thirty million dollars and over to fifty million dollars and over, this fact was so thoroughly demonstrated that the city was said to be "living off of the building trades." A decline of about eight million dollars in the year 1910 had a marked effect, which was noticeable in all lines of business. Since the year 1910 each year has recorded a gain over its predecessor of two million dollars. At the close of 1912 the year's work showed a total of \$26,179,116, and all lines of business reported a prosperous year as a consequence.

CIVIC CENTER PLAN

UNITED STATES SUBTREASURY

MASONIC TEMPLE, DESIGNED BY BLISS & FAVILLE

To look backward ten years is not a hard task and one that can be accomplished by nearly everybody in the building business in San Francisco, but to compile a record of San Francisco's building activities during that period is well nigh impossible, even a general survey of the subject proves difficult. Records above quoted show the extent of private endeavor and in a most casual way an effort will be made to show the enormity of the work undertaken by the Government, State and City.

Under the direction of the various State Boards of Harbor Commissioners during this period San Francisco's water front as it stands today has been built. The city now has a total of thirty-five substantial piers, nearly all constructed of reinforced concrete and each represent-

but a fraction of the part taken by the State of California in the upbuilding of San Francisco.

The Constructing Quartermaster's Department at Fort Mason has played a silent but very important part in the Building Drama of the past ten years. During the greater part of that time this branch of the War Department has been in charge of Lt. Col George McK. Williamson, under whose direction has been accomplished such undertakings as the construction of the new Transport Docks at Fort Mason, the installation of central lighting and heating systems in the Presidio, Fort Winfield Scott and Fort Baker. The Presidio of San Francisco has been practically rebuilt during this period, while the present post known as Fort Winfield Scott is an entirely new creation

6132. STANDARD OIL BLDG., DESIGNED BY BENJ. J. MC DOUGALL

ing a cost of a half million dollars, in actual operation. Besides these there are eight ferry slips and other dockage facilities. Under the administration of the present State Board of Harbor Commissioners, one of the most efficient bodies, in spite of the adverse criticism of the daily press, contracts have been awarded for the construction of four more substantial piers, the cost of which will total nearly two million dollars. During the period above mentioned the Belt Line Railroad has been constructed and thousands of feet of sea wall have been completed. Such work as noted, while the most important, represents

as far as buildings and equipment are concerned. The Presidio, including Fort Winfield Scott, is considered one of the most modern military posts in the United States. A view of "Infantry Terrace," one of the most unique features of the reservation is shown, in which can be seen a number of the representative new buildings. The construction of the Letterman General Hospital, Commissary warehouses, Quartermaster stables, numerous officers' quarters, modern barracks, miles of road work and sanitary sewers are among the most important of the achievements which stand to the credit of the Constructing Quar-

terminator's Department. Of the work of the various other departments of the Government undertaken in this city much might be said but space forbids. The New Customs House is regarded as a masterpiece of construction and a work of architectural beauty. Since the opening of the new year a contract has been let for the construction of the Subtreasury building which will add another splendid architectural feature to the city.

NEWHALL BLDG. LEWIS P. HOBART

When the City and County of San Francisco came to appraise its loss by fire and earthquake it found little of the former city's holdings in tact, and such of its buildings as did escape complete destruction were of comparatively small value and located in outlying districts. Confronted with a problem of how best to set about building a new city San Francisco started within a few months after the disaster by organizing a Municipal Department of Engineering and Architecture, both of which were placed under the direction of the Board of Public Works. It has been through this department that all important municipal work has been carried on. The work has been enormous and has embraced problems in every known field of engineering and architecture and has called forth the best efforts of many experts. The vast majority of the work has been well done and stands as monuments to those who planned and directed it. Some mistakes have been made of course, but as a whole the municipal construction in San Francisco compares most favorably with that in any other city of the world. Some of the most important features of this work includes such undertakings as the construction of a practically new system of sanitary and storm water sewers, reconstruction of nearly all street work and sidewalks. The enormity of such a task in a city the size of San Francisco can easily be appre-

iated. Perhaps the construction of the high-pressure salt water fire protection system which has extended over the years since 1906, stands as the greatest of the many accomplishments of the Engineering Department. No other city has a system of such magnitude. It embraces miles of special pipe, two pumping plants, the Twin Peaks' Reservoir and hundreds of smaller reservoirs under the intersection of the principal streets. No section of the city has been neglected, and several recent experiences in different parts of the city have proven the worth of the system. A municipal railroad became a reality with the completion of the Geary street line, and plans are now being prepared for extensive additions to the system, which will aid in carrying the people to the Exposition grounds in 1915. Foremost of these extensions is the proposed Van Ness Avenue line. Many other vast undertakings might be placed to the credit of the Engineering Department of the city during the past few years, but many are too well known to the people to need mention.

Under the direction of the Board of Public Works the Department of Architecture has designed new buildings for nearly every school in the city. The San Francisco

ALASKA-COMMERCIAL BLDG. WARD & BLOHME

Hospital nearly completed, is one of the largest and most modern institutions of its kind in the United States. A new Class A Hall of Justice has been completed and a City and County Jail, besides extensive work at the Relief Home Tract and in various other parts of the city. Under this department has been developed a Civic Center scheme costing eight millions and which will be undertaken at once. Plans of Architects Bakewell & Brown for the four

DAVID HEWES BLDG. REID BROS.

THIRD & TOWNSEND DEPOT

and a half million dollar City Hall are nearing completion, and contracts will be let shortly. In the same connection may be mentioned the approval of plans for the Municipal Auditorium which is to occupy a site in the Civic Center.

Of the wealth of private construction undertaken or projected the following which are illustrated here are distinctly representative. The Masonic Temple, designed by Architects Bliss & Fayille, and now nearing completion at the corner of Van Ness avenue and Oak street, cost in the neighborhood of a million dollars and is one of the most beautiful structures in the city. In the rear of this building and facing Oak street the Young Men's Institute will shortly start construction on a \$150,000 building devoted to the purposes of the organization. Plans for this work are being prepared in the offices of Architect of Will D. Shea.

Many new commercial structures have appeared in the business district of which the new ten-story office building now being erected at the northwest corner of Bush and Sansome streets for the Standard Oil Company is typical. This building, designed by Architect Benj. G. McDougall is of the Class A type, and when completed will cost nearly \$500,000. The structure is fireproof and will be occupied by the owners, associated companies and offices. Another ten story office building is to be erected by Leibes and Meyers at the gore of Market and Sutter streets, contracts for which have been let in the offices of Architects Havens & Toepke, while property in the same neighborhood, at the corner of Market and Ecker streets has recently been improved with a four-story Class A commercial building by the Crocker Estate, Lewis P. Hobart, Architect. Further down into the financial district stands the Newhall building, a ten-story office structure designed by Architect Lewis P. Hobart. The Alaska Commercial Building, near the Newhall, is a somewhat older, but very well known commercial building which was designed by Architects Meyers & Ward. Further up Market street at Sixth, and at the present time marking the outskirts of the office building district stands the David Hewes Building, a fourteen-story structure designed by Architects Reid Bros. The Grant Building, one block further up Market street, is the last

of the office buildings on upper Market street.

Whatever the final outcome of the Southern Pacific Co.'s location of a main passenger depot will be it is certain that but a few months will lapse before construction is undertaken on a new terminal at Third and Townsend streets. This work will include a decided change in the company's trackage, the addition of several more tracks and the removal of the present freight houses to

PACIFIC UNION CLUB, WILLIS POLK

a point further from Third street. The new depot is to be in the California Mission style, the building alone costing in the neighborhood of \$100,000.

No city in the west has finer private clubs than has San Francisco, and many of these buildings have been erected within a few years. The new home of the Pacific Union Club, occupying the crest of Nob Hill, is considered one of the city's finest pieces of architecture. The building was designed by Architect Willis Polk. The site commands a wonderful view of the entire city, bay and the Alameda and Marin County shores. The building is constructed of brown stone and the interior is finished

BOHEMIAN CLUB, LORING P. RIXFORD

in the most artistic manner. The Bohemian Club, located at the northeast corner of Post and Taylor streets, is a three-story and basement Class A building, designed by Architect Loring P. Rixford.

A new home is being erected for the London-Liverpool and Globe Insurance Company in the heart of the financial district on California street, which will cost between \$150,000 and \$200,000. Bliss & Faville are the architects, and have selected a classic design for the structure. The building will be practically a two-story structure with a complete steel frame and exterior walls of marble and granite. During the passed two years many of San Francisco's leading banks and financial houses have constructed new buildings, mostly of the monumental type, and have added greatly to the beauty of the city's architecture.

Hale Brothers' new department store at the southwest corner of Fifth and Market streets, typical of this type of building in San Francisco, is a splendid six-story Class A structure designed by Reid Bros.

The following report of the contracts so far entered into by the Panama-Pacific International Exposition Co. for work on the Exposition grounds shows better than anything else can how that interesting undertaking is progressing:

Reclamation of Harbor View lands and Presidio completed. More than 1,500,000 cubic yards of bay sediment used.

Construction of sea-wall completed along waterfront of the grounds.

About 90 per cent, or two miles of site fenced.

Service building, first Exposition structure, completed and occupied.

The greenhouses and potting houses for Exposition shrubbery and plants completed.

Asphalt roadway through Fort Mason reservation built.

Four oil tanks have been removed, besides scores of smaller structures.

Gas retort house removed.

North service sewers, 3,000 feet long, completed.

Sanitary and storm sewers, forty miles long, in foreign and state pavilion sections, under construction.

Service sewers in foreign pavillon site 3,000 feet long, 95 per cent completed.

South Garden sewers 95 per cent completed.

Wharves and bulkhead nearly half completed.

Contract let for ten miles of high pressure water lines for fire protection.

LONDON-LIVERPOOL & GLOBE INSURANCE BLDG.
BLISS & FAVILLE

Contract let for service water system.

Rich loam from Sacramento Valley—5,000 cubic yards—unloaded on the grounds, for shrubbery and plants.

Contract awarded for erection of ferry slips, hydraulic plant and steel apron.

Contract awarded for grading for Machinery Hall and its construction.

Contract let for construction of sewers in main roadway of concession district.

Construction of sunken gardens more than half completed.

HALE BROS NEW BLDG. REID BROS.

Firms desiring news on special classes of buildings, such as Banks, Churches, Schools, Hotels, etc., will find such items all classified and grouped under proper headings, commencing on this page. These same items are again repeated under "LOCALITIES" in the last part of our news department.

APARTMENT HOUSES.

SAN FRANCISCO—Apartment house, 3 story and base, frame and concrete, \$15,000. Architect, Sidney R. Newsom. Nevada Bank Bldg., S. F. Owner, E. Rohndt, 550 Montgomery St., S. F. The building will be erected at the northwest corner of Union and Jones streets and will cover an area of 15x137½ feet. There will be a total of 30 apartments, arranged in two and three room suites with private baths and wall beds. Besides the suites the building will contain a large social room and dance hall and a large roof garden. Interior finish will be of pine, redwood and hardwoods. Bath rooms will be finished in tile and will have composition floors. There will be steam heat, an automatic elevator and vacuum cleaning system. The exterior of the building will be covered with cement plaster on metal lath. Plans are complete and in the hands of the owner who will do the work by Day Labor.

SAN FRANCISCO—Apartment house, 3 story and base, frame, \$17,000. Architect, C. M. Cook, Rialto Bldg., S. F. Owner, Mr. Bender. The building will be arranged for 12 three-room suites with baths and wall beds. Interior will be finished in pine with some elm panels. There will be a central heating system. Entrance vestibule will be finished in tile and marble. The exterior of the building will be covered with rustic and shiplap. Plans are complete and figures have been taken. A contract will be awarded within a day or two.

SAN FRANCISCO—Apartment house, 10 story and base. Class A construction. Cost not stated. Architect, A. R. Denke, Humboldt Bank Bldg., S. F. Owners, Hug Estate. The building will be erected at the southwest corner of Stockton and Bush streets. Plans are being prepared for a high-class structure which will be arranged for both apartments and single rooms. All modern conveniences will be installed, including wall beds, elevator service, a vacuum cleaning system and steam heat. Interior will be finished in pine, redwood and hardwoods. Bath rooms will be wainscoted with tile and will have composition floors. Suites will consist of two, three and four rooms each. All single rooms will have connecting bath. The exterior of the building will be faced with pressed brick and terra cotta. Plans are being prepared.

SAN FRANCISCO—Apartment house, 3 story and base, frame, \$10,000. Architects, C. M. and A. F. Rousseau, Monadnock Bldg., S. F. Owners, Rousseau Realty Co. The building will have a frontage of 30 feet and a depth of 68 feet. Interior will be arranged for six apartments of three rooms each. Interior finish will be of pine and redwood with some oak floors. Furnace heat will be installed. All suites will have wall beds and connecting baths. The exterior of the building will be covered with cement plaster on metal lath. Plans are complete and the work will be done by Day Labor.

SAN FRANCISCO—Apartment house, 6 story and base, reinforced concrete,

Cost not stated. Architects, O'Brien & Werner, Foxcroft Bldg., S. F. Owner, C. F. Bernard. The building will be erected on Gough street between Pace and Lily alley. The structure has been arranged for a number of two and three room suites with private bath rooms and wall beds. Interior finish will be of pine, redwood and some hardwood. Oak floors will be used in the principal rooms. Plans include steam heat, elevator service and a vacuum cleaning system. Entrance will be finished in tile and marble. The exterior of the building will be faced with pressed brick. Plans are complete and figures are being taken.

OAKLAND, CAL.—Apartment house, 3 story and base, concrete and frame, \$60,000. Architect, none. Owner, Dr. G. W. Caldwell, 2143 Harrison Blvd., Oakland. The building will cover a considerable ground area and will be arranged for two and three room suites. All suites will be equipped with wall beds and will have connecting baths. There will be steam heat, vacuum cleaning and other modern improvements. Interior finish will be of pine, redwood and hardwoods. Bath rooms will have composition floors. Entrance lobby and reception room will be finished in tile and marble. The exterior of the building will be covered with cement plaster on metal lath. Plans are in the hands of the owner and he will let all contracts.

HALLS AND SOCIETY BUILDINGS.

SANTA ROSA, SONOMA CO., CAL.—City hall, 2 story and base, brick and steel, \$35,000. Architect, L. M. Turton, Napa. Owners, City of Santa Rosa. Bids for the construction of this building were opened by the City Council on February 18th. The work was segregated and no report of the lowest man has been received. All bids for the work will be found in this issue under Marin, Contra Costa and Sonoma Counties.

Contracts Awarded.

FRESNO, FRESNO CO., CAL.—Municipal auditorium, 2 story, reinforced concrete, \$35,000. Architect, C. K. Kirby, Jr., Fresno. Owners, City of Fresno. Contractors, McElroy & Higgins, Fresno. Contract price, \$36,600. Two other bids were received for this work, one from B. A. Hanson, Fresno, \$41,887, and the other from Trewitt & Suldis, Hanford, for \$49,816. The contract was awarded to McElroy & Higgins.

SANTA ROSA, SONOMA CO., CAL.—City Hall, 2 story and base, brick and steel, \$40,000. Architect, L. M. Turton, Napa. Owners, City of Santa Rosa. The following contracts for this structure have been awarded by the City Council:

Gallagher & Wygant, S. F., general construction, \$24,250.

Ralston Iron Works, S. F., structural steel, \$1,253.

M. G. West Co., S. F., vault and cell work, \$2,766.75.

John G. Sutton Co., S. F., heating, \$1,770.

LOS ANGELES, CAL.—Museum building, 1 story and base, reinforced concrete. Cost not stated. Architects, Hunt & Burns, Laughlin Bldg., L. A. Owners, Southwest Museum. Contractors, C. J. Kubach Co., Pacific Electric Bldg., L. A. Contract price not stated. Note, This is the first of a group of buildings which has been planned by this institution and contracts for the balance of the work will follow shortly.

HOTELS.

SAN FRANCISCO—Hotel, 5 story and base, brick and steel, \$130,000. Architect, Henry H. Meyers, Kohl Bldg., S. F. Owners, Mary, W. M. and Joseph Hyman. This building, which has been designed for a commercial house, will be erected at the southwest corner of Eddy and Taylor streets. The building lot covers a large area. Plans so far prepared show a total of 170 rooms, fifty per cent of which will have connecting baths. There will be steam heat, elevator service, vacuum cleaning and a hot water plant. Interior finish will be of pine, redwood and hardwoods. Some oak and ornamental plaster will be used in the office and lobby. There will be a concrete foundation, brick walls and considerable structural steel used. Plate glass and patent store fronts will also be specified. The exterior of the building will be faced with pressed brick and terra cotta. Plans are being prepared.

RICHMOND, CONTRA COSTA CO., CAL.—Hotel, 3 story and base, brick. Cost not stated. Architect, Sidney B. Newsum, Nevada Bank Bldg., S. F. Owner's name withheld. Preliminary plans are being prepared for a three-story commercial structure, which will shortly be erected on MacDonald avenue. There will be stores and the hotel lobby on the first floor and in the neighborhood of 60 rooms on the upper floors. The building will cover an area of 30x112 feet. Interior finish will be of pine and redwood. A central heating system and hot water plant will be installed. The exterior will probably be faced with pressed brick. Plans are still in the preliminary stage.

LOS ANGELES, CAL.—Hotel, 3 story and base, brick and concrete. Cost not stated. Architects, Morgan, Walls & Morgan, Story Bldg., L. A. Owner, A. W. Rhodes. The building will cover an area of 60x140 feet, and is to be arranged with stores on the first floor and in the neighborhood of 50 rooms and 25 baths on the upper floors. Interior finish will be of pine and redwood with some oak in the lobby. There will be steam heat, a hot water system and vacuum cleaning. Exterior of the building will be faced with pressed brick. Plans are complete and figures are being taken by the architects.

LOS ANGELES, CAL.—Hotel, 4 story and base, brick. Cost not stated. Architect, Peter W. Ehlers, Delta Bldg., L. A. Owner, Charles R. Cates. The building is to cover an area of 38x146 feet and will contain a total of 100 guest rooms. There will be public baths on each floor. Interior finish will be of pine, redwood and some hardwood. Plans include a central heating system, vacuum cleaning, elevator service and steam heat. Ornamental plaster will be used in the entrance and lobby. The exterior of the building will be faced with pressed brick. Plans are being prepared.

SAN FRANCISCO—Hotel and restaurant, 5 story and base, reinforced concrete, \$22,000. Architects, Rhodes & Marish, 3372 16th St., S. F. Owner, C. F. Hornung. The building will be erected on Valencia street, the first floor being arranged for an up-to-date restaurant and upper floors for a rooming house. The building will cover an area of 30x38 feet. Interior finish will be of pine, redwood and hardwoods. There will be a central heating system,

elevators and vacuum cleaning. The exterior will be faced with cement plaster. Plans are being prepared and figures will be called for shortly.

Contracts Awarded.

LOS ANGELES, CAL.—Hotel, 4 story and base, brick. Cost not stated. Architect, Joseph F. Rhodes, Central Bldg., L. A. Owner, Eugene Pourrey. Contractor, Joseph F. Rhodes, Central Bldg., L. A. Contract price not stated. Note: This building will contain a total of 65 rooms.

LOS ANGELES, CAL.—Hotel, 3 story and base, reinforced concrete. Cost not stated. Architect, none. Owner, William S. Hook. Contractors, Richard-Neustadt Construction Co., Wright and Callender Bldg., L. A. Contract price not stated. Note: This building will contain 69 rooms and cover an area of 50x145 feet.

PANAMA -- PACIFIC EXPOSITION WORK.

SAN FRANCISCO—Constructing roads. Cost not stated. Engineer, Director of Works, P. P. I. E. Co., Service Bldg., S. F. Owners, Panama-Pacific Exposition Co. Plans for constructing roads adjacent to the Service building at the Fair site have been completed and bids and now being called for by the Buildings and Grounds Committee. Bids will be opened on February 25th. The official proposal appears in another column of this issue.

SAN FRANCISCO—Conduit system, \$8,460. Engineer, Director of Works, Service Bldg., S. F. Owners, Panama-Pacific Exposition Co. Bids for constructing a Conduit system in the concessions district at the Fair site were opened by the Buildings and Grounds Committee, and show James O'Brien low at \$4,460. He will be awarded the contract.

RAILROAD CONST., STATIONS AND EQUIPMENT.

PRINCE RUPERT, B. C.—Passenger station, 2 story and base, reinforced concrete, \$500,000. Architect, David J. Myers, Central Bldg., Seattle. Owners, Grand Trunk Pacific R. R. Co. Under the direction of Consulting Engineer Virgil Bogue plans have been prepared for the big passenger station at the western terminus of the new transcontinental line. Construction will be of reinforced concrete throughout. Bids will be called for within a short time for this work.

RESIDENCES.

SAN FRANCISCO—Residence, 2 story and base, frame, \$20,000. Architect, Lewis P. Hobart, Crocker Bldg., S. F. Owner, G. A. Bos. The dwelling will be erected in the north line of Green street east of Leavenworth, and will contain twelve rooms, several baths, laundry and a garage. Interior will be finished in pine, hardwoods and white enamel. There will be furnace heat, open fire places and brick and tile mantels. Bath rooms will be finished in tile with composition floors. An automatic water heater will be installed and a vacuum cleaning system. The exterior of the house will be covered with rustic and cement plaster on

metal lath. Plans are complete and figures are being taken.

SAN FRANCISCO—Residences, 3, 2 story and base, frame, \$3,500 each. Architect, Joseph Leonard, Phelan Bldg., S. F. Owners, Urban Realty Co. These houses will be erected in Ingleside Terrace and each will contain seven rooms and bath. Interior finish will be of pine, redwood and oak. Hardwood floors will be used in the principal rooms. There will be furnace heat and open fire places. Mantels will be of brick. Tile will be used in the bath rooms and kitchens. Exteriors will be covered with cement plaster, rustic and shingles. Plans are being prepared and when complete the work will be done by Day Labor.

SAN FRANCISCO—Residence, 1½ story and base, frame, \$2,000. Architect, none. Owner, C. Jacobsen, 812 Hampshire St., S. F. The house has been designed for a six-room bungalow with bath. All interior finish will be of pine or redwood. Some oak floors will be used. There will be open fire places and brick mantels. Tile will be used in the bath room and kitchen. The exterior of the house will be covered with shiplap and rustic. Plans are complete and the work will be done by Day Labor.

SAN FRANCISCO—Residence, 2 story and base, frame, \$3,000. Architect, O. E. Evans, 2132 Mission St., S. F. Owner, James Welsh, 214 20th St. The house has been designed for a seven-room dwelling with all modern conveniences. Interior will be finished in pine and redwood with some elm panels. Floors will be of oak in the principal rooms. There will be open fire places and brick mantels. Tile will be used in the bath room and kitchen. The exterior of the house will be covered with cement plaster on metal lath. Plans are complete and in the hands of the owner who will do the work by Day Labor.

SAN FRANCISCO—Residence, 2 story and base, frame. Cost not stated. Architect, Sidney B. Newsum, Nevada Bank Bldg., S. F. Owner's name withheld. This dwelling will be erected in the Marine View Terrace at 32nd avenue. Plans will be prepared to meet all the requirements of a modern city home. There will be in the neighborhood of ten rooms, three baths and sleeping porch. Interior finish will be of pine and hardwoods. Oak floors will be used in the principal rooms. There will be furnace heat and open fire places. Mantels will probably be of brick. Tile will be used in the bath rooms and kitchen. An automatic water heater will be installed. The exterior of the dwelling will be covered with cement plaster on metal lath. Plans are being prepared.

SAN FRANCISCO—Residence, 2 story and base, frame, \$4,000. Architect, none. Owner, G. Dall Olmo. The house will be erected on Railroad avenue, 26¼ feet north of Quesada, and will contain eight rooms and bath. All interior finish will be either of pine or redwood. Hardwood floors will be used in four of the rooms. There will be furnace heat and open fire places. Mantels will be of tile and brick. Tile will be used in the bath room and kitchen. The exterior of the dwelling will be covered with rustic and shiplap. Plans are in the hands of the owner and the work will be done by Day Labor.

BERKELEY, ALAMEDA CO., CAL.—

Residence, 2 story and base, frame, \$1,000. Architect, A. Merrill Bowser, 1007 Broadway, Oakland. Owners, Richard Waidle Co. The house will be erected in North Berkeley and will contain seven rooms, bath and sleeping porch. Interior will be finished in pine, redwood and some hardwood. Oak floors will be used in the principal rooms. There will be furnace heat and open fire places. Mantels will be of brick. Tile will be used in the bath room and kitchen. An automatic water heater will be installed. The exterior of the dwelling will be covered with cement plaster. Plans are complete and the work will be done by Day Labor.

BERKELEY, ALAMEDA CO., CAL.—Bungalow, 1 story and base, frame, \$1,000. Architects, Hermann Bros., Timken Bldg., San Diego. Owner, W. G. Appleton. The house has been designed for a six-room dwelling with bath and sleeping porch. All interior finish will be of pine and white enamel. There will be open fire places and brick mantels. Floors throughout will be of oak. A Niposet roof will be used. Tile will be used in the bath room and kitchen. Exterior of the house will be covered with cement plaster on metal lath. Plans are complete and the work will be done by Day Labor.

OAKLAND, CAL.—Residence, 2 story and base, frame, \$1,000. Architect, none. Owner, John A. Bishop, 1353 Channing Way, Berkeley. The house has been designed for an eight-room dwelling with bath. Interior will be finished in pine with hardwood floors in the principal rooms. There will be open fire places and brick or tile mantels. An automatic water heater will be installed. Tile will be used in the kitchen and bath room. The exterior of the dwelling will be covered with cement plaster. Plans are complete and in the hands of the owner who will do the work by Day Labor.

BERKELEY, ALAMEDA CO., CAL.—Residence, 2 story and base, frame, \$5,000. Architect, none. Owner, Charles C. Beynton, La Loma and Cedar Sts., Berkeley. The dwelling has been designed for an eight-room house with bath and sleeping porch. Interior will be finished in pine and redwood with some hardwood. Oak floors will be used in the principal rooms. There will be furnace heat and open fire places. Mantels will be of brick and tile. An automatic water heater will be installed. Tile will be used in the bath room and kitchen. The exterior of the house will be covered with cement plaster on metal lath. Plans are complete and the work will be done by Day Labor.

BERKELEY, ALAMEDA CO., CAL.—Residence, 2 story and base, frame, \$1,500. Architect, Sidney B. Newsom, Nevada Bank Bldg., S. F. Owner, Harry Howard. The house has been designed to contain seven rooms and bath. Interior will be finished in pine and redwood with oak floors in the living and dining rooms and reception hall. There will be furnace heat and open fire places. Mantels will be of brick. Tile will be used in the bath room and kitchen. The exterior of the house will be covered with cement plaster on metal lath. Plans are complete and figures are being taken by the architect.

OAKLAND, CAL.—Residence, 2 story and base, frame, \$3,500. Architect,

Edward G. Bolles, 650 Market St., S. F. Owner, Mrs. Susie Noble. The dwelling will contain six rooms, sleeping porch and bath. The interior will be finished in pine throughout with hardwood floors in the living room and dining room. There will be open fire places, furnace heat and an automatic water heater. Mantels will be of brick. Tile will be used in the bath room. The exterior of the dwelling will be covered with cement plaster on metal lath. Plans are complete and figures are now being taken.

SAN JOSE, SANTA CLARA CO., CAL.—Cottages, 3, 1 story and base, frame, \$2,000 each. Architect, none. Owner, E. Hiatt, 24 Brooks Ave., San Jose. These houses will be erected in various parts of the city. Each will contain five rooms and bath. All interior finish will be of pine and redwood. Oak floors will be used in the living and dining rooms. There will be open fire places and tile or brick mantels. The exteriors will be covered with rustic shingles and cement plaster. Plans are in the hands of the owner and the work will be done by Day Labor.

ALAMEDA, ALAMEDA CO., CAL.—Residence, 1½ story and base, frame, \$3,000. Architect, L. M. Newsom, 832 Broadway, Oakland. Owner, D. Lundholm. The dwelling will contain six rooms and bath. Interior finish will be of pine and redwood throughout. There will be some hardwood floors. Open fire places and brick mantels will be used in the living and dining rooms. Tile will be used in the bath and kitchen. The exterior of the house will be covered with cement plaster on metal lath. Plans are complete and the work will be done by Day Labor.

BERKELEY, ALAMEDA CO., CAL.—Residence, 2 story and base, frame, \$3,500. Architect, C. M. Cook, Rialto Bldg., S. F. Owner, Mr. Marshall. The dwelling will contain eight rooms and bath. All interior finish will be of pine. There will be furnace heat and open fire places. Mantels will be of brick. Oak floors will be used in the principal rooms. Tile will be used in the bath and kitchen. The exterior of the dwelling will be covered with cement plaster on metal lath. Plans are complete and in the hands of the owner who will do the work by Day Labor.

PIEDMONT, ALAMEDA CO., CAL.—Residence, 2 story and base, frame, \$10,000. Architects, Cunningham & Politeo, First National Bank Bldg., S. F. Owner, H. L. Cunningham. The dwelling will contain nine rooms, baths and sleeping porch. Interior finish will be of pine, redwood and hardwoods. The plans call for a central heating system, open fire places and brick mantels. An automatic water heater will be installed. Hardwood floors will be used throughout. Tile will be used in the bath rooms and kitchen. The exterior of the dwelling will be covered with cement plaster on metal lath. Plans are complete and figures are being taken.

Contracts Awarded.

LOS ANGELES, CAL.—Conservatory and palm houses, Class A construction, \$210,000. Architect, A. F. Rosenheim, H. W. Hellman Bldg., L. A. Owner, E. L. Delany. The following contracts for this work have been awarded: Concrete, masonry and carpenter work to James H. Jacobs & Co., granite to Bly Bros., skylights and sheet metal work to the California Cornice Works, struc-

tural steel to Llewellyn Iron Work, interior finish to Weber Sawcase and Fixture Co., marble and tile work to Joseph Wessleme.

SCHOOLS.

BURLINGAME, SAN MATEO CO., CAL.—School, 1 story and base, reinforced concrete, \$55,000. Architect, W. H. Weeks, 75 Post St., S. F. Owners, Burlingame School District. Plans for a new school which is to be erected in Burlingame have just been accepted by the Board of School Trustees. There will be four class rooms. A central heating system is to be installed. Interior of the building will be finished in pine. Maple floors will be used. The exterior of the structure will be faced with cement plaster. A red clay tile roof is specified. Plans will be completed as rapidly as possible and bids will be called.

OAKLAND, CAL.—School, 2 story and base, reinforced concrete, \$66,500. Architect, J. J. Donovan, Security Bldg., Oakland. Owners, City of Oakland. Bids opened on February 17th for the construction of the Perry School show Van Sant-Houghton Co. low at \$66,468. A complete list of all figures received for this work appears in this issue under Oakland and Alameda County.

SANTA MONICA, LOS ANGELES CO., CAL.—Gymnasium building, brick, \$60,000. Architects, Allison & Allison, Hibernian Bldg., L. A. Owners, Santa Monica Polytechnic High School. This building will have concrete foundations, brick walls, faced with tapestry brick, maple floors, modern plumbing, including shower baths and a central heating system. Besides the building there will be an athletic field surrounded by a brick wall ten feet in height, with two ornamental gates of brick and stone. Plans for this work are complete and figures will be called for at once.

TACOMA, WASH.—School, 2 story and base, brick, \$50,000. Architects, Heath & Gove, National Realty Bldg., Tacoma. Owners, City of Tacoma. Plans have been ordered for another two-story school building containing from eight to ten class rooms, and which will be known as the Hawthorne School. There will be a central heating system and modern plumbing. Interior will be finished in pine and hardwoods. There will be an assembly hall besides the class rooms. Exterior will probably be faced with pressed brick. The architects have started the working drawings.

STORES & OFFICE BUILDINGS

ALAMEDA, ALAMEDA CO., CAL.—Stores, 1 story, frame and corrugated iron, \$5,000. Architect, Charles E. J. Rogers, 24 California St., S. F. Owner, P. Jorgenson. The building will be erected on Webster street and will be arranged for several stores. Interior will be finished in pine throughout. There will be plate glass display windows and patent store fronts. The street elevation will be covered with cement plaster on metal lath. Plans are complete and figures are being taken by the architect.

SAN FRANCISCO—Stores, 1 story and base, Class A construction, \$100,000. Architect, Sylvain Schnaltzacher, First National Bank Bldg., S. F. Own-

THEATRES.

ERS, Aronson Realty Co. The Aronson Realty Co. have just taken the large corner property located at the north-east corner of New Montgomery and Mission streets over in exchange for their improved property on Sutter street, and have announced the selection of an architect to prepare plans for a large store building. The new building, which is to be designed to carry five additional stories, will have a frontage of 145 feet on Mission street, 160 feet on New Montgomery and 138 feet on Jessie. There will be eight stores fronting New Montgomery street and two larger stores fronting Mission street. Construction will be fireproof. Plans are being prepared and will shortly be ready for figures.

OCEAN PARK, LOS ANGELES, CAL.—Stores and picture theatre, 3 story and base, brick. Cost not stated. Architect, Frank T. Kexley, Jr., Consolidated Realty Bldg., L. A. Owners, Messrs. Stinehan and Kramer. The building has been designed to contain several stores and a motion picture theatre on the first floor and rooms on the floors above. Interior finish will be of pine and redwood. A central heating system and hot water plant will be installed. There will be fire escapes and pressed brick facing. Plans are complete and figures are being taken.

LOS ANGELES, CAL.—Stores and offices, 3 to 10 story and base, reinforced concrete. Cost not stated. Architect, W. J. Saunders, International Bank Bldg., L. A. Owner, F. W. Braun. The proposed structure is to be erected on Broadway, between 8th and 9th streets, and will cover an area of 50½x159 feet. Only preliminary plans have been prepared and the owner is not decided on the height to which the building will be carried. In any case the structure will be of the class A type. The first floor will be arranged for modern stores and upper floors for offices. A lease on the site is pending. The exterior of the building will probably be faced with cement plaster. Full particulars will be given in these columns as the plans progress.

LOS ANGELES, CAL.—Stores and lofts, 3 story and base, brick and steel. Cost not stated. Architects, Eisen & Son, Wilcox Bldg., L. A. Owners, George W. Walker and A. Fleishman. The building will be erected on Broadway, and will have a frontage of 50 feet and depth of 146 feet. The first floor will be arranged for two stores. There will be patent store fronts, plate glass windows and hardwood trim. The upper floors will be arranged for light lofts. There will be elevator service and fireproof doors. Metal window sash and frames are specified. The exterior of the building will be faced with pressed brick. Plans are complete and figures are being taken.

SEATTLE, WASH.—Stores and lofts, brick and steel construction. \$50,000 and \$45,000. Architects, Bebb & Mendel, Haight Bldg., Seattle. Owners, Times Bldg. and Denny Bldg. Both of these structures were recently damaged by fire and plans for the rebuilding of the damaged portions of both buildings will be prepared by the above named architects. This work will include plastering, interior trim, new plumbing and electric work. But little exterior facing in either case is to be restored. Plans for the work will be completed as rapidly as possible and bids will be called.

TACOMA, WASH.—Theatre, 1 story and base, reinforced concrete, \$50,000. Architect, Max Umbrecht, Globe Block, Seattle. Owner, Eugene Levy. The new building, which is to be designed for a modern moving picture theatre will be erected on the site of the old Circuit and Scenic theatres in Tacoma. Construction will be fire proof throughout with concrete foundations, floor, walls and roof slabs. Interior finish will be of metal, marble and tile. The exterior of the building will be faced with cement plaster. Plans are being prepared.

SEATTLE, WASH.—Theatre, Class A construction, \$250,000. Architect, Max Umbrecht, Globe Block, Seattle. Owner, Eugene Levy, Grand Opera House. Mr. Levy has just instructed his architect to complete preliminary sketches for a new and modern picture and vaudeville theatre building, which is to be erected at once on property in 3rd avenue. Details of the construction have not been settled and cannot be given at this time. Further mention of the work will be made in these columns as the plans progress. Mr. Levy hopes to have plans out for figures by April 15th.

SEALED PROPOSALS.

NOTICE TO CONTRACTORS.

SEALED BIDS will be received by the Directors of the Indian Valley Bank for the erection of a one-story reinforced concrete building, to be erected on their building lot, in the town of Greenville, California, as per plans and specifications, now on file at the Banking office, and at the office of the Architect, J. B. (Gibson) Richmond, California. All bids to be filed not later than **March 31st, 1913**, with the architect, or with the Directors of the bank in Greenville. The Board reserves the right to reject any or all bids.

INDIAN VALLEY BANK. (*)

FRANK T. KENNEDY,
Secretary Board of Fire Commissioners.

NOTICE TO CONTRACTORS.

PANAMA-PACIFIC INTERNATIONAL EXPOSITION.

SEALED PROPOSALS will be received by the Building and Grounds Committee of the Panama-Pacific International Exposition Company at the Board Room No. 415 Exposition Building, Pine and Battery streets, San Francisco, California, at **11 o'clock A. M. Tuesday, February 25th, 1913**.

For Constructing The Roadways Adjacent to the Service Buildings in accordance with the specifications on file in the office of the Director of Works.

Each proposal must be accompanied by a certified check payable to the order of the Panama-Pacific International Exposition Company or cash in the sum of ten (10) per cent of the amount bid, on the same which will not be considered. When the award of contract is made all checks will be returned to the respective bidders, except that filed with the accepted proposal or bid, which check will be returned upon the successful bidder signing the contract and filing the required bond. A bond in the sum of \$50,000 per cent of the contract price will be required for the faithful performance of the contract; the sureties thereon must be satisfactory to the Building and Grounds Committee of the Panama-Pacific International Exposition Company.

Progressive payments will be made. The right is reserved to reject any and all bids and to waive technical defects if in the interest of the Exposition Company. Plans and specifications for the work may be obtained from the Director of Works, at Room 407 Service Building, Fillmore and Chestnut Streets, by depositing \$5.00 in cash which will be refunded upon the return of the plans and specifications in good condition.

By order of the Building and Grounds Committee,
WILLIAM H. CROCKER,
Chairman (*)

Firms desiring news from certain localities like San Francisco, Los Angeles, Portland, Seattle, etc., will find all such items, commencing on this page, and carefully classified as to location. These same items are repeated in the fore part of the news department, under distinct headings, such as Banks, Churches, Hotels, etc.

SAN FRANCISCO.

APARTMENT HOUSE—3 story and base, frame and concrete \$15,000. San Francisco. Architect, Sidney B. Newson, Nevada Bank Bldg., S. F. Owner, E. Islandi, 550 Montgomery St., S. F. The building will be erected at the northwest corner of Union and Jones streets and will cover an area of 45x137½ feet. There will be a total of thirty apartments arranged in two and three room suites with private baths and wall beds. Besides the suites the building will contain a large social room and dance hall and a large roof garden. Interior finish will be of pine, redwood and hardwoods. Bath rooms will be finished in tile and will have composition floors. There will be steam heat, an automatic elevator and vacuum cleaning system. The exterior of the building will be covered with cement plaster on metal lath. Plans are complete and in the hands of the owner who will do the work by Day Labor.

APARTMENT HOUSE—3 story and base, frame, \$17,000. San Francisco. Architect, C. M. Cook, Rialto Bldg., S. F. Owner, Mr. Bender. The building will be arranged for twelve three-room suites with baths and wall beds. Interior will be finished in pine with some elm panels. There will be a central heating system. Entrance vestibule will be finished in tile and marble. The exterior of the building will be covered with rustic and shiplap. Plans are complete and figures have been taken. A contract will be awarded within a day or two.

APARTMENT HOUSE—10 story and base. Class A construction. Cost not stated. San Francisco. Architect, A. R. Denke, Humboldt Bank Bldg., S. F. Owners, Hug Estate. The building will be erected at the southwest corner of Bush and Stockton streets. Plans are being prepared for a high-class structure which will be arranged for both apartments and single rooms. All modern conveniences will be installed, including wall beds, elevator service, a vacuum cleaning system and steam heat. Interior will be finished in pine, redwood and hardwoods. Bath rooms will be wainscoted with tile and will have composition floors. Suites will consist of two, three and four rooms each. All single rooms will have connecting bath. The exterior of the building will be faced with pressed brick and terra cotta. Plans are being prepared.

APARTMENT HOUSE—3 story and base, frame, \$10,000. San Francisco. Architects, C. M. and A. F. Rousseau, Monadnock Bldg., S. F. Owners, Rousseau Realty Co. The building will have a frontage of 30 feet and a depth of 88 feet. Interior will be arranged for six apartments of three rooms each. Interior finish will be of pine and redwood with some oak floors. Furnace heat will be installed. All suites will have wall beds and connecting baths. The exterior of the building will be covered with cement plaster on metal lath. Plans are complete and the work will be done by Day Labor.

APARTMENT HOUSE—5 story and base, reinforced concrete. Cost not stated. San Francisco. Architects, O'Brien & Werner, Foxcroft Bldg., S. F. Owner, G. P. Bernard. The building will be erected on Gough street between Page and Lily alley. The structure has been arranged for a number of two and three room suites with private bath rooms and wall beds. Interior finish will be of pine, redwood and some hardwood. Oak floors will be used in the principal rooms. Plans include steam heat, elevator service and a vacuum cleaning system. Entrance will be finished in tile and marble. The exterior of the building will be faced with pressed brick. Plans are complete and figures are being taken.

FLATS—2 story and base, frame, \$5,000. San Francisco. Architect, none. Owner, A. Harrington, 5th and Judah Sts., S. F. The building will be erected on 17th street west of Belvedere and will have a street frontage of 25 feet and a depth of 60 feet. There will be three modern five and six room flats. Interior trim will be of pine, redwood and hardwood. Oak floors will be used in several of the rooms. There will be either gas grates or open fire places. Mantels will be of tile or brick. The exterior of the building will be covered with rustic and cement plaster on metal lath. Tile will be used in the bath rooms and kitchens. Plans are complete and in the hands of the owner who will do the work by Day Labor.

FLATS—2 story and base, frame, \$3,000. San Francisco. Architect, none. Owner, Julia A. Brown, 1580 Jackson St., S. F. The building will cover an area of 25x10 feet. There will be two flats of five and six rooms each with bath. Interiors will be finished in pine and redwood with some hardwood floors. There will be open fire places and tile or brick mantels. Tile will also be used in the bath rooms. The exterior of the building will be covered with rustic. Plans are complete and the work will be done by Day Labor.

FLATS—2 story and base, frame, \$3,000. San Francisco. Architect, none. Owner, Charles Katz, 1200 Dolores St., S. F. Plans for raising the present building and constructing two stores under the same are complete. The upper floors will also undergo extensive alteration. The new work will include plumbing, electric work, plastering, painting and mill work. Interior finish will be of pine and redwood. There will be open fire places and brick mantels. Plate glass will be used in the store fronts. The exterior of the new portion of the building will be covered with shiplap. Plans are in the hands of the owner and the work will be done by Day Labor.

FLATS—2 story and base, frame, \$3,000. San Francisco. Architect, M. Mattanovich, David Hayes Bldg., S. F. Owner, F. Rabinovitch. The building will cover an area of 25x55 feet and will be erected on Leland street near Alpha. Interior finish will be of pine throughout. There will be two flats of five and six rooms each. Open fire

places and brick mantels will be used. Baths and kitchens will have tile wainscot. Oak floors will be used in the principal rooms. The exterior of the building will be covered with rustic. Plans for the work are being prepared.

HOTEL—5 story and base, brick and steel, \$130,000. San Francisco. Architect, Henry H. Meyers, Kohl Bldg., S. F. Owners, Mary, W. M. and Joseph Hyman. This building, which has been designed for a commercial house, will be erected at the southwest corner of Eddy and Taylor streets. The building lot covers a large area. Plans so far prepared show a total of 170 rooms, fifty per cent of which will have connecting baths. There will be steam heat, elevator service, vacuum cleaning and hot water plant. Interior finish will be of pine, redwood and hardwoods. Some oak and ornamental plaster will be used in the office and lobby. There will be concrete foundation, brick walls and considerable structural steel used. Plate glass and patent store fronts will also be specified. The exterior of the building will be faced with pressed brick and terra cotta. Plans are being prepared.

RESIDENCE—2 story and base, frame, \$20,000. San Francisco. Architect, Lewis P. Hobart, Crocker Bldg., S. F. Owner, G. A. Bos. The dwelling will be erected in the north line of Green street east of Leavenworth, and will contain twelve rooms, several baths, laundry and a garage. Interior will be finished in pine, hardwoods and white enamel. There will be furnace heat, open fire places and brick and tile mantels. Bath rooms will be finished in tile with composition floors. The exterior of the house will be covered with rustic and cement plaster on metal lath. Plans are complete and figures are being taken.

RESIDENCES—3, 2 story and base, frame, \$3,500 each. San Francisco. Architect, Joseph Leonard, Phelan Bldg., S. F. Owners, Urban Realty Co. These houses will be erected in Ingleside Terrace and each will contain seven rooms and bath. Interior finish will be of pine, redwood and oak. Hardwood floors will be used in the principal rooms. There will be furnace heat and open fire places. Mantels will be of brick. Tile will be used in the bath rooms and kitchens. Exteriors will be covered with cement plaster, rustic and shingles. Plans are being prepared and when complete the work will be done by Day Labor.

RESIDENCE—1½ story and base, frame, \$2,000. San Francisco. Architect, none. Owner, C. Jacobsen, 812 Hampshire St., S. F. The house has been designed for a six-room bungalow with bath. All interior finish will be of pine or redwood. Some oak floors will be used. There will be open fire places and brick mantels. Tile will be used in the bath room and kitchen. The exterior of the house will be covered with shiplap and rustic. Plans are complete and the work will be done by Day Labor.

RESIDENCE—2 story and base, frame, \$3,000. San Francisco. Architect, O. E. Evans, 2132 Mission St., S. F. Owner, John Welsh, 214 20th St. The house has been designed for a seven-room dwelling with all modern conveniences. Interior will be finished in pine and redwood with some elm panels. Floors will be of oak in the principal rooms. There will be open

fire place and brick mantels. Tile will be used in the bath room and kitchen. The exterior of the house will be covered with cement plaster on metal lath. Plans are complete and in the hands of the owner who will do the work by Day Labor.

RESIDENCE—2 story and base, frame, cost not stated, San Francisco. Architect, Sidney R. Newsom, Nevada Bank Bldg., S. F. Owner's name withheld. This dwelling will be erected in the Marine View Terrace at 32nd avenue. Plans will be prepared to meet all of the requirements of a modern city home. There will be in the neighborhood of ten rooms, three baths and sleeping porch. Interior finish will be of pine and hardwoods. Oak floors will be used in the principal rooms. There will be furnace heat and open fire places. Mantels will probably be of brick. Tile will be used in the bath rooms and kitchen. An automatic water heater will be installed. The exterior of the dwelling will be covered with cement plaster on metal lath. Plans are being prepared.

RESIDENCE—2 story and base, frame, \$4,000, San Francisco. Architect, none. Owner, G. Dall Oino. The house will be erected on Railroad avenue, 26 1/2 feet north of Quesada, and will contain eight rooms and bath. All interior finish will be either of pine or redwood. Hardwood floors will be used in four of the rooms. There will be furnace heat and open fire places. Mantels will be of tile and brick. Tile will be used in the bath room and kitchen. The exterior of the dwelling will be covered with rustic and ship-lap. Plans are in the hands of the owner and the work will be done by Day Labor.

Stores—1 story and base. Class A construction, \$100,000, San Francisco. Architect, Sylvain Schnaittacher. First National Bank Bldg., S. F. Owners, Aronson Realty Co. The Aronson Realty Co. has just taken the large corner property located at the northeast corner of New Montgomery and Mission streets over in exchange for their improved property on Sutter street, and have announced the selection of an architect to prepare plans for a large store building. The new building, which is to be designed to carry five additional stories, will have a frontage of 145 feet on Mission street, 160 feet on New Montgomery and 138 feet on Jessie. There will be eight stores fronting New Montgomery street and two larger stores fronting Mission street. Construction will be fireproof. Plans are being prepared and will shortly be ready for figures.

CONSTRUCTING ROADS—Cost not stated, San Francisco. Engineer, Director of Works, P. I. E. Co., Service Bldg., S. F. Owners, Panama-Pacific Exposition Co. Plans for constructing roads adjacent to the Service building at the Fair site have been completed and bids are now being called for by the Buildings and Grounds Committee. Bids will be opened on February 25th. The official proposal appears in another column of this issue.

CONDUIT SYSTEM—\$8,460, San Francisco. Engineer, Director of Works, Service Bldg., S. F. Owners, Panama-Pacific Exposition Co. Bids for constructing a conduit system in the concession district at the Fair site were opened by the Buildings and Grounds Committee and show James

O'Brien low at \$8,460. He will be awarded the contract.

APARTMENT HOUSE—3 story and base, frame, \$12,000, San Francisco. Architects, Rhodes & Marish, 3372 16th St., S. F. Owner's name withheld. The building has been arranged for twelve apartments of two and three rooms each. There will be private baths and wall beds. Interior finish will be of pine and redwood with some elm panels. Apartments will have gas grates or open fire places. Tile will be used in the baths. The exterior of the building will be covered with rustic and shiplap. Plans are being prepared.

APARTMENT HOUSE—3 story and base, frame, \$11,000, San Francisco. Architects, Rhodes & Marish, 3372 16th St., S. F. Owner, C. F. Hornung. The building will be erected at the southwest corner of 16th and Dehon streets and will cover an area of 55x50 feet. The first floor will be arranged for stores and the two upper floors for ten apartments of two and three rooms each. All suites will have connecting baths and wall beds. Interior finish will be of pine, redwood and some elm panels. Stores will be finished in pine, with plate glass display windows. Rector vacuum gas radiators will be installed. The exterior will be covered with brick veneer and cement plaster on metal lath. Plans are nearly complete and will shortly be out for figures.

APARTMENT HOUSE—4 story and base, brick and steel, \$40,000, San Francisco. Architect, C. S. McNally. Mechanics' Institute Bldg., S. F. Owner, Mr. Wood. The building will be erected on Sutter street near Hyde and will contain a number of well arranged two and three room suites with baths and wall beds. Interior will be finished in pine and hardwoods. Bath rooms will have composition floors. There will be steam heat, elevator service and a vacuum cleaning system. The work has been mentioned in these columns before. Plans have been out for figures, but have been revised to some extent and will be refigured within a few weeks.

GARAGE—2 story and base, reinforced concrete, \$35,000, San Francisco. Architect, G. Albert Lansburgh, 709 Mission St., S. F. Owners, Hug Estate. The building will be erected on Bush Street west of Mason, and is designed for a commercial garage. Construction will be fireproof throughout with concrete floors, metal window sash and frames. There will be special gasoline storage tanks. The exterior of the building will be faced with cement plaster. Interior will be finished in pine throughout. Plans are now being prepared and bids will be called for shortly.

GARAGE—2 story and base, reinforced concrete. Cost not stated, San Francisco. Architects, O'Brien & Werner, Foxcroft Bldg., S. F. Owner, Mrs. Edward F. Burns. This building, which has been designed for a commercial garage and stores, will be erected at the northwest corner of Hush and Taylor streets. There will be three stores besides the garage. Interior finish will be of pine throughout. Stores will have plate glass windows and patent fronts. The exterior of the building will be faced with cement plaster. Plans are being prepared.

\$22,000, San Francisco. Architects, Rhodes & Marish, 3372 16th St., S. F. Owner, C. F. Hornung. The building will be erected on Valencia street, the first floor being arranged for an up-to-date restaurant and upper floors for a rooming house. The building will cover an area of 30x88 feet. Interior finish will be of pine, redwood and hardwoods. There will be a central heating system, elevators and vacuum cleaning. The exterior will be faced with cement plaster. Plans are being prepared and figures will be called for shortly.

FLATS—2 story and base, frame, \$5,000, San Francisco. Architect, W. G. Vadden, 1015 Cole St., S. F. Owner, Thomas Vadden. The building will be erected on 15th avenue, and has been designed to contain two modern flats of five and six rooms each. The interiors will be finished in pine, redwood and hardwood. Oak floors will be used in the principal rooms. There will be open fire places and brick mantels. Tile will be used in the baths and kitchens. The exterior of the building will be covered with cement plaster on metal lath and rustic. Plans are in the hands of the owner and the work will be done by Day Labor.

OAKLAND AND ALAMEDA COUNTY.

APARTMENT HOUSE—3 story and concrete and frame, \$60,000. Oakland, Cal. Architect, none. Owner, Dr. V. Caldwell, 2113 Harrison Blvd., Oakland. The building will cover a considerable ground area and will be used for two and three room suites. All suites will be equipped with wall beds and will have connecting baths. There will be steam, vacuum cleaning and other modern improvements. Interior finish will be of pine, redwood and hardwoods. All rooms will have composition floors. Entrance lobby and reception hall will be finished in tile and marble. The exterior of the building will be covered with cement plaster on metal lath. Plans are in the hands of owner and he will let all contracts.

APARTMENT HOUSE—3 story and concrete and frame, \$27,000. Oakland, Cal. Architect, C. W. McCall, Central Bank Bldg., Oakland. Owner, John Spellman. The building will be erected at corner of 25th and Telegraph avenues. The building will be 48x112 feet and will be arranged to contain 54 apartments of two and three rooms each. All suites will have private bathrooms and wall beds. Interiors will be finished in pine, redwood and hardwood veneer. Oak floors will be used in the principal rooms. Steam heat and a hot water plant are provided. Bath rooms will be finished in tile and will have composition floors. The exterior of the building will be covered with cement plaster on metal lath. Plans for the building are being prepared.

BANK AND OFFICES—11 story and concrete. Class A construction, \$300,000. Oakland, Cal. Architect, L. B. Dutton, Conicle Bldg., S. F. Owners, First State and Savings Bank. This institution has just announced the selection of an architect to prepare plans for the building which is to be erected at corner of 16th and San Pablo avenues. The entire first floor of the building will be occupied by the bank. Upper floors will be subdivided into a large number of modern offices. Plans include steam heat, elevator service, mail chutes and a vacuum cleaning system. There will be hollow tile interior partitions, concrete floors and tall window frames and sash. A complete steel frame will be erected. The exterior of the building will be faced with pressed brick and terra cotta. Plans are being prepared and the work will be started as soon as specifications and plans can be completed.

APARTMENT HOUSE ALTERATIONS AND ADDITIONS—3 story, frame. Cost not stated. San Francisco. Architect, William H. Crim Jr., Kearny St., S. F. Owner, Wesley Sheffield. An addition of three stories will be built adjoining the present building, and the interior of the old structure will undergo extensive alterations. Work will include new masonry, plastering, electric work and painting. Interior finish in the new portion will be of pine and redwood. The exterior of the building will be covered with shiplap and rustic. Plans are now being taken by the architect.

APARTMENT HOUSE—3 story and concrete and frame. Cost not stated. San

Francisco. Architect, none. Owner, J. Pattonson, 2060 Fell St., S. F. The building will be erected on Parnassus avenue having a frontage of 80 feet and a depth of 30 feet. Interior will be arranged for four four-room suites on the upper two floors and a larger apartment on the first floor. Interior finish will be of pine and redwood. Furnace heat will be installed. There will be wall beds and private baths with each apartment. The exterior of the building will be covered with rustic and shiplap. Plans are being prepared by the owner and when complete the work will be done by Day Labor.

APARTMENT HOUSE—8 story and base, brick and steel, \$55,000. San Francisco. Architects, Phillip Schwerdt & Co., Phelan Bldg., S. F. Owners, Benj. and H. Hersch. The building will be erected at the northwest corner of Post and Taylor streets and will contain in the neighborhood of 66 rooms and baths. A part of the building will be arranged for small apartments and the balance for a commercial hotel. Plans include steam heat, a hot water plant, wall beds and vacuum cleaning system. Interior finish will be of pine and hardwood. Elevator service will also be included. The exterior of the structure will be faced with tapestry brick and terra cotta. Plans are being prepared and the excavation has been started.

APARTMENT HOUSE—3 story and base, frame, \$17,000. Oakland, Cal. Architect, A. W. Smith, 1010 Broadway, Oakland. Owner, William Mann. The building, which is to be erected at the southeast corner of 5th avenue and East 14th street, will contain a total of 50 rooms, which are to be arranged in two and three room suites. All suites will have private baths and wall beds. Interior finish will be of pine and redwood with some hardwood. There will be a central heating system and a hot water plant. Tile and marble will be used in the entrance and reception room. Bath rooms will have composition floors. The exterior of the building will be covered with cement plaster on metal lath. Plans are complete and the work will be done by Day Labor.

COLD STORAGE WAREHOUSE—2 story and base, reinforced concrete, \$60,000. Oakland, Cal. Architect's name not given. Owners, Pacific Coast Canning Co., 12th and Pine streets, Oakland. This building will be erected in the west line of Pine street between 11th and 12 streets. Construction will be of reinforced concrete throughout, including walls, floors and roof. A large amount of special machinery will be ordered. Plans call for considerable structural steel. There will be metal window frames and sash. The exterior of the building will be faced with cement plaster. Plans are in the hands of the owners and the work will be done by Day Labor.

FLATS—2 story and base, frame, \$30,000. Oakland, Cal. Architect, Phillip Schwerdt, Phelan Bldg., S. F. Owner, Fred Hennings. The building will be erected at the corner of 6th and Allen streets, and in addition to the flats will contain a garage. Plans provide for thirteen rooms, baths and sleeping porches. Each flat will consist of four or five rooms. Interior will be finished in pine, redwood and hardwood. Oak floors will be used in some rooms. A central heating system will be installed. There will be open fire places

and brick mantels. Tile will be used in the bath rooms. The exterior of the building will be covered with cement plaster on metal lath. Plans are complete and figures are being taken.

FLATS—2 story and base, frame, \$3,000. Oakland, Cal. Architect, Clay N. Burrell, Albany Bldg., Oakland. Owner, B. Saucella. There will be one store on the first floor of the building and two modern four-room flats on the upper floor. Interior trim will be of pine and redwood. Some oak floors will be used. Tile will be used in the bath rooms. The exterior of the building will be covered with rustic. Plans are complete and figures are now being taken by the architect.

GARAGE—1 story, brick and steel, \$5,000. Berkeley, Alameda Co., Cal. Architect, A. Merrill Bowser, 1007 Broadway, Oakland. Owner, F. M. Seeggin. The building has been designed for a commercial garage. Foundation will be of concrete and exterior walls of brick, faced with pressed brick. Floor will be of cement. There will be metal covered doors, metal window frames and sash. Interior finish will be of pine throughout. Plans are complete and the architect is taking segregated figures for the various parts of the work. The building will cover an area of 50x125 feet.

RESIDENCE—2 story and base, frame, \$4,000. Berkeley, Alameda Co., Cal. Architect, A. Merrill Bowser, 1007 Broadway, Oakland. Owners, Richard Wadlie Co. The house will be erected in North Berkeley and will contain seven rooms, bath and sleeping porch. Interior will be finished in pine, redwood and some hardwood. Oak floors will be used in the principal rooms. There will be furnace heat and open fire places. Mantels will be of brick. Tile will be used in the bath room and kitchen. An automatic water heater will be installed. The exterior of the dwelling will be covered with cement plaster. Plans are complete and the work will be done by Day Labor.

BUNGALOW—1 story and base, frame, \$3,000. Berkeley, Alameda Co., Cal. Architects, Herrmann Bros., Tinklen Bldg., San Diego. Owner, W. G. Appleton. The house has been designed for a six-room dwelling with bath and sleeping porch. All interior finish will be of pine and white enamel. There will be open fire places and brick mantels. Floors throughout will be of oak. A Neapolitan roof will be used. Tile will be used in the bath room and kitchen. Exterior of the house will be covered with cement plaster on metal lath. Plans are complete and the work will be done by Day Labor.

RESIDENCE—2 story and base, frame, \$4,000. Oakland, Cal. Architect, none. Owner, John A. Bishoff, 1353 Channing Way, Berkeley. The house has been designed for an eight-room dwelling with bath. Interior will be finished in pine with hardwood floors in the principal rooms. There will be open fire places and brick or tile mantels. An automatic water heater will be installed. Tile will be used in the kitchen and bath room. The exterior of the dwelling will be covered with cement plaster. Plans are complete and in the hands of the owner who will do the work by Day Labor.

RESIDENCE—2 story and base, frame, \$5,000. Berkeley, Alameda Co., Cal. Architect, none. Owner, Charles C. Boynton, La Loma and Cedar streets,

Berkeley. The dwelling has been designed for an eight-room house with bath and sleeping porch. Interior will be finished in pine and redwood with some hardwood. Oak floors will be used in the principal rooms. There will be furnace heat and open fire places. Mantels will be of brick and tile. An automatic water heater will be installed. Tile will be used in the bath room and kitchen. The exterior of the house will be covered with cement plaster on metal lath. Plans are complete and the work will be done by Day Labor.

RESIDENCE — 2 story and base, frame, \$1,500. Berkeley, Alameda Co., Cal. Architect, Sidney B. Newsom, Nevada Bank Bldg., S. F. Owner, Harry Howard. The house has been designed to contain seven rooms and bath. Interior will be finished in pine and redwood with oak floors in the living, dining room and reception hall. There will be furnace heat and open fire places. Mantels will be of brick. Tile will be used in the bath room and kitchen. The exterior of the house will be covered with cement plaster on metal lath. Plans are complete and figures are being taken by the architect.

RESIDENCE — 2 story and base, frame, \$2,500. Oakland, Cal. Architect, Edward G. Bolles, 660 Market St., S. F. Owner, Mrs. Susie Noble. The dwelling will contain six rooms, sleeping porch and bath. The interior will be finished in pine throughout with hardwood floors in the living room and dining room. There will be open fire places, furnace heat and an automatic water heater. Mantels will be of brick. Tile will be used in the bath room. The exterior of the dwelling will be covered with cement plaster on metal lath. Plans are complete and figures are now being taken.

SCHOOL — 2 story and base, reinforced concrete, \$66,500. Oakland, Cal. Architect, J. J. Donovan, Security Bank Bldg., Oakland. Owners, City of Oakland. Bids opened on February 17th for the construction of the Perry School show Van Sant-Houghton Co. low at \$66,448. A complete list of all figures received for this work appears in this issue under Oakland and Alameda County.

STORES — 1 story, frame and corrugated iron, \$3,000. Alameda, Alameda Co., Cal. Architect, Charles E. J. Rogers, 24 California St., S. F. Owner, P. Jorgenson. The building will be erected on Webster street and will be arranged for several stores. Interior will be finished in pine throughout. There will be plate glass display windows and patent store fronts. The street elevation will be covered with cement plaster on metal lath. Plans are complete and figures are being taken by the architect.

RESIDENCE — 1½ story and base, frame, \$3,000. Alameda, Alameda Co., Cal. Architect, L. M. Newsom, 832 Broadway, Oakland. Owner, D. Lundholm. The dwelling will contain six rooms and bath. Interior finish will be of pine and redwood throughout. There will be some hardwood floors. Open fire places and brick mantels will be used in the living and dining rooms. Tile will be used in the bath and kitchen. The exterior of the house will be covered with cement plaster on metal lath. Plans are complete and the work will be done by Day Labor.

RESIDENCE — 3 story and base, frame, \$10,000. Piedmont, Alameda Co., Cal. Architects, Cunningham & Polito, First National Bank Bldg., S. F. Owner, H. L. Cunningham. The dwelling will contain nine rooms, bath and sleeping porch. Interior finish will be of pine, redwood and hardwoods. The plans call for a central heating system, open fire places and brick mantels. An automatic water heater will be installed. Hardwood floors will be used throughout. Tile will be used in the bath rooms and kitchen. The exterior of the dwelling will be covered with cement plaster on metal lath. Plans are complete and figures are being taken.

Bids For The Perry School Are Opened.

Oakland Board of Education Open Fifteen Bids For School. Van Sant-Houghton Co. Are Low Men.

Fifteen sets of figures were opened at the Monday evening session of the Oakland Board of Education for the construction of the Perry School. The lowest figure was presented by Van Sant-Houghton Co. of Oakland, at \$66,468 and this firm will probably be awarded the work although there were three other very close bids. The building is to be a two-story and basement reinforced concrete structure and will be erected in the west line of Grant avenue, between Perry and Santa Clara streets. Plans for the work were

prepared by Supervising Architect J. J. Donovan, Security Bank Bldg., Oakland. The following is a list of all figures received:

SAN JOSE AND THE SANTA CLARA VALLEY.

COTTAGES—3, 1 story and base.
 frame, \$2,000 each. San Jose. Santa
 Clara Co., Cal. Architect, none. Own-
 er, E. Hiatt, 24 Brooks Ave., San Jose.
 These houses will be erected in va-
 rious parts of the city. Each will con-
 tain five rooms and bath. At interior
 finish will be of pine and redwood, Oak

floors will be used in the living and
 dining rooms. There will be open fire
 places and tile or brick mantels. The
 exteriors will be covered with rustle-
 shingles and cement plaster. Plans are
 in the hands of the owner and the
 work will be done by Day Labor.

SCHOOL—1 story and base, rein-
 forced concrete, \$35,000. Burlingame,
 San Mateo Co., Cal. Architect, W H
 Weeks, 75 Post St., S. F. Owners, Bur-
 lingame School District. Plans for a
 new school which is to be erected in
 Burlingame have just been accepted
 by the Board of School Trustees. There
 will be four class rooms. A central
 heating system is to be installed. In-
 terior of the building will be finished
 in pine. Maple floors will be used. The
 exterior of the structure will be faced
 with cement plaster. A red clay tile
 roof is specified. Plans will be complet-
 ed as rapidly as possible and bids will
 be called.

Contracts Awarded.

MUNICIPAL AUDITORIUM—2 story, reinforced concrete, \$35,500. Fresno, Fresno Co., Cal. Architect, W. K. Kirby, Jr., Fresno. Owners, City of Fresno. Contractors McElroy & Higgins, Fresno. Contract price, \$35,500. Two other bids were received for this work, one from H. A. Hansen, Fresno, \$41,887, and the other from Trewhitt & Shields, Hanford, for \$40,816. The contract was awarded to McElroy & Higgins.

Award Contract For Fresno Auditorium.

Only Three Bids Were Received for Finishing Construction of Building But Job is Awarded.

Only three bids were received for the finishing construction of the Rowell Auditorium in Fresno by the City Council on Monday evening, Feb. 17th. The work was estimated to cost \$40,000 and all bids were well within the appropriation. Plans for the building were prepared by Architect C. K. Kirby Jr., of Fresno. This is the second time that the work has been out for figures, all bids received on former plans were in excess of the amount available and plans were revised. The structure is a two-story reinforced concrete building, now partly constructed. Besides being used as an auditorium the building will contain large play grounds and rooms for children. The following is a list of all figures received:

Finishing Construction.

H. A. Hansen, Fresno, .. \$41,887
Trewhitt & Shields, Hanford, 40,846
McElroy & Higgins, Fresno, 35,500
Final action was taken by the City Council and the contract was awarded to McElroy & Higgins for \$35,600.

There will be elevator service and modern plumbing. Floors will be of concrete. Interior finish is to be of metal and pine. An automatic sprinkler system will be installed. The exterior of the building will be faced with cement plaster. Plans are being prepared and official bids will be advertised for within a few weeks.

HOTEL—3 story and base, brick and concrete. Cost not stated. Los Angeles, Cal. Architects, Morgan, Walls & Morgan, Story Bldg., L. A. Owner, A. W. Rhodes. The building will cover an area of 60x140 feet, and is to be arranged with stores on the first floor and in the neighborhood of 50 rooms and 25 baths on the upper floors. Interior finish will be of pine and redwood with some oak in the lobby. There will be steam heat, a hot water system and vacuum cleaning. Exterior of the building will be faced with pressed brick. Plans are complete and figures are being taken by the architects.

HOTEL—4 story and base, brick. Cost not stated. Los Angeles, Cal. Architect, Peter W. Ehlers, Delta Bldg., L. A. Owner, Charles R. Cates. The building is to cover an area of 38x146 feet and will contain a total of 100 guest rooms. There will be a number of public baths on each floor. Interior finish will be of pine, redwood and

one hardwood. Plans include a central heating system, vacuum cleaning, elevator service and steam heat. Ornamental plaster will be used in the entrance and lobby. The exterior of the building will be faced with pressed brick. Plans are being prepared.

MUSEUM BUILDING—1 story and ase, reinforced concrete. Cost not stated. Los Angeles, Cal. Architects, unit & Burns, Laughlin Bldg., L. A. Owners, Southwest Museum. Contractors, C. J. Kubach Co., Pacific Electric Bldg., L. A. Contract price not stated. Note: This is the first of a group of buildings which has been planned by this institution and contracts for the balance of the work will follow shortly.

SCHOOL GYMNASIUM BUILDING—rick, \$60,000. Santa Monica, Los Angeles Co., Cal. Architects, Allison & Allison, Hilbernan Bldg., L. A. Owners, Santa Monica Polytechnic High school. This building will have concrete foundations, brick walls, faced with tapestry brick, maple floors, modern plumbing, including shower baths and a central heating system. Besides the building there will be an athletic field surrounded by a brick wall ten feet in height, with two ornamental gates of brick and stone. Plans for this work are complete and figures will be called for at once.

STORES AND PICTURE THEATRE—3 story and base, brick. Cost not stated. Ocean Park, Los Angeles Co., Cal. Architect, Frank T. Kegley, Jr., Consolidated Realty Bldg., L. A. Owners, Messrs. Stinemman & Kramer. The building has been designed to contain several stores and a motion picture theatre on the first floor and rooms on the floors above. Interior finish will be of pine and redwood. A central heating system and hot water plant will be installed. There will be fire escapes and pressed brick facing. Plans are complete and figures are being taken.

STORES AND OFFICES—3 to 10 story and base, reinforced concrete. Cost not stated. Los Angeles, Cal. Architect, W. J. Saunders, International Bank Bldg., L. A. Owner, F. W. Braun. The proposed structure is to be erected on Broadway between 8th and 9th streets, and will cover an area of 50½x158 feet. Only preliminary plans have been prepared and the owner is not decided on the height to which the building will be carried, in any case the structure will be of the Class A type. The first floor will be arranged for modern stores and upper floors for offices. A lease on the site is pending. The exterior of the building will probably be faced with cement plaster. Full particulars will be given in these columns as the plans progress.

STORES AND LOFTS—3 story and base, brick and steel. Cost not stated. Los Angeles, Cal. Architects, Eisen & Son, Wilcox Bldg., L. A. Owners, George W. Walker and A. Fleishman. The building will be erected on Broadway and will have a frontage of 50 feet and a depth of 140 feet. The first floor will be arranged for two stores. There will be patent store fronts, plate glass windows and hardwood trim. The upper floors will be arranged for light lofts. There will be elevator service and fireproof doors. Metal window sash and frames are specified. The exterior of the building will be faced with pressed brick. Plans are complete and figures are being taken.

Contracts Awarded.

HOTEL—4 story and base, brick. Cost not stated. Los Angeles, Cal. Architect, Joseph P. Rhodes, Central Bldg., L. A. Owner, Eugene Pourrey. Contractor, Joseph P. Rhodes, Central Bldg., L. A. Contract price not stated. Note: This building will contain a total of 65 rooms.

HOTEL—3 story and base, reinforced concrete. Cost not stated. Los Angeles, Cal. Architect, none. Owner, William S. Hook. Contractors, Richard-Neustadt Construction Co., Wright and Callender Bldg., L. A. Contract price not stated. Note: This building will contain 69 rooms and cover an area of 50x115 feet.

CONSERVATORY AND PALM HOUSES—Class A construction, \$210,000. Los Angeles, Cal. Architect, A. F. Rosenheim, H. W. Hellman Bldg., L. A. Owner, E. L. Debeney. The following contracts for this work have been awarded: Concrete, masonry and carpenter work to James H. Jacobs & Co., granite to Bly Bros., skylights and sheet metal work to the California Corncor Works, structural steel to Leewhy Iron Works, interior finish to Weber Showcase and Fixture Co., marble and tile work to Joseph Wessolme,

site of the old Grand and Seattle theatres in Tacoma. Construction will be fireproof, throughout with concrete foundations, floor, walls and roof slabs. Interior finish will be of metal, marble and tile. The exterior of the building will be faced with cement plaster. Plans are being prepared.

THEATRE—Class A construction, \$250,000. Seattle, Wash. Architect, Max Umbrecht, Globe Block, Seattle. Owner, Eugene Levy Grand Opera House. Mr. Levy has just instructed his architect to complete preliminary sketches for a new and modern picture and vaudeville theatre building which is to be erected at once on property in 3rd avenue. Details of the construction have not been settled and cannot be given at this time. Further mention of the work will be made in these columns as the plans progress. Mr. Levy hopes to have plans out for figures by April 15th.

Contracts Awarded.

JAIL—2 and 3 story and base, reinforced concrete, \$223,165. Victoria, B. C. Architect, W. Ridgeway Wilson, Victoria. Owners, City of Victoria. Contractors, British Columbia Construction and Engineering Co., Victoria. Contract price, \$223,165.

SEATTLE AND WASHINGTON.

SCHOOL—2 story and base, brick, \$50,000. Tacoma, Wash. Architects, Heath & Gove, National Realty Bldg., Tacoma. Owners, City of Tacoma. Plans have been ordered for another two-story school building containing from eight to ten class rooms, and which will be known as the Hawthorne School. There will be a central heating system and modern plumbing. Interior will be finished in pine and hardwoods. There will be an assembly hall besides the class rooms. Exterior will probably be faced with pressed brick. The architects have started the working drawings.

STORES AND LOFTS—Brick and steel construction, \$50,000 and \$45,000. Seattle, Wash. Architects, Behl & Mendel, Haight Bldg., Seattle. Owners, Times Bldg. and Denny Bldg. Both of these structures were recently badly damaged by fire and plans for the rebuilding of the damaged portions of both buildings will be prepared by the above named architects. This work will include plastering, interior trim, new plumbing and electric work. But little exterior facing in either case is to be restored. Plans for the work will be completed as rapidly as possible and bids will be called.

PASSENGER STATION—2 story and base, reinforced concrete, \$500,000. Prince Rupert, B. C. Architect, David J. Meyers, Central Bldg., Seattle. Owners, Grand Trunk Pacific R. R. Co. Under the direction of Consulting Engineer Virgil Fague plans have been prepared for the big passenger station at the western terminus of the new transcontinental line. Construction will be of reinforced concrete throughout. Bids will be called for within a short time for this work.

THEATRE—1 story and base, reinforced concrete, \$50,000. Tacoma, Wash. Architect, Max Umbrecht, Globe Block, Seattle. Owner, Eugene Levy. The new building, which is to be designed for a modern moving picture theatre, will be erected on the

PORTLAND AND OREGON.

APARTMENT HOUSE—1 story and base, brick and steel, \$100,000. Portland, Ore. Architects, Clausen & Clausen, Portland. Owner, Dr. W. L. Wood. The building is to be erected on a corner lot and will cover an area of 100 feet square. Suites will be arranged in two and three rooms each with wall beds and private baths. Interior finish will be of pine and hardwoods. There will be steam heat, elevator service and a vacuum cleaning system. Tile and composition floors will be used in the bath rooms. The exterior of the building will be faced with pressed brick. Plans are complete and figures will be called for shortly.

NOTICE TO CREDITORS.

IN THE DISTRICT COURT OF THE UNITED STATES IN AND FOR THE SOUTHERN DISTRICT OF CALIFORNIA.

IN THE MATTER OF G. H. GIBSON, doing business under the firm name of PHOENIX IRON & SHEET METAL WORKS, otherwise PHENIX IRON & SHEET METAL WORKS, bankrupt.

No. 7939 in Bankruptcy.

Take notice, that G. H. GIBSON, doing business under the firm name of PHOENIX IRON & SHEET METAL WORKS, otherwise PHENIX IRON & SHEET METAL WORKS has been duly adjudicated bankrupt under the Act of Congress of July 1, 1898, and that the first meeting of the creditors has been called to meet at the office of the undersigned in the U. S. Post office and Court House Building, San Francisco, California, on Saturday the 8th day of March, 1912, at the hour of 10 o'clock a. m., for the purpose of proving their claims against the estate of said bankrupt, and examining said bankrupt, and that at the same time and place all creditors whose claims have been duly proven and allowed shall appoint one or three trustees of said estate, and also may consider whether such trustee or trustees shall be authorized to sell the property of the estate.

Claims must be prepared in form required by the Bankruptcy Act, and sworn to.

Dated, San Francisco, Feb. 24, 1912.
ARMAND B. KREFT,
Referee in Bankruptcy in and for the City and County of San Francisco.

PATENTS

promptly obtained OR NO FEE. Trade-Marks, Copyrights and Labels registered. **TWENTY YEARS' PRACTICE** Highest references. Read model, sketch or plan, for free report on patentability. PORTLAND CEMENT IN 1912.

Estimate by United States Geological Survey Shows Increase of Three and One-Half Million Barrels.

According to returns received by the United States Geological Survey up to January 15, 1913, it is estimated by Ernest F. Burchard, of the Survey, that the total quantity of Portland cement manufactured in the United States in 1912 was approximately 31,941,995 barrels. It is believed that this estimate is within 1.5 per cent of the exact figure. This quantity represents an increase of 3,413,261 barrels over the 78,328,637 barrels manufactured in 1911, or 4.3 per cent. The shipments of Portland cement during 1912 are estimated at 34,750,291 barrels, compared with 75,547,829 barrels in 1911, an increase of 3,202,462 barrels, or 12.2 per cent. The production in 1912 was thus held in check sufficiently to permit a material reduction in the stocks of cement at the mills at the close of 1911, which amounted to nearly 12,000,000 barrels.

The continued increase in the production of Portland cement is significant in view of the fluctuations in the output of other leading mineral products such as coal, iron, and copper. The curve of production of Portland cement, although not now rising at so rapid a rate as during 1909 and 1910, is still pointing upward and has yet to take its first downward drop.

Business Conditions and Prices.

Practically all mills report having to contend with adverse business conditions during the first six months of the year. Prices were lower than the average for 1911 during this period, and some plants reported that lowest prices for which they had ever sold cement. After the middle of the year conditions improved materially and generally during the last four months of 1912 the demand for Portland cement was sufficient to keep most mills running at full capacity. In the Lehigh district production was curtailed slightly in order to diminish accumulated stocks. Production and shipments in New York show the greatest proportionate increase of all districts. In the Southeastern States the increase in production and shipment was gratifyingly large, as it was also in the vicinity of Chicago, Ill., and in Iowa and Missouri.

Certain plants in Kansas were much hampered by the failure of the supply of natural gas, and were obliged to shut down temporarily while installing coal-burning devices. This feature contributed to the decrease in production in the Great Plains States. In the Pacific Coast States and in certain of

the Rocky Mountain States production did not keep pace with that of 1911, owing to the lack of demand for cement for large public works.

The average price for the whole country of Portland cement per barrel in bulk at the mills will probably show a slight decrease when complete returns are received, although at the close of the year prices were much better than they had been during the last two years.

Production by Districts.

In addition to estimating the total production and shipments of Portland cement during 1912 it is possible to present fairly complete statistics of production and shipments by districts.

Lehigh district—Eastern Pennsylvania and New Jersey, which together form the leading Portland cement manufacturing district of the United States, produced approximately 24,449,523 barrels of Portland cement in 1912, compared with 25,972,108 barrels in 1911. This represents a decrease of 1,522,585 barrels, or 5.9 per cent. The shipments of Portland cement in 1912 approximated 25,905,257 barrels, compared with 25,192,464 barrels shipped in 1911, an increase of 712,793 barrels, or 2.8 per cent. There were 20 mills reported as active in 1912, against 24 in 1911.

New York—Mills in the State of New York produced approximately 4,490,180 barrels of Portland cement in 1912, compared with 3,314,217 barrels in 1911. This represents an increase of 1,175,963 barrels, or 35.5 per cent. The shipments of Portland cement in 1912 approximated 4,547,195 barrels, compared with 3,058,463 barrels shipped in 1911, an increase of 1,488,732 barrels, or 48.7 per cent. There were 7 mills reported as active in 1912, the same number as in 1911.

Ohio and western Pennsylvania—In Ohio and western Pennsylvania there were produced approximately 7,239,775 barrels of Portland cement in 1912, compared with 6,756,313 barrels in 1911. This represents an increase of 483,462 barrels, or 7.2 per cent. The shipments of Portland cement in 1912 approximated 7,460,885 barrels, compared with 6,654,363 barrels shipped in 1911, an increase of 746,516 barrels, or 11.2 per cent. There were 9 mills reported as active in 1912, the same number as in 1911.

Michigan and northwestern Indiana—This district produced approximately 4,449,274 barrels of Portland cement in 1912, compared with 519,726 barrels in 1911. This represents a decrease of 70,452 barrels, or 1.6 per cent. The shipments of Portland cement in 1912 approximated 4,451,838 barrels, compared with 4,550,896 barrels shipped in 1911, a decrease of 99,058 barrels, or 2.2 per cent. There were 12 mills reported as active in 1912, the same number as in 1911.

Kentucky and southeastern Indiana—Mills near Ohio River in Kentucky and Indiana produced approximately 3,071,467 barrels of Portland cement in 1912, compared with 2,818,820 barrels in 1911. This represents an increase of 252,647 barrels, or 9 per cent. The shipments of Portland cement in 1912 approximated 3,134,874 barrels, compared with 2,800,526 barrels shipped in 1911, an increase of 334,348 barrels, or 11.9 per cent. Three mills were reported as active in 1912, the same number as in 1911.

Southeastern States—Mills in the States of Maryland, Virginia, West

Virginia, Tennessee, Georgia, and Alabama produced approximately 4,664,4 barrels of Portland cement in 1912, compared with 4,049,063 barrels in 1911. This represents an increase of 615,333 barrels, or 15.2 per cent. The shipments of Portland cement in 1912 approximated 4,961,662 barrels, compared with 3,723,183 barrels shipped in 1911, an increase of 1,238,479 barrels, or 33 per cent. There were 9 mills reported as active in 1912, against 11 in 1911.

Iowa and Missouri—The output of Portland cement in Iowa and Missouri amounted to approximately 7,557,000 barrels in 1912, compared with 6,067,4 barrels in 1911. This represents an increase of 1,489,641 barrels, or 24.6 per cent. The shipments of Portland cement in 1912 approximated 7,792,111 barrels, compared with 5,932,856 barrels shipped in 1911, an increase of 1,859,255 barrels, or 31.3 per cent. There were 8 mills reported as active in 1912, against 7 mills active in 1911.

Great Plains States—In Kansas, Oklahoma, and central Texas approximately 5,760,938 barrels of Portland cement were produced in 1912, compared with 7,010,396 barrels in 1911. This represents a decrease of 1,249,458 barrels, or 17 per cent. The shipments of Portland cement in 1912 approximated 6,152,377 barrels, compared with 6,332,698 barrels shipped in 1911, a decrease of 180,321 barrels, or 2.8 per cent. There were 11 mills reported as active in 1912, against 17 mills active in 1911.

Rocky Mountain States—Colorado, Utah, Montana, and western Texas together produced approximately 2,298,649 barrels of Portland cement in 1912, compared with 2,124,930 barrels in 1911. This represents an increase of 173,719 barrels, or 8.2 per cent. The shipment of Portland cement in 1912 approximated 2,234,766 barrels, compared with 1,994,790 barrels shipped in 1911, an increase of 239,976 barrels, or 12 per cent. Seven mills were reported as active in 1912, and the same number in 1911.

Pacific Coast—The States of California and Washington produced approximately 7,258,524 barrels of Portland cement in 1912, compared with 7,278,277 barrels in 1911. This represents a decrease of 19,753 barrels, or 0.3 per cent. The shipments of Portland cement in 1912 approximated 7,483,852 barrels, compared with 6,770,242 barrels shipped in 1911, an increase of 713,610 barrels, or 10.5 per cent. There were 11 mills reported as active in 1912, the same number as in 1911.

BANK CLEARINGS FOR PAST WEEK

Bank clearings as reported to the California Development Board by the several Clearing House cities for the week ending February 13 1913, showing the increase or decrease from the amount of clearings for the corresponding week of 1912, (five banking days) follow:

San Francisco, \$45,249,600, decrease, \$7,123,610; Los Angeles, \$20,801,951, increase, \$288,513; Oakland, \$3,492,573, decrease \$121,290; Sacramento, \$1,781,375, increase, \$375,473; San Diego, \$3,062,282, increase, \$64,486; Fresno, \$894,306, increase, \$105,196; Stockton, \$814,435, increase, \$40,733; San Jose, \$606,575, increase, \$24,228; Pasadena, \$973,069, increase, \$90,203; Bakersfield, \$316,903.

Editorial Comment.

The action of the State Railroad Commission, or more properly the Public Utilities Commission, in preventing the unmerging scheme of the Southern Pacific and Union Pacific Railroads has caused the people all over the country to take notice. It is another illustration of what Governor Johnson has called a law with teeth in it and with men on the commission who have the ability and the integrity to look after the interest of the people. And in regard to the men on this commission an editorial in the Fresno Republican has an interesting biography of the President of the Commission:

Probably few of those who heard Railroad Commissioner Eshleman the other night at the Merchants' Association banquet realized that the speaker of the evening began his railroad career in Fresno, as a section hand, shoveling dirt on the very railroad whose president appeared before him this week appealing to him as arbiter of the destiny to that railroad in the greatest crisis that ever confronted it or any other railroad. From section hand to the president of the most famous state railroad commission in America is a sufficiently remarkable career, though characteristically American.

"Jack" Eshleman, thrown on his own resources with only a grammar school education, began work as a section hand, and rose to some minor position as straw boss or time clerk. During his service on the section, earning his living by manual labor in the daytime, he gave himself a high school education by studying at night in the camp. Then he made his own way through the university and graduated with honors. He studied law and began practice in Berkeley, where he was later elected city attorney. He also served for a time on the state labor bureau. Elected to the legislature from Berkeley, he first came to statewide notice as the author of the original race-track gambling law. The push, then in control of the legislature, succeeded in killing the bill, and nearly killed Eshleman in the process. He was taken from a Sacramento hospital and sent to the then just-opened Imperial Valley, in Southern California, to die of tuberculosis—a process in which he is still vigorously engaged, and gives promise of continuing for the next forty years. He is a living example of Oliver Wendell Holmes' aphorism that "the best guarantee of a long life is to get an incurable disease." As the Imperial settlement grew into Imperial county, Eshleman became its chief citizen, and was elected district attorney. They tried to run him for judge, and have since

tried to run him for Congress. He was chosen on the Lincoln-Roosevelt ticket to run for railroad commissioner, was elected and then chosen president of the board, wrote the railroad commission law of California, recognized as the most advanced legislation on the subject in the United States, and took the leadership in transforming California's railroad commission from at least efficient to the most efficient commission in the United States. He has made a state and national reputation, and now they are trying, against his protest, to boom him for governor. And he is not yet forty years old!

Such a career is a tribute to energy and ability. Still more, it is a tribute to American opportunity.

It is altogether probable that the Hetch-Hetchy permit will be decided today by Secretary Fisher. It should be without any question. It would seem to the casual observer that this question has been before the department long enough for everybody to know the merits of the case. Certain it is that if there had been but the single question to decide as to whether the government should allow the city to get a water supply the question would have been decided long ago.

This splitting of hairs and dispute about inconsequential things are disposed to make one weary of the whole affair and wonder when there will be a man in the interior department with the courage and integrity to solve a matter and decide like any man should in the premises.

Of all the vexatious delays that have ever harassed a long-suffering people this question of a water supply takes the medal. Not until the Freeman report has there been an engineer's statement of the case that a layman could understand or that had the stamp of comprehensive ability and common sense. If the Secretary brushes aside the cobwebs and decides the question in a comprehensive manner as he should, he will at least go out of office with the gratitude of a long suffering people as contrasted with the doubtful reputations of former politicians who have held the office before him.

"In grandma's day," observed the Joplin News-Herald, "the women used to smoke hams and raise children. Now they smoke cigarettes and raise hell."

A Siskiyou paper has learned from the agricultural college that "an abundance of humus makes a soil friable." The paper has noticed that pounding a steak with an ax or a mallet has the same effect. It makes it friable.

An exchange points out that the word sinned spelled backward, is the name of the man who doesn't advertise.

ISTHMUS COALING PLANTS.

Engineering Details of Storage and Loading Devices At the Canal Entrance.

Spaced in handling coal with the least possible amount of breakage is the main requirement of the coaling plants to be established at the Atlantic and Pacific entrances to the Isthmian Canal, at Cristobal and Balboa, respectively. Specifications for the machinery of the two plants have been completed and bids are now being called for.

It is planned to have a coal storage basin at Cristobal with a capacity of 200,000 tons, and one at Balboa with a capacity of 160,000 tons. In each place the storage will be within a large basin made of reinforced concrete, in which approximately half of the coal will be stored under water for use in time of war, and the other half above water to be added to and taken from continually for the ordinary uses of commercial and Government vessels. It is also planned, if the policy should be approved to be able to lease parts of the storage basin to such private coaling companies as may wish to maintain their own coal stores on the Isthmus, but in such cases all of the handling will be done by the Government plant, a suitable charge being made for the service.

The specifications are not hard and fast, but merely establish certain general methods and standards, leaving it to manufacturers to devise suitable machines. One of the limiting conditions is that the Government shall build the substructure or storage bin and place upon the walls such tracks as cranes and other movable machines may require. This substructure will cost more than the coal handling plant. The details will not be decided upon until the bids for the handling plant have been canvassed, because each plan will require its own special substructure, and one of the points considered in awarding the contract will be the cost of the substructure required under each plan.

In general, however, the specifications call for cranes that will unload coal from ships, a conveying system that will transfer it to bridges that will span the storage basin, and dump it at any place desired, and such a system of buckets operating upon these bridges as will make it possible to lift coal from the storage basin, and by means of conveyers raise it to loading machines that will dump it into colliers or lighters. The Cristobal plant must be capable of unloading 1,000 tons and loading 2,000 tons of coal each hour, and the Balboa plant 500 and 1,000.

In the ordinary operation of each of the plants vessels requiring bunker coal will not go alongside the wharves of the plants to receive such coal, but will be coaled while lying in the stream from barges laid alongside, these barges having been loaded by means of the reloaders forming part of the special handling machinery for each plant. The plants are to be capable, however, of rapidly loading colliers laid alongside the wharves by means of the above mentioned reloaders, the high capacities specified for outward bound coal being fixed with a view to requiring colliers to remain at

the plants for the shortest time practicable.

Atlantic Entrance Plant.

The coaling plant at the Atlantic entrance will be situated on the north end of the island formed by the old French canal, the American canal, and the Mindi River. It will be reached from the mainland by means of a bridge to be built by the Panama Railroad over the French canal south of the dry dock shops. The storage basin will be opposite dock No. 13 at Mount Hope, and it will be 1,000 feet long and 250 feet wide. The bottom of the basin will be 19 feet below mean tide, and the elevation of the decks of the wharves 10 feet above mean tide. There will be 41 feet depth of water alongside the wharves. The wharves will be founded upon steel cylinders filled with reinforced concrete resting upon hard rock. The maximum tidal oscillation in Limon Bay is 2.65 feet.

For this type of storage basin at least two layouts of coaling plant are feasible, the first being that in which the loading and unloading wharves occupy opposite sides of the basin parallel with one another, with the coal piles between them, and the second that in which the unloading wharf will be at right angles to the loading wharf. The normal capacity will be 240,000 tons, capable of increase to 290,000 tons by piling coal to ten feet additional height.

Pacific Entrance.

The coaling plant at the Pacific entrance will be on the quay wall south of the entrance to the large dry dock. The size of the basin will be 500 feet long and 250 feet wide for one design of plant and the same length and 340 feet wide for a second design. The extreme tidal difference here is 21.8 feet. As at the Atlantic entrance the loading wharf will be founded upon concrete cylinders resting upon hard rock; the unloading wharf will be gravity section concrete wall resting on rock. The normal capacity of the Balboa plant will be 135,000 tons, capable of increase to 160,000 tons, by piling coal ten feet above normal height.

The layout is somewhat different from that at the Atlantic entrance, although the methods of handling the coal will be similar. The unloading wharf will be situated at the outer end of the dry dock ship, while the line of the loading wharf makes an angle of about 45 degrees with that of the unloading wharf running out toward the canal prism from the end of the unloading wharf.

In the first plan a basin 500 feet long and 250 feet wide is provided for, with bottom at 18 feet below mean tide and top of wharf at 16½ feet above mean tide. The capacity of this plant must be not less than 500 tons of coal an hour to be unloaded and 1,000 tons per hour to be loaded aboard colliers or barges. Two unloaders will be required with conveyers and two single-stocking reclaiming bridges. Two reloaders will also be required. The operation of this plant is essentially

the same as that for the Atlantic entrance.

An alternate plan for the Balboa plant provides for the same location of the wharves but for a basin 500 feet long and 340 feet wide. The unloaders are the same as in other plans, but instead of dumping into conveyors they will discharge by means of the cantilever and directly into the basin, and large cantilever cranes will then pick up the coal and deposit it at any desired point in the storage basin. For reclaiming, these same cranes will pick up the coal and trolley it into their towers, where it will be dumped into cars or other conveyors, whence it will be carried away from the basin, along the front of the reloading wharf to the reloaders.

The purpose of this second plan is to make use of four beam cranes now in the placing of concrete at Miraflores locks, and thus save the expense of the stocking and reclaiming bridges. Whether they will be used depends upon the cost and general desirability of this plant compared with one having entirely new handling machinery.

Units of the Plants.

The following paragraphs refer particularly to the Cristobal plant, but with certain modifications, as indicated above, apply also to the Balboa plant.

Unloaders.

The unloading operation will consist of taking coal from a collier and depositing it at any desired place in the bin or basin. For this purpose unloading towers, a conveying system that will carry the coal lengthwise of the storage bin along the wharf, bridges spanning the basin, and a conveying system upon these bridges, which will take the coal from the first conveyors and dump it wherever required, are specified.

Four unloading towers of not less than 250 tons capacity per hour each, making a total capacity of 1,000 tons an hour, for the first unit of the unloading system. These towers must be capable of four operations: (1) Mining coal from a vessel and depositing it into a hopper built within the tower, whence it may be delivered by chutes to the conveying system, or to Panama Railroad cars running on a track beneath the tower. (2) Mining coal from a vessel and depositing it by the bucket or shovel into the storage bin behind the tower. (3) Mining coal from storage pile behind the tower and depositing it in the hopper in the tower. (4) Mining coal from the storage pile behind the tower and depositing it by the bucket or shovel aboard vessels.

Each tower will travel on two parallel pairs of rails between which at the level of the wharf deck there shall run a railroad track so located that cars may be run beneath the unloading tower and receive coal from its hopper. The speed of travel in either direction must be not less than 50 feet per minute against a wind pressure of ten pounds per square foot. The track travel must be by motors or engines within each tower, and cable drive will not be acceptable.

bucket or shovel by means of the tower will mine coal from the basin and will have a capacity of 100 tons of liquid fuel. This size is chosen because, although many colliers will have large hatches (equivalent to those of the latest naval type), a considerable portion of the coal will be piled to the isthmus in vessels like a larger bucket could not be used. Larger buckets may be offered, but, provided small buckets are supplied and a rapid means of effecting the change from one to the other is provided.

The tower will be fitted with a lifting and folding boom on the water side with a cantilever on the storage side. The cantilever may be movable if necessary to permit the passage of the reclaiming bridges. In the case of the track for the trolley of the bucket shall be horizontal and continuous between the extreme ends of the cantilever when both are in horizontal position, and the passage of the trolley over the hinge joints can be made easily and without difficulty. Suitable buffers will be fitted at each end of the trolley runway. The trolley, through which the trolley bucket will be capable of operation as follows: Maximum height of wharf level, Balboa and Cristobal, 20 feet; maximum depth for reeling coal from ships below wharf level, Balboa, 45 feet; maximum horizontal travel of bucket on water side beyond center of tower legs next to water, Balboa, 60 feet; maximum horizontal travel of bucket on land beyond nearest wall of coal basin, Balboa and Balboa, 35 feet; maximum depth below wharf level for reeling coal from storage on land at Cristobal, 29 feet; maximum depth below wharf level for reclaiming coal from storage on and side at Cristobal, 34½ feet.

In addition to these operations the trolleys will be able to dredge the bottom of the slip in front of the unloading wharf 51 feet below wharf level at Cristobal and 61½ feet at Balboa.

A hopper within the unloading tower will have a capacity of not more than 50 tons of coal. The boom on the water side will lift or fold by movement in a vertical plane in such a manner that when fully hoisted no part shall project more than four feet above the concrete face of the wharf, and descend lower than the top of the wharf.

Conveyors.

The conveying system must provide for the transfer of coal from the unloading towers along the wharf to the point at which the bridges may span the bin, and the transfer of the bridges to any point desired. It may be tripped into the storeroom. It must have sufficient capacity to handle the maximum amount of coal delivered by the unloading tower. It may consist of either cars or propelled by electricity or cable, or continuous conveyors of similar construction, or any other appliance, tried out, and guaranteed for doing the work, due regard being had to the basic requirement of breakage of coal in handling being reduced to a minimum.

At the Cristobal plant the conveying system must be capable of performing any of the eight operations listed below. At the Balboa plant

the requirements are similar, but are necessarily modified by reason of the smaller size of that plant and the use of the berm cranes referred to above:

(1) Receiving coal from single unloading tower or group of towers located anywhere on the unloading wharf, as for the unloading of a single vessel, and transporting it to any part of the storage pile. (2) Receiving coal from a single unloading tower or group of towers located anywhere on the unloading wharf, as for the unloading of a single vessel, transporting it direct to the reloaders, which may be spaced at any intervals along the reloading wharf, and delivering it to one only or distributing it among any number of reloaders, the proportionate distribution among the reloaders in action being of as wide a range, within the individual capacities of the reloaders, as practicable without undue complication and cost. It will be possible, in any event, to distribute the coal substantially equally among any number of reloaders in action. (3) Receiving coal from a single unloading tower or two towers, located anywhere on the unloading wharf, as for the unloading of a single vessel, and transporting it direct to the wharf bunker, the capacity of the conveying system leading to the wharf bunker being sufficiently great to handle the maximum discharge from two unloading towers. (4) Receiving coal from a single unloading tower, or group of towers, located anywhere on the unloading wharf, as for the unloading of a single vessel, and transporting it to storage at any part of the storage pile, while at the same time coal is being reclaimed from any other part of the storage pile, and being conveyed to the reloaders or to the wharf bunker.
